Subject: RE: Iron Mountain Connect - Reports

Yeah, we got a fun phone call from Katie's program director about that yesterday before the latest studies came out. She basically said, I can't tell you who said what, but DON'T DRINK THE WATER! So, there's that.

No, this report is not particularly helpful. We really need a way to try and match the Iron Mountain data to what's in each of the local databases.

Morning,

I think of you every time I hear a news story about the water in Flint – I hope you have been avoiding it!!!!

Just wondered if these reports are helpful to you? It's easy to see IM does not want to give us much info as the reports are all short and sweet.

Thanks,
Corie

Subject: RE: Keeping HP records Manager files

Pam,

My voice is gone and Jessie is teaching classes all day, so we'll try and cover this through email. At least for today.

Is there a retention schedule item for the 6 years you'll need to keep these records? I can think of a couple of possible solutions for this, but I wanted to get a handle on that question first. Let me know if you have that or not and then we will put some possible solutions together.

Subject: Keeping HP records Manager files

Do to the Flint Water situation, we now have to keep Flint water records for 6 years. Can you give some pointers on how to do this? Perhaps a folder could be created and the records moved to it? Plus I have know that there are some closed records also. Can you call me to discuss solutions? Thank you.

Have a great day!

Pam

The HP TRIM configuration detailed below is the configuration to be built in SOM1 for production. We understand that we may request future changes, additions and deletions but that by agreeing to this configuration this will be the initial configuration to be used in fulfilling our HP TRIM Charter and moving into production.

File Plan Configuration:

User Access:

Users will be a part of one of two available groups at the functional level in order to access records within this configuration:

DEQ-CIP-Flint-Modify
DEQ-CIP-Flint-View

At this time, only one user will belong to either of these groups:

Michael Marshall: DEQ-CIP-Flint-Modify

Record Retention and Disposal Schedule Application

The following record retention and disposal schedules will be applied to the following file plans:

File Plan	Retention Series	Series Name	Retention
Flint Water	None	**Special project to identify records related to the Flint water contamination for DEQ executives, Auditor General, Attorney General, and others as necessary**	Records will be redistributed to the appropriate location/file plan/retention series upon completion of the project

Retention will not be applied to files within this configuration.

Record Type Configuration:

Use SOM Primary Folder for person/site files.

Use SOM Secondary Folder for sub-issue/program files.

Use DEQ-CIP Generic Document Type for all documents.

Folder and Document Types

New SOM Primary Folder

STATE OF MICHIGAN

RICK SNYDER
GOVERNOR

DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET
LANSING

DAVID B. BEHEN
DIRECTOR

February 17, 2016

TO: All DTMB Custodians of Correspondence Related to Flint

FROM: Jean Ingersoll, Interim Chief of Staff to David B. Behen, Director and CIO

SUBJECT: Flint Document Production – Search Terms and Guidance

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. **As a custodian, you are required to produce any documents containing the search terms listed below, no later than Monday, February 22, 2016.** This memorandum contains detailed instructions for the process of identifying, compiling, scanning, and copying the necessary information.

Microsoft 365 – Outlook (includes emails, calendar items) and OneDrive

DTMB staff will centrally coordinate the Microsoft 365 search for all of DTMB's custodians. Therefore, DTMB's custodians *do not need to independently search any of their Microsoft 365 applications* for the search terms listed below.

Network Drives

Similar to the approach outlined above, DTMB staff will centrally coordinate the network drive search effort for all DTMB custodians. Custodians *do not* need to independently conduct a network drive search for the search terms below.

Non-Network Drives – includes hard drives, desktop, and thumb/flash drives

For all non-network drive types, ***each custodian will need to search every search term listed below in every non-network format, and move all relevant/related documents in to a network drive for collection. In order to move items to the network, you must be connected to the network.***

Start by conducting the search of all non-network drives, filling out the attached search term checklist as you go. If you need guidance as to how to perform this search, a step-by-step guide is included below in Appendix 1.

All relevant/responsive items that are produced as a result of your search need to be moved to a network drive. You can move your relevant/related documents to a network drive in whatever format the document is currently in. After the February 22, 2016, deadline, DTMB staff will access the network drives to collect the files.

Paper Files

Review all applicable paper files. Scan any relevant/related documents, and save them to a network drive, as described above. If this is not possible, you may provide hard copies of documents to Jean Ingersoll in the Director's Office. These documents must be received in the Director's Office by February 22, 2016, and will not be returned to you.

Home Computer

Any relevant e-mails or other documents on a personal computer also are subject to this request. Please check your personal computer for any e-mails or other documents relating to this search. If you discover any relevant/related documents, please include the phrase "personal computer" in the file name, and save them to the aforementioned network drive.

Conclusion

Thank you for your cooperation in complying with this request. Should you have any questions, please contact Jean Ingersoll at 1-8844.

Attachments

- FOIA Checklist
- Attachment 1 – Search Guidance

Search Term Checklist

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. As a custodian, you are required to search and copy all items that you identify to a DTMB network drive, as described above.

Please complete your search no later than close of business on Monday, February 22, 2016. Relevant/related items from the past 10 years should be included.

You should search for *each term exactly as it is shown below, and include quotation marks around each separate word*. For example, "Legionnaire", "Legionella", or "Flint" would all go into search fields. After you complete a search term, check the box beside the term.

Search Terms:

- | | | |
|---|--|---|
| <input type="checkbox"/> "Legionnaire" | <input type="checkbox"/> "Karegnondi" | <input type="checkbox"/> "Pb" & "water" |
| <input type="checkbox"/> "Legionella" | <input type="checkbox"/> "Genesee County Health Department" | <input type="checkbox"/> "KWA" |
| <input type="checkbox"/> "boil water order" & "Flint" | <input type="checkbox"/> "Flint" & "utilities" | |
| <input type="checkbox"/> "coli" & "Flint" | <input type="checkbox"/> "Lead and Copper Rule" | |
| <input type="checkbox"/> "bacteria" & "Flint" | <input type="checkbox"/> "Detroit Water and Sewerage Department" & "Flint" | |
| <input type="checkbox"/> "microb" & "Flint" | <input type="checkbox"/> "DWSD" & "Flint" | |
| <input type="checkbox"/> "TTHM" & "Flint" | <input type="checkbox"/> "Flint River" | |

APPENDIX 1 – Search Guidance

Regardless of what version of Windows you're using, each of them has a search feature built in called "Windows Explorer," you see it every time you open up a folder on a network drive, or on your own computer.

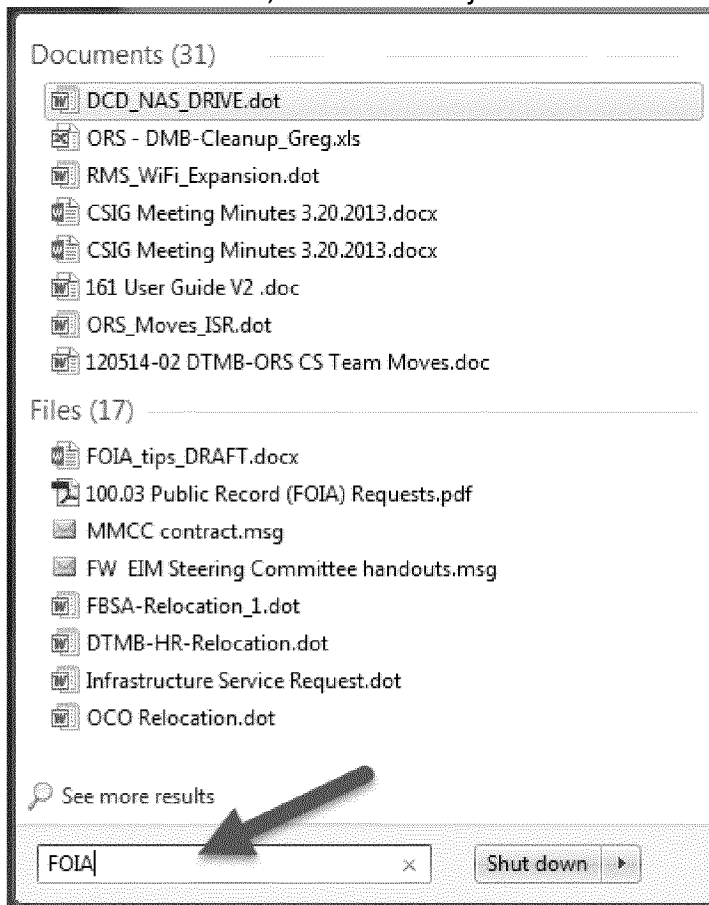

Using the search function in windows 7

Since the majority of DTMB is on Windows 7, the examples below are on that operating system. If you click on windows Start button, you'll see the search box right next to it

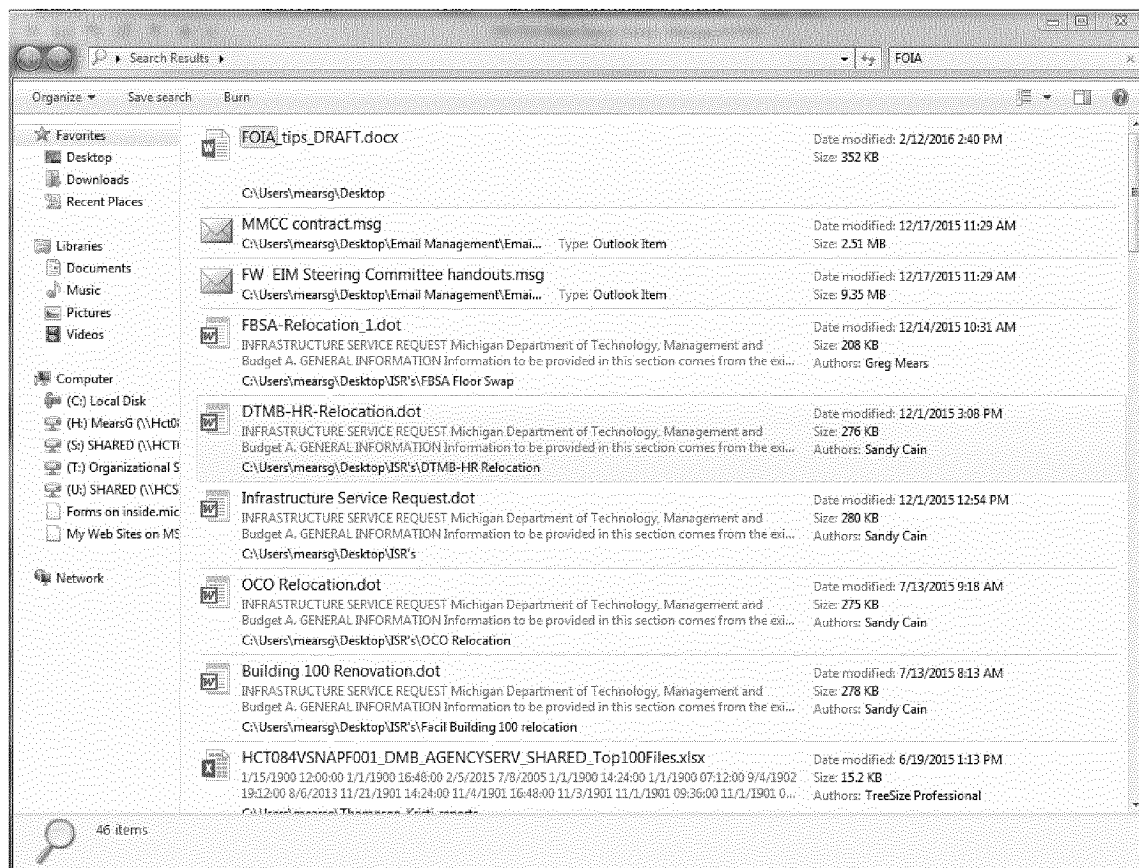

► All Programs

This example searches for the word FOIA. As you can see, the search yielded numerous documents including emails. Since DTMB is centrally collecting relevant emails and other Microsoft 365 items, we'll focus on just the documents.

You need to open each document to make sure that it's relevant. In this instance, the search brought up a DTMB Move form, but only because it has the word FOIA in the form. You'll notice that the words "See more results" appears at the bottom of the list. This means that the search turned up a lot more documents than what can easily be displayed. You must click on the link to open Windows Explorer and reveal a comprehensive list, along with their locations.

As you can see from this example the search found 46 items. We can now select them all using the “Ctrl-A method”, and copy them to a network drive.

Michigan State Employees banner image

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJJK>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm

came from people who worked for me, and I feel responsible for that. But I am committed to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." [Click here to read the Governor's full op-ed.](#)

Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. [Click here to read the full story in the Washington Post.](#)

Subject: Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit www.helpforflint.com to learn how you can help.

For additional information and updates, visit www.michigan.gov/flintwater.

Again, thank you for all your support.

Sincerely, Mike Zimmer
Office of Good Government Director
Dept. of Licensing and Regulatory Affairs Director

Sent: Tuesday, January 26, 2016 8:39 AM
To: Furseth, Kristen (DTMB)
Subject: Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – www.helpforflint.com – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. [Administrative Policy 200.37](#) establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at behend@michigan.gov.

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit www.HelpForFlint.com to learn how you can do so. For additional information and to sign up for daily updates, please visit www.mi.gov/FlintWater. I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

Subject: "Flint residents should not have to pay for water they cannot drink"

Budget recommendation will include \$30 million request for Flint water bill repayments

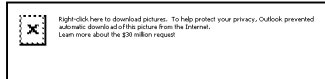

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a \$30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly 65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking, and washing your hands. Residents still would be responsible for paying the sewer portion

of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

[Click here to learn more about the budget request.](#)

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at www.mi.gov/flintwater. **Click here to watch the video.**

VIDEO: What Governor Snyder's FY17 budget means for Michigan

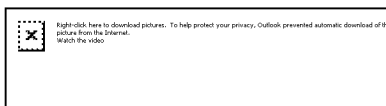

Gov. Rick Snyder's FY 2017 budget calls for critical investments for the Flint water crisis, statewide infrastructure and the Detroit Public Schools. The governor's recommendation also addresses the skyrocketing costs of specialty medications that Michigan residents depend on for better health outcomes.

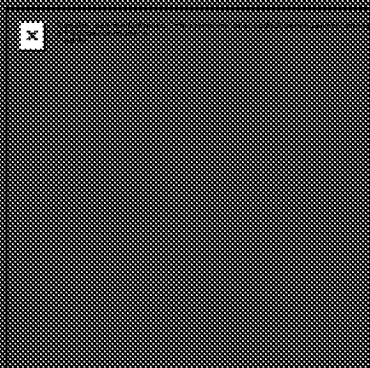

This budget also stays committed to the Governor's core statewide priorities of education, talent and economic development, health and human services, and public safety.

The proposed FY 2017 budget makes key investments to strengthen the state for all of Michigan's families. [Click here to learn more about the top 6 takeaways from the](#)

Importance: High

Morning all,

We need to supply the director's office a list of names of any staff who would have been a part of the Flint Water response. Anything in the past and current efforts are important to know. In the emails from Brom it is requested that we give this information to them today by noon. To coordinate this effort can you please reply to me your area's list of names so that I can compile one response.

Suzanne, I am including John and Yvonne on this so that they can respond while you are away at training.

Please let me know if you have any questions.

Thank you,

Aimee

Subject: Time Sensitive Request

SMT,

Jean Ingersoll is leading DTMB's effort to comply with document production requests related to freedom of information requests and certain lawsuits against the state.

At some point during the day tomorrow, Jean will share with you a list of standard “search terms” which we will use to compile documents related to this lawsuit.

Within 2 hours of receiving this email from Jean, you need to respond with a list of likely custodians from your work area. Jean may have more information on this tomorrow, but generally speaking a custodian will be a staff member who might reasonably be expected to have documents (electronic or otherwise) that correspond to the issues identified in the search terms.

If you have any questions, please call me or Jean. This is an important issue and I thank you in advance for your attention to this matter.

VIDEO: How volunteers are helping Flint

Volunteers at the Food Bank of Eastern Michigan are working hard to collect donations in order to help the families of Flint. Last Thursday, Governor Snyder visited with the many dedicated volunteers and helped sort cans of food.

Good nutrition is critically important for Flint's children. Foods that are high in calcium, vitamin C, and iron can help limit the effects of lead exposure. To donate or volunteer at the Food Bank of Eastern Michigan, visit www.fbern.org.

Subject: The Gov. Snyder's Budget Proposal

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.
DTMB Header 9/22/15

Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the \$54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates \$1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of \$1.3 billion for department operations and a one-time allocation of \$32.4 million.

A few highlights include:

- \$502 million for information technology support for all state agencies and \$132.8 million for 14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by \$7 million, from \$65 million to \$72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.
- An additional \$5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of \$6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at behend@michigan.gov.

Thank you again for all the good work you do. I hope you have a great week ahead.

David

Hello Kristen,

I am late for responding to this request. I left you a voicemail as well. I'm assuming that the meeting that my team was invited to is as a result of the request below.

Just recently (yesterday) my PMO was requested to provide PM support for the Flint effort. Besides myself, are these the only two required to attend tomorrow's meeting?

Please let me know.

Thanks,

Yvonne

Subject: MICWRAP-SBCP Theme-Project kick-off Meeting- Invitees' names - Regarding

Chris:

This has reference to the meeting we had today (2/12/2016) morning in **DTMB Cass Second Floor Large Conference Room**.

I have the following personnel listed as names of resources against the **MICWRAP - Statewide Business Continuity Planning (SBCP) Theme** project:

- Executive Sponsor: Rod Davenport
- Business Owner: Chris Christensen

Team members:

- Project Manager -- Anand Narimetla
- Emergency Manager Coordinator - Jeanette Doll -- will be unable to attend meetings right now due to her role at the SEOC in responding to the Flint Water Crisis
- Office of Infrastructure Protection -- Kathy Knapp (please remove Jeff Pratt)
- MCS -- Rock Rakowski
- Agency Services -- Gene White (he is our Agency Services rep)
- DCO - Matt Caterino
- Technical Services (O/S) -- Timothy Scott
- NTSD (Network/Telecom) -- David Wilson
- DD -- John McQuaid
- EA -
- ICCO Advisor - John Juarez

- Internal Audit Advisor – Rick Lowe

Following are the ones who attended the meeting today i.e., on 02/12/2016 including self:

1. Chooi, Patricia (DTMB) ChooiP@michigan.gov
2. Gilliland, Michael (DTMB) gillilandm@michigan.gov
3. Jacokes, Paul (DTMB) jacokesP@michigan.gov
4. Jennings, Brian (DTMB) jenningsb@michigan.gov
5. Juarez, John (DTMB) juarezi@michigan.gov
6. Kinnamon, Mark (DTMB) KinnamonM@michigan.gov
7. Knapp, Kathy (DTMB) knappk1@michigan.gov
8. Slagle, Neil (DTMB) slaglen@michigan.gov
9. Narimetla, Anand (DTMB) NarimetlaA1@michigan.gov

For the project kick-off meeting that I would like to schedule sometime during the next week, I would greatly appreciate, if you could please let me know all those who need to be invited for the meeting, if possible by the close of business hours on **Tuesday, the 16th of February, 2016.**

Thank you,

Subject: NEWS UPDATE--Earley To Resign As DPS EM

Tuesday, February 2, 2016, 10:29 AM

Earley To Resign As DPS EM

Detroit Public Schools Emergency Manager Darnell Earley has come under heavy criticism for his management of the school district and his role in switching Flint's water source to the Flint River on an interim basis, and now he is resigning from his role as DPS emergency manager.

Governor Rick Snyder announced Mr. Earley's plan to resign today. In a statement, neither made any mention of the criticism of Mr. Earley, the former emergency manager in Flint, about the Flint Water Crisis, and Mr. Snyder had only positive things to say about Mr. Earley's performance at DPS.

"Darnell has done a very good job under some very difficult circumstances," Mr. Snyder said in a statement. "I want to thank him for his professionalism and his service to the people of Michigan. He restructured a heavily bureaucratic central office, set in place operating and cost-containment measures and has taken steps to stabilize enrollment. These factors should all set the course for a sustainable, new Detroit Community Schools, as I have proposed."

And Mr. Earley essentially said he had accomplished his mission as DPS emergency manager.

"I have completed the comprehensive restructuring, necessary to downsizing the central office, and the development of a network structure that empowers the educational leadership of our schools to direct more resources toward classroom instruction," he said in the statement released through Mr. Snyder's press office. "This and other initiatives implemented over the past year were completed ahead of my 18-month schedule as provided in the act."

Mr. Earley's resignation is effective February 29. Mr. Snyder said he would appoint a "transitional leader" later this month and called on the Legislature to pass his proposal restructuring the Detroit Public Schools so that it would no longer need him to name an emergency manager.

Without action soon, Mr. Snyder said DPS would be "virtually insolvent" by April.

"I urge our Legislature to move as fast as possible so we can give Detroit students and teachers the learning environment they deserve," he said.

Hello Kristen,

I am late for responding to this request. I left you a voicemail as well. I'm assuming that the meeting that my team was invited to is as a result of the request below.

Just recently (yesterday) my PMO was requested to provide PM support for the Flint effort. Besides myself, are these the only two required to attend tomorrow's meeting?

Please let me know.

Thanks,

Yvonne

Hello Aimee,

At the end of last week and over the weekend, Kristen Furseth has been assigned as Project Manager for this effort, and Laura Brancheau will be back up. They will be supporting Jean in this effort.

Thank you,
Ward

Importance: High

Morning all,

We need to supply the director's office a list of names of any staff who would have been a part of the Flint Water response. Anything in the past and current efforts are important to know. In the emails from Brom it is requested that we give this information to them today by noon. To coordinate this effort can you please reply to me your area's list of names so that I can compile one response.

Suzanne, I am including John and Yvonne on this so that they can respond while you are away at training.

Please let me know if you have any questions.
Thank you,
Aimee

Senior Management Team,

We just received the search terms for the document production. (See below.) Given the lateness of this email, we are asking you send your list of custodians to Jean Ingersoll **no later than noon on Tuesday, February 16.**

We are not asking you to conduct any searches right now. Further directions will come from Jean.

Search terms:

Legionnaire
Legionella
“boil water order” & “Flint” (anywhere in document)
“coli” & Flint (anywhere in document)
“bacteria” & “Flint” (anywhere in document)
“microb” & “Flint” (anywhere in document)
“TTHM” & “Flint” (anywhere in document)
“Lead” & “Flint” (anywhere in document)
“emergency” & “Flint” (anywhere in document)
Karegnondi
“Genesee County Health Department”
“Flint” (within sentence) “utilities”
“Lead and Copper Rule”
“Detroit Water and Sewerage Department” & “Flint” (anywhere in document)
“DWSD” & “Flint” (anywhere in document)
“Flint River”
“Pb” & “water” (anywhere in document)
“KWA”

Please call me or Jean if you have any questions.

Brom

Subject: Time Sensitive Request

SMT,

Jean Ingersoll is leading DTMB's effort to comply with document production requests related to freedom of information requests and certain lawsuits against the state.

At some point during the day tomorrow, Jean will share with you a list of standard "search terms" which we will use to compile documents related to this lawsuit.

Within 2 hours of receiving this email from Jean, you need to respond with a list of likely custodians from your work area. Jean may have more information on this tomorrow, but generally speaking a custodian will be a staff member who might reasonably be expected to have documents (electronic or otherwise) that correspond to the issues identified in the search terms.

If you have any questions, please call me or Jean. This is an important issue and I thank you in advance for your attention to this matter.

Subject: What this year's budget means for Michigan...

VIDEO: What Governor Snyder's FY17 budget means for Michigan

Gov. Rick Snyder's FY 2017 budget calls for critical investments for the Flint water crisis, statewide infrastructure and the Detroit Public Schools. The governor's recommendation also addresses the skyrocketing costs of specialty medications that Michigan residents depend on for better health outcomes.

This budget also stays committed to the Governor's core statewide priorities of education, talent and economic development, health and human services, and public safety.

The proposed FY 2017 budget makes key investments to strengthen the state for all of

Michigan's families. Click here to learn more about the top 6 takeaways from the Governor's FY 2017 state budget.

Click a tweet to tweet it out:

The #MiBudget @OneToughNerd proposed yesterday makes key investments to strengthen Michigan for all families --> www.mi.gov/MiBudget

--> @OneToughNerd's #MiBudget includes \$72 million a year for Detroit Public Schools. It is time to act now --> www.mi.gov/MiBudget

--> @onetoughnerd's significant investment in #Flint families is the right thing to do. #FlintFWD #MiBudget www.mi.gov/MiBudget

VIDEO: How volunteers are helping Flint

Volunteers at the Food Bank of Eastern Michigan are working hard to collect donations in order to help the families of Flint. Last Thursday, Governor Snyder visited with the many dedicated volunteers and helped sort cans of food.

Good nutrition is critically important for Flint's children. Foods that are high in calcium, vitamin C, and iron can help limit the effects of lead exposure. To donate or volunteer at the Food Bank of Eastern Michigan, visit www.fbem.org.

Subject: The Gov. Snyder's Budget Proposal

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.
DTMB Header 022216

Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the \$54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates \$1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of \$1.3 billion for department operations and a one-time allocation of \$32.4 million.

A few highlights include:

- \$502 million for information technology support for all state agencies and \$132.8 million for

14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by \$7 million, from \$65 million to \$72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.

- An additional \$5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of \$6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at behend@michigan.gov.

Thank you again for all the good work you do. I hope you have a great week ahead.

David

Subject: Urgent: Flint stuff
Importance: High

Ok, here's the plan we must follow. Every purchase we make on behalf of DTMB or any other agency must be approved by Chris Christensen (our SEOC rep.) in advance. Chris will ensure that we don't create a situation where multiple departments pull the trigger on the same expenditure. I have communicated this plan to Shawn Sible (MSP) and Nancy Duncan (SBO).

Chris, if you have any concerns, please call me.

Brom, Phil, Natalie—My understanding is there is a PO for \$4.3 million for water filters and cartridges pending funding approval. Nancy indicated DTMB has agreed to pay for this per David; however, she has a slight preference that DHHS pay for it to keep DTMB from being another line item on the supplemental. Phil, are you the right person to take the lead to identify the funding source so that the PO can be released?

Thanks, everyone!

RUDOLPH THE UNION REINDEER

Rudolph the Union reindeer
Pulled the sleigh for old St. Nick
He signed a Union contract
He knew North Pole politics

All of the other reindeer
Worked long hours around the clock
They paid no heed to Rudolph
They worked in non-union shops

Then one year on Christmas Eve
They all came to say,
"We will do what you advise
Rudolph, help us organize!"

Then how the reindeer loved him
As they lined up with their sleigh
Now when they work on Christmas
They're all getting premium pay.

Labor Heritage Foundation; Lyrics Julie McCall

2015 State Christmas Tree From Wakefield In U.P.

Michigan's 30th official Christmas tree is a 66-foot spruce from Wakefield in the western Upper Peninsula. Wakefield is 10 miles east of Ironwood and the Wisconsin border. It's the 21st state Christmas tree selected from the Upper Peninsula.

The spruce was donated by Florence Daniels in memory of her husband, the late Jim Daniels. Mr. Daniels was a teacher in the Wakefield School System for 30 years, receiving many honors, including U.P. Coach of the Year, and induction into the U.P. Sports Hall of Fame.

The tree arrived in Lansing on Halloween morning, delivered by the Dept. of Technology, Management and Budget (DTMB) with help from the Michigan Association of Timbermen, the Great Lakes Timber Professionals Association and Michigan Operating Engineers. The Hi-Ball Co. of Lansing volunteered a crane and crew to set the tree at the intersection of Capitol and East Michigan avenues. The tree lighting took place on Nov. 20 as part of the annual Silver Bells in the City celebration.

2016 Litigation & Arbitration Dates

Jan. 15-16; Feb. 5-6; Mar. 4-5; Apr. 1-2;
May 13-14; June 3-4; July 8-9; Aug. 5-6;
Sept. 9-10; Oct. 7-8; Nov. 4-5; Dec. 2-3.

Peter Clark, JD, MSEA Labor Relations Coordinator, testified before the Civil Service Commission (CSC) on Dec. 16, protesting proposed changes to Rule 6-3. Unfortunately, the CSC quickly and unanimously voted to adopt the rule amendment with almost no discussion.

BAH HUMBUG, CSC!

The Office of the State Employer (OSE) and the various Departments started a push to use the Prohibited Subject of Bargaining Complaint (PSB) to overturn arbitrator awards that have, in the past, been viable. Seven cases were modified or overturned by the State Personnel Department (SPD) from 1994-2011. Why is this number significant? Because in the last two years, MSEA has been subject to dozens of SPD decisions that have either prevented grievances from ever seeing an arbitrator or had them overturned. The topics of these cases are vast and the connection to classification gets more tenuous with each filing.

The PSB complaint is being used to circumvent integrity of the Bargaining Unit Contract clauses. If we are not able to preserve the work that we do as the exclusive Labor and Trades/Safety and Regulatory units, then nothing will prevent unqualified staff from performing this work.

In some cases, there is a license required to do the work and the state disregards this fact—operating under the guise that it is the Civil Service's exclusive right to execute the Equitable Classification Plan. It is presumed that the Commission classifies employees based on their qualifications to do the job for which they are hired. Unions have a stake in this as well.

The proposed language of the rule change further disables our ability, as bargaining units, to protect our integrity and undermines the reason for classification. This rule change is a direct result of our attempt to protect the job security of our workers. We are asking the Commission to not approve the proposed rule change.

REQUIREMENTS FOR FILING A GRIEVANCE:

Article 8, MSEA Primary Agreement

Article 8 of MSEA's Primary Agreement details requirements for properly filing a Grievance. This is only a summary which is not meant to replace Article 8 in the current MSEA contract. Please refer to the contract for specifics.

Employee

Grievances must be filed within 15 week days from the date the employee knew OR SHOULD HAVE KNOWN of the infraction.

Step One

The employer has 10 days to answer at Step One.

—The employee has 10 days from answer or absent a Step One answer, 10 days from the time the First Step Answer was DUE to appeal to Step Two.

Step Two

The employer has 15 days to Answer at Step Two.

—If a Step Two meeting is held, such a meeting must take place within 15 days of the Employer's receipt of the appeal to Step Two. The Step Two Answer is then due within 10 days of that meeting.

Grievance to MSEA

The employee must then IMMEDIATELY request, in writing, that the matter be considered by MSEA's Litigation and Arbitration Committee. Only MSEA may appeal a Grievance to arbitration and such MUST be filed within 45 week days from the date of the employer's Second Step Answer or from the date the employer's Answer WAS DUE. **NOTE: This is the most common time issue. Employees have to submit appeals to the Lit and Arb Committee which only meets once a month.**

Litigation and Arbitration Committee

Given MSEA's Request for Arbitration procedure, MSEA's appeal procedure, and Demand filing deadlines, the employee's written request for consideration by the Lit and Arb Committee MUST be forwarded to the office as soon as possible.

—Arbitration & Litigation requests MUST have a cover letter attached specifying that it's an Arbitration & Litigation request.

—Failure to timely and appropriately submit a Grievance and its supporting documentation may result in the Grievance being considered untimely/improperly filed.

RETIREES

We're looking for one adventurous retiree from each of MSEA's 10 Regions to be a volunteer coordinator on the Retiree Committee. We would also like to form a special MSEA Veterans Group. If you're interested, please feel free to contact the committee chairs with any questions or to volunteer your much-needed time and energy!

Chair Mike Kelley
(269) 838-7908
mikek49058@yahoo.com

The cost for retirees to belong to MSEA is just \$12 a year as stated in the MSEA Constitution: Article VI, Section 8: *Any retired Union member age fifty (50) years or older or with at least ten (10) years of membership, or a disabled Union member, shall be entitled to retain membership in the Union for \$1.00 per month, to be paid in advance at the rate of \$12.00 per year. Retiree's dues are to be pro-rated from the date of retirement to the next January 1st. Thereafter, the retiree's dues shall be payable on January 1st, with thirty days advance notice given by MSEA Central Office. By paying your retiree dues of only \$12 per year, you will continue to receive the MSEA News. Please make checks payable to Michigan State Employees Association and mail to: MSEA Central Office, 6035 Executive Dr., Suite 104, Lansing, MI 48911*

7 ways Social Security will change in 2016

There are changes on the horizon for Social Security in 2016, according to *U.S. News & World Report*.

No payment increase. Social Security recipients won't be receiving a cost-of-living adjustment (COLA).

Stagnant tax cap. In years when there is no COLA, there is also no change in the maximum amount of earnings subject to the Social Security tax, which will remain \$118,500 in 2016.

Earnings limit unchanged. The Social Security earnings limit for people who work and claim Social Security payments at the same time will remain \$15,720 in 2016 for people ages 65 and younger. For people who will turn 66 in 2016, the earnings limit climbs to \$41,880. Once a retiree turns 66 in 2016, the earnings limit no longer applies and benefit payments are recalculated to factor in withheld payments and continued earnings.

Medicare premium increases. Most retirees who are already receiving Social Security benefits will continue to pay the same Medicare Part B premium in 2016, because Medicare Part B premiums are prevented by law from increasing faster than Social Security payments for most existing beneficiaries. However, retirees who first sign up for Medicare Part B in 2016 and high income Medicare recipients may pay higher monthly premiums than people who previously signed up for Social Security.

Maximum possible benefit declines. The maximum possible Social Security payment for a 66-year-old worker who signs up for Social Security in 2016 will be \$2,639 per month, down \$24 from \$2,663 in 2015.

"A decrease in full maximum benefit occurs when there is no cost-of-living adjustment, but there is an increase in the national average wage index," according to a statement from the Social Security Administration.

More online services. Workers can already create a My Social Security account that allows them to view their taxes paid and get a personalized estimate of their monthly payments at various claiming ages. Retirees can use this account to adjust their direct deposit, obtain a benefit verification letter, request a replacement SSA-1099 form, or get a replacement Medicare card.

Longer office hours. Following years of cutbacks, the Social Security Administration expanded office hours in many of its field offices beginning in March 2015. However, most offices continue to close to the public at noon on Wednesdays so that employees can work to reduce backlogs. If you prefer to conduct your Social Security business in person, you will now have an hour longer to do it on most weekdays.

RETIREEES

In addition to a proposed prisoner of war (POW) specialty license plate for motorcycles (p. 5, Sept-Oct 2015 *MSEA News*), Michigan now offers a **Support Michigan Veterans** license plate. This plate can only be used on non-commercial passenger cars, pickup trucks, vans and motor homes. Motorcycles, trailers and vehicles used commercially are not eligible for these plates. According to the Secretary of State, funds from the sales and renewals of the plate will be distributed by the Michigan Veterans Affairs Agency to support outreach activities that benefit Michigan veterans and their families, including tuition support for Michigan National Guard members or children of the veterans' tuition grant program, and funding for county and local veterans' organizations. Specialty license plates can be ordered by mail, fax, or at any Secretary of State branch office.

Safe Drivers Smart Options

Keys to Lifelong Mobility

When is it time to give up the keys?

The Michigan Secretary of State announced a new website at a press conference on Dec. 7 that aims to help seniors answer that difficult question. Secretary of State Ruth Johnson was joined at the announcement by Michigan State Police, the Michigan Dept. of Transportation (MDOT) and the University of Michigan Transportation Research

Institute. Partner organizations include AARP Michigan, AAA, Michigan Trauma Coalition, and Michigan Academy of Family Physicians.

The website offers resources to help seniors decide when to limit or retire from driving. It lists warning signs, driver safety tips, the impact of aging on driving and more. There also are links describing the effects of driving with various medical conditions and alternative transportation services. Traffic statistics show that seniors are involved in more than 9% of all crashes with the most frequent violations including failure to yield and tailgating. Most of the accidents occur between 12 noon and 6 pm and not at night, as might be expected.

Michigan has one of the oldest populations in the country. According to the 2010 census, 14% of residents are age 65 or older, and this age group is the fastest growing demographic in the state.

"Aging drivers who monitor their driving skills can maintain their independence behind the wheel longer while limiting risks to themselves and others," said Johnson.

The new Safe Driver Smart Options website can be found at: www.michigan.gov/agingdriver.

FULL RETIREMENT AGE

When you qualify for full Social Security benefits depends on when you were born.

BIRTH YEAR	RETIREMENT AGE
1927 or earlier	65
1928	65 and 2 months
1929	65 and 4 months
1930	65 and 6 months
1931	65 and 8 months
1932	65 and 10 months
1933-1934	66
1935	66 and 2 months
1936	66 and 4 months
1937	66 and 6 months
1938	66 and 8 months
1939	66 and 10 months
1940 and later	67

Source: Social Security Administration
800-795-2887
www.ssa.gov

A new online tool can help you decide when to file for Social Security benefits. It's available through the Consumer Financial Protection Bureau at: www.consumerfinance.gov/blog/before-you-claim-social-security-explore-our-new-planning-for-retirement-tool

To use the tool, you just type in your birth date and highest annual work income to see your estimated benefit for each age, from 62 to 70. Click on the age you think you would like to retire, and a new benefit amount pops up to show how your choice affects your check. You can also get specific, detailed information by answering questions about your marital status and finances.

The AARP also has a variety of online resources, including a Social Security benefits calculator and a retirement calculator at:

www.aarp.org/work/social-security/social-security-benefits-calculator/

Social Security is the only guaranteed monthly income for about 69% of senior consumers, according to a report issued by the Consumer Financial Protection Bureau.

FYI

HB 4814, sponsored by Rep. Jim Runestad (R-White Lake), is calling for departments to post easy-to-follow organization charts so people can find who they need to contact in state government. Runestad testified before the House Oversight and Ethics Committee the beginning of November and said he spent two hours online looking for contact infor-

mation for various departments and subdivisions of state departments, including how to contact supervisors in various offices. He said he came away empty-handed.

"It is just common sense that citizens who are aggrieved or affected by a state department should be able to go to that department's website, view the chart, and easily find the correct number to call for an answer," said Runestad. "People should also be able to access a supervisor if they believe any front-line employee within the department did not treat them properly."

Kurt Weiss, spokesperson for the Dept. of Technology, Management and Budget (DTMB), said department officials are working with Runestad on a higher-level organization chart that includes phone numbers and titles. Weiss said it would be difficult and a lot of work to include the names and titles of every state employee.

MICHIGAN

LOTTERY

The Michigan Lottery has become the first U.S. lottery to obtain certification after completing the Internet

Responsible Gambling Compliance Assessment Program (iCAP). The iCAP was developed by the National Council on Problem Gambling (NCPG). It provides vendors and operators with an independent assessment of responsible gaming policies based on standards and best practices from around the world.

The Michigan Lottery, in collaboration with NeoPollard Interactive, launched online gaming in late 2014.

"We believe that problem gambling must be addressed by vendors and lotteries alike," said Keith Whyte, Executive Director, NCPG. "We applaud NeoPollard Interactive and the Michigan Lottery for meeting or exceeding operational standards for all of the NCPG's specific 30-point criteria in order to achieve iCAP certification."

Michigan State Police

Beginning Dec. 1, 2015, the Michigan State Police and Michigan County Clerk offices are responsible for processing concealed pistol licenses (CPL) under Senate Bills 35 and 35 or Public Acts 3 and 4.

The change does away with gun boards that included county sheriffs and prosecutors in the review process. Under the new law, applications are to be processed within 45 days instead of eight weeks. In addition, if the paperwork isn't processed within the 45-day period, applicants can use their application receipts received by the clerk's office as proof of certification.

State police are required to develop an online permit renewal system by October 2018. People are still responsible for taking at least 8 hours of gun training from a certified instructor. Applicants will have to pay \$115 for licensing and a \$10 renewal fee.

2,127 Net Rules Cut

The Office of Regulatory Reinvention (ORR) announced in November that it has cut a net total of 2,127 obsolete, burdensome and duplicate rules since 2011.

Gov. Rick Snyder had charged the agency with cutting bureaucratic red tape. Many of the rules hadn't been reviewed in decades.

"The success of the ORR is not found in the elimination of one needless rule," said Dept. of Licensing and Regulatory Affairs Director Mike Zimmer, "but in the elimination of thousands of unnecessary regulatory requirements that allow state government to make more efficient use of our resources."

However, the Michigan Environmental Council (MEC) received protests from environmental groups when it attempted to tighten its list of toxic air contaminants. The state held two public hearings in December.

WHAT THEY'RE SAYING

Birthday cake with singing surprise from my Union brothers and sisters today at the Board Meeting (Saturday, Nov. 7). I'm so touched! Thanks, every one. It was not big enough for anyone to jump out of tho! Lolol
--Brenda Kafer
(VIII MDOT)

It really shows a galling lack of respect for the public's right to know...I find that a little arrogant.
--Sen. Steve Bieda (D-Warren)
regarding the lack of action on bills to expand FOIA to the Michigan Legislature.

We must remember that the voters in our state elected these people in Lansing. We have no one to blame except ourselves.
--Mark Richard
(V LARA)

Big thanks to Tim Hughes who retired from UAW Michigan CAP on Halloween. Tim was always available to help answer questions and give advice. Tim will not be replaced, no one has his knowledge and skill set after 46 years around the Michigan Legislature.
--Ray Holman, UAW Local 6000
legislative liaison

Go Figure!!
--Aaron Begley
(X MDOT)

The problem in Michigan is that people can commit fraud with impunity. Consumer protection is an issue that the people running our state don't give a crap about.
--Adam Taub, a Southfield consumer attorney regarding scrutiny of unlicensed loan-sharking operations in Michigan.

And so it has begun. Now that RTW applies to state workers, the CSC will try to weaken the unions.
--Brian Hagler
(VI DHHS)

In light of the serious nature of today's whistleblower lawsuit filed by Keith Aliard and Ben Graham in U.S. Federal District Court, I am requesting the Michigan State Police and state Attorney General Bill Schuette update the Legislature on their investigation into the Cotter-Courser-Gamrat situation.

As many people will remember throughout the House's internal investigation into this matter, House Democrats consistently asked and finally were able to secure that the Michigan State Police and the Attorney General conduct an independent investigation. This whistleblower lawsuit brings forward a number of very serious allegations against Speaker Kevin Cotter's office that warrant a thorough investigation into a potential cover-up after Aliard and Graham's termination.

I'm anxious to see how work has been progressing on their investigation. We must ensure that ethical representation remains our top priority as we conduct the official business of the state.

--statement from House Democratic Leader Tim Greimel (D-Auburn Hills) on the pending whistleblower lawsuit against the Michigan House of Representatives.

Hundreds of state computer servers are vulnerable to hacking and failure because of outdated operating systems, ineffective security configurations, poor password control, failure to install security patches and a lack of timely scanning to detect vulnerabilities.
--report by Michigan Auditor General Doug Ringle released on Dec. 17.

MSEA Facebook comments about the CSC voting to adopt changes to Rule 6-3 following testimony that the Prohibited Subject of Bargaining Complaint (PSB) is being used to circumvent Integrity of the Bargaining Unit contract clauses.

The bill made election law changes that are terrible for the people of Michigan. So I am happy I voted no, I am very disappointed that the Republicans played games in order to pass this awful legislation.
--Rep. Andy Schor (D-Lansing)

We don't actually know all the details of the bill because you're not giving us the opportunity to understand what's in this bill.
--House Democratic Floor Leader Rep. Sam Singh
(D-East Lansing)

I guess you guys get a straight ticket. So that's fun. Merry Christmas to the rest of us in the state.
--Sen. Curtis Hertel (D-Lansing)
Comments after SB 13 was shoved through by Republicans, taking the straight ticket voting option off Michigan ballots.

Wages and Benefits: January 1, 2016 – December 31, 2016
Non-economic Provisions: January 1, 2016 – December 31, 2018

What's New in the 2016-2018 MSEA CBA

A voluntarily ratified contract instead of a Civil Service Commission imposed contract.

83% of the voting members voted to accept; 13.5% voted to reject; 3.5% of the ballots were spoiled.

Wages to include first year 1% base raise and a 1 ½% lump sum bonus payable October 1, 2016.

Wages and Benefits to be renegotiated for 2017 and 2018 in 2016.

All non-economic items covered for 3 years, January 1, 2016 - December 31, 2018.

The implications of the upcoming Federal Excise Tax on Cadillac insurance premiums is what is making the wage and benefit opener a necessary component. There is a new letter of understanding that will ensure that MSEA is part of the solution process regarding health care premium raises.

Language changes made to cover combining the Department of Community Health (DCH) and the Department of Human Services (DHS) into the new Department of Health and Human Services (DHHS).

Article 8 language changes to identify the arbitration panel selection process start date. Also, language stating that the Office of the State Employer will act as a mediator between MSEA and departments prior to arbitration.

Article 22 Section F has protective clothing language from DHHS and MDOT which has also been incorporated into the primary contract from the secondary contracts in those departments.

Article 33 has language added so that copies of position descriptions will be provided if Civil Service Review is necessary for changes to the position description.

Article 35 has DNR Conservation Officers and DEQ clothing/boot allowance language incorporated from the Letter of Understanding (LOU) into the article.

Article 37 has been updated with specifications from the current DTMB regulations on mobile home moving expenses.

Article 43 has had multiple changes made to move benefit language/information to the charts listed in Appendices M-2, (Medical Benefit), M-3, (Dental Benefit), M-4, (Vision Benefit). The benefit of \$755.00 one time for laser eye surgery was lost. The 2-year hearing aid coverage is now 3 years before replacement. There are improvements in the vision insurance including added limits. There is also an added program called Tru-Hearing which has coverage for digital hearing aids.

Article 43T has been changed to show that DTMB travel regulations now reflect that meal receipts are no longer required. Also, the pilot program referred to in the Letter of Understanding 34 which refers to meal receipts has been suspended. The reference to the DTMB Administrative Manual 5-3-1 has been eliminated and language referring to the Administrative Guide has been added.

Article 43 / Appendices M-2 have Telemedicine added as a voluntary benefit.

Letter of Understanding # 22-A Clothing and boot reimbursement has been incorporated into the primary CBA from the MSP secondary contract.

Carolyn Park is an executive board member of the American Federation of State, County and Municipal Employees (AFSCME) Local 232, representing employees of the Cincinnati Public School system.

Working people have taken a beating in recent years. Our paychecks aren't keeping up with costs that keep climbing. It's getting harder to find good jobs that offer a living wage and benefits. Wealthy CEOs, corporations and politicians have manipulated the rules in their own favor, and the rest of us are falling behind.

Ohioans have had enough with the failed policies and empty rhetoric that got us here. And we are starting to do something about it.

Here in Ohio, a broad coalition of working people is mobilizing against yet another attack on collective bargaining. Even though "right to work" has failed repeatedly in the past, Rep. Tom Brinkman, R-Mount Lookout, is pushing a new bill in the statehouse. It's an effort to keep middle-class Ohioans from speaking up together for wages and benefits that can sustain our families.

This is clearly an idea that should be kicked to the curb, as it was in several states earlier this year and as it was when Ohio voters rejected the same scheme by a 2-1 margin in 2011. More and more, the tide is turning against this brand of corporate politics all over the country.

In September, the Missouri Legislature upheld Gov. Jay Nixon's veto of a so-called right-to-work measure, which had been a top priority for out of state, big money special interests, as well as some state house leaders. Right-to-work laws make it harder for working people to band together on the job and result in lower wages for all working people, whether they are in a union or not.

The working families who stand to lose when anti-worker legislation is on the table aren't a special interest, and they don't belong to one party. They're ordinary Americans who live in every city and voting district. Lawmakers in Missouri chose to listen to their constituents over outside special interests, and a bipartisan coalition stood with working families as they defeated the bill and upheld the governor's veto.

In the past year, citizens rejected similar legislation in Kentucky, New Mexico, West Virginia and Illinois. Last fall, anti-worker measures failed to make the ballot in a number of states, including Ohio. A proposal to seriously limit workplace rights did make the ballot in Anchorage, Alaska, where it was roundly defeated by voters.

And now Scott Walker, the Wisconsin governor who staked his entire political career on attacking union members and working families, has fallen on his face. Only a few days after doubling down on an extremist anti-worker platform as part of his presidential bid, he bowed out of the race. He was polling favorably with less than one-half of one percent of voters.

It turns out that most people understand that strong unions make for a strong middle class. The majority of Americans – including nearly half of registered Republicans – hold a positive opinion of the labor movement. In an economy where wealthy corporations and CEOs are calling the shots while many ordinary people feel stuck, unions are a path forward.

But corporations and CEOs are still finding new ways to manipulate the rules in their favor by trying to make it even harder for working people like teachers and firefighters to come together, speak up, and get ahead. And if they can't fight us in public, they'll go behind the scenes.

In the coming months, the Supreme Court will hear a case called *Friedrichs v. California Teachers Association*. If the special interests backing this case get their way, they will effectively make all public service jobs "right to work" – hurting paychecks for all working families and public services for communities nationwide.

It's time politicians here in Ohio and in Washington, D.C., got the message: Americans are tired of policies that benefit the wealthy few at the expense of everybody else. We are ready for something better. And we vote.

Members of the MSEA Constitution & Election Committee prepare to count ballots (l-r): Tom Hampston (Retired, I DOC); Steve Richardson (III DMVA); Dave Sudol (II DOC); Lonnie Thomas (VIII DCH); Doris Larkin (V MDOT); Jason Zylstra (VII MSP); Mark Sanchez, Jr. (VI DTMB); and Chairperson Kevin Henry (IV DHS).

On Nov. 19, 2015, the Constitution and Election Committee met at MSEA Central Office and, according to the Constitution, counted ballots submitted by members on whether or not to ratify a newly-negotiated Tentative Agreement (TA).

A majority of voting members voted to ratify the TA. The Civil Service Commission approved the contract at its meeting on Dec. 16.

"I would like to thank the MSEA bargaining team, and committee chair Ron Damuth, for diligently bargaining with the Office of the State Employer," said MSEA President Ken Moore.

"I would also like to thank all the members who participated by voting on the Tentative Agreement. We are stronger together."

See p. 8, "What's New in the 2016 - 2018 MSEA CBA."

The CBA is posted on the MSEA website under Member Menu, Contracts tab.

Bargaining Committee members attended the Civil Service Commission (CSC) meeting on Dec. 16, where the CSC approved MSEA's new 2016-2018 Collective Bargaining Agreement. (l-r): DMVA Spokesperson Steve Richardson; Lit & Arb Committee chair Jo Irby; Region VII Director Chuck Riker; MSEA VP Brent Heyer; MDOT Spokesperson Tim Schutt; Region IV Director Mark Baker; Bargaining Committee Chair Ron Damuth; and Valerie Hill, State Asst. Administrator.

State Workers Get New Contracts For Christmas

The Civil Service Commission (CSC) unanimously approved MSEA's member-ratified 2016-2018 Collective Bargaining Agreement (CBA) at its meeting on Dec. 16. Also approved were CBAs for the following unions and the Office of the State Employer: AFSCME Council 25, MCO, SEIU, and the UAW.

MEET JO IRBY!

Hello MSEA members, I am Jo Irby. I was a member of the Primary Bargaining team for the Collective Bargaining Agreement, and some of you may have seen me on recent site visits during the ratification process. I am a member of Region IX, and am currently serving as the new chairperson

for the Litigation and Arbitration Committee. Thank you for allowing me the opportunity to serve you during my tenure in this position. jirby@msea.org

Litigation and Arbitration Committee Chairperson Jo Irby and Region IX Director Mike Martindell welcomed members to the Region IX meeting at Archie's restaurant in Livonia on Oct. 28.

ASK THE DNR

(l-r): John Depue, wildlife biologist DNR Baraga office; WNMU-TV13 Media Meet host Bill Hart; Paul Gaberdiel, DNR recreation trails specialist with the Newberry office; and Conservation Officer Brett DeLonge, Menominee office.

Photo courtesy Michigan Dept. of Natural Resources

Conservation Officer Brett DeLonge (I DNR)

appeared Dec. 4 on the call-in question program "Ask the DNR," broadcast on Public Television from WNMU-TV 13 in Marquette, Mich. CO DeLonge was joined on the program by wildlife biologist John DePue; Darren Kramer, northern Lake Michigan unit manager; Paul Gaberdiel, recreation trails specialist; and deputy public information officer John Pepin.

The DNR staff members reviewed preliminary results of the firearm deer hunting season and previewed ice fishing and snowmobiling, although the discussion is usually wide-ranging, based on viewer questions. The program also featured photos of successful deer hunters from the recent bow and firearm deer hunting seasons in the Upper Peninsula.

"Ask the DNR" is produced five times each year in October, November, December, April and May. The December installment of the program was sponsored by Safari Club International.

CELEBRATING TIM HUGHES

Tim Hughes and wife Sharon Bommarito.

At 4:53 pm on October 30, 2015, Tim Hughes, legislative director for the UAW, posted the following farewell message on his Facebook page.

After 46 years working around the Legislature, I'm ready to hang 'em up. I'm retiring, effective at the end of today.

I've had a great time working with literally thousands of people around the Capitol through my work with the UAW, Senate Democratic Staff, Michigan State AFL-CIO, Governor Granholm and finally, with UAW Michigan CAP.

There is a sign outside our office that features this quote from the late, great Walter Reuther:

"There is no greater calling than to serve your fellow men. There is no greater contribution than to help the weak. There is no greater satisfaction than to have done it well."

That's been the motivation for my work over the years. Thanks to all of you who have worked with me in this cause. I've valued your friendship and commitment and I look forward to seeing you in a more relaxed atmosphere in the years to come.

Look for me on the golf course, at my cottage, playing with my grandchildren or travelling with my wonderful wife Sharon.

I'm a lucky man.

(l-r): Reps. Jeff Irwin (D-Ann Arbor); Scott Dianda (D-Calumet); Tim Greimel (D-Auburn Hills); Sen. Curtis Hertel, Jr. (D-E. Lansing); Tim Hughes; Sen. Rebekah Warren (D-Ann Arbor); and Rep. Andy Schor (D-Lansing).

Tim Hughes reaches for his ringing cell phone during a speech of appreciation and plaque presentation by Michigan House Minority Leader Tim Greimel at his retirement party on Nov. 4. The ringtone is ducks quacking.

WHAT'S BEHIND MICHIGAN'S CURTAIN?

The Michigan Campaign Finance Network (MCFN) called the report a "national embarrassment" for Michigan. Common Cause Michigan said the results were "appalling." They were referencing the annual nationwide report by the nonprofits Center for Public Integrity and Global Integrity which graded each state in 13 different categories.

According to the report, Michigan ranked 50th out of 50 states with an "F" grade. Ten other states received similar rankings, but no other Great Lakes State fell to the same level of abject failure as Michigan. Out of 13 areas scored, Michigan received an "F" in 10 of them.

"The State of Michigan does the least of any state to fight corruption, conflict of interest and cronyism in state government," said Melanie McElroy, Common Cause Director in Michigan, in a press release. "As a result, the voices of ordinary people are being drowned out by special interests, insiders and lobbyists. It's time to make government accountable to the people by making information openly available to the public and cracking down on the corrupting influence of secret undisclosed money flowing into our campaign, elections and lobbying."

An Opinion piece by Phil Leech, a member of Common Cause, was published in *The Flint Journal* (*Lansing must come out into the light; Sunday, Nov. 22, 2015*). Leech states: "Government is supposed to be of, by and for the people...Contact your representatives, write letters to the editor or contact good government groups like the League of Women Voters and Common Cause that are working to bring change on these issues." Leech urges people to demand transparency, an end to lobbyist control and the right to know who is behind secretly funded political ads. "We can do better," he says. "We need to put power back into our hands and make sure our voices are heard if we ever want to see real action on the issues that matter to us."

By Brandon Dillon

Nowhere is transparency more important than in government, where elected decision-makers must be held to the highest standard of accountability. Unfortunately, that standard has gone missing from the halls of Michigan's Capitol. The lack of accountability among the Republicans who control our state government is so severe, that it's taken the courageous actions of two whistleblowing staff members to bring the truth to light.

This month, former staffers of disgraced Republican state representatives Todd Courser and Cindy Gamrat, filed a federal whistleblower lawsuit against the Michigan House of Representatives, led by Speaker Kevin Cotter. In the complaint, staffers Keith Allard and Ben Graham claim Cotter and his top officials knew from the very beginning about the scandalous behavior of the former legislators, including the misuse of taxpayer resources to hide their affair, which was ultimately the justification for their removal.

Despite these accounts of the impropriety taking place under his leadership, Speaker Cotter did nothing. On no less than eight separate occasions, the whistleblowers claim in the lawsuit they informed the Speaker's office of the ongoing abuse of taxpayer funds including, "undeniable physical proof" of the Courser/Gamrat affair and the bizarre email that was sent to cover it up. It's no wonder Cotter's former chief of staff, Norm Saari, refused to answer questions from Democrats during committee hearings on the affair. Throughout the investigation, Democrats asked the question, "What did Speaker Cotter know, and when did he know it?" According to the lawsuit, the answer is he knew from the very beginning, and Speaker Cotter did nothing to stop the misuse of taxpayer resources, while his staff repeatedly ignored information suggesting the abuse was getting worse every month.

We must next ask why the Speaker refused to publicly address these serious allegations, including the misuse of taxpayer resources. Only when the whistleblowers felt their concerns were falling on deaf ears and they had nowhere else they could turn but to the press, did Speaker Cotter finally take action. I believe the answer to why Mr. Cotter refused to act on these allegations is clear – because he hoped they would never come to light – and the odds were in his favor they would not.

Republicans in Lansing have had unchecked power now for so long they've created a world sealed off from public scrutiny and public accountability, where they answer to no one but themselves. In this environment, where transparency and accountability are non-existent, we have seen a pattern of secrecy in Lansing that must stop now. Whether it's hiding information about water quality in Flint, the disastrous Aramark contract, the governor's EAA under FBI investigation, or the Capitol View boondoggle, the public has been kept in the dark for too long by Republicans in Michigan.

That leads us to the final question we have to ask of Speaker Cotter and House Republican leadership – what else don't we know? Unfortunately, we may not have that answer until the Speaker and his friends are no longer in power – or more courageous whistleblowers come forward with the truth.

One vote, one value: representation?

Gerrymandering

1. Manipulate the boundaries of legislative constituencies in order to favor one party or class.
2. Achieve a result by such manipulation: to make leaders in government the people they want.

When we vote, we want:
Fair elections
Our votes to count
Our voices to be heard

This fall, the League of Women Voters hosted over 30 Town Halls across the state with the message that elections should reflect the will of the people, not the maneuvering of politicians. Their stated goal "is to ensure that every vote counts, that every eligible voter can have a say, that our elections represent the will of the people, and our government is of, by and for the people."

Redistricting is the process of drawing legislative districts—for U.S. Congress, Michigan Senate and Michigan House of Representatives—to determine who will represent the citizens.

Legislators currently draw the lines and choose their voters. For the party in power—Republicans or Democrats—the objective is to put the opposing party's voters into the fewest number of districts as possible. As the *Detroit Free Press* noted in its editorial on Aug. 9, 2015, the legislature changes the maps based on which party is in control. Republicans controlled the 2011 redistricting process and did a great job drawing districts favorable to them. So Democrats have fewer pickup opportunities. This is not democracy! By gerrymandering the districts, it means the vast majority of them aren't competitive. This impacts policies as well as elections. It's like "putting the fox in charge of the hen house."

Currently, 27 states put the redistricting power solely with their Legislatures. Seventeen states have advisory commissions and six states have an independent commission. In California and Arizona, independent citizens' commissions draw the maps. In states like these, where someone other than the Legislature draws the lines, there is higher voter turnout and less partisan bias.

The League of Women Voters believes the solution is to change the rules so that the process is fair, transparent and impartial. In order to change the redistricting process, there would have to be an amendment to the Michigan constitution, which would require a two-thirds majority approval in the House and Senate, followed by voter approval in a statewide election. Currently, this appears unlikely. Another way would be for a third party group to launch a petition drive for a ballot proposal to amend the state constitution. The League of Women Voters and Common Cause are reportedly exploring the possibility of a petition drive, although the League says there are no firm plans right now. Every 20 years, the U.S. Census Bureau counts the citizens of each state. There is time to eliminate gerrymandered districts before the 2020 census.

HOW TO STEAL AN ELECTION

(l & r): The League of Women Voters held a Redistricting Forum on Nov. 10 at the Hannah Community Center in East Lansing.

ELECTION 2016

Michigan's presidential primary is scheduled for March 8, 2016. Joining Michigan will be Republicans in Hawaii, Idaho and Mississippi. The presidential primary season kicks off with Iowa's first-in-the-nation caucuses on Feb. 1, followed by New Hampshire, South Carolina and Nevada. Voters in 12 more

states will cast ballots on Super Tuesday, March 1, and four more states will vote on March 5.

AFSCME has endorsed Hillary Clinton for president. The 35-member elected board, which includes councils and affiliates from around the country, voted to back the former secretary of state. AFSCME President Lee Saunders said the group was looking for someone to fix the "out-of-balance economy."

"Members want a candidate who will make it easier instead of harder to join together in strong unions and stand together for wages and benefits that can sustain our families," Saunders said. "What we also heard was AFSCME members want the candidate who will be the most effective champion for working families, and who will be able to deliver a victory in this critically important election. AFSCME members believe that candidate is Hillary Clinton."

As reported by CNN, the decision came after the union had conversations with all candidates, including Clinton, former Maryland Gov. Martin O'Malley and independent Vermont Sen. Bernie Sanders. All three candidates participated in town hall meetings with the unions in Iowa earlier this year, and AFSCME used three member polls to gauge which candidates their members were backing. Saunders said that nearly two-thirds of AFSCME members would vote for Clinton in the Democratic primary. In Michigan, the "Hillary for America" campaign is counting 140 elected officials in her corner, according to a press release sent this month.

AFSCME backed Clinton in 2007 and went early for then-Gov. Bill Clinton in 1992. AFSCME is a major player in Iowa, representing 40,000 public employees.

2016 DEBATE SCHEDULE *Details will be posted on the MSEA website, under the LPAR module.*

Jan. 14, 2016:	Republican debate -- Fox Business
Jan. 17, 2016:	Democratic debate -- NBC/Congressional Black Caucus Institute
Feb. 6, 2016:	Republican debate -- ABC News/ IJ Review
Feb. 11, 2016:	Democratic debate -- PBS
Feb. 13, 2016:	Republican debate -- CBS News
Feb. 26, 2016:	Republican debate -- NBC/Telemundo/National Review
March 9, 2016:	Democratic debate -- Univision/The Washington Post
March 10, 2016:	Republican debate -- CNN/Salem Radio
March 2016:	Republican debate -- Fox News (pending)

DEMOCRATS currently set to appear on Michigan's primary ballot: Hillary Clinton, Martin J. O'Malley and Bernie Sanders.

REPUBLICANS currently set to appear on Michigan's primary ballot: Jeb Bush, Ben Carson, Chris Christie, Ted Cruz, Carly Fiorina, Lindsey Graham, Mike Huckabee, John R. Kasich, George Pataki, Rand Paul, Marco Rubio, Rick Santorum and Donald J. Trump.

Oct. 2015 marked the 70th anniversary of the completion of the South Dakota monument featuring presidents George Washington, Thomas Jefferson, Theodore Roosevelt and Abraham Lincoln. It took 400 workers 14 years to build--from Oct. 4, 1927 to Oct. 31, 1941. Ninety percent of Mount Rushmore was carved using dynamite. Despite the dangerous nature of the project, not one worker died. Gutson Borglum, the son of Danish immigrants, designed the sculpture and intended for the monument to endure, like Stonehenge, long past people's understanding of it.

CAPITOL NEWS

Michigan Needs a Real Plan

This fall, Republicans in the state Legislature passed a road funding plan which was signed into law by Gov. Rick Snyder in November.

Voting in opposition to the plan was House Democratic Floor Leader Sam Singh (D-E. Lansing).

Calling the plan "unsustainable and fiscally irresponsible," Rep. Singh says that Michigan's roads will continue to deteriorate for years to come.

"The package of bills fails to identify where \$600 million in funding cuts will be made, and fails to guarantee that public safety, education and health care funding will be protected in future budgets. In addition, it will only generate \$425 million in the first year and \$608 million in the second year. This is significantly below the \$1.2 billion needed annually for road funding, and it won't reach \$1.2 billion in annual funds until Fiscal Year 2012."

WHAT DOES THE ROADS PLAN DO?

1. CREATES A NEW BIRTHDAY TAX TIED TO REGISTRATION FEES.
2. INCREASES THE GAS TAX.
3. FAILS TO ACTUALLY FIX THE ROADS.

December 2012 rally at the state Capitol which saw thousands of union members and supporters protest pending Right-to-Work legislation which Gov. Rick Snyder shortly afterward signed into law.

The question if state employees could be required to pay union dues ended up before the Michigan Supreme Court in a lawsuit filed by the Coalition of Unions. Legislators sought to apply the controversial Dec. 2012 Right-to-Work (RTW) law to state employees. Legislators had amended the Public Employment Relations Act (PERA) to say workers could not be forced to pay union dues or, for those who opt out of unions, so-called "fair-share fees" as a condition of employment. PERA typically hasn't applied to state workers because they are regulated separately by the Civil Service Commission (CSC). Unions feared and legislators hoped that legislation affecting PERA—including an expansion of Right-to-Work policies and a measure prohibiting public employers from paying employees while they're performing union business—could be easily applied to state government workers.

In a July 2015 ruling, authored by Chief Justice Robert Young Jr., the court ruled against the Coalition of Unions. However, in a year-end interview with *Lansing State Journal* reporter Justin Hinkley, Young said the court's July 29 ruling on Right-to-Work applying to state workers "was not a statement on right-to-work statutes or the power of the Legislature to regulate state workers. Young stated that the 4-3 ruling was "...a recognition there was a limitation on the Civil Service Commission's authority, but the theory that the Legislature had a right to come in and regulate the civil service, if you read my opinion, you would know that was not an accepted theory."

Source: *Lansing State Journal*, "Chief justice: State worker ruling unrelated to right-to-work," by Justin Hinkley, Dec. 14, 2015.

LegislatorLump.com

You could have Santa put your legislator on Santa's "Naughty List" and receive a lump of coal for the holidays. The Michigan AFL-CIO made it convenient by launching a website (see above) which allowed voters to send a letter to their state representative about Senate Bill 13, which would eliminate straight party voting in Michigan.

"We should be making it easier to vote in Michigan, not harder," said Ron Bieber, president of the Michigan AFL-CIO. "This legislation will mean longer lines at the polls next year, plain and simple. Making it harder for seniors and people of color to make their voice heard at the ballot box is downright

un-American. We're putting Lansing politicians on notice that they should go back to the drawing board and work on legislation that expands access to voting. Otherwise, we will be notifying the one million active and retired union members in Michigan about how their elected officials voted on these important bills."

On behalf of Michigan's working families, the Michigan AFL-CIO delivered lumps of coal to the offices of state legislators who voted for SB 13 prior to the Legislature's holiday recess on Dec. 18.

Two important bills that would prevent union release time passed the state Senate in November. Both bills were sponsored by Sen. Marty Knollenberg (R-Troy), and co-sponsored by most of the Senate Republican caucus. As this issue goes to print, the bills are in the state House.

Senate Bill 279 would "prohibit public school districts and unions from adopting 'release time' arrangements in which a school employee who goes to work full time for a teachers union remains an employee of the district for purposes of collecting a government pension."

Senate Bill 280 would "ban government employee union contracts that pay employees who are union officials for the time they spend on the job conducting union business, i.e., 'release time.'" Workers have long had a right to negotiate release time as part of collective bargaining. Release time allows workers to use time from their jobs to take care of union issues in the workplace. But there are efforts in several states to prohibit public employees from negotiating with their employers to include these provisions in their contracts. The American Legislative Exchange Council (ALEC) has a model bill to outlaw release time. At least five states (Maine, Michigan, Minnesota, New Hampshire and Nevada) saw legislation introduced in 2015 to eliminate release time for public employees, and Nevada ultimately enacted legislation this year that allows workers to be paid for time spent in union activities only if the cost of the leave is paid by the union or offset by concessions made by the union.

Lies About Release Time -- And The Truth

Taxpayers shouldn't have to pay for union business.

It's really about making sure public employees are providing the best possible service to taxpayers at the lowest possible cost.

It will save taxpayers money.

It will actually cost taxpayers more by eliminating important labor-management committees and dealing with increased grievances and contract disputes.

Release time really just gives union bosses paid time off to do political work on the taxpayer's dime.

Michigan law already bans public employees from doing any political work during normal business hours.

It doesn't do anything to hurt collective bargaining.

This is about punishing public employees by forcing union officials to use their hard-earned vacation time, and at their own expense, to enforce a collective bargaining agreement. It also doesn't restrict employers from being compensated during their labor-management meetings.

AROUND THE STATE

Members of MSEA's LPAR Committee turned out on Wed., Dec. 9, for the official campaign kick-off in Grand Ledge of former Rep. Theresa Abed. She is running for the 71st House District seat which she lost in 2014 by a mere 148 votes to now-Rep. Tom Barrett (R-Pottersville). MIRS has ranked the district the ninth most likely to flip in the 2016 election.

Abed Kicks Off Campaign In 71st House District

REPUBLICANS RIG THE RULES

Michigan senators were locked in the chamber the night of Dec. 16, as Republicans instituted a "call of the Senate," meaning senators couldn't leave the chamber under threat of arrest. Tensions ran high as Republicans cleared the floor of all staff except the Senate Majority Leader's, leaving Democratic senators without any staff members. Seven Democratic amendments to Senate Bill 13, which would take the straight ticket voting option off Michigan ballots, were voted on as one block of bills, instead of seven separate amendments, which added to Democrats' fury.

The Republican-controlled House gave the bill final approval on a narrow 54-52 vote. To add insult to injury, the bill includes a \$5 million appropriation, which means it can't be repealed by voters since laws that contain appropriations are referendum proof. Twice in the past, voters have overturned legislative attempts to end straight ticket voting in Michigan. This allows voters, by checking a box at the top of a ballot, to choose all candidates from either the Democrat or Republican Party.

Both Facebook and Twitter went into overdrive as people vented their anger and frustration over passage of the bill. **Rep. Andy Schor (D-Lansing)** posted the following on Facebook:

Rep. Andy Schor

Michigan has long lines now (we are the sixth worst state in the nation) and this will only make the lines longer. Why are we restricting voter access and options at the polls? Because House Republicans are afraid they will lose the next election and want to reduce votes that go to Democrats because they use straight ticket more when voting... I hope the voters will remember this in November 2016.

THE REVERSE ROBIN HOOD PLAN

An amendment to the Michigan Campaign Finance Act, passed by the state Legislature on its last day of voting in 2015, will substantially delay the reporting of millions of dollars in election spending if it's signed into law by Gov. Rick Snyder. According to the **Michigan Campaign Finance Network (MCFN)**, **SB 571** is "a flawed bill that should not be signed into law." The bill eliminates the requirement for political action committees (PACs) and independent expenditure committees (superPACs) to file a quarterly campaign finance report in February of each year.

"This legislation perversely delays the citizens' right to knowledge of who is spending millions of dollars to influence the outcome of Michigan election campaigns," said Rich Robinson of the MCFN. "Instead of delaying reporting, legislators should be acting to make records of massive independent expenditures available to the public before Election Day, so citizens can consider campaign messages with full knowledge of who is paying for them."

Happy New Year

FRIEDRICH v. CALIFORNIA TEACHERS ASSOCIATION

A bad decision from the U.S. Supreme Court could limit working people's ability to negotiate better wages, benefits and working conditions.

Higher wages, better benefits, working safety

Unions make communities stronger by advocating for smaller class sizes for our children and better patient-to-staff ratios in our hospitals.

AMERICA'S ECONOMY IS ALREADY OUT OF BALANCE. A BAD DECISION HERE WILL MAKE IT WORSE.

#WorkTogether

With this case, the U.S. Supreme Court still has a chance to do what's right. But don't be confused about what's going on here and what's at stake for workers and unions. Oral arguments for this case are scheduled for January 11, 2016.

Union issues are really what Senate Bill 492 and four House bills are all about. They would amend the Franchise Investment Law to say that a franchise owner (franchisee),

not the franchising business itself (franchisor), is the employer of workers. The decision is about whether or not workers have the right to bargain with an employer that has authority to control employees' pay, benefits and working conditions.

The legislation is an attempt to reverse a recent National Labor Relations Board (NLRB) ruling in the Browning-Ferris case. The case deals specifically with a staffing agency that supplied workers to Browning-Ferris Industries. But the decision could apply to a franchise situation, depending on the facts of the case and how much the franchisor has authority to control key aspects of the workplace.

Workers form unions because they want to bargain with their employers over improvements in the workplace. If employers are able to manipulate the system to avoid bargaining by hiring temporary employees or contractors, this undermines workers' ability to organize and bargain. The ruling makes it more possible for workers to organize and bargain with an employer who has authority to control the terms of their employment.

The courts have consistently rejected attempts by states to circumvent national laws through trying to pass a patchwork of state laws. Unions warn that passing such a bill could lead to legal issues for the state. The bills passed the state House on Dec. 15 and went to Gov. Rick Snyder for signing. They will take effect 90 days after being enacted.

Freedom OF Information —ACT—

become chair of the Michigan Democratic Party. Dillon's bill had also included the Governor's office in FOIA. Sen. Steve Bieda (D-Warren) sponsored a similar bill in 2013 and also last March in the Senate. As reported in MIRS, Bieda's bill was sent to the Senate Government Operations Committee, "where everyone knows bills are DOA."

Prior to the 2011-12 session, no bills calling for the **expansion of FOIA to the Legislature** had been introduced since at least the 1995-96 session, according to the state Legislature's web site.

"This is the way it's always been done."

That has been the attitude in the past as various attempts to expand the state's Freedom of Information Act (FOIA) to include the Michigan Legislature have sputtered and stalled. But Rep. John Bizon (R-Battle Creek) is co-sponsoring **HB 4283** which would expand FOIA to the state House and Senate.

Previous bills were sponsored by former Rep. Brandon Dillon (D-Grand Rapids) and introduced numerous times before he left to

MEMORANDUM

TO: Chief Financial Officers and Human Resource Directors
All State Agencies

FROM:  Michael J. Moody, Director
Office of Financial Management

SUBJECT: Flint Water Expenditure and Activity Tracking

In order to facilitate the tracking and monitoring of expenditures and activity related to the Flint water emergency, the Office of Financial Management (OFM) has established the following coding and processes. The coding and processes described in this memo will be used to track expenditures in MAIN and state employee activity in DCDS. Separate instructions regarding the tracking of outputs related to the Flint water emergency will be forthcoming.

Expenditure of Funds Appropriated in Public Act 3 of 2016

OFM has established a line item appropriation number (88500) that will be used for all appropriations included in Public Act 3 of 2016 (HB 5520). Each affected agency is responsible for submitting Electronic Budget Adjustment (EBA) documents using the appropriation number established by OFM and providing the necessary D23 coding for the funding source(s) identified in the appropriation act.

In addition to the submitting EBA documents, affected agencies must establish and use Program Cost Account (PCA) coding in MAIN to specify which of the activities identified in the appropriation act boilerplate are supported by expenditures. Each of the established PCA codes must include multipurpose code FNT-WTR. OFM will contact affected agencies within the next week to discuss establishment and use of the needed PCA codes in more detail.

Please note that these instructions apply only to funds appropriated in Public Act 3 of 2016. Additional instructions will be issued when future appropriations related to the Flint water emergency are enacted.

Flint Water Expenditure and Activity Tracking
Page 2
February 1, 2016

Expenditure of Other Funds

OFM has established MAIN multipurpose code FNT-WTR to be used by agencies to track expenditures of funds not appropriated in Public Act 3 of 2016 that are related to the Flint water emergency. FNT-WTR is a statewide multipurpose code that is available for use with any PCA code.

If your agency already uses multipurpose code in a manner that conflicts with using it as described above, please contact OFM as soon as possible to discuss alternative methods for tracking.

Tracking Time and Activity in DCDS

OFM has established a DCDS activity code (FDWP) that affected state employees should use to record the amount of time spent on activities related to the Flint water emergency. The activity code will be used to track employee hours devoted to activities related to the Flint water emergency. It is separate from and will have no impact on the expenditure tracking that will occur in MAIN. If employees are not familiar with the DCDS activity reporting process, the reporting is done biweekly on the "Activity" tab of the DCDS timesheet.

If you have questions regarding this memo, please contact Lora Mikula at 373-0447 or MikulaL@michigan.gov.

Subject: Flint FOIA - DTMB Systems

SMT Members:

In response to the Flint FOIA Project we have compiled a list of DTMB-owned systems that may need to be searched depending on *whether or not the systems listed would reasonably contain any of the search terms* sent on Friday (see search terms below). We are not asking you to perform any searches at this time, additional instructions are forthcoming.

What I need from you is to:

- 1) review the list and tell me whether the systems listed may contain the search terms (center column);
- 2) notify me if there are DTMB systems that are not listed that may contain the search terms;
- 3) tell me who is the individual responsible for performing the search in the system on behalf of the custodians (right column);

This information is due back to me close of business (5:00pm) today, Wednesday.

Subject: Volunteer Opportunity in Flint

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.
Michigan State Employee banner image

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJKK>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

THIS WEEK IN POLITICS

Flint Fallout, Corruption in Court and One State's New Supermajority

BY ALAN GREENBLATT

This was a busy week in politics -- but then, practically every week is. That's why *Governing* is offering this new weekly newsletter.

We won't cover the presidential campaign -- you can find plenty of that elsewhere. Instead, we aim to share with you the most interesting and important developments in state and local politics each week.

You can sign up for a free subscription [here](#).

ADVERTISEMENT ... Content continues below

Flint Curbs Snyder's Future

Although it's premature to call him a lame duck, Michigan Gov. Rick Snyder's political capital has clearly been diminished by the Flint water crisis. During his State of the State address on Tuesday, Snyder offered lots of apologies: "You did not create this crisis;" "Government failed you;" and, "I'm sorry."

Since winning re-election in 2014, Snyder had been mentioned as a potential presidential or vice presidential pick on the Republican side. That kind of talk, however, has abruptly ended. "Even some Michigan Republicans concede that Snyder's national prospects are toast, at least in the short term," reports *Politico*.

MCSC celebrates Mentoring Month with the Detroit Pistons

MCSC celebrated Mentoring Month with the Detroit Pistons as the two organizations teamed up to host Mentor Michigan Night at the Palace of Auburn Hills. More than 100 people involved with mentoring programs attended the event.

Mentor Michigan redevelops Quality Based Mentoring Standards

In September 2015, MENTOR: the National Mentoring Partnership released the 4th edition of the Elements of Effective Practice for Mentoring. In response, Mentor Michigan has redeveloped Quality Based Mentoring Standards in order to reflect the most up-to-date research in the mentoring field. This new and improved system will enable us to increase our level of engagement with mentoring programs, ensuring that all youth in Michigan receive the level of support they need. Quality Rated Programs will receive special offers and opportunities for national exposure.

Save on the ground

The Corporation for National and Community Service (CNCS) announced it is deploying an AmeriCorps team to Flint, to support state and local efforts to protect the public health of residents facing challenges from increased lead levels in the Flint water supply.

"National service is all about getting things done to solve local problems, and we are committed to supporting Flint at this time of need," said Wendy Spencer, CEO of CNCS.

Funding Alerts

Scotts Miracle-Gro GRO1000 Grassroots Grants

The Scotts Miracle-Gro Company's GRO1000 Grassroots Grants help foster the development of gardens and green spaces in the United States. Grants of up to \$1,500 are awarded to local communities throughout the country to help bring edible gardens, flower gardens and public green spaces to more neighborhoods.

Teacher Vision Grants

American Electric Power will combine your teaching talents and creativity with our resources and desire to help you make a difference in your students' lives. Available for teachers of pre-k through grade 12 with projects that have an academic focus and a goal to improve student achievement. Grants range from \$100 to \$500.

Kars4Kids Grants

Kars4Kids is constantly on the lookout for like-minded charities which share our values and are working hard to make a difference

[Michigan](#)

[Willow Farm Therapeutic Riding](#)

[Feeding America West Michigan](#)

in the areas of education and youth development. Grants typically range from \$500-\$2,000, depending on mission alignment and availability of funds.

Walmart Foundation State Giving Program

Applications will be accepted for programs within the scope of one of the following focused giving areas: career opportunity, hunger and healthy eating or disaster preparedness. Grants range from \$25,000 to \$250,000.

National Arts and Humanities Youth Program Awards

The National Arts and Humanities Youth Program Awards, sponsored by the President's Committee on the Arts and the Humanities, recognizes excellence in after-school and out-of-school arts and humanities programs for underserved children and youth. Twelve winners will receive a \$10,000 award and an invitation to accept their award at a White House ceremony.

Volunteer opportunities

Junior Achievement of Mid-Michigan

Junior Achievement offers programs to teach young people career and life skills. JA programs are five to seven sessions usually taught over the course of several weeks to students in K-12th grade.

Willow Farm Therapeutic Riding

Willow Farm Therapeutic Riding serves as a center for continual development, implementation and evaluation of a therapeutic riding program for children and young adults between the ages of 4 and 26, all of whom have a physician-diagnosed disability. Volunteer opportunities include sidewalkers and horse leaders.

Feeding America West Michigan

Feeding America West Michigan Food Bank provides food to 492,100 people in need each year. In one hour, volunteers can help distribute 150 meals.

About the MCSC

The Michigan Community Service Commission utilizes service as a strategy to address the state's most pressing issues and empowers volunteers to strengthen communities. In 2015-2016, the MCSC is granting more than \$7 million in federal funds to local communities for volunteer programs and activities. The MCSC is funding 29 AmeriCorps programs and four My Brothers Keeper grantees. The Governor's Service Awards and Mentor Michigan are also premier programs of the MCSC. www.michigan.gov/volunteer

How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm came from people who worked for me, and I feel responsible for that. But I am committed

to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." Click [here](#) to read the Governor's full op-ed.

Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. [Click here to read the full story in the Washington Post.](#)

Subject: Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – www.helpforflint.com – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. [Administrative Policy 200.37](#) establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at behend@michigan.gov.

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

<http://www.scribd.com/doc/297005752/DTMB-Facility-Notification>

State Arranged Water Coolers For Flint State Workers Last Year

The state began arranging for water coolers to be placed in a Flint state office building in January 2015, after the city issued a notice about the city's drinking water standards, according to an email obtained by Progress Michigan.

The email unveiled a "facility notification" sent out by the Michigan Department of Technology, Management and Budget (DTMB) on Jan. 7, 2015 that said "DTMB is in the process of providing a water cooler on each occupied floor" in response to the city's notice about drinking water standard violations.

The subject of the email read "Facility Notification: Flint State Office Building."

The state has been criticized for its slow response to Flint residents' concerns about their water, given complaints about the taste and color of the water began shortly after the switch from the Detroit municipal system to the Flint River in April 2014.

Gov. Rick [SNYDER](#) has set Oct. 1 as the date when he and his administration publicly acknowledged the link between elevated blood lead levels in Flint residents and the Flint water switch and subsequently reacted.

But the standard violations referenced in the notice made public today had to do with levels of total trihalomethanes (TTHM) in Flint's water, an issue the state had been monitoring since the summer of 2014.

The state flagged Flint water for violating TTHM standards, which the state has considered not so much an immediate public health, but rather one that is more threatening with long-term exposure (See "[DEQ: Flint Focused On Different Health Issue With Flint Water](#)," 1/21/16).

The DTMB email from Jan. 7, 2015 also stated, "the coolers will arrive today and will be provided as long as the public water does not meet treatment requirements."

The city's water didn't return to TTHM compliance until September 2015. DTMB spokesperson Caleb [BUHS](#) said the

state has continued to provide water coolers in the Flint state office building, but DTMB couldn't provide an estimate of how much that has cost.

The email chain released by Progress Michigan also shows officials with the Michigan Department of Environmental Quality (DEQ) were looped in on DTMB's actions regarding the water coolers in the Flint state office building in January 2015.

"Gov. Snyder needs to explain to the people of Flint why his administration trucked water into a state building while allowing residents to drink unsafe water," said Progress Michigan Director Lonnie **SCOTT**.

DTMB provided one water cooler per floor at a time when people in the city were concerned by the color and odor of the water, said Snyder spokesperson Dave **MURRAY**. "The city at the time said no corrective action was needed for the water. The coolers were placed near the water fountains so employees had a choice. The state was working with city to address those problems, as evidenced by the \$2 million grant for water infrastructure.

"As we know now, there was a failure at all levels of government regarding Flint water. Once Gov. Snyder became aware of the lead problems, he responded aggressively," Murray said "We continue to work to address the immediate needs of the people in Flint as well as potential long-term problems caused by the lead issue."

THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit www.HelpForFlint.com to learn how you can do so. For additional information and to sign up for daily updates, please visit www.mi.gov/FlintWater. I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

Subject: "Flint residents should not have to pay for water they cannot drink"

Budget recommendation will include \$30 million request for Flint water bill repayments

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a \$30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly 65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking, and washing your hands. Residents still would be responsible for paying the sewer portion

of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

[Click here to learn more about the budget request.](#)

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at www.mi.gov/flintwater. **Click here to watch the video.**

THIS WEEK IN POLITICS

Top Officials at Risk and Unresolved 2016 Election Maps

BY ALAN GREENBLATT

Statewide Officials Find Themselves at Risk

Executive branch jobs are generally more stable than legislative positions. But some didn't seem too secure this week.

In Michigan, the drumbeat of complaints about Republican Gov. Rick Snyder just keep getting louder. On Monday, the Board of State Canvassers approved one of many recall petitions, which gives Snyder's critics a green light to collect signatures to put a recall measure on the November ballot. The approved petition has to do with education, but any recall campaign will focus squarely on how Snyder has handled the Flint water crisis.

In Indiana, Republican Gov. Mike Pence, who is up for re-election this fall, picked a new running mate this week after his quit. Lt. Gov. Sue Ellspermann is up for a job running a community college system, so Pence turned to Eric Holcomb, a former chair of the state GOP, to shore up his ties with party activists.

"By selecting Holcomb as his running mate, Pence sent a clear message about how endangered his political career is," wrote Matthew Tully, a columnist with the *Indianapolis Star*.

Pence is being challenged by Democrat John Gregg, a former House speaker.

Subject: FW: NEW DEADLINE - Time Sensitive Request

Phil:

I have to go meet with Bankowski at 9:15 to prep for tomorrow's Risk Committee meeting, at which I'll be discussing MICWRAP status, so we'll have to re-schedule our 1 x 1 (it is/was scheduled for 9:00 today).

Related to the request below, here are the names of staff in FS that we need to respond to Jean with (I talked to both Greg and Natalie about it this morning):

Natalie Spaniolo
Lacy Wilke
Marsha Stansfield
Denice Ballard
Trisha Hampton

Greg DeCamp
Jennifer Gibson
Dane Hengesbach

Both thought that the "search term" that may appear within some of their communications (or their staffs') would be the one with "emergency" and "Flint" (none of the other "search terms", we think)

Subject: NEW DEADLINE - Time Sensitive Request

Senior Management Team,

We just received the search terms for the document production. (See below.) Given the lateness of this email, we are asking you send your list of custodians to Jean Ingersoll no later than noon on Tuesday, February 16.

We are not asking you to conduct any searches right now. Further directions will come from Jean.

Search terms:

Legionnaire

Legionella

"boil water order" & "Flint" (anywhere in document) "coli" & Flint (anywhere in document) "bacteria" & "Flint" (anywhere in document) "microb" & "Flint" (anywhere in document) "TTHM" & "Flint" (anywhere in document) "Lead" & "Flint" (anywhere in document) "emergency" & "Flint" (anywhere in document) Karegnondi "Genesee County Health Department"

"Flint" (within sentence) "utilities"

"Lead and Copper Rule"

"Detroit Water and Sewerage Department" & "Flint" (anywhere in document) "DWSD" & "Flint" (anywhere in document) "Flint River"

"Pb" & "water" (anywhere in document)

"KWA"

Please call me or Jean if you have any questions.

Subject: Time Sensitive Request

SMT,

Jean Ingersoll is leading DTMB's effort to comply with document production requests related to freedom of information requests and certain lawsuits against the state.

At some point during the day tomorrow, Jean will share with you a list of standard "search terms" which we will use to compile documents related to this lawsuit.

Within 2 hours of receiving this email from Jean, you need to respond with a list of likely custodians from your work area.

Jean may have more information on this tomorrow, but generally speaking a custodian will be a staff member who might reasonably be expected to have documents (electronic or otherwise) that correspond to the issues identified in the search terms.

If you have any questions, please call me or Jean. This is an important issue and I thank you in advance for your attention to this matter.

Brom Stibitz

Subject: Flint FOIA - DTMB Systems

SMT Members:

In response to the Flint FOIA Project we have compiled a list of DTMB-owned systems that may need to be searched depending on whether or not the systems listed would reasonably contain any of the search terms sent on Friday (see search terms below). We are not asking you to perform any searches at this time, additional instructions are forthcoming.

What I need from you is to:

- 1) review the list and tell me whether the systems listed may contain the search terms (center column);
- 2) notify me if there are DTMB systems that are not listed that may contain the search terms;
- 3) tell me who is the individual responsible for performing the search in the system on behalf of the custodians (right column);

This information is due back to me close of business (5:00pm) today, Wednesday.

Importance: High

Phil:
I have to go meet with Bankowski at 9:15 to prep for tomorrow's Risk Committee meeting, at which I'll be discussing MICWRAP status, so we'll have to re-schedule our 1 x 1 (it is/was scheduled for 9:00 today).

Related to the request below, here are the names of staff in FS that we need to respond to Jean with (I talked to both Greg and Natalie about it this morning):

Natalie Spaniolo
Lacy Wilke
Marsha Stansfield
Denice Ballard
Trisha Hampton

Greg DeCamp
Jennifer Gibson
Dane Hengesbach

Both Natalie and Greg thought that the "search term" that may appear within some of their communications (or their staffs') would be the one with "emergency" and "Flint" (none of the other "search terms", we think). Anyway, let me know if you want to send these on to Jean or if you'd like me to.

Thanks,
Mike

Subject: NEW DEADLINE - Time Sensitive Request

Senior Management Team,

We just received the search terms for the document production. (See below.) Given the lateness of this email, we are asking you send your list of custodians to Jean Ingersoll **no later than noon on Tuesday, February 16.**

We are not asking you to conduct any searches right now. Further directions will come from Jean.

Search terms:

Legionnaire
Legionella
“boil water order” & “Flint” (anywhere in document)
“coli” & Flint (anywhere in document)
“bacteria” & “Flint” (anywhere in document)
“microb” & “Flint” (anywhere in document)
“TTHM” & “Flint” (anywhere in document)
“Lead” & “Flint” (anywhere in document)
“emergency” & “Flint” (anywhere in document)
Karegnondi
“Genesee County Health Department”
“Flint” (within sentence) “utilities”
“Lead and Copper Rule”
“Detroit Water and Sewerage Department” & “Flint” (anywhere in document)
“DWSD” & “Flint” (anywhere in document)
“Flint River”
“Pb” & “water” (anywhere in document)
“KWA”

Please call me or Jean if you have any questions.

Subject: Time Sensitive Request

SMT,

Jean Ingersoll is leading DTMB's effort to comply with document production requests related to freedom of information requests and certain lawsuits against the state.

At some point during the day tomorrow, Jean will share with you a list of standard "search terms" which we will use to compile documents related to this lawsuit.

Within 2 hours of receiving this email from Jean, you need to respond with a list of likely custodians from your work area. Jean may have more information on this tomorrow, but generally speaking a custodian will be a staff member who might reasonably be expected to have documents (electronic or otherwise) that correspond to the issues identified in the search terms.

If you have any questions, please call me or Jean. This is an important issue and I thank you in advance for your attention to this matter.

Subject: Flint FOIA - DTMB Systems

SMT Members:

In response to the Flint FOIA Project we have compiled a list of DTMB-owned systems that may need to be searched depending on *whether or not the systems listed would reasonably contain any of the search terms* sent on Friday (see search terms below). We are not asking you to perform any searches at this time, additional instructions are forthcoming.

What I need from you is to:

- 1) review the list and tell me whether the systems listed may contain the search terms (center column);
- 2) notify me if there are DTMB systems that are not listed that may contain the search terms;
- 3) tell me who is the individual responsible for performing the search in the system on behalf of the custodians (right column);

This information is due back to me close of business (5:00pm) today, Wednesday.

Electronic/DTMB Systems	E-Mich	Pauley (Swanson) (Already public facing?)
	Buy4Mich	Maynard (Brownlee/Wellman)
	MAIN	Dave Gabler (Brownlee/Wellman)
	MPSCS	Brad Stoddard (Swanson)
	Anything Related to Cyber?	Christian Kopacsi
	FileNet	Demello (Swanson)
	Time and Expense	Laurie Westfall/Dave Gabler (McFarlane)

	DCDS	Laurie Westfall/Dave Gabler (McFarlane)
	X3	Turnquist (Stibitz)
	HPTrim	Kristi Thompson (Joyce Vancouvering)

Subject: Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – www.helpforflint.com – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. [Administrative Policy 200.37](#) establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at behend@michigan.gov.

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit www.HelpForFlint.com to learn how you can do so. For additional information and to sign up for daily updates, please visit www.mi.gov/FlintWater. I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

Subject: "Flint residents should not have to pay for water they cannot drink"

Budget recommendation will include \$30 million request for Flint water bill repayments

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a \$30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

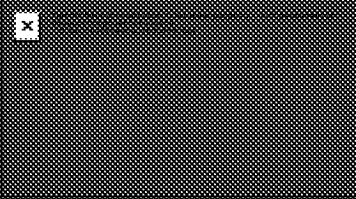

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly

65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking, and washing your hands. Residents still would be responsible for paying the sewer portion of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

[Click here to learn more about the budget request.](#)

 Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.
[Learn more about the \\$20 million request](#)

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at www.mi.gov/flintwater. [Click here to watch the video.](#)

VIDEO: What Governor Snyder's FY17 budget means for Michigan

Gov. Rick Snyder's FY 2017 budget calls for critical investments for the Flint water crisis, statewide infrastructure and the Detroit Public Schools. The governor's recommendation also addresses the skyrocketing costs of specialty medications that Michigan residents depend on for better health outcomes.

This budget also stays committed to the Governor's core statewide priorities of education, talent and economic development, health and human services, and public safety.

The proposed FY 2017 budget makes key investments to strengthen the state for all of Michigan's families. [Click here to learn more about the top 6 takeaways from the](#)

VIDEO: How volunteers are helping Flint

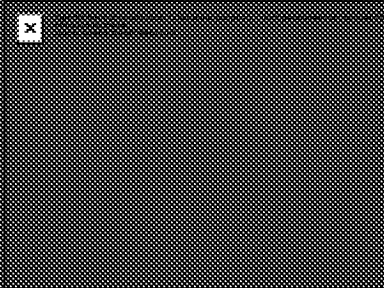

Volunteers at the Food Bank of Eastern Michigan are working hard to collect donations in order to help the families of Flint. Last Thursday, Governor Snyder visited with the many dedicated volunteers and helped sort cans of food.

Good nutrition is critically important for Flint's children. Foods that are high in calcium, vitamin C, and iron can help limit the effects of lead exposure. To donate or volunteer at the Food Bank of Eastern Michigan, visit www.fbem.org.

DTMB Header 022216

Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the \$54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates \$1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of \$1.3 billion for department operations and a one-time allocation of \$32.4 million.

A few highlights include:

- \$502 million for information technology support for all state agencies and \$132.8 million for

14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by \$7 million, from \$65 million to \$72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.

- An additional \$5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of \$6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at behend@michigan.gov.

Thank you again for all the good work you do. I hope you have a great week ahead.

David

Michigan State Employee banner image

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJKK>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

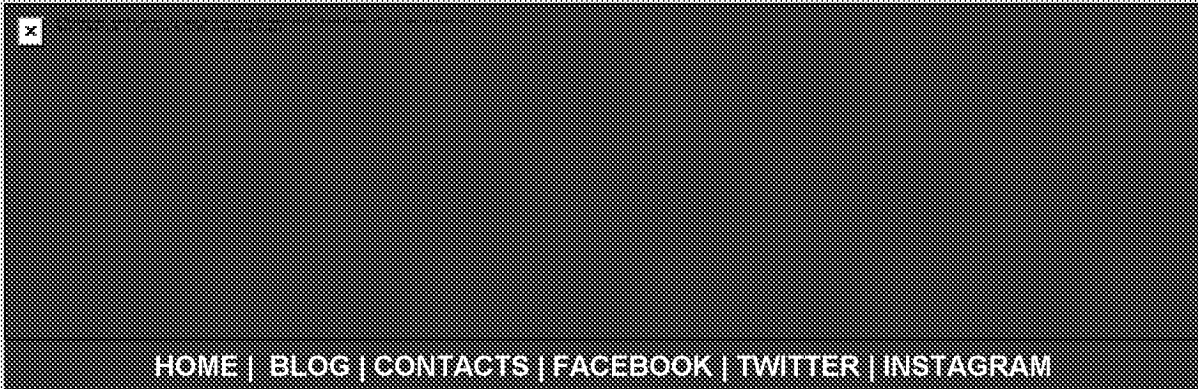

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm

came from people who worked for me, and I feel responsible for that. But I am committed to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

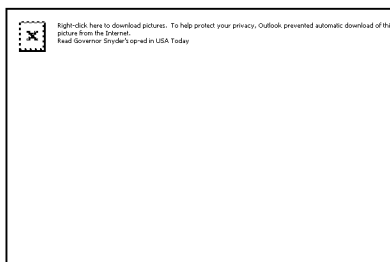

Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." Subject: Flint Mailing

As a follow up to my voice mail, I used the following website to figure out what zip codes may be involved servicing flint proper.

<http://www.mapzipcode.com/michigan/flint/>

The mapping suggests 48502 and 48503 covers most of the city of flint, but does the water issue go beyond the city proper? (26,271 population) Someone would need to confirm if those zip codes are all that need to be contacted or if more are involved.

Once known, from the USPS site we could figure out how many actual mailing addresses are in those zip codes. Also a decision of whether to mail to just residents, or both residents and businesses would need to be made.

I see from the USPS site it may be possible to mail for a little as 5.4 cents postage for each piece.

Subject: Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – www.helpforflint.com – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. [Administrative Policy 200.37](#) establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at behend@michigan.gov.

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

Subject: Thank you for your service

THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit www.HelpForFlint.com to learn how you can do so. For additional information and to sign up for daily updates, please visit www.mi.gov/FlintWater. I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

Governor Rick Snyder

Subject: "Flint residents should not have to pay for water they cannot drink"

Budget recommendation will include \$30 million request for Flint water bill repayments

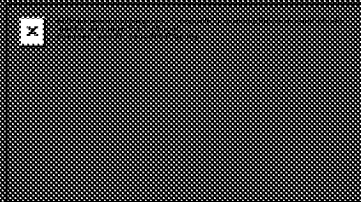

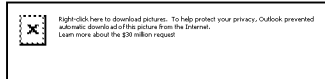

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a \$30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly 65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking, and washing your hands. Residents still would be responsible for paying the sewer portion

of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

[Click here to learn more about the budget request.](#)

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at www.mi.gov/flintwater. **Click here to watch the video.**

Subject: Time Sensitive Request

SMT,

Jean Ingersoll is leading DTMB's effort to comply with document production requests related to freedom of information requests and certain lawsuits against the state.

At some point during the day tomorrow, Jean will share with you a list of standard "search terms" which we will use to compile documents related to this lawsuit.

Within 2 hours of receiving this email from Jean, you need to respond with a list of likely custodians from your work area. Jean may have more information on this tomorrow, but generally speaking a custodian will be a staff member who might reasonably be expected to have documents (electronic or otherwise) that correspond to the issues identified in the search terms.

If you have any questions, please call me or Jean. This is an important issue and I thank you in advance for your attention to this matter.

Subject: The Gov. Snyder's Budget Proposal

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.
DTMB Header 02/22/16

Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the \$54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates \$1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of \$1.3 billion for department operations and a one-time allocation of \$32.4 million.

A few highlights include:

- \$502 million for information technology support for all state agencies and \$132.8 million for 14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by \$7 million, from \$65 million to \$72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.
- An additional \$5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of \$6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at behend@michigan.gov.

Thank you again for all the good work you do. I hope you have a great week ahead.

David

Subject: Volunteer Opportunity in Flint

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.
Michigan State Employees banner image

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJKB>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

Subject: Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit www.helpforflint.com to learn how you can help.

For additional information and updates, visit www.michigan.gov/flintwater.

Again, thank you for all your support.

Sincerely, Mike Zimmer
Office of Good Government Director

VIDEO: How volunteers are helping Flint

Volunteers at the Food Bank of Eastern Michigan are working hard to collect donations in order to help the families of Flint. Last Thursday, Governor Snyder visited with the many dedicated volunteers and helped sort cans of food.

Good nutrition is critically important for Flint's children. Foods that are high in calcium, vitamin C, and iron can help limit the effects of lead exposure. To donate or volunteer at the Food Bank of Eastern Michigan, visit www.fbem.org.

Click here to watch the video and learn more about how the Food Bank of Eastern Michigan is helping Flint's families.

Melvia, I did have a conversation with the agency who would be responsible for public notification regarding the City of Flint's water supply. My recommendation was to use the USPS Every Door Direct Product. I shared options of searching out how to identify the population and postal routes. But since I have not heard anything about whether the agency will be sending a mailing at this time.

Hi Tom,

It is so much going on with the water now, they may have put it on the back burner. We could do a 20 minute presentation to show them the benefit of getting their point of view to the residents. Television can be so negative. Everyone is pointing fingers and throwing blame. Mail is stealth. They could get their message across without the noise. The use of mail could help rebuild the trust of the residents. Let me know what time and day would be good for a short meeting.

Subject: Are you involved?

Hi!

This is the project Melvia was talking about the other day. Are you involved?

We are looking for a sample of the letter and the volumes that are getting dropped.

Elaine

FLINT, MI — In a joint effort to inform the community about lead exposure<http://www.mlive.com/lansing-news/index.ssf/2015/10/michigan_deq_audit_expanded_to.html>, the Genesee County Health Department and Michigan Department of Health and Human Services will send letters to parents.

The letters, to be sent this week, will provide parents with information about lead testing, how to reduce lead exposure and where lead comes from, as well as other useful information. Children may be exposed to lead from drinking water in lead pipes, old lead paint, soil, pottery, cosmetics, toys and some household remedies, according to a joint news release from the GCHD and MDHHHS.

Adult jobs and hobbies — such as auto repair, stained glass and jewelry making, as well as ammunition handling, also may put children at risk if they touch clothing or play in areas where lead is found, according to the release.

Following results that showed elevated blood lead levels<http://www.mlive.com/news/flint/index.ssf/2015/10/blood_lead_clinic_to_be_held_f.html> for some Flint children, the GCHD and MDHHHS have worked together to develop guidance for families.

Routine lead testing should be part of well-child visits at ages 1 and 2, according to the release.

"This is a good time to check with your health care provider to make certain your child has been tested at the recommended times and, if not, have the test performed," Dr. Gary Johnson, medical director at the Genesee County Health Department, said in a statement.

The GCHD and MDHHHS are issuing the following recommendations for parents:

* Families who live in the city of Flint and are on the Flint water system, or who have children attending school, child care or spending time with a caregiver in the city, are encouraged to get their children at their doctor's offices or the GCHD.

* Families may get their water tested for lead for free by calling 810-787-6537<tel:810-787-6537> for details.

* Families are encouraged to use NSF Certified water filters in their homes. Free filters still are available. Call 211 for information about where to pick up a free filter.

* Run only cold water through the filter.

* Use filtered or bottled water for drinking — including making coffee, drink mixes, juice and baby formula — and cooking. Even if people boil water, the lead will stay in the water and food.

* People can use unfiltered tap water for washing hands and dishes. If people must use unfiltered water for drinking or cooking, run the tap for five minutes before using the tap water.

* Safe cleaning also can reduce risk of lead exposure in homes. People can use unfiltered tap water to wipe countertops, mop floors and wash clothes.

* Keep children away from lead paint and dust. Use wet paper towels to clean up lead dust around windows, play areas and floors. Wash hands and toys often, using soap and water.

* Always wash fruits with filtered water. Some foods help keep lead from being stored in a child's body, such as foods rich in calcium and iron and foods with vitamin C.

The GCHD and MDHHHS plan to continue providing information to the community on lead exposure and protecting the health of residents, according to the release. For more information, click here<<http://www.michigan.gov/lead>>.

The letters, to be sent this week, will provide parents with information about lead testing, how to reduce lead exposure and where lead comes from, as well as other useful information. Children may be exposed to lead from drinking water in lead pipes, old lead paint, soil, pottery, cosmetics, toys and some household remedies, according to a joint news release from the GCHD and MDHHS.

Adult jobs and hobbies — such as auto repair, stained glass and jewelry making, as well as ammunition handling, also may put children at risk if they touch clothing or play in areas where lead is found, according to the release.

Following results that showed elevated blood lead levels<http://www.mlive.com/news/flint/index.ssf/2015/10/blood_lead_clinic_to_be_held_f.html> for some Flint children, the GCHD and MDHHS have worked together to develop guidance for families.

Routine lead testing should be part of well-child visits at ages 1 and 2, according to the release.

"This is a good time to check with your health care provider to make certain your child has been tested at the recommended times and, if not, have the test performed," Dr. Gary Johnson, medical director at the Genesee County Health Department, said in a statement.

The GCHD and MDHHS are issuing the following recommendations for parents:

- * Families who live in the city of Flint and are on the Flint water system, or who have children attending school, child care or spending time with a caregiver in the city, are encouraged to get their children at their doctor's offices or the GCHD.

- * Families may get their water tested for lead for free by calling 810-787-6537<tel:810-787-6537> for details.
- * Families are encouraged to use NSF Certified water filters in their homes. Free filters still are available. Call 211 for information about where to pick up a free filter.
- * Run only cold water through the filter.
- * Use filtered or bottled water for drinking — including making coffee, drink mixes, juice and baby formula — and cooking. Even if people boil water, the lead will stay in the water and food.
- * People can use unfiltered tap water for washing hands and dishes. If people must use unfiltered water for drinking or cooking, run the tap for five minutes before using the tap water.
- * Safe cleaning also can reduce risk of lead exposure in homes. People can use unfiltered tap water to wipe countertops, mop floors and wash clothes.
- * Keep children away from lead paint and dust. Use wet paper towels to clean up lead dust around windows, play areas and floors. Wash hands and toys often, using soap and water.
- * Always wash fruits with filtered water. Some foods help keep lead from being stored in a child's body, such as foods rich in calcium and iron and foods with vitamin C.

The GCHD and MDHHHS plan to continue providing information to the community on lead exposure and protecting the health of residents, according to the release. For more information, click here<<http://www.michigan.gov/lead>>.

Ruth, I found out we did prepare some envelopes (hand-outs) approx. 12,500 for community health for the flint water issue, but we haven't heard of a U.S. mailing as yet. I'll keep you posted.

Michigan State Employee banner image

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJKK>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm

came from people who worked for me, and I feel responsible for that. But I am committed to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

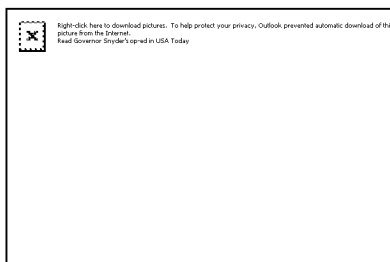

Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." Click [here](#) to read the Governor's full op-ed.

Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. [Click here to read the full story in the Washington Post.](#)

Subject: Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit www.helpforflint.com to learn how you can help.

For additional information and updates, visit www.michigan.gov/flintwater.

Again, thank you for all your support.

Sincerely, Mike Zimmer

Subject: Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – www.helpforflint.com – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. [Administrative Policy 200.37](#) establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at behend@michigan.gov.

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit www.HelpForFlint.com to learn how you can do so. For additional information and to sign up for daily updates, please visit www.mi.gov/FlintWater. I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

Subject: "Flint residents should not have to pay for water they cannot drink"

Budget recommendation will include \$30 million request for Flint water bill repayments

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a \$30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly

65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking, and washing your hands. Residents still would be responsible for paying the sewer portion of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

[Click here to learn more about the budget request.](#)

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at www.mi.gov/flintwater. [Click here to watch the video.](#)

I under estimated. Spent \$18,592.85 at Apple and still need to go to Verizon.

Hi Dave – If we have Jimmy John's direct bill us for food that we are ordering for the volunteers that are distributing the water in Flint, for dinner tonight, can we use the corporate office vendor ID that is in MAIN or would we have to have the restaurant here in Flint fill out paperwork?

Good Morning,

An exemption to purchase Jimmy John's for volunteers that are distributing water in Flint is approved. Please ensure that you print this email and attach it to the transaction detail in which you purchase appears.

Let me know if you estimate that the purchase will be more than \$2,500.

Thanks,
Trisha

Chris,

Can you confirm the Walmart charge was for bottled water for Flint residents. Water filters (Walmart is to donate them)

Also, can you tell us if you've placed any other orders related to the Flint water crisis. Printing, Temporary Fuel Cards, Rental agreement for warehouse space, 30 tablets

We've heard truckloads of water are coming daily and wonder who may have placed the order and what funds are being used to pay for it. The funds will be taken out of DHHS's supplemental funding to pay for 72 trucks at \$5,538.12 a truck, total cost \$398,744.64

VIDEO: What Governor Snyder's FY17 budget means for Michigan

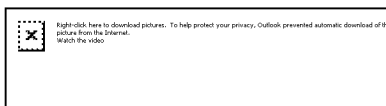

Gov. Rick Snyder's FY 2017 budget calls for critical investments for the Flint water crisis, statewide infrastructure and the Detroit Public Schools. The governor's recommendation also addresses the skyrocketing costs of specialty medications that Michigan residents depend on for better health outcomes.

This budget also stays committed to the Governor's core statewide priorities of education, talent and economic development, health and human services, and public safety.

The proposed FY 2017 budget makes key investments to strengthen the state for all of Michigan's families. [Click here to learn more about the top 6 takeaways from the](#)

Subject: VIDEO: Volunteering in Flint

VIDEO: How volunteers are helping Flint

Volunteers at the Food Bank of Eastern Michigan are working hard to collect donations in order to help the families of Flint. Last Thursday, Governor Snyder visited with the many dedicated volunteers and helped sort cans of food.

Good nutrition is critically important for Flint's children. Foods that are high in calcium, vitamin C, and iron can help limit the effects of lead exposure. To donate or volunteer at the Food Bank of Eastern Michigan, visit www.fbem.org.

Subject: The Gov. Snyder's Budget Proposal

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.
DTMB Header 02/22/16

Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the \$54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates \$1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of \$1.3 billion for department operations and a one-time allocation of \$32.4 million.

A few highlights include:

- \$502 million for information technology support for all state agencies and \$132.8 million for 14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by \$7 million, from \$65 million to \$72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.
- An additional \$5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of \$6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at behend@michigan.gov.

Thank you again for all the good work you do. I hope you have a great week ahead.

David

Subject: Flint Water Crisis - P-Card limit

Hi Trisha,

We have been helping out with the Flint water crisis. We have used our drivers and trucks. They were still in need of more trucks and drivers, so I was asked to rent 3 24' straight trucks with lift gate to help out in Flint. Because of the urgency to get these trucks rented and be available for Flint, I put them on my P-Card. I do not have an end date of when we will be done with these, so I will need an increase to both my single limit and my cycle limit to be able to pay for these.

Kristi has approved this as well.

Thank you for all of your help Trisha!

Chris,

Can you confirm the Walmart charge was for bottled water for Flint residents. Water filters (Walmart is to donate them)

Also, can you tell us if you've placed any other orders related to the Flint water crisis. Printing, Temporary Fuel Cards, Rental agreement for warehouse space, 30 tablets

We've heard truckloads of water are coming daily and wonder who may have placed the order and what funds are being used to pay for it. The funds will be taken out of DHHS's supplemental funding to pay for 72 trucks at \$5,538.12 a truck, total cost \$398,744.64

Sent: Wednesday, February 03, 2016 6:16 PM
To: Hodgman, Steve (DTMB)
Subject: "Flint residents should not have to pay for water they cannot drink"

Budget recommendation will include \$30 million request for Flint water bill repayments

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a \$30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly 65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking, and washing your hands. Residents still would be responsible for paying the sewer portion

of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

[Click here to learn more about the budget request.](#)

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at www.mi.gov/flintwater. **Click here to watch the video.**

Return sample and form to either Flint City Hall or the Flint Water Plant.
Samples must be received in the laboratory within 14 days of collection.

DRINKING WATER LEAD AND COPPER SAMPLING INSTRUCTIONS

Thank you for helping to monitor for lead and copper in your drinking water.

It is important that you follow these instructions so we obtain an accurate measurement of the lead and copper in your drinking water.

Do not open the bottle until instructed in step 3. Do not touch the inside of cap or bottle.

- 1. The water in the house must not have been used for a minimum of six (6) hours prior to sampling.** The best times to sample are early morning or after returning from work. **Do not flush the sample tap before sample collection.**
- 2. Select a cold water faucet in the KITCHEN or BATHROOM** that is commonly used for drinking and has been used within the last 24 hours. **No other faucets are acceptable for collection.** If the faucet is connected to a faucet mount filter, water softener, iron filter or reverse osmosis system, etc. the treatment device must be removed or bypassed.

When was the faucet last used before sampling? Date _____ TIME _____ AM/PM

Is there a faucet-mount filter? ☐ YES ☐ NO If YES, was it bypassed? ☐ YES ☐ NO

Is this faucet connected to a home treatment device such as a water softener, a reverse osmosis unit, an iron removal device OR is any kind of additive used in the home? ☐ YES ☐ NO

If YES, please describe: _____

If YES, was it bypassed? ☐ YES ☐ NO

- 3. Open sample bottle and place below the faucet and gently open the COLD water tap.** If you have a single handle faucet, turn it fully to the **COLD** side. Fill the sample bottle to within an inch of the top with the "first draw" of **COLD** water.
- 4. Tightly cap the sample bottle**

If any plumbing repairs or replacement has been done in the home since the previous sampling event, please note this information here:

If YES, please describe: _____

- 5. Fill out the collection information on the front, answer the questions below and sign the form.**
- 6. Attach this form to the bottle and return it to either Flint City Hall or the Flint Water Plant.**
- 7. Thank you again for your help. We will send you your individual results within 30 days of receiving them from the laboratory. A summary of information on this year's lead and copper monitoring will be printed in the annual water quality report that will be made available by July 1 of this year. Contact your water supply if you have questions.**

If you have any questions contact:

City of Flint Water Plant 4500 N. Dort Hwy. Phone: 810-787-6537 ext. 3501

I have read the Drinking Water Lead and Copper Sampling Instructions and have taken a tap sample in accordance with these directions.

Michigan State Employees banner image

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJJK>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

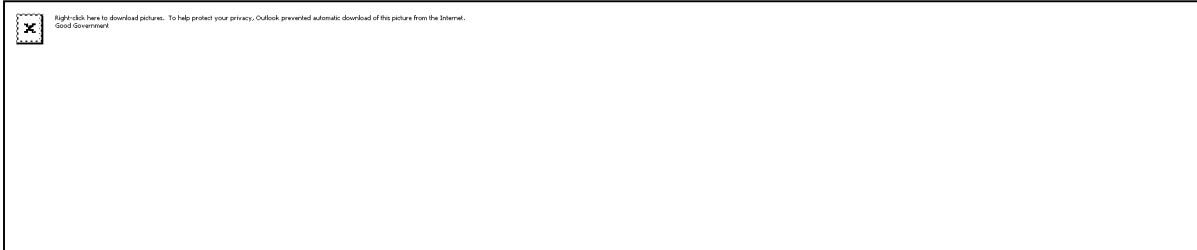

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

Subject: Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit www.helpforflint.com to learn how you can help.

For additional information and updates, visit www.michigan.gov/flintwater.

Again, thank you for all your support.

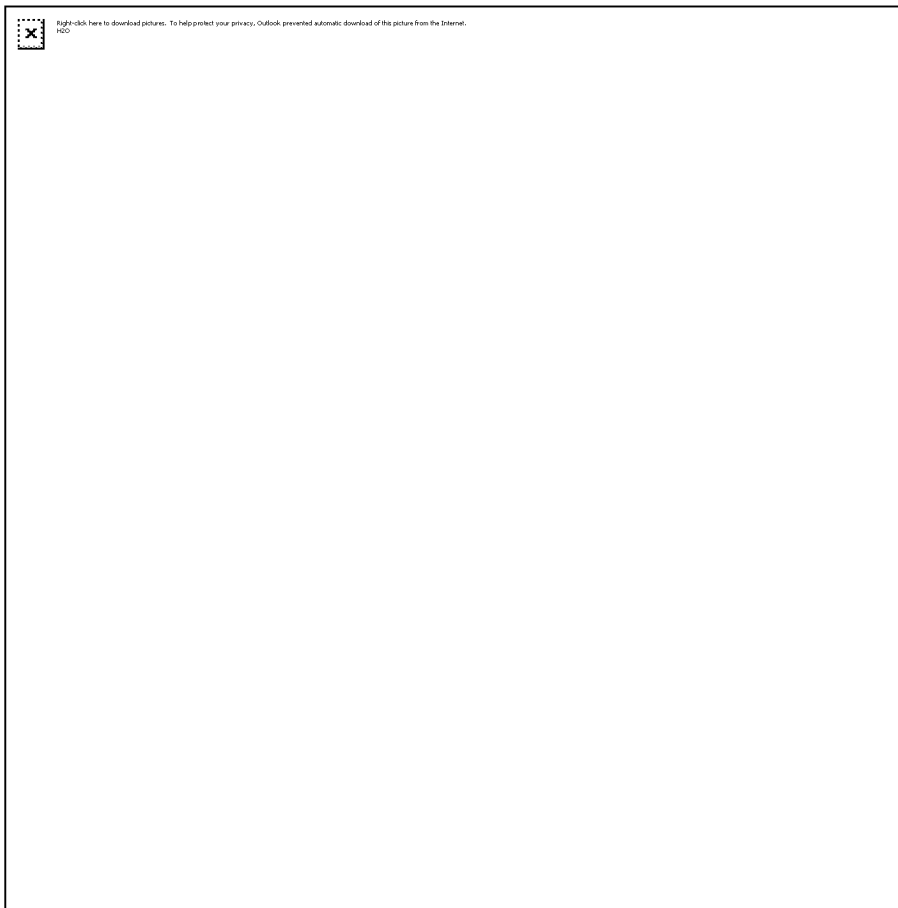

Sincerely, Mike Zimmer
Office of Good Government Director
Dept. of Licensing and Regulatory Affairs Director

Subject: Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – www.helpforflint.com – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. [Administrative Policy 200.37](#) establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at behend@michigan.gov.

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

Entregue la muestra y el formulario en Flint City Hall o Flint Water Plant.

Las muestras deberán ser recibidas en el laboratorio dentro de los 14 días de la recolección.

INSTRUCCIONES DE LA MUESTRA DE PLOMO Y COBRE EN EL AGUA POTABLE

Gracias por ayudar a monitorear el nivel de plomo y cobre en el agua potable.

Es importante que siga estas instrucciones, de modo que podamos obtener mediciones precisas del nivel de plomo y cobre en el agua potable.

No abra la botella hasta que se indique en el paso 3. No toque el lado interno de la tapa o la botella.

- 1. El agua de la casa no deberá haber sido usada por un mínimo de seis (6) horas antes de realizar la muestra.** Los mejores momentos para realizar la muestra son temprano por la mañana o luego de regresar de trabajar. **No deje correr el agua del grifo de la muestra antes de realizar la recolección.**
- 2. Elija un grifo de agua fría** de la **COCINA** o del **BAÑO** que se use comúnmente para beber y que se haya usado dentro de las últimas 24 horas. **Ningún otro grifo es aceptable para la recolección.** Si el grifo está conectado a un filtro de montaje para grifos, ablandador de agua, filtro de hierro o sistema de ósmosis inversa, etc., el dispositivo de tratamiento deberá ser retirado o circundado con un bypass.

¿Cuándo se usó el grifo por última vez antes de la muestra? Fecha _____ HORA _____ AM/PM

¿Hay un filtro de montaje para grifo? ☐ SÍ ☐ NO Si es ASÍ, ¿se usó un bypass? ☐ SÍ ☐ NO

¿Está este grifo conectado a un dispositivo de tratamiento del hogar tal como un ablandador de agua, una unidad de ósmosis inversa, un dispositivo de eliminación de hierro O se usa algún tipo de aditivo en el hogar? SÍ NO

Si es ASÍ, describa: _____

Si es ASÍ, ¿se usó un bypass? ☐ SÍ ☐ NO

- 3. Abra la botella de la muestra y colóquela debajo del grifo y de forma suave abra el grifo de agua FRÍA.** Si cuenta con un grifo con una sola llave, gírela completamente hacia el lado **FRÍO**. Llene la botella de la muestra hasta antes de una pulgada del borde con la "primera carga" de agua **FRÍA**.
- 4. Ajuste bien la tapa de la botella de la muestra.**

Si se realizaron reparaciones de plomería o reemplazos en el hogar desde el momento de la muestra previa, por favor anote esta información aquí:

Si es ASÍ, describa: _____

- 5. Complete la información de recolección en el frente, responda las preguntas anteriores y firme el formulario.**
- 6. Adjunte este formulario a la botella y entréguelo en Flint City Hall o Flint Water Plant.**
- 7. Gracias nuevamente por su ayuda. Le enviaremos sus resultados individuales dentro de los 30 días luego de haberlos recibido desde el laboratorio. Se imprimirá un resumen de la información de monitoreo de plomo y cobre de este año en el informe anual de la calidad del agua, que estará disponible el 1 de julio de este año. Ante cualquier consulta, comuníquese con su proveedor de agua.**

Ante cualquier duda, comuníquese a:

City of Flint Water Plant

4500 N. Dort Hwy.

Teléfono: 810-787-6537 int. 3501

Leí las Instrucciones de la Muestra de Plomo y Cobre en el Agua Potable y tomé una muestra de un grifo de acuerdo con estas instrucciones.

Firma del recolector de la muestra

Subject: Thank you for your service

THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit www.HelpForFlint.com to learn how you can do so. For additional information and to sign up for daily updates, please visit www.mi.gov/FlintWater. I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

Governor Rick Snyder

VIDEO: What Governor Snyder's FY17 budget means for Michigan

Gov. Rick Snyder's FY 2017 budget calls for critical investments for the Flint water crisis, statewide infrastructure and the Detroit Public Schools. The governor's recommendation also addresses the skyrocketing costs of specialty medications that Michigan residents depend on for better health outcomes.

This budget also stays committed to the Governor's core statewide priorities of education, talent and economic development, health and human services, and public safety.

The proposed FY 2017 budget makes key investments to strengthen the state for all of

Michigan's families. Click here to learn more about the top 6 takeaways from the Governor's FY 2017 state budget.

Click a tweet to tweet it out:

The #MiBudget @OneToughNerd proposed yesterday makes key investments to strengthen Michigan for all families --> www.mi.gov/MiBudget

--> @OneToughNerd's #MiBudget includes \$72 million a year for Detroit Public Schools. It is time to act now --> www.mi.gov/MiBudget

--> @onetoughnerd's significant investment in #Flint families is the right thing to do. #FlintFWD #MiBudget www.mi.gov/MiBudget

VIDEO: How volunteers are helping Flint

Volunteers at the Food Bank of Eastern Michigan are working hard to collect donations in order to help the families of Flint. Last Thursday, Governor Snyder visited with the many dedicated volunteers and helped sort cans of food.

Good nutrition is critically important for Flint's children. Foods that are high in calcium, vitamin C, and iron can help limit the effects of lead exposure. To donate or volunteer at the Food Bank of Eastern Michigan, visit www.fbem.org.

DTMB Header 9/22/15

Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the \$54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates \$1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of \$1.3 billion for department operations and a one-time allocation of \$32.4 million.

A few highlights include:

- \$502 million for information technology support for all state agencies and \$132.8 million for 14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by \$7 million, from \$65 million to \$72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.
- An additional \$5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of \$6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at behend@michigan.gov.

Thank you again for all the good work you do. I hope you have a great week ahead.

David

October 27, 2015

Dear Parent,

To help make sure the children of Flint are safe from lead exposure, the Genesee County Health Department and the Michigan Department of Health and Human Services are providing answers to the following questions:

- Where does lead come from?
- What can I do to protect my family?
- Should I get my child tested for lead?
- Where can I find more information about lead?

Where does lead come from?

Elevated levels of lead have been found in the drinking water from lead pipes in the City of Flint. Kids can also be exposed to lead from old lead paint, soil, pottery, cosmetics and toys and some home remedies. Adult jobs and hobbies, like auto repair, stained glass, jewelry making and ammunitions handling can also put children at risk if they touch clothing or play in areas where lead is found. Lead is a serious health hazard, especially for small children who become lead poisoned when they eat, drink or breathe lead.

Should my child get a blood lead test? Children who live in the City of Flint, live in a home using City of Flint water, or who attend school, childcare or often spend time with a caregiver in the City of Flint should be tested for lead poisoning.

This should be done as soon as possible.

Where should I go to get a blood lead test for my child?

The best place to get your child's blood lead test is your doctor's office. Tests are covered by most health plans. Your doctor will follow up with you on lab tests and provide you with information on what to do next. Your child can also get a free lead test at the Genesee County Health Department. If you need transportation, contact 2-1-1 for help.

Understanding your child's lead test result.

A lead level below 5 means there is a little lead in your child's blood. Use the tips below to help keep your child safe. Your doctor may suggest retesting your child within the next 12 months to make sure the level does not go up.

A lead level of 5-44 means that your child has had some exposure to lead. Work with your doctor and local health department for further guidance on how to limit your lead exposure. Your doctor may retest your child in 1-3 months to make sure the level does not go up.

Children with very high levels of lead (**over 44**) may require treatment at the hospital.

What Can I Do to Keep My Family Safe?

The following steps should be taken right away to help protect you and your child.

Protecting your family from lead in the water:

- Get your water tested for lead. It's free. Call (810) 787-6537 to learn more.
- Use a water filter in your home. Call 2-1-1 for information on free NSF Certified water filters.
- Run only cold water through the filter.
- If you do not have a water filter, use bottled water for drinking and mixing formula.
- Use filtered or bottled water for drinking (including making coffee, drink mixes, juice, baby formula), and cooking (even if you boil the water, the lead will stay in the water and food).
- You can use unfiltered tap water for washing your hands and washing dishes.
- If you have to use unfiltered water for drinking or cooking, run the tap for five minutes before using the water.

Safe cleaning:

Safe cleaning is important. Keeping your home clean and safe from lead hazards will help to protect your family.

- Buildings built before 1978 could have lead paint in them. Use wet paper towels to clean up paint chips and dust in these older buildings. Be sure to clean around windows, play areas, and floors.
- Wash hands and toys often with soap and water.
- You can use unfiltered tap water to wipe down countertops, mop floors, and wash clothes.

Good nutrition:

Some foods will help keep lead from being stored in a child's body. These are foods with a lot of calcium, iron and vitamin C. These foods include:

Calcium Rich Foods	Iron Rich Foods	Foods with Vitamin C
➤ Milk	➤ Beans	➤ Oranges
➤ Cheese	➤ Lean meats like fish and chicken	➤ Orange juice
➤ Yogurt	➤ Whole grain cereals	➤ Grapefruits
➤ Tofu	➤ Peanut butter	➤ Tomatoes
➤ Spinach		➤ Green peppers

Always wash your fruits with filtered water. If you are concerned about your child's diet, talk with your doctor who may also recommend a daily multivitamin.

WIC and SNAP provide assistance to parents and children who need fresh and healthy foods. Contact the **Genesee County WIC office at (810) 237-4537** to learn more. SNAP also offers a Double Bucks program to purchase even more healthy food for no additional costs.

Where can I get more information on lead?

- Genesee County Health Department Lead Program
(810) 257-3833
www.gchd.us
- Michigan Department of Health and Human Services
Childhood Lead Poisoning Prevention Program
(888) 322-4453
www.michigan.gov/lead
- United States Environmental Protection Agency
www.epa.gov/lead
- U.S. Centers for Disease Control and Prevention (CDC) Web site
www.cdc.gov/nceh/lead

These recommendations will stay in effect until the Genesee County Health Department lifts the restrictions on water usage.

Sincerely,

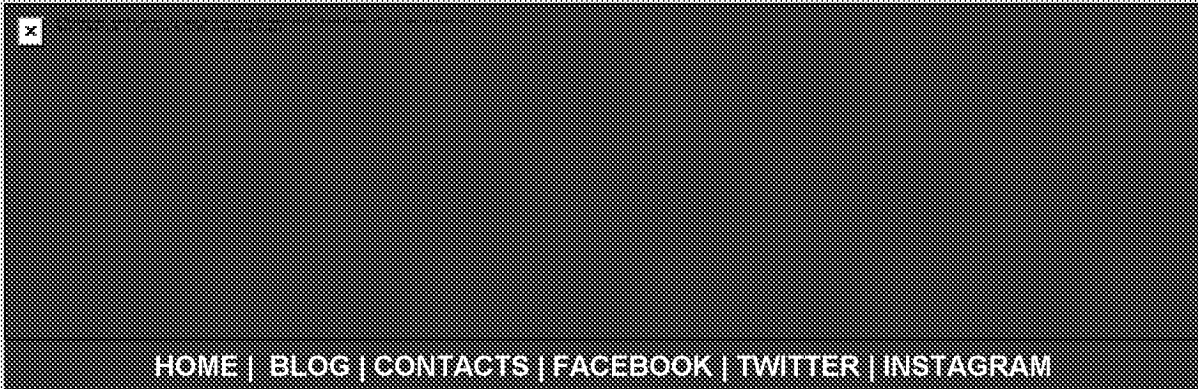

Eden V. Wells, MD, MPH, FACPM
Chief Medical Executive
Michigan Department of Health and Human Services

Gary K. Johnson, MD, MPH
Medical Director
Genesee County Health Department

Subject: "He's his own best spokesman"

How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm came from people who worked for me, and I feel responsible for that. But I am committed

to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." Click [here](#) to read the Governor's full op-ed.

Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. [Click here to read the full story in the Washington Post.](#)

***This attachment was updated 2/18/16**

*See agenda below

Requested By:

DTMB Executive Staff

Location:

Ottawa Building

Upper Level – Conference Room 4

611 W. Ottawa Street

Lansing, MI 48933

Call-in: 866-390-1828

Access code: 1842654

Security:

Please have your State Employee ID showing at all times.

Parking:

Metered parking is available along Ottawa and Pine street.

Briefing:

In recent months, the State of Michigan has received a number of requests to produce documents related to the water emergency in Flint. You have been identified as a potential custodian of relevant/responsive correspondence and/or documents related to these requests. As a custodian, you are required to produce, by a certain date, any documents containing certain search terms. In this meeting we will review instructions for the process of identifying, compiling, scanning, and copying the necessary information.

Agenda

- 1) Kickoff – Brom Stibitz, Chief Deputy Director
- 2) Why you are here – Jean Ingersoll, Interim Chief of Staff
- 3) What you need to do (February 22, 2016 deadline) – Jean
- 4) What will be done for you – Jean

- 5) What's next – Jean
- 6) Public Information Reminder – Caleb Buhs, Public Information Officer
- 7) Questions and Answers - Group

Subject: Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit www.helpforflint.com to learn how you can help.

For additional information and updates, visit www.michigan.gov/flintwater.

Again, thank you for all your support.

Sincerely, Mike Zimmer
Office of Good Government Director
Dept. of Licensing and Regulatory Affairs Director

Subject: Volunteer Opportunity in Flint

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJJK>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm

came from people who worked for me, and I feel responsible for that. But I am committed to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

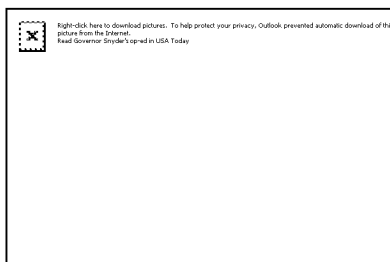

Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." Click [here](#) to read the Governor's full op-ed.

Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. [Click here to read the full story in the Washington Post.](#)

Subject: Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit www.helpforflint.com to learn how you can help.

For additional information and updates, visit www.michigan.gov/flintwater.

Again, thank you for all your support.

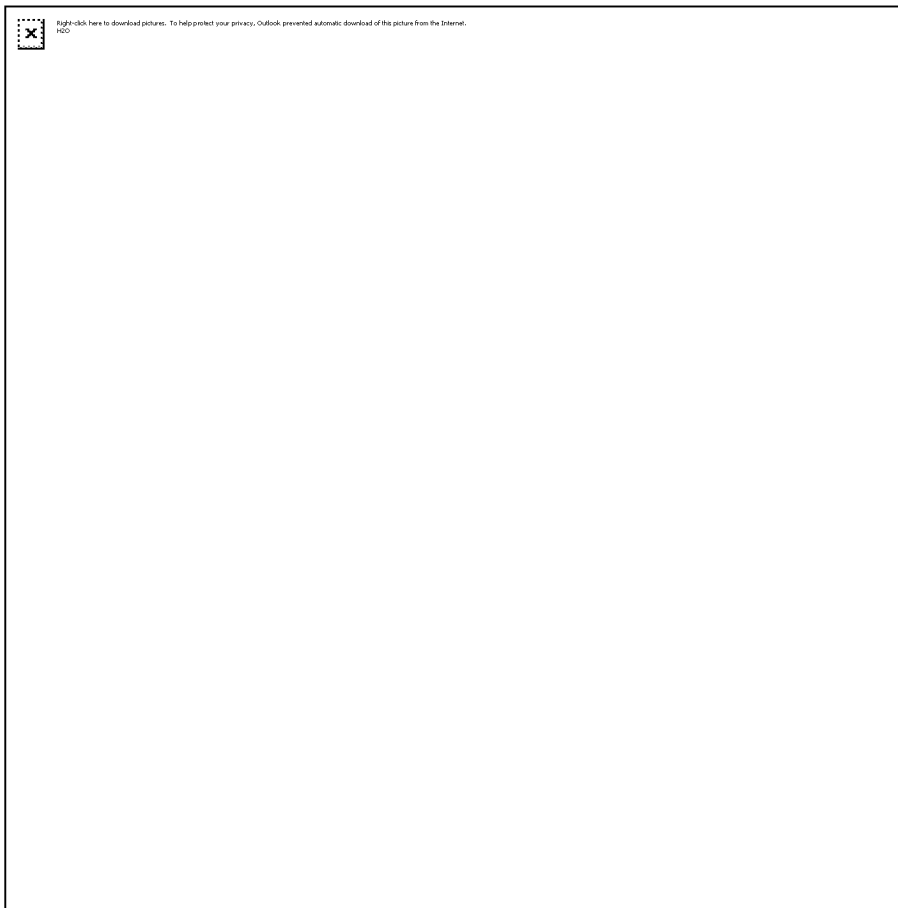

Sincerely, Mike Zimmer
Office of Good Government Director

Subject: Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – www.helpforflint.com – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. Administrative Policy 200.37 establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at behend@michigan.gov.

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit www.HelpForFlint.com to learn how you can do so. For additional information and to sign up for daily updates, please visit www.mi.gov/FlintWater. I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

Subject: "Flint residents should not have to pay for water they cannot drink"

Budget recommendation will include \$30 million request for Flint water bill repayments

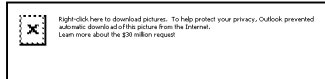

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a \$30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly 65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking, and washing your hands. Residents still would be responsible for paying the sewer portion

of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

[Click here to learn more about the budget request.](#)

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at www.mi.gov/flintwater. **Click here to watch the video.**

VIDEO: What Governor Snyder's FY17 budget means for Michigan

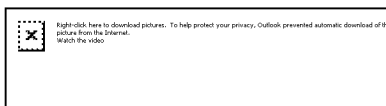

Gov. Rick Snyder's FY 2017 budget calls for critical investments for the Flint water crisis, statewide infrastructure and the Detroit Public Schools. The governor's recommendation also addresses the skyrocketing costs of specialty medications that Michigan residents depend on for better health outcomes.

This budget also stays committed to the Governor's core statewide priorities of education, talent and economic development, health and human services, and public safety.

The proposed FY 2017 budget makes key investments to strengthen the state for all of Michigan's families. [Click here to learn more about the top 6 takeaways from the](#)

Subject: Article from Dome Magazine about Dark Money Politics

This is the info that Laurin' was talking about at church last Sunday. The Dirty Dark Money Politics in Michigan is destroying our state. We must be aware of this. Legislators and other elected officials are being "bought and bossed". Its a long article, but, worth the read.

Michigan's "Dark Money" Politics Steered by Lawmakers with Dark Secrets

January 15, 2016

"See no evil, hear no evil."

"Do as I say, not as I do."

"I will faithfully discharge the duties of the office of State Senator/Representative ..."

The first two of these phrases certainly apply to Michigan legislators. But the third, derived from the oath of office taken by each lawmaker, certainly does not. A bill that the Legislature passed, and Governor Rick Snyder signed into law last week, substantially alters Michigan's election process and stands as one of the more contentious actions taken at the state Capitol in recent years.

Yet, the greater controversy here is that Senate Bill 571 revealed a new level in a dishonest lawmaking process that leads to secretive, "CYA" politics. As a result, Michigan's battered reputation has sunk to a new low. The sponsor of the numerous clandestine changes made to SB 571 in the 11th hour on the final day of legislative session for 2015 was eventually revealed (after about two weeks) to be GOP Rep. Lisa Posthumus Lyons from the Grand Rapids area.

State Representative Lisa Lyons

Lyons has made some rather amazing statements in defending her actions, which dramatically super-size the substance of the initial legislation. Her substitute bill increased the measure from 12 pages to 53 pages, but she says that she doesn't remember from where all of that new material originated. The term-limited representative from Alto told the Detroit Free Press that she can't recall who inserted the heavily criticized section that effectively places a "gag order" on government and school officials 60 days before any election which involves a local ballot proposal.

Pleading “the Fifth” on Legislation

Lyons, the daughter of Dick Posthumus, former Lieutenant Governor and Snyder’s senior adviser who deals closely with the Legislature, also pleaded the fifth with regard to another key passage: She said she was uninformed about her bill language that doubles the amount that PACs can contribute during a campaign cycle after the fact to pay off a candidate’s campaign debts. That move essentially marks the second time that PAC money maximums in Michigan have doubled in as many years.

While Lyons disingenuously plays dumb, the sponsor of the original, relatively insignificant version of the bill Senator Mike Kowall (R-White Lake Township) maintains that he was not aware of the most impactful alterations made to the measure that he authored. The senator said he does not know who wrote the amendments or which special interest groups were involved. But, he voted for the final legislation anyway.

An average voter would assume that the sponsor of a bill would ask several, piercing questions if his 12-page bill mysteriously ballooned to 53 pages. But the new version of SB 571 was rushed through the House and Senate and the final votes took place as midnight was approaching the night of December 16th, with the Legislature eager to recess for the Christmas/New Year holidays. A majority of the House and Senate voted for the legislation even as most members assert that they do not know who was behind the dramatically amended version of the bill.

This Pelosi-like defense, contending not to know all of the bill’s details, fails to acknowledge that the hastily arranged Michigan legislation could easily have been delayed for a few weeks. Instead, it was adopted despite the lack of committee hearings or prior public debate. Lyons later blew the whistle on fellow Republicans who proclaimed that they were left in the dark. She pointed out that the newly-minted bill had been discussed (however briefly) earlier on December 16th in the House Republican caucus meeting.

In addition, two Democratic lawmakers – Senator Steve Bieda of Warren and Representative Sam Singh of East Lansing railed against the “appalling” hidden elements of the bill on the floor of the House and Senate before the final late-night votes, when the bill was adopted mostly along party lines. What’s more, some members of the Republican majority in Lansing, after facing many days of heavy criticism after the vote, publicly expressed regrets that they supported Senate Bill 571 and urged a Snyder veto.

See no Evil... Unless the Media Shines a Bright Light!

This sordid episode places another black mark on a state that already ranks last in the nation in government transparency and integrity. <http://www.publicintegrity.org/2015/11/09/18427/michigan-gets-f-grade-2015-state-integrity-investigation>

While Lyons argues that she doesn’t know who wrote key passages in the legislative document she presented to her colleagues for approval, many political observers in Lansing believe they know exactly how Lyons came to serve as an errand girl, and for whom she was carrying water:

The DeVos Family Stronghold

The strong suspicion is that she was doing the bidding of the DeVoses (mostly Dick and Betsy), fellow west Michigan Republicans who have an astounding level of influence over the Legislature. This wealthy family – just a small group of people – made \$4.9 million worth of campaign contributions in the 2013-14 election cycle. That was twice the amount of cash doled out to politicians by any Michigan PAC representing a large corporation, labor union...or entire industry.

Lyons, chair of the House Elections Committee, who apparently has her eye on becoming Michigan Secretary of State someday, received her largest House campaign donation (\$10,000) in 2014 from the DeVoses even as she was breezing to re-election.

One needs no more evidence of the DeVoses influence over SB 571 than this: The Michigan Freedom Fund the family’s premier political organization announced on the afternoon of January 6th that the governor had signed the bill (“A major victory for Michigan taxpayers”) before the governor’s office made Snyder’s signature public.

The Players Game the System, While the Rest of Us Get Played

Rich Robinson, Michigan Campaign Finance Network

"I don't have any doubt that, in those House and Senate Republican caucuses, it's made clear to them that 'You're here to serve the DeVoses,'" said Rich Robinson, the state's main campaign watchdog as director of the Michigan Campaign Finance Network. As for Lyons, Robinson said, "She is the DeVoses elected representative. I'm sure Rep. Lyons is attentive to her special constituents." Perhaps that tone sparks a red-faced, angry reaction from the DeVos family and their political allies. Yet, the secretive process that resulted in the passage of SB 571 serves as a narrative on the larger, bipartisan "dark money" system that dominates Michigan's campaign process. That system allows legislators, judges and statewide elected officials to benefit from third-party groups, which secure millions of dollars in special interest donations on their behalf, without disclosing who is contributing all that cash. In fact, SB 571 makes it easier for corporate PACs but not those representing labor unions to collect campaign money from their workers.

Now, what we have here is an especially lopsided "failure to communicate". At election time, lawmakers who collectively scoop up huge amounts of PAC money to produce countless vile, misleading ads as Election Day approaches, have forced local officials to "go dark" for the two months leading up to an election. These legislators shamelessly equate their slick brand of electioneering with the nerdy pre-election fact sheets about millages and bond proposals, distributed by mayors and school superintendents, which cost merely a few thousand dollars.

The true motivation is that anti-tax Lansing legislators know that people vote "no" when they don't know about a ballot question. Our top state officials try to keep us in the dark about who finances their campaigns while they now keep voters in the dark about local ballot proposals that deal with schools, roads, police/fire protection, parks and city charter amendments.

Michigan's Dysfunctional Politics

State law already prevents local officials from sending out publicly-financed materials that advocate a "yes" vote on a ballot proposal. If Lansing lawmakers were concerned, they could have tightened up the enforcement process. But SB 571 became an ideological quest; a solution looking for a problem. According to the state's chief elections agency, the Secretary of State's Office, they have enforced the no-advocacy rule about two dozen times in the past three years. In one notable case in 2014, the Traverse City school district was found to have egregiously violated the law. The SOS reached a consent agreement that forced the district to raise \$14,800 in private funds to offset the misspent public funds, and also have its law firm donate campaign-finance and legal training for district employees in lieu of paying another \$10,000 fine.

Meanwhile, members of the House and Senate routinely engage in mass-mailings at taxpayers' expense providing basic information about ballot proposals at the statewide level as an election approaches. Last year, a senate bill designed to repeal the state prevailing wage included a \$75,000 appropriation that would have made the measure referendum-proof not subject to voter approval. Lawmakers justified this sleight of hand by insisting that tax dollars contained in the bill were necessary to "disseminate information" to the public about the proposed/new law, even though it would never appear on a ballot.

Amidst all this hypocrisy and lack of integrity, Michigan becomes a disjointed, dysfunctional place where the legislative process allows craven lawmakers to simultaneously make these two proclamations:

"I swear I didn't know anything about this."

And,

"I swear I will faithfully discharge the duties ..."

In the end, only the overall electorate is victimized. Only we are subjected to shadowy lawmaking-inspired by dark money—controlled by legislators with deep, dark secrets.

VIDEO: How volunteers are helping Flint

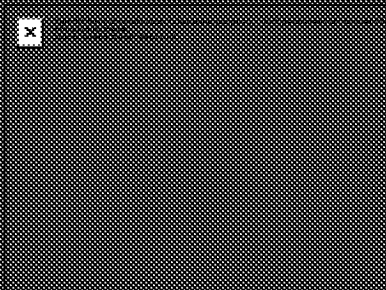

Volunteers at the Food Bank of Eastern Michigan are working hard to collect donations in order to help the families of Flint. Last Thursday, Governor Snyder visited with the many dedicated volunteers and helped sort cans of food.

Good nutrition is critically important for Flint's children. Foods that are high in calcium, vitamin C, and iron can help limit the effects of lead exposure. To donate or volunteer at the Food Bank of Eastern Michigan, visit www.fbem.org.

Subject: The Gov. Snyder's Budget Proposal

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.
DTMB Header 02/22/16

Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the \$54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates \$1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of \$1.3 billion for department operations and a one-time allocation of \$32.4 million.

A few highlights include:

- \$502 million for information technology support for all state agencies and \$132.8 million for 14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by \$7 million, from \$65 million to \$72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.
- An additional \$5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of \$6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at behend@michigan.gov.

Thank you again for all the good work you do. I hope you have a great week ahead.

David

Michigan State Employees banner image

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJJK>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

Subject: Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit www.helpforflint.com to learn how you can help.

For additional information and updates, visit www.michigan.gov/flintwater.

Again, thank you for all your support.

Sincerely, Mike Zimmer
Office of Good Government Director
Dept. of Licensing and Regulatory Affairs Director

Subject: Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – www.helpforflint.com – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. [Administrative Policy 200.37](#) establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at behend@michigan.gov.

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

Subject: RE: hard drives for forensic copies

Hi Jennifer,

Nanette Snider will be reaching out to you to coordinate delivery of the hard drives to you. However, wanted to let you know that the final batch being scanned has been delayed due to the Flint water crisis.

We will be in touch as soon as we have an update.

Thank you,
Nicole

Subject: RE: hard drives for forensic copies

Thank you Nan. The hard drives need to go to the AG's office when they are done.

Jennifer, here is the status of the hard drives. They are finishing up the last group of PCs to be imaged.

Can Tim coordinate delivery of the hard drives with you or someone in your office, Jennifer? Or do we need to get them and coordinate that with you? I would think the less hands on them, the better. Please let me know how you would like to handle.

Thank you,
Nicole

Subject: RE: hard drives for forensic copies

Hi Nicole,

Once forensic copying is finished - the hard drives will be returned. The last batch (11 PCs) were sent to MCS on Friday 1/22/16, and they are still being processed.

"The forensic images on the large External Hard Drives will need to be stored. You will need to check with your Chain of Command on where they will be stored (your offices or the AG's)" - Tim Lee, 1/26/16

If these images are needed during the case, the hard drives will have to be sent back to MCS and looked at by a forensic examiner. Please let me know where you would like the hard drives delivered once they are released by MCS. I could have the MDOS Warehouse staff

- Bring the hard drives to MDOS (at Ops or Austin) or
- Hand deliver them directly to the AG's office (*please specify to whose attention and what specific physical location*).

I'm working at Austin today - so please give me a call on my personal cell, or drop me a note if you have questions or would like to discuss further.

Thanks!!

Flint Alternate Water Resource

Date/Time:

Monday, October 5, 2015 at 6:00 a.m. until further notice

Details:

Beginning Monday, October 5, 2015, water coolers will be available in common areas on floors 1-6 of the Flint State Office Building. Although the drinking water has been tested and falls within all DEQ and EPA regulation standards, alternate water sources will be offered to accommodate all tenants due to recent concerns regarding the water supply. Water testing will continue and the alternate water source will be available until all quality concerns are addressed.

Thank you for your cooperation.

Facility Notification

Flint Water Quality

Details:

DTMB commissioned testing of the water in the Flint State Office Building and the results show our water poses no health threats. Although the water is safe to drink, we will continue to provide water coolers in common areas on floors 1-6 of the Flint State Office Building until we are connected to the Detroit water system.

Flint Drinking Water

Details:

An advisory has been issued by the City of Flint asking water customers within a defined area (see attached notice and map) to boil water before using it. However, the Flint State Office Building does not fall within the identified area. DTMB continues to offer tap and bottled water in public areas on each floor as options in the Flint State Office Building.

VIDEO: How volunteers are helping Flint

Volunteers at the Food Bank of Eastern Michigan are working hard to collect donations in order to help the families of Flint. Last Thursday, Governor Snyder visited with the many dedicated volunteers and helped sort cans of food.

Good nutrition is critically important for Flint's children. Foods that are high in calcium, vitamin C, and iron can help limit the effects of lead exposure. To donate or volunteer at the Food Bank of Eastern Michigan, visit www.fbern.org.

[Click here to watch the video and learn more about how the Food Bank of Eastern Michigan is helping Flint's families.](#)

LISTEN IN: Governor Snyder's tele-town hall with Flint residents

Governor Snyder hosted his third town hall with Flint residents on Thursday, Feb. 11, answering their questions directly. [Click here to listen to the call.](#)

Subject: The Gov. Snyder's Budget Proposal

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.
DTMB Header 02/22/16

Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the \$54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates \$1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of \$1.3 billion for department operations and a one-time allocation of \$32.4 million.

A few highlights include:

- \$502 million for information technology support for all state agencies and \$132.8 million for 14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by \$7 million, from \$65 million to \$72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.
- An additional \$5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of \$6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at behend@michigan.gov.

Thank you again for all the good work you do. I hope you have a great week ahead.

David

THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit www.HelpForFlint.com to learn how you can do so. For additional information and to sign up for daily updates, please visit www.mi.gov/FlintWater. I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

Flint Drinking Water

Details:

DTMB will continue to offer tap and bottled water as options in the Flint State Office Building. An advisory has been sent asking residents and businesses within a defined area (see attached notice and map) to boil water before using it. However, the Flint State Office Building does fall within the Area of Interest on the map. Additionally, the results of testing we commissioned in October 2015 showed no signs of threats in the water supply to our building.

We will continue to monitor the water crisis and if at any time we have evidence that our water supply poses a threat to the health of our employees and visitors, we will take immediate action. Either way, we will continue to provide bottled water as an option for those who are still concerned.

Unresolved Requests for Space - DTMB - Real Estate Division

	J	K	L
	Comments	Next Steps	Expected Completion Date
1	Request via email to Mike. Internal Audit wants to consolidate staff several locations in the Romney Building (preferred) or another state owned building downtown. Currently, there is not space available in State owned space to accommodate this request. Troy Spitzley has advised Fran of this and suggested leasing space at Capitol Tower which is located across the street from the Romney Building. Fran will advise Jeff and ask about leasing option. Met with Fran on 2/18 to talk about a partial consolidation of staff in Romney as a short term solution and plan for a long term solution. Short-term we can consolidate critical staff on the 8th floor of Romney. Fran will present to Jeff and get back with me.	Waiting to hear back from Fran regarding the proposal for the short term. In the meantime, continue to look for space to accommodate the entire team.	Short term plan 5/15/2016
2	Education believes they had an agreement with DTMB that AS-MDOC would vacate their space in the Hannah Bldg. 1st floor for Education to move people from a leased location into state owned space in exchange for allowing CEPI to remain in Education space in the Library. This move allows Education to have all their staff in one location and eliminate S. Washington lease (\$112,054 annually). Education cannot move into Hannah until AS-MDOC moves out. AS-MDOC does not have funding to move.	Need determination on funding for the AS-MDOC part of this move.	6/1/2016
3	AS-MDOC agreed to relocate from Hannah 1st to a leased location (no state owned available) so that Education could move their staff from a leased location into the Hannah Building. However, AS-MDOC does not have funding and feel they should not have to pay for the move since they are leaving to accommodate Education. Education does not feel they should pay to move AS-MDOC because they would have moved into the Library if not for CEPI.	Who is funding this move?	6/1/2016
4	I & O wants consolidate staff from several locations into one location. The consolidation would free space in OPS, 1st floor, Hannah 1st floor and eliminate Westshire lease (\$287,640 annually). Programming documents have been completed and are still being reviewed. I & O needs approx. 68,000 sq. ft. of space to consolidate staff. Currently, there isn't any space in state owned space to accomplish this so we will need to do an RFP for leased space.	Review programming documents. Determine funding source.	1/1/2017
5	Recommend moving AS to the Hannah Bldg. space vacated by Telecom when I&O consolidates staff. This would allow AS-LARA to be close to their client and eliminate Phoenix Bldg. lease (\$130,036 annually). This move is dependent on I & O consolidating their space.	Determine if I & O will be able to fund project to consolidate staff and move Telecom to free up space for AS-LARA.	1/1/2017
6	Treasury is expanding their operations and would like additional space in the OPS Center. Additional space would be available for Treasury if DTMB - I & O consolidates staff and relocates to a new location.	Determine if I & O will be able to fund project to consolidate staff and move out of OPS.	1/1/2017
7	AS was moved to the Hollister Building swing space as part of the Con Hall/Mason Bldg. project. AS was supposed to move to the Mason building upon its completion. That did not happen and the Hollister Building rental rate has increased to \$13/sq. ft. since then. The rate is too high for that property and AS wants nicer space. Capitol Tower has new space available for \$12/sq. ft. Who should fund this move since AS' was originally part of the Mason Building moves?	Need determination on funding.	6/1/2016
8	Field Services was moved to the Hollister Building swing space as part of the Con Hall/Mason Bldg. project. Field Services was supposed to move to the Mason building upon its completion. That did not happen and the Hollister Building rental rate has increased to \$13/sq. ft. since then. The rate is too high for that property and Field Services wants nicer space. Capitol Tower has new space available for \$12/sq. ft. Who should fund this move since Field Services was originally part of the Con Hall/Mason Building moves?	Need determination on who is funding.	6/1/2016
9	UJA would like to consolidate UJA from around the state into one location.	Waiting for approval from the Governor's Office to consolidate staff in Lansing.	TBD
10			

Unresolved Requests for Space - DTMB - Real Estate Division

12									
	LARA	Ethan Thelen	Email request	Flint State Office Building	2	Flint State Office Building	Flint State Office Building	Yes	
13									
14									
15	Special Notes:								
16	AS-MDOC/MDOT/MSP/DMVA and Education moves are dependent on one another.								
17	Infrastructure & Operations, AS-LARA, and Treasury moves are dependent on one another								

	J	K	L
	As part of the CAR project, MSP is moving their headquarters to the GOB at the Secondary Complex. MSP is requesting two workstations downtown, preferably in the Romney building so that Colonel and Legislative Liaisons have a place to use while working downtown.	Trying to locate available suitable space for MSP. Will need to confirm that MSP understands they will need a BOA on the final space selected.	4/1/2016
11	The DHHS staff in Flint is continually growing. Since Civil Rights moved out of the 5th floor, DHHS has requested to take over the space.	This is delayed due to additional people needing to be in the building to respond to Flint's Water Situation. The space is accounted for and redesigned but the project is on hold until the space frees up.	5/1/2016
12	LARA has brought more staff to Flint from another location and would like to add 2-3 additional stations to their area.	This is delayed due to additional people needing to be in the building to respond to Flint's Water Situation. The space is accounted for and redesigned but the project is on hold until the space frees up.	5/1/2016

Outlook Notification

Flint Alternate Water Source

Date/Time:

Monday, October 5, 2015 at 6:00 a.m. until further notice

Details:

Beginning Monday, October 5, 2015, water coolers will be available in common areas on floors 1-6 of the Flint State Office Building. Although the drinking water has been tested and falls within all DEQ and EPA regulation standards, alternate water sources will be offered to accommodate all tenants due to recent concerns regarding the water supply. Water testing will continue and the alternate water source will be available until all quality concerns are addressed.

Thank you for you cooperation.

Yeah I was not sure about adding that,

The press has been beating this up on a daily basis and even Erin Brochavic has been in town. The city currently gets the water from the flint river and they are working on a new pipe line from Lake Huron to flint which should be done by 2017 .

There is higher levels of lead (but it's within the limits)

And to be honest Brian Walts is the expert on this please feel free to contact him he has a tremendous amount of knowledge on this.

I know Brian will be glad to help

Subject: Protest Event - Constitution Hall

DTMB Leadership,

For your awareness there is a protest event planned for Tuesday Oct. 27th outside Constitution Hall between 12 noon and 4:00pm. The event is a response to the water situation in Flint. Please plan your daily activities with this in mind as a large turnout for this event is anticipated. [REDACTED]

Please let us know if you have any questions or require additional details.

Thanks,

Jeff

Michigan State Employees banner image

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJJK>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

Only, in that I know some of the persons in Water Division of DEQ. My first State employment was in that group, back when it was in the Health Department. I was limited term and only worked there 15 months, but they are a good group of people, so I feel for their situation. And who knows how this will shake out for them, or for all of us for that matter.

How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm came from people who worked for me, and I feel responsible for that. But I am committed

to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

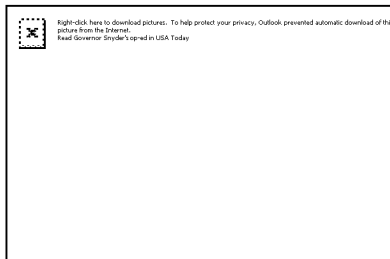

Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." Click [here](#) to read the Governor's full op-ed.

Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. [Click here to read the full story in the Washington Post.](#)

Subject: Flint Volunteer Efforts

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit www.helpforflint.com to learn how you can help.

For additional information and updates, visit www.michigan.gov/flintwater.

Again, thank you for all your support.

Sincerely, Mike Zimmer
Office of Good Government Director
Dept. of Licensing and Regulatory Affairs Director

Subject: Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – www.helpforflint.com – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. [Administrative Policy 200.37](#) establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at behend@michigan.gov.

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

Subject: "Flint residents should not have to pay for water they cannot drink"

[HOME](#) | [NEWSROOM](#) | [BLOG](#) | [CONTACT](#) | [FACEBOOK](#) | [TWITTER](#) | [INSTAGRAM](#)

Budget recommendation will include \$30 million request for Flint water bill repayments

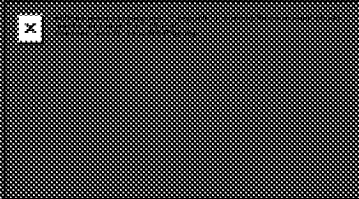

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a \$30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly 65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking, and washing your hands. Residents still would be responsible for paying the sewer portion

of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

[Click here to learn more about the budget request.](#)

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at www.mi.gov/flintwater. **Click here to watch the video.**

Flint Water Advisory

Date/Time:

Effective Wednesday, January 7, 2015

Details:

The City of Flint recently sent out the attached notice regarding violations to the drinking water standards. While the City of Flint states that corrective actions are not necessary, DTMB is in the process of providing a water cooler on each occupied floor, positioned near the water fountain, so you can choose which water to drink. The coolers will arrive today and will be provided as long as the public water does not meet treatment requirements.

Contact:

DTMB Customer Service Center, DTMB-Customerservice@michigan.gov or (844) DTMB-CSC or (844-386-2272)

 <p>Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet. DTMB Energy Tip</p>	<p>Since we spend about 40 hours a week at our workplaces, isn't the office the best place to try out some new energy-saving tricks? The Energy Information Administration estimates that if commercial and industrial buildings improved their energy efficiency by 10 percent, our economy could see yearly savings of nearly \$20 billion.</p>

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

City of Flint Did Not Meet Treatment Requirements

Our water system was recently found to be in violation of a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Samples were collected for total trihalomethanes (TTHM) analysis from eight locations on a quarterly basis (May 21, August 21, and November 20 of 2014). The average of the results at ANY of the eight locations must not exceed the maximum contaminant level (MCL) for TTHMs, otherwise our water system exceeds the Maximum Contaminant Level (MCL). The standard for TTHMs is 80 ug/L. The location reporting the highest TTHM level was 99 ug/L, thus, our water system exceeds the TTHM MCL.

What should I do?

- There is nothing you need to do unless you have a severely compromised immune system, have an infant, or are elderly. In that case, you may be at increased risk and should seek advice about drinking water from your health care provider.
- You do not need to boil your water or take other corrective actions. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What does this mean?

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

People who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

What is being done?

We are currently working on solutions to correct the problem. We anticipate resolving the problem in 2015.

For more information, please contact Mr. Brent Wright or Mike Glasgow at 810-787-6537 or the Water Plant at 4500 North Dort Highway, Flint, MI 48505.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the City of Flint.

CERTIFICATION: F1 S3

WSSN: 02310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules. Reminder to water supplier: This notice/certification must be sent to the DEC.

THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit www.HelpForFlint.com to learn how you can do so. For additional information and to sign up for daily updates, please visit www.mi.gov/FlintWater. I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

Governor Rick Snyder

I just spoke to the DEQ and they stated that at both locations there was no copper detected.

#1 location had .001 for lead and #4 had .004 for lead. In order to be a concern it would have to be .015 or above so both are well within acceptable levels.

As far as bacterial or chlorine residual, those samples are submitted differently as they are done in house. Did you submit those as well? They would have been in a much smaller sample bottle. If not, I can connect you with the lab and we may have to have the tech come out.

Caleb -

Please see the attached account info. The water coolers are in the common areas and were/are available to the public as well. As I mentioned, they receive an average of 500 visitors per day (not counting children) in the Flint State Office Building.

Here are the number of people by floor:

1st Floor: DTMB Facilities (15 employees) 2nd Floor: DHHS (54 employees) 3rd Floor: DHHS (83 employees) 4th Floor: DHHS (86 employees) 5th Floor: LARA/BSBP (8 employees), Treasury (21 employees), DTMB – Vacant (8 employees), MDCR-Civil Rights (13 employees), Office of the Governor (2) Offices.
6th Floor: DHHS (127 employees)
7th Floor: DHHS (71 stations + 32 Customer Kiosk stations proposed)

Approximately 480 staff (not counting the 8 vacant spaces on 5th floor or the 32 proposed kiosk stations on 7th floor).

Departments in the Flint State Office Building: Treasury; LARA, DTMB; Civil Rights (they moved out two months ago); DHHS.

Let us know if you need anything further.

Caleb -

Please see the attached account info. The water coolers are in the common areas and were/are available to the public as well. As I mentioned, they receive an average of 500 visitors per day (not counting children) in the Flint State Office Building.

Here are the number of people by floor:

1st Floor: DTMB Facilities (15 employees) 2nd Floor: DHHS (54 employees) 3rd Floor: DHHS (83 employees) 4th Floor: DHHS (86 employees) 5th Floor: LARA/BSBP (8 employees), Treasury (21 employees), DTMB – Vacant (8 employees), MDCR-Civil Rights (13 employees), Office of the Governor (2) Offices.
6th Floor: DHHS (127 employees)
7th Floor: DHHS (71 stations + 32 Customer Kiosk stations proposed)

Approximately 480 staff (not counting the 8 vacant spaces on 5th floor or the 32 proposed kiosk stations on 7th floor).

Departments in the Flint State Office Building: Treasury; LARA, DTMB; Civil Rights (they moved out two months ago); DHHS.

Let us know if you need anything further.

Thanks -

Subject: Flint Kettering University Water update letter
Attachments: KetteringWaterAlumniParents1242016.pdf

Hi Team,

I found this report from the Office of the President from Kettering University located here in Flint. When reading down through it I found lots of correct and helpful information. I thought I would share. It appears to list facts and attempts to stay clear of some of the hype. I hope it can be of some help.

Thanks,
Brian Walts

1700 University Avenue • Flint, Michigan 48504-6214

Monday, January 25, 2016

To: The Kettering Community of Parents of our Students and our Alumni

Subject: Kettering Campus Water Update¹

I know that you value the excellence of the education we provide, but I expect as alumni or parents of students currently enrolled at our great University that you are concerned about the barrage of news about Flint's water supply. I am a proud parent of a Kettering student, and my family and I reside in Flint, so I understand deeply and very personally how you might be feeling about the situation as reported in the media.

Last week, I sent a detailed Kettering Water Update letter to our campus and to our students. Because I know (from direct experience!) that students may not always communicate promptly with their parents on even important issues, I thought I would take a moment to update you and our alumni directly on this issue, because I know it is a subject of concern.

Unfortunately, as is often the case in public crises, a great deal of misinformation about the water supply in Flint is being reported as fact. Just as distressingly, though, a great deal of important information that we do have about the situation is also *not* being reported.

Kettering campus water is safe, and our faculty, staff, students, and campus residents are **not** being exposed to contaminated water on campus. We are, and have been even before the current crisis emerged, committed to ongoing testing of our water to ensure the safety of the campus water supply. Moreover, the entire water supply of Flint has not been contaminated with lead; although some sections of the city have experienced problems, some severe, other sections have not.

All of us deplore that any single person has been exposed to unsafe levels of lead in the water; however, many people living in Flint have not been exposed to water containing elevated levels of lead in their residences or places of business.

I also want to clarify that *the water from the Flint River that was used as the city's water source from April 2014 through October 2015 was not contaminated with lead*. The contamination, where it occurred, was due primarily to interactions between treated river water and lead supply lines in the distribution system, particularly in lead lines connecting individual houses to local water mains. This is not a global problem with the water, but a problem with how that water - after treatment - interacted with some pipes and other elements of the city's distribution system. This interaction was often (considerably) different - even house-by-house on a single block.

In this letter I want to outline for you what we know about the nature of the contamination of the Flint system, how the university has responded to it, what we have done and are doing on an ongoing basis to ensure the integrity and safety of drinking water on the campus, and how we are working to ensure that those in the campus community who live off-campus in private housing

¹ This memo is a revision of an earlier memo dated Monday, January 18, 2016. In this revision, any references and citations to measured blood levels in children or numbers of children impacted in Flint have been removed, because the original data cited and as supplied by the State of Michigan has been significantly revised since the publication of the original memo.

have access to appropriate information, tests, and filters to ensure and monitor the safety of their private supplies.

Because I want to document what I write, I am also including footnotes that will lead you, if you are interested, to the sources of my information, something I learned to do as a faculty member and still highly value. We are committed to deploying every resource at our disposal to continue to ensure the safety of our entire campus community and our visitors. We value your input, and I hope that as members of the Kettering Community and of this great University that the information presented in this letter is helpful to you. If you have questions, comments, or thoughts on this issue we welcome you to send them to us at water@kettering.edu.

Introduction

Elevated lead levels have been detected in the water supply in a number of areas in the city of Flint, and these have received significant medical, political, and media attention over the last three months. The State of Michigan officially declared a state of emergency in Flint on January 6, 2016,² and the Federal Government followed on January 16, 2016.³ Federal, state and local officials have now engaged and are taking more aggressive corrective action to address this situation and the public health crisis that has resulted from it. Proudly, many in the Kettering Community have taken a very active role in helping those families and children in Flint impacted by this health crisis since its beginning last year.

The levels of lead found in some areas of Flint are gravely upsetting, but I want again to stress that the problem of lead contamination in public and private drinking water supplies is not present in all of Flint. Unfortunately, this distinction has been absent from much of the reporting on this subject in the media. Reports often imply that the water was tainted at the source (i.e. the Flint River), or that contamination of the water is uniform across the entire distribution system and that every house and business has been equally affected.

I also think it important for us to recognize that this problem is widespread and in fact is not isolated to Flint.⁴ For example, I am sad to report, drinking water supply contamination, in some cases at levels far worse than have been found in Flint, has been found in Washington D.C., Seattle, Baltimore, Philadelphia, and Los Angeles among other cities and areas of the country.⁵ In Michigan, elevated blood-lead levels have been found in an even higher percentage of children than Flint is experiencing in sections of Jackson, Detroit, Grand Rapids, Saginaw, Holland, and a number of other cities.⁶

The Nature of the Problem

First, the nature and cause of the contamination are reasonably well understood at this point. In brief:

⁶ <http://www.craigslist.com/article/20151210/NEWS/151219980/interactive-map-places-with-higher-lead-rates-than-flint>

- Historically, the Flint water system used and distributed treated water from Detroit Water Authority. It did so until April 2014, when it switched to treating water from the Flint River in an existing Flint water treatment plant.
- The “raw” river water to which the city switched in April 2014 was not contaminated with lead.
- The water within *some* sections of the distribution network was, however, contaminated *after* the water left the treatment plant by the leaching of metals such as lead, iron, and copper from lead service lines and lines containing lead solder.

After the switch to river water, the City failed to treat the water for corrosivity by managing its chemistry,⁷ which lead to the erosion (and release) of lead-bearing pipe scale in supply lines⁸ and lead/copper galvanic corrosion of lead solder and lead copper joints in the distribution system.⁹ Because raw water quality varies across the US, federal law requires all municipal water systems to have a corrosion control plan to address this possibility; this regulation is known as the Lead and Copper Rule.¹⁰ Flint unfortunately did not have such a plan in place when it switched the water source to the River.

Here I want to stress that the lack of corrosion control did not, in and of itself, make the water unsafe. What it did do, however, is increase the potential for the water to react chemically with certain types of plumbing systems, and in doing so leach lead and other metals (if they were present) from those systems.

And if this isn't enough complexity, the City (out of what I'm sure were benign motives) used a relatively high level of chlorine to treat the river water to prevent bacterial growth in the supply. The unanticipated consequence of this choice, combined with a lack of activated charcoal filtration in the treatment process, led to the subsequent production of elevated levels of trihalomethanes (which are disinfection by-products of water chlorination) in the water, but these were present primarily in areas of the system where the water pooled or moved through the system slowly.

In October of last year, Flint switched its water source back to Detroit Water Authority. It took approximately 3-4 weeks for the Detroit source water to replace fully all of the water in the distribution system. In December, Flint also began introducing additional corrosion control additives to the water supply.¹¹ It did this expecting that the addition of these additives will, over time, help to rebuild the protective scale on the inside of the parts of the distribution system where it has been damaged.

Not All Areas of Flint were Impacted Equally

The specific mechanisms that gave rise to the contamination of the system mean that **not all areas of the system were equally impacted**. Portions of the system that do not contain lead service lines or lead solder were not as greatly impacted as those that do. Older parts of the

⁷ Specifically the chloride-to-sulfate mass ratio in the treated water, which can be influenced by salt entering the source river from runoff or changes in the way that organics are removed in the treatment process. It can also be affected by the use of Ferric Chloride (FeCl₃) as a coagulant in the water treatment process. This ratio is typically adjusted by adding lime or orthophosphates in the treatment process, see <http://www.waterrf.org/publicreportlibrary/4088.pdf>

¹¹ <https://www.cityofflint.com/2016/01/10/flint-city-leaders-county-state-officials-announce-relief-effort-expansion/>

system, especially sections built in the 1940's through the 1960's¹² that have not been upgraded since their construction are disproportionately vulnerable.¹³ Other areas are far less so.

As a consequence, **the presence of lead contamination in the water supply was not uniform across the entire municipal water system, and not all areas of the city or all resident supplies were equally affected by it.**¹⁴

- The amount of lead that leached into a given part of the system depended upon a variety of factors, including the age of the system in the area, the specifics of its construction (e.g. are lead service lines present), and the time that water typically spends in that part of the system between treatment and use.
 - The levels of lead contamination measured in the water drawn from a particular source point depends upon the characteristics of the infrastructure through which the water passed, and how long it took to do so. **This is why water drawn in some houses on a single block might show measurable lead contamination, while others did not.**¹⁵
- For the same reason, as I noted earlier, only a percentage of Flint residents have been exposed to water containing elevated levels of lead in their residences or places of business (for information on how lead levels in water are specified and interpreted, see the discussion beginning on page 5).
 - Of the 853 samples of water from Flint homes tested by the Michigan Department of Environmental Quality between September 29, 2015 and January 15, 2016, approximately 92% of the samples had measured lead levels below 15 ppb, 79% registered below 5 ppb.¹⁶

Kettering's Campus Water Supply and Our Approach to Ensuring its Safety

The municipal water infrastructure that supplies Kettering is relatively modern, the flow-rates of water through the system are high, and we do not have lead-copper transitions in the main supply lines, as do many residences in some areas of the city. All of these factors reduce the chance of contamination in our supply. Even so, the University has taken a number of proactive steps to ensure that the campus drinking and cooking water supplies are free from contamination, a number of which have been described in previous communications to the campus on this issue. These include:

- Since early 2015 (after the switch to river water but before lead contamination was suspected), the University has been engaged in recurring testing of all drinking and food service water distribution points on campus using an independent, certified laboratory (Brighton Analytical, LLC). We will continue to test all drinking and food service water distribution points (and there are almost 100 of these) indefinitely.

¹² In the early part of the last century, many municipal codes *required* the use of lead pipes when connecting homes and businesses to municipal water mains but most codes banned the use of lead pipes by the early 1970's. Chicago, for example, continued to require them as recently as 1986, see: *EPA warns modernizing water system may boost levels of lead*, Chicago Tribune, September 25, 2013. Some major U.S. cities still have 100% piping bringing water from the utilities to homes and businesses, see: <https://www.safep plumbing.org/health-safety/lead-in-plumbing>.

¹³ <http://nepis.epa.gov/Exe/ZyPDP.cgi?Dockey=20001R4V.txt>

¹⁴ For an example see:

https://web.archive.org/web/20160120012739/https://michigan.gov/documents/deq/Copy_of_deq-fw-Flint-Home-Owner-Data-Sept-3-thru_Nov-5-15_505529_7_505579_7.pdf

¹⁵ *ibid.*

¹⁶ <http://www.freep.com/story/news/local/michigan/flint-water-crisis/2016/01/23/flint-lead-levels/79178786/>

- We also similarly test incoming water from our (six) Flint Municipal Water system input supply lines.
- All food service water source lines are flushed for a minimum of five minutes prior to use each morning, and only cold water is used, consistent with EPA guidelines.¹⁷
- We use NSF/ANSI 53 certified filters on all drinking water supplies on campus; these filters are certified to remove lead and trihalomethanes in addition to a wide variety of other contaminants and suspended solids. You may find details on the NSF/ANSI 53 certification standard at nsf.org and on the websites of manufacturers that produce filters conforming to this standard. There are 31 specific performance criteria that fall under Standard 53.
- All of our filters are maintained and replaced at the intervals recommended by their respective manufacturers.
- To be conservative, we shut off all water fountains on campus where the filters for that fountain were located at a significant physical distance from the fountain itself (usually because of space restrictions in the fountain cabinet).

We did this as a precautionary measure, since it is possible for lead (if, for example lead solder was used in its supply line) to be produced through the interaction of water with plumbing in the supply line *after* it has been filtered *if* that water is allowed to sit undisturbed for a protracted time in the supply line (such as when a water fountain is used very rarely).

We do not test the water used in toilets, bathroom vanities, or showers, **but we do test the sources from which they draw water** (i.e. the input supply lines to campus). **Human skin does not absorb lead in water**, so bathing, washing, or showering is safe even using water containing lead over the EPA's action level.^{18 19} Adults may safely use unfiltered water for brushing their teeth.²⁰

In addition, we continue to make improvements to our local system to improve convenience and ensure safety. One of the most visible of these is the replacement of many of our water fountains across campus with hydration stations; this project in fact began a number of years ago. All of our hydration stations are monitored and contain integral NSF/ANSI 53 water filtration systems.

How are Lead Levels in Water Specified and Interpreted?

The concentration of a metal, like lead, in water is often measured in parts per billion, usually denoted **ppb**. A concentration in water of 1 ppb represents one gram, or three one-hundredths of an ounce (3/100 ounce), of a substance in 260,000 *gallons* of water. One ppb is also three seconds out of 100 years. Ten parts per billion (10 ppb) is the equivalent of approximately one teaspoon of water in an Olympic-sized swimming pool.

The EPA has set an action level for lead in drinking water supplies at 15 ppb, and a goal of 0 ppb given its health

¹⁷ EPA 810-F-93-001

¹⁸ <http://www.cdc.gov/nceh/lead/tips/water.htm>

¹⁹ http://www.michigan.gov/deq/0,4561,7-135-3313_3675_73946-372051--,00.html

²⁰ http://www.michigan.gov/documents/deq/2015-10-21_-_Lead_-_Flint_Water_FINAL_504265_7.pdf

effects on children.²¹ In other words, if drinking water contains lead below the 15 ppb level, EPA regulations state that no action is required.²²

For reference, the EPA permits faucets to be sold in the U.S. that leach 10 ppb or less of lead into water during a 19-day test.²³ Studies conducted by the EPA have found that the geometric mean of lead levels in drinking water systems in the US is 2.8 ppb.²⁴

Results of Our Ongoing Testing

- As of the date of our last test series and over the past many months, we have tested the water drawn from the six input lines to campus a total of 15 times and all tests have resulted in a measured level of “ND” (for “None Detected”), with only three, single-test exceptions. In these three exceptions:
 - One detection was at 1 ppb, one was at 5 ppb, and the other was at 7 ppb. All of these are significantly lower than the EPA’s action limit for lead of 15 ppb.²⁵
 - These were single point-in-time detections; **later repeat testing of the same distribution points detected no lead.**
- **No lead has ever been detected in any water source used for food preparation.**
- As of the date of our last test series and over the past many months, all drinking water distribution points (e.g. water fountains) on campus have consistently tested “ND” (for “None Detected”) for lead, with only six, single-test exceptions in well over one-hundred tests conducted. In these six exceptions:
 - All detections were at levels of less than 5 ppb (1,4,5,2,3 and 2 ppb respectively); all are significantly under the EPA’s action limit for lead of 15 ppb.²⁶
 - These were single point-in-time detections; **later repeat testing of the same distribution points detected no lead.**

Access to Test Data

We make all results of these tests public. You may always find our latest test results along with other information related to the state of water in Flint at <http://www.kettering.edu/water>. We will continue to update the test reports on this site as we receive them.

On this same webpage, you will also find a link to PDF copies of the certified assay reports provided to us by our independent laboratory.

We have encouraged our students to speak with their parents or guardians about this issue, and to share with them all communications they receive from us. Copies of all of our communications to students on this matter may also always be found at <http://www.kettering.edu/water>.

To: The Kettering Community of the Parents of Our Students and Our Alumni

More Information

If you have further concerns, I encourage you to read the Centers for Disease Control website on lead contamination of water at <http://www.cdc.gov/nceh/lead/leadinwater/> and <http://www.cdc.gov/nceh/lead/tips/water.htm> as well as the citations in this letter. Additional information is also available on our website at <http://www.kettering.edu/water>.

If you have technical questions about the campus water supply, they may be directed to Nadine Thor, Director of Auxiliary Services, at nthor@kettering.edu. Questions from students or their families of a more general nature should be directed to Dean Betsy Homsher, Dean of Students, at bhomsher@kettering.edu.

We will of course continue to update the campus as this situation evolves.

Members of the Kettering Community that Live off Campus in Impacted Areas

We have encouraged our students, faculty and staff who live off campus within Flint city limits to use bottled water, to test their water (which also supports the city's data collection and analysis efforts), and to use appropriate water filtration in drinking water sources until notified otherwise by civil authorities.²⁷

In the interim, **free bottles of water, water filters, replacement cartridges, and home water testing kits are widely available to all Flint residents.**²⁸ There are multiple distribution points for these around the city, and the University maintains a supply of filters as well as bottled water in the Office of Student Life for students otherwise unable to obtain them.

Information on the city's distribution of all of these items to residents may be found at www.michigan.gov/deq. Students residing off campus needing assistance in acquiring water, test kits, and/or faucet filters have been encouraged to contact the Office of Student Life at (810) 762-9871.

A Note on Water Clarity

You may see pictures of bottles of rusty or cloudy water in articles on water safety; the same has been true of the reporting surrounding the water crisis in Flint.

The presence of suspended rust in water can turn it orange, red, brown or yellow. The presence of rust in water is not necessarily an indication of the presence of lead or other contaminants in the water, nor does it necessarily indicate that the water is unsafe to drink,²⁹ but water corrosivity does accelerate the erosion of iron elements in the water system which may discolor the water.³⁰ In water, lead is colorless, odorless, and tasteless,³¹ and the presence of rust in water does not indicate the presence of lead, bacteria, or other substances. Conversely, water may also be clear and yet contaminated with lead or bacteria.

On its own, rust in water is not a sign of harmful bacteria or lead. In fact, the limits set by the Environmental Protection Agency (EPA) for iron in drinking

²⁷ http://www.michigan.gov/deq/0,4561,7-135-3313_3675_73946---00.html

²⁸ http://www.michigan.gov/deq/0,4561,7-135-3313_3675_73946-366279---00.html

²⁹ http://www.quincyma.gov/CityOfQuincy_Content/documents/RustyWaterFactSheet.pdf

³⁰ Iron erosion can also negatively affect the level of free chlorine in the water.

³¹ <http://extension.psu.edu/natural-resources/water/drinking-water/water-testing/pollutants/lead-in-drinking-water>

To: The Kettering Community of the Parents of Our Students and Our Alumni

water are based on aesthetics (taste, odor, color), not safety concerns.³²

Trapped air (in the form of small bubbles) in the water can also turn it cloudy or milky. Water pipelines are pressurized systems, so any air introduced into the system can remain trapped until the water leaves a faucet. This cloudiness is not indicator of water quality.

The NSF/ANSI 53 water filtration systems we use on campus for all drinking water remove suspended particulates including the iron that can discolor water (known as “turbidity reduction”).

Legionella

It has very recently been reported³³ that there were an unusually high number of cases of Legionnaire's Disease seen in Genesee County in 2014-2015.³⁴ It has also been suggested in the media that this increase related in some way to the switch in the Flint water supply. Roughly half of the cases identified are in individuals who live outside of the city and the Flint municipal water service zone,³⁵ and a possible causal link between the two has not been established.

We have no evidence of any member of the University community having contracted Legionnaire's Disease.

Legionnaire's Disease is not contracted by drinking water containing *Legionella* nor is it transmitted between individuals. It is not contagious.

Legionnaire's Disease is a form of pneumonia caused by the bacteria *Legionella pneumophila*, and it is treatable with several classes of antibiotics.³⁶ It has an incubation period of two to ten days. *Legionella* do not survive in water above 140 °F (60 °C). *Legionella* are normally found in rivers, lakes, and streams,³⁷ and they are normally present in the water systems of large buildings and even in a percentage of residential water systems.³⁸

Legionnaire's Disease is primarily contracted by heavy smokers, immunocompromised individuals, and individuals with chronic lung disease³⁹ through the aspiration of water or the inhalation of water mist contaminated with the *Legionella* bacteria.⁴⁰ Even after exposure to *Legionella* most people do not become sick.

Cooling towers for large buildings are frequently cited as potential breeding ground for *Legionella* bacteria if they are not regularly maintained and disinfected.⁴¹ **The University has for many years routinely monitored and disinfected all cooling towers on campus.**

As part of a proactive effort, though, we have also begun ongoing and recurring testing of our water for the presence of *Legionella*. We will take appropriate action (which we will report) if elevated levels of the bacteria are detected in campus water supplies in the future. We will of course publish the results of these tests on <http://www.kettering.edu/water> when they become available.

Federal Emergency Declaration

On January 16, 2016 and at the request of the state of Michigan, President Obama signed an emergency declaration the purpose of which is to make Federal aid available to the city in support of current filter and water distribution efforts to impacted persons in the city.⁴² Substantively, this declaration simply mobilizes the Federal Emergency Management Agency (FEMA) to assist in these efforts and also makes certain federal funds available to the city for the purpose of supporting these activities. As stated in the order, it “is to provide water, water filters, water filter cartridges, water test kits, and other necessary related items for a period of no more than 90 days.”⁴³

A Kettering Professor (from the Beginning) and Our Students have been and will continue to be Part of the Solution

Last year, Kettering’s Mechanical Engineering Professor Laura Sullivan was asked to co-chair Flint’s Technical Water Advisory Board and was recently appointed by Mayor Karen Weaver to the Karegnondi Water Authority. This is important work, and through it she makes all of us in the greater Kettering family a key part of the solution. I want to take this opportunity to recognize her and to thank her for her service to Flint and the University.

Our students are some of the most creative in the world, and so we have been and are continuing to organize ways for our students, often in teams, to solve some of the challenging and unforeseen problems that have arisen in the distribution and installation of filters in affected areas of Flint. These efforts not only take advantage of the expertise and ingenuity of our students but they are also consistent with Kettering’s ongoing commitment to Flint. We will make information on these efforts available on <http://www.kettering.edu/water> as it becomes available.

Please know that we are deploying every resource at our disposal to ensure the safety of our entire campus community and our visitors, and we will continue to work with federal, state, and local officials to help create long-term solutions to these problems. We value your input, and I hope that as valued members of the Kettering Community and of this great University that this letter has been helpful to you. If you have questions, comments, or thoughts on this issue or the University’s response to it please send them to us at water@kettering.edu.

Thank you.

Warmest Regards,

Dr. Robert K. McMahan
President

Subject: Flint SOB drinking water notice action

Team,

We have the notices posted and the new water dispensers have been installed at all the drinking fountain locations at the Flint State Office Building in reaction to the City of Flint's notice of a violation in the drinking water standard for the water they supply to our Flint Facility. Please see photo attached. The potable water vendor couldn't deliver till Friday so we pick up the equipment and installed to avoid any extra disruption this issue may cause our tenants and visitors to the building. We worked the vendor for a new customer price so the first month rent on the dispensers was free and will only be \$7.00 per month after that with a price of \$4.00 per 5 gallon container of water. I have made contact with the City of Flint Water Department to gain more information on the corrective action plan and possibly the time line to correct the issue but they were unable to provide any more information at this time. Please let me know if more action is necessary and I will keep everyone posted if I hear any new information on this issue.

Thank you,
Brian

Flint Water Advisory

Date/Time:

Effective Wednesday, January 7, 2015

Details:

The City of Flint recently sent out the attached notice regarding violations to the drinking water standards. While the City of Flint states that corrective actions are not necessary, DTMB is in the process of providing a water cooler on each occupied floor, positioned near the water fountain, so you can choose which water to drink. The coolers will arrive today and will be provided as long as the public water does not meet treatment requirements.

DTMB Energy Tips

Since we spend about 40 hours a week at our workplaces, isn't the office the best place to try out some new energy-saving tricks? The Energy Information Administration estimates that if commercial and industrial buildings improved their energy efficiency by 10 percent, our economy could see yearly savings of nearly \$20 billion.

Subject: FW: Sample Storage Space

Good afternoon,
Do you guys know if we could make heated storage space available temporarily for DEQ Flint water samples at the SOM W.C? The Initial estimate of space needs based on the number of potential samples would be 1000-1500 ft², enough to hold around 100 (3'x4') pallets with additional space to maneuver around to get to specific pallets if necessary.

Thanks,
Jamie

Subject: Sample Storage Space

Neal – Based on our phone conversation, I'm looking for storage/warehouse space for a potentially large amount of water samples over the next few months with the State of Emergency that is happening in Flint right now. Wondering if

there are any locations near the Lab that we could utilize for this effort if necessary. At a minimum, the space would need to be secured and temperature controlled, only to prevent freezing. Also looking for pallets that can hold around 1000 Lbs or more. The idea is that we palletize samples here and have them transferred to this storage location on a daily/weekly basis as necessary. There is really no storage space for this kind of capacity here at the State Lab. Initial estimate of space needs based on the number of potential samples would be 1000-1500 ft², enough to hold around 100 (3'x4') pallets with additional space to maneuver around to get to specific pallets if necessary.

Sandip – Copying you on this message if you have any ideas that could help.

Thank you!

Kirby

Brandon,

Can you make sure that our new guest have the parking activated. I did check two badges just before lunch and they are not working yet.

This is a big issue with DHHS and the limited parking they have for they're clients. So if we can have them directed to park there as soon as they can would be a great help to us.

I will assign one of my staff up there tomorrow morning to make sure they can get in.

Team,

We have reached out to Our Tenants DHHS Sandi Mose and talked about them giving up the 5 work station across from where FEMA is now.
DHHS has said there is no way that they could allow to lose that space. We were thinking that this space could be rebuilt to allow them to have multiple workers for FEMA to coordinate the operations.

However,

Sandi did mention that maybe the MCcree facility that they just moved out of is wide open and could house 180 staff as a possibility.

Please let us know if there is anything else we can do.

Facilities & Business Services Administration Building Operations Division

Joint Focus Meeting Notes Tuesday, January 19, 2016 Operations Center, Conference Rooms A,B,C 9:30 a.m. – 11:00 a.m.

Leading the Meeting: Jamie Uphaus

❖ **Special Topic (5 Min.)**

- Health and Safety – Dan/Olivia
 - Arc Flash Training coming up on Jan. 27th, 15 slots available for free, cost for staff beyond that, one day training 8-4 Cadillac Place
 - Send RSVP e/m to Dan and Olivia for staff on provided list, let them know if there are other folks that are interested
 - Emergency Responders- what are BOD responsibilities for R badges
 - Dan/Larry/Jamie will be outlining and defining our role during emergencies
 - Dan is working closely with OIP on active shooter
 - Spok mobile alternatives
 - Jamie reported OIP is putting together options
 - Dick suggested that the complexes be broken up: Downtown and Secondary, etc.

❖ **Discussion Topics**

- BOC Training Session
 - Energy Office offered to pay for 13 people to attend Building Operator Certification courses
 - Offered to BTSS- Brandon, Jerry and Kyle have signed up so far
 - Now extending invite to Building Trades Crew Leaders that are interested, application deadline is 4pm on 1/19 (Bethanie forwarded email with details on 1/19/16)
- Flint Water Crisis
 - Mike Noonan provided update on what is happening in the Flint State Office Building
 - SOB water testing has consistently tested well below the EPA allowable limits for lead, continuing to test water quarterly
 - Water coolers have been set-up for tenants, filters installed on faucets

❖ **Alternate 15 Input – Larry Scates**

- Specialty Crew invite to all project kick-off meetings
 - Please be sure to invite OIP and specialty crews to kick-off/partnership meetings to keep everyone involved from the beginning of a project
 - FS needs to make certain that professional always includes everyone on meeting invites, as they have a tendency to drop people off if they don't attend every meeting

❖ **MEP & Supply Chain Input**

- Supply Chain is currently restocking cleaning kits. Email DTMB-SupplyChain w/related requests.

 - AHU Replacement Project: Work on bulletin #9 completed.
 - New Loading dock seals and doors have been installed and completed.
 - In the process of rebuilding the High Voltage Switchgear.
- Scott Davis – Zone 6
 - Power Plant Operator

Next Meeting: Tuesday, February 2, 2016 9:30 - 11:00 a.m., Ottawa UL Conference Room #5

COLLABORATION. COMMUNICATION. COOPERATION. CUSTOMER SERVICE

- Robert Barnes started 1/19/16
- Reposted for current vacant PPO
- Ralph Matt has completed his retirement papers, last day is January 29th
- Norm Fudge is off on medical leave, return to work TBD
- Energy Center
 - Absorption Chillers
 - Operational as designed, utilizing “free steam” cooling the complex up to approximately 72°F
 - Heat Exchanger/Free Cooling
 - On line and functioning very well to cool the complex
 - Centrifugal Chillers
 - Performing winter maintenance
 - Will be working upgrading control panels on unit #4
 - Solar Turbine/HRSG
 - Operating as designed
 - Boiler #1 (old unit)
 - Standby mode
 - Thermal Storage
 - Utilizing to compliment absorption chiller capacity.
 - Metering Project
 - Procedural Operating Documentation
 - Meeting with C2AE to begin design and format
 - Update Meeting on 1/22/15 to review SOP's, Valve tagging and prelim layout
 - Funding has been acquired, Dave Sproul will be scheduling a progress meeting
 - Remaining Catwalk Access
 - Meeting with Century A & E 11/19/14 to review preliminary designs
 - Finalizing design, received an approximate cost from C2AE
 - Pre-Bid Walk through June 8th, Bids Due June 17th
 - Laux Construction awarded the contract
 - Pre-con meeting 10/09/15
 - Mobilize November 30th, complete by December 31
 - Interior steel-complete
 - Exterior steel-complete
 - Awaiting punch list item completion (parts at galvanizer) and closeout
- General Service Building
 - Painting of Exterior project
 - Punch list compiled- awaiting final closeout meeting
 - Lobby Upgrades
 - Drywall, paint, flooring, interior door and ceiling complete
 - Furniture on order
 - Planning with designers to move into main hall and break area
 - Sewer Line/ AHU 9-10
 - Pre-Con meeting scheduled for 1/21/15
 - Mandatory RFP meeting 4/17/14, Received Proposals 5/06/14-William A. Kibbe & Associates, Inc. chosen as PSC
 - Moore Trosper started work on 3/23/15
 - ✓ The new sewer line-Complete
 - ✓ Commissioning-complete
 - ✓ Punch list has been generated-to be completed during the bulletin #2 work
 - ✓ Bulletin #2 approved-booster pump and drywall to deck, complete
 - ✓ Re-work of controls valves need to be completed
 - Depot Move
 - Working w/Dave McGrath & tenants to complete bldg. mods to meet Depot needs
 - To be complete by March 1st
- Operations Center
 - Treasury modular reconfiguration project
 - Including carpet, lighting and paint

Next Meeting: Tuesday, February 2, 2016 9:30 - 11:00 a.m., Ottawa UL Conference Room #5

COLLABORATION. COMMUNICATION. COOPERATION. CUSTOMER SERVICE

- SWS Modular Reconfiguration Phase 3- started 1/11/16
- OPS Hosting Center
 - Final meeting on punch list ~~July 22, 2015~~ postponed to 8/11/15, McGrath and Gute did not show- awaiting closeout documents per Dave McGrath
- OPS DTMB Technical Services
 - Modular Reconfiguration
 - Timeline/scheduling Meeting 9/01/15
 - Begin phase 1- complete
 - Phase 2- complete
 - Phase 3 beginning 12/28/15
- OPS DTMB CSC
 - Modular Reconfiguration- 3 phases + Door Frames
 - Phase 1- complete
 - Phase 2- starting 1/04/16
 - Phase 3- starting 2/01/16
 - Door Frames begin- 1/04/16
- TRANSPORTATION WAREHOUSE
 - Engineering Print Floor issue still on the table
 - Installing LED light fixtures in the front office-complete
 - Piloting warehouse lighting fixtures in several areas prior to global replacement
 - Earle Center Lighting 98% LED complete
 - Parking Lot improvements- Met with tenants 10/23/15 to assist w/future use & planning
- VTS
 - Reviewing parking lot for repair/replacement
 - Continuing with options for building generator
- Kirk Brennan – Zone 7
 - C & T
 - Approval has been giving on carpet estimate and tile colors for Admin. area and some surrounding rooms. Also restroom partition replacement.
 - Going out for bid on the repair/replace exterior brick lentils Project with SME. Mandatory walk thru Feb 9th, bids need to be received March 2nd.
 - Forensics Lab
 - Working with the Carpenters on the removal of 2 revolving doors in rooms 279 and 283.
 - GOB
 - SEOC project: 5 refrigerators and 5 microwaves have been ordered for the first agency into the 2nd floor of the GOB (MPSCS) scheduled for the weekend of January 29th.
 - Cars Project: FBSA is completed its move from the 3rd floor to the 2nd floor B wing GOB. Demo of the 3rd floor B wing has begun. Other areas under construction: 3rd fl A&B Wings, 2nd fl A wing, 2nd fl B wing DBI, 1st fl A wing fitness center block work continues.
 - Meeting is scheduled Jan 26th with Comm. for the Blind on quotes received for cate' remodel.
 - HazMat (EMHSTC): Business as usual
 - MSP Post/ Head Quarters: Business as usual
 - MSP Annex: Business as usual
 - PTA: General bldg. and dorm room repairs continue for scheduled classes starting in March.
 - Drive Track: Business as usual
 - SOS: Curt Myers is looking at selection of solid surface counters tops for the main men's and women's restrooms.
- Butch Kimball – BIS Controls & Fire Crew
 - New R-3 door in Allegan Ramp is being wired today. Delayed to work on the Ottawa R-8 door which was made operational last week.
 - Met with Rytec Door Manufacturer and are looking to replace some of our more troublesome area doors.
 - Kick-off meeting today with Zone 1 to start Fire Alarm installation at Building #600.

Next Meeting: Tuesday, February 2, 2016 9:30 - 11:00 a.m., Ottawa UL Conference Room #5

COLLABORATION. COMMUNICATION. COOPERATION. CUSTOMER SERVICE

- Worked with contractors at Mason Building with control and air balance issues over the holiday weekend.
- Job offer will go out to electrician to fill a vacancy on the Fire Crew today.
- Chris Rankin – Grounds
 - Crew hauled out snow piles from downtown on 1/18/16.
 - Sarah from Gov. office requested temp fence be replaced and that was resolved
 - Ordered last load of salt, to be delivered next week
- ❖ Staff Ideas/Concerns & Open Discussion *(10 Min.)*
 - Dan reported there is a push for wellness, strategic objective 3.3
 - FSs/BTSs please make certain that stairwells are safe, i.e. free of obstructions, treads are in good repair, etc.
 - RM 9s- Gates out week of 19th, Fudge out thru end of month
 - Let Clinton know if your zone has plumbing work as his plumber has availability

Subject: Flint Water Purchase Program Update

THANK YOU for your support for the people of Flint during this water crisis. Because of your donations, the UFCW 951 program was very successful and they delivered dozens of truckloads of water. Please note that due to such demand, they had to switch to different size packs of water to maximize and provide even more water at a discounted price with a slight increase. Thank you to United Food And Commercial Workers Local 951 for making it easier for us to help our friends in Flint. Please continue your support.

UFCW 951 & MEIJER: FLINT WATER PURCHASE PROGRAM

UFCW 951 has arranged for a discounted rate with Meijer for any organization that would like to purchase large quantities of water for Flint. Donating water through Meijer is convenient, and your participation in the lifting, pulling and loading of water isn't necessary.

Your organization can reserve your own truck loads, or UFCW 951 will assist those who can purchase a portion of a truck load by combining your contributions with other organizations in order to have full trucks delivered to the residents of Flint.

THE COSTS ARE AS FOLLOWS:

One truck will deliver OVER 36,000 bottles of water to residents of Flint

UFCW 951 represents Meijer employees in retail stores, distribution centers and the entire fleet of truck drivers. All water will be loaded by UFCW 951 members at the distribution center and then driven by a UFCW 951 driver to the Flint area food bank warehouse for distribution to the residents of Flint.

TO RESERVE YOUR TRUCKS OF WATER, OR FOR MORE DETAILS, CONTACT TODD REGIS WITH UFCW 951 AT 1-800-999-0951 EXT. 111.

*NOTE: Due to heavy demand, trucks carrying 35-packs of bottled water are no longer available. Therefore, prices have changed since the beginning of this project. Manufacturers are now filling trucks with 24-packs, so the trucks can hold more water. These are the new prices, with a full truck holding over 36,000 bottles of water.

Thanks Mike ,
But it's a team effort and I cannot thank my my team at the facility enough.

Brian Walts, Ed Wright, Dennis Releford and Paul Bates have all gone out of the way for our new tenants and will continue to do so.

Monday we will make sure to take good care of the day's guest. It's going to be a long journey but with the great team I have and the great support from Lansing we will continue to provide great service.

We also have test done and another one on the way . Are levels were very low they are available on the shared file .

We also have been providing Culligan drinking water in the common areas .
I was also just informed that FEMA will reimburse us for the water bills since April

Hi David,

DynGlobal manufactures units to remove heavy metals including lead from drinking water. Our technology is scalable from under sink units to large municipal scale facilities.

Please let me know how we can assist Flint to remove lead or other metals or bacteria from drinking water. DynGlobal's technology can be rapidly deployed within less than two months to resolve the current emergency situation.

Thank you and best regards,

Vern

Subject: Safe Water For Flint Campaign

Imagine
giving this
to your
baby?

In recent months, children of Flint, MI have been diagnosed with high blood lead levels because of the city's lead contaminated water system. The problem is so severe, a state of emergency has been declared in the City of Flint. There is a great need for safe drinking water in Flint.

On Sunday January 10, 2016 through Sunday January 31, 2016, Union Missionary Baptist Church (UMBC) will begin a Safe H2O Campaign to provide the children of Flint with bottled water. For the next four weeks UMBC will accept donations of bottled water. Anyone may purchase a case of water or make a financial contribution for the purchase of

bottled water.

Cases of water may be dropped off at the church located at 500 S. Martin Luther King Jr Blvd,
Lansing, MI 48915 - Phone (517) 485-7705

Monday-Thursday	8:00 pm - 7:00 pm
Friday	10:00 am - 3:00 pm
Saturday	8:00 am - 12 noon
Sunday	7:30 am - 1:00 pm

If you wish to make a financial donation to the Safe H2O Campaign, please indicate on your offering envelope in the 'Other section' 'Water' or 'H2O'. For personal checks to made out to UMBC, please write 'Water' or 'H2O' on the line that indicates 'Memo.'

Larry,

Just want to let you know that I have been working with Jenette Doll on the flint state of emergency and finding a location for the (PIOs) Public Information Officials .

We are putting them on the 5th floor in our conference room and will be setting up an area for them to do interviews in our other conference room.

I T has a tech onsite to install phone and data as needed. They should be up and rolling by noon Friday .

Subject: Re: sampling

I just spoke to the DEQ and they stated that at both locations there was no copper detected.

#1 location had .001 for lead and #4 had .004 for lead. In order to be a concern it would have to be .015 or above so both are well within acceptable levels.

As far as bacterial or chlorine residual, those samples are submitted differently as they are done in house. Did you submit those as well? They would have been in a much smaller sample bottle. If not, I can connect you with the lab and we may have to have the tech come out.

Hi Melanie,

Any news back on the water samples I dropped off on 9/25/15 for the State Office Building at 125 E. Union St? I dropped off a few samples and was looking for lead results for sure (shocker right) and possible chlorine residual and bacteria results as well. Any news would be appreciated I know you guys are extremely busy.

Thank you,

Brian Walts

Subject: sampling

It was nice talking to you this afternoon. I forwarded your request and contact information to Mike Glasgow, Utilities Administrator and former Lab Supervisor.

I also had a brief conversation with the Lab Assistant, Chris Beatenhead who suggested that you pick up the sample bottle at your earliest convenience if you need to expedite the process.

Sincerely,

Melanie Poisson, Clerk

Subject: Facility Notification: Flint State Office Building

Flint Alternate Water Resource

Date/Time:

Monday, October 5, 2015 at 6:00 a.m. until further notice

Details:

Beginning Monday, October 5, 2015, water coolers will be available in common areas on floors 1-6 of the Flint State Office Building. Although the drinking water has been tested and falls within all DEQ and EPA regulation standards, alternate water sources will be offered to accommodate all tenants due to recent concerns regarding the water supply. Water testing will continue and the alternate water source will be available until all quality concerns are addressed.

Thank you for your cooperation.

Subject: Update following GFHC Board resolution on lead levels in City of Flint water

Greater Flint Health Coalition Board of Directors:

Following Monday's GFHC Board meeting in which the Board passed the attached resolution regarding physician concerns with observed elevated blood lead levels in children since the change in the City of Flint water source, there has been significant efforts at the local and state level to address this public health threat to residents. On that note, I want to keep you informed of an event that will be happening this afternoon, led by community physicians (specifically pediatricians) in collaboration with the broader medical community.

Specifically, members of the physician community will be holding a press conference at Hurley Medical Center at 3:00 in the Charles White Conference Center, regarding their concerns about the lead in the City of Flint water and the appropriate precautionary measures to take. This is being done in the absence of a formal health advisory from the city or county, although we have been told this is in development. The press conference will be led by Mona Hanna-Attisha, MD MPH FAAP, Director of Hurley Children's Hospital pediatric residency program and CEO of Mott Children's Health Center, Lawrence Reynolds, MD FAAP. Dr. Hanna-Attisha and the Hurley research department have looked at data to date and the collective observation of all blood lead levels processed in the Hurley lab do show some early indications of elevated blood lead levels for children living in the City of Flint. Given this data, the physician community collectively feels as though they should err on

the side of caution and discuss precautionary measures that the public should take to prevent future harm from elevated lead levels. The organizations represented in this effort, and sharing this concern, include Hurley Medical Center, Greater Flint Health Coalition, Mott Children's Health Center, Genesee County Medical Society, MSU Program in Public Health, Hamilton Community Health Network, and others.

We will keep you posted as additional information and resources are provided.

Sincerely,

Kirk D. Smith, MHSA
President & CEO

GREATER FLINT HEALTH COALITION

RESOLUTION REQUESTING THE RELEASE OF A HEALTH ADVISORY BY THE CITY OF FLINT REGARDING ELEVATED LEVELS OF LEAD IN THE CITY OF FLINT WATER SUPPLY AND THE ASSOCIATED PUBLIC HEALTH THREAT TO ALL CITY RESIDENTS, WITH AN EMPHASIS ON CHILDREN

WHEREAS, the Greater Flint Health Coalition is a nonprofit Michigan collective impact organization whose mission is to improve the health status of the residents of Genesee County and to improve the quality and cost effectiveness of the health care system in Genesee County;

WHEREAS, the Greater Flint Health Coalition Board of Directors is composed of representatives and leadership from Flint & Genesee County's hospitals, physicians, healthcare providers, health insurers, business, government, educators and schools, organized labor, and community residents.

WHEREAS, the Greater Flint Health Coalition Board of Directors has engaged in multiple discussions and reviewed detailed information regarding the state of the City of Flint's water supply and its potential health impacts to all residents.

NOW, THEREFORE, IT IS HEREBY RESOLVED, that the Greater Flint Health Coalition Board of Directors requests the release of a Health Advisory from the City of Flint and its Department of Public Works, with urgency, regarding the impact of elevated levels of lead in the City of Flint water supply on all residents, with emphasis on the public health threat to children.

THIS RESOLUTION has been unanimously adopted effective September 21, 2015.

Subject: FOIA Request
Importance: High

I have a meeting today at 3:30 to discuss this. What if any records would we have to support this? Thoughts on process and time to respond for our Team?

Request for Public Record

To: FOIA Coordinators via email

I am a person as defined under Michigan FOIA. Please accept this correspondence as a request pursuant to the Michigan Freedom of Information Act (FOIA) Michigan Compiled Laws §15.231 to §15.246 *et seq.*, the Michigan Constitution and common law, and the U.S. Constitution, for certain public documents hereinafter specified.

Date of Request: 2/4/16 **Time:** 4:40 p.m. via email

Person Requesting Record: Matthew Dolan Phone: 313-223-4743

Mailing address: Detroit Free Press

160 W. Fort Street

Detroit, MI 48226

Email Address: msdolan@freepress.com **Fax:** n/a

Delivery Specifications:

Please select the quickest form to be able to view the documents:

☐ **Email:** to requestor at the email address above if possible, and if not please mail to the address above.

☐ **In-office Inspection:** Please contact me with an acceptable contact, time, and date when I may appear for inspection and possible scanning of documents.

☐ **Pick- up:** Please contact me with an acceptable contact, time, and date when I may pick up the documents.

Auditor or Attorney: _____ **Contact:** _____

Media Specification: Paper Copies or Email attachment less than 20 MB, CD-ROM or DVD, unless certain records are not available in computer format, in which case response by fax or in-person viewing is preferred

Records requested: The records and documents I am requesting are all those relating to:

Copies of the documents, including but not limited to emails already requested by and provided to Progress Michigan or those associated with the organization related to any and all discussion of Flint's water supply, including but not limited to contaminant such as lead and copper in the water as well as any and all discussion of Legionnaire's disease in Genesee County, Mich.

For the purposes of this request, the term "**you**" or "**your**" refers to public body generating or maintaining the public records requested in this request, and to which this request is directed, whether that be an agency, municipality, office, county, or any other entity subject to disclosure under this act; the term "**records**" refers to all documents, regardless of physical form (including without limitation papers, reports, notes of telephone conversations, telephone call messages, studies, proposals, indices, letters, messages, faxes, minutes, logs, journal entries, calendars, and computer-based or computer-generated materials including e-mail, or any other documentation of any kind of any and all kind) of or belonging to any department, agency, service area, board or other subdivision of the public body. "Records" shall include drafts of records to the extent permitted by law; The term "**email**" includes any electronic message and any attachment to any such message, and specifically includes emails sent or received by an officer, agent, or employee using an email address other than that person's official government issued email address if sent or received while on duty, using a government computer, in a government building, sent or received using a government contact list, or other using any other government resource.

Michigan law requires you to respond to this request not more than five (5) days from your receipt of this request, but you are asked to expedite this request if possible. If this request is sent by fax or email, the time to comply begins the day after the faxed request is sent to you. If your agency does not maintain these public records, please let my designated auditor know who does, and include the proper custodian's name and address. If this fax request does not go directly to the office of the FOIA coordinator, you must deliver it there immediately. If you deny any part of this request, please indicate the name and position of the person too who an appeal should be directed prior to instituting suit, so that needless litigation in which costs, damages, and attorney fee may be taxed against you might be avoided.

Take notice of the penalties and consequences for failure to comply with this request: Willful violation of FOIA by refusing to disclose or delaying in disclosing or providing copies of a public record, may result in the court awarding in addition to any actual or compensatory damages, award punitive damages in the amount of \$500 to the person seeking the right to inspect or receive a copy of a public record. Reasonable attorneys' fees, costs, and disbursements" will be awarded to any person who prevails in an action to compel disclosure under MCLA § 15.240. If the requesting person only prevails in part, "the court may, in its discretion, award all or an appropriate portion of reasonable attorneys' fees, costs, and disbursements.

Because of the civic educational purpose of this request, I request a fee waiver and ask that you determine that a waiver or reduction of the fee is in the public interest because furnishing copies of the public record can be considered as primarily benefiting the general public." MCLA § 15.234(1)

I agree to pay any reasonable search, copying, and postage fees of not more than \$2.00. If the cost would be greater than this amount, Please immediately contact me by telephone or email if you anticipate that the costs will exceed this amount, so as not to cause delay in the prompt disclosure of the records requested. I may appear in person to inspect the documents on scan them using my portable equipment. Please provide a receipt indicating the charges for each document. The Michigan FOIA law provides that, "A fee shall not be charged for the cost of search, examination, review, and the deletion and separation of exempt from nonexempt information as provided in section 14 unless failure to charge a fee would result in unreasonably high costs to the public body because of the nature of the request in the particular instance, and the public body specifically identifies the nature of these unreasonably high costs. MCLA § 15.234(3).

If the documents I have requested are not subject to disclosure in their entirety, I request that you release all nonexempt portions of the documents that may be segregated and all parts of the documents that can be rendered disclosable by redaction without fee. If you determine that any of the requested documents fall within a statutory exemption, I request that you exercise your discretion to disclose those materials because of the overriding public concern about the improper use of government email systems and resources to further political agendas. As to any portion of the documents that you withhold, please state with specificity the legal and factual basis for withholding such portion. To the extent that you are unable to produce copies of or otherwise make available all records requested within the time frame provided, please notify my auditor in writing and provide me with those records that are available within the prescribed time frame and the remainder of the records on a "rolling" basis as they become available for production.

I appreciate your anticipated prompt cooperation and will expect your response within 5 days, as required by the act. If you need further explanation of the details or the nature or scope of this request, please feel free to call me or my designated auditor or attorney specified above using the contact information provided.

Hi David,
DynGlobal manufactures units to remove heavy metals including lead from drinking water. Our technology is scalable from under sink units to large municipal scale facilities.

Please let me know how we can assist Flint to remove lead or other metals or bacteria from drinking water. DynGlobal's technology can be rapidly deployed within less than two months to resolve the current emergency situation.

Thank you and best regards,

Vern

That is great, let me know when they will be there. Much appreciated.

I can take two chairs that are stored for DHHS that are like new.
We will need to get two soon.

I just spoke with Larry and he said that we can get two from
Lansing this week or sooner if needed.

Im sure our tenants won't mind if I borrow two chairs temporarily.
Given the circumstances.
I would even give them two of mine or my staffs chairs (not really
in great shape mind you). I just didn't want them to have something
like that.

But Monday two chairs will be in that office and we can swap out later .

Is everyone ok with that.

I received this just now from Brom as well. It is for 2 chairs. Can we make it happen?

Mike - we set up an office in Flint for Harvey Hollins in Gov's office to work on the water issue. He needs a chair.

Can we have something delivered ASAP? Otherwise they have an extra chair in the Gov's office that someone could take up.

Oops. Two chairs.

**Subjec
t: RE:
Flint
Office
Space**

Jamie,
Thanks
so
much.
This is
perfect
. What
does
patch
cord
on the
desk
mean?
Do you
want
me
have a
chair
deliver
ed to
Flint?

The
person
using
the
office
is

Harvey
Hollins
. I will
let you
know
when
he
starts
using
it.

We
have
one of
the
offices
originally
designed
for
the
Governor's
staff in
Flint
available
for
your
use. It
has
furniture
in it
minus
a chair
and is

ready
to use
starting
today.
I am
sure
that we
can
find an
extra
chair
onsite.
There
is data
in the
wall,
but I
did not
see a
patch
cord
on the
desk.

I have
attache
d a
furnitu
re plan
noting
the
locatio
n on
the 5th
floor
and
this
room's
relative
locatio
n to
where
another
group
of
individ
uals
related
to the
water
situatio

n are
station
ed.

This
space
is
current
ly
vacant
and in
DTMB
's
control
. I have
cc'd
Mike
Noona
n and
Brian
Walts
onto
this
email
and
they
are
both
aware
of your
request
and in
agreement that
this
room
is open
for
your
use.

Subject: NEWS UPDATE--House Approves Flint Water Fix

Wednesday, October 14, 2015, 08:43 PM

House Approves Flint Water Fix

The House unanimously voted this evening to approve \$9.35 million of state funds to return Flint to the Detroit water system and pay for additional state staff in the city's schools to gauge exposure to lead, handle evaluation and protocols on drinking water and to assist with plumbing engineers.

Governor Rick Snyder last week called for state funds to return the city to drawing water from the Detroit system and ending a disastrous move to pull water from the Flint River, as well as funds to pay for additional state staffers from the Department of Health and Human Services, the Department of Environmental Quality and the Department of Licensing and Regulatory Affairs working in the city.

The supplemental (HB 4102) allocates \$6 million to get the city back on Detroit's water system; \$300,000 for DEQ's drinking water and environmental health services; \$1 million for DEQ's laboratory services; \$1 million for DHHS emergency services to purchase and distribute water to Flint residents; \$850,000 for follow up services for children, including testing lead levels and care for those with abnormal levels; and \$200,000 for plumbing inspections.

Insufficient corrosion controls for water drawn from the river – which is inherently more corrosive than water drawn from Lake Huron, where the Detroit system draws its water – caused lead from the city's old service lines to leach into the water, leading to lead levels in the water exceeding the federal standard to trigger remediation and to elevated lead levels in the blood of some Flint children.

Gongwer News Service will have more on this story in Wednesday's Michigan report.

Team,

I made contact with the City of Flint to get an update on the potable water issue and found that on the re-test the water met the violated MCL from the test in January. Mr. Wright with the City Water Department told me they have made several changes to their operation and are planning to add charcoal filters to the system late this summer. The department still has to meet the MCL guidelines in their quarterly sample May 16th before reporting the water is all clear but it does look like they are making progress. I thought you guys might like the information to help keep up on the issue.

Thank you,
Brian

Facility Notification

Flint Water Advisory

Date/Time:

Effective Wednesday, January 7, 2015

Details:

The City of Flint recently sent out the attached notice regarding violations to the drinking water standards. While the City of Flint states that corrective actions are not necessary, DTMB is in the process of providing a water cooler on each occupied floor, positioned near the water fountain, so you can choose which water to drink. The coolers will arrive today and will be provided as long as the public water does not meet treatment requirements.

Flint Drinking Water

Details:

DTMB will continue to offer fresh and bottled water as options in the Flint State Office Building. An advisory has been sent asking residents and business within a defined area (see attached notice and map) to boil water before using it. However, the Flint State Office Building does fall within the Area of Interest on the map. Additionally, the results of testing we commissioned in October 2015 showed no signs of threats in the water supply to our building.

We will continue to monitor the water crisis and if at any time we have evidence that our water supply poses a threat to the health of our employees and visitors, we will take immediate. We will continue to provide bottled water as an option for those who are still concerned.

We will continue to work with Floor monitors and Key Contacts on safety procedures. If you don't know who your Floor Monitor or Key Contact is, please contact Facilities Supervisor, Kirk Brennan at (517) 322-5797 or BrennanK1@michigan.gov

Contact:

DTMB Customer Service Center, DTMB-Customerservice@michigan.gov or (517) 373-6227

DRINKING WATER WARNING

**The City of Flint water system lost pressure and contamination may have occurred
BOIL YOUR FILTERED WATER BEFORE USING**

Due to a drop in pressure in the City of Flint water supply, bacterial contamination may have occurred in the water system. Bacteria are generally not harmful and are common throughout our environment. Corrective measures are currently being undertaken to correct the situation.

What should I do?

AS A PRECAUTIONARY MEASURE, DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST. Bring all FILTERED water to a boil, let it boil for one minute, and let it cool before using, or use bottled water. If you are currently NOT using a filter to remove lead from drinking water, FLUSH your water for AT LEAST 7 minutes before collecting any to boil. Boiled FILTERED, boiled FLUSHED, or bottled water should be used for drinking, making ice, brushing teeth, washing dishes, and preparing food. Boiling kills bacteria and other organisms in the water. Continue using boiled or bottled water until further notice.

Due to the pressure loss, there may be trapped air and loose sediment in your water lines. The air and sediment may be removed by flushing your water system. DO NOT FLUSH YOUR SYSTEM THROUGH THE FILTER. The resulting air and sediment may affect the performance of your filter and the filter cartridge should be replaced.

What happened? What is being done?

These precautionary actions are being taken due to the loss of water pressure in the water distribution system caused by a water transmission main break on February 9, 2016. Whenever a water system loses pressure for any significant length of time, precautionary measures are recommended.

The City of Flint Water Department is working to get pressure restored, and water staff will be taking other remedial actions such as flushing and collecting bacteriological samples from around the system. The samples will be collected to determine that the water quality meets the state drinking water standards. We will inform you when tests show no bacteria and you no longer need to boil your water. We anticipate resolving the problem later today. This precautionary boil water notice shall remain in effect until results from the sampling verify the water is safe to drink. **Customers will be advised when the boil water advisory has been lifted.**

For more information, please contact The City of Flint Water Department at (810) 766-7202. General guidelines on ways to lessen the risk of infection by microbes are available from the EPA Safe Drinking Water Hotline at 1(800) 426-4791.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

CERTIFICATION:

WSSN: 2310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules.

To: Walts, Brian (DTMB) <WaltsB@michigan.gov>
Subject: Re: sampling

I just spoke to the DEQ and they stated that at both locations there was no copper detected.

#1 location had .001 for lead and #4 had .004 for lead. In order to be a concern it would have to be .015 or above so both are well within acceptable levels.

As far as bacterial or chlorine residual, those samples are submitted differently as they are done in house. Did you submit those as well? They would have been in a much smaller sample bottle. If not, I can connect you with the lab and we may have to have the tech come out.

Snyder could be asked to testify before Congress on Flint

"WASHINGTON — U.S. Rep. Brenda Lawrence's office said Tuesday that she and her staff have received word a U.S. House committee will hold a hearing Wednesday, Feb. 3, on the Flint water crisis and the state and federal government response to high lead levels there, but committee staff declined to confirm the report, calling it "premature.""

EPA blasts handling of Flint crisis, says risks remain

"WASHINGTON — The U.S. Environmental Protection Agency announced in an emergency order Thursday that it plans to take over lead sampling in Flint after sharply criticizing local and state officials in the handling of the city's water crisis, saying repeated delays and a lack of transparency continue to pose "an imminent and substantial" danger to residents."

Flint red flag: 2015 report urged corrosion control

"LANSING — A March 2015 consultant's report recommended spending \$50,000 to add corrosion control chemicals to Flint's drinking water because iron was leaching from the pipes and turning the water brown — a significant and relatively early red flag that city officials and regulators missed, experts said Thursday.."

Advocacy/Opinion

Don't limit access in elections

"

On Jan. 6, Gov. Rick Snyder signed a statute that prohibits local officials from using public funds to communicate ballot proposals within 60 days of an election.

"

Source: Escanaba Daily Press **Date:** 01-22-2016 **Link:** http://www.dailypress.net/page/content_detail/id/569872/Don-t-limit-access-in-elections.html?nav=5052

Our Editorial: Detroit lawmakers should back DPS

"With widespread teacher sickouts, buildings in poor condition and a district quickly going broke, Detroit Mayor Mike Duggan has started warming to the governor's plan to overhaul the finances and governance of Detroit Public Schools. His backing should help sway Detroit lawmakers, and that could speed the process in Lansing.

"

Michigan National Guard taking action to remedy lead surface dust

"LANSING, Mich. -Many older armories in Michigan and across the nation are home to Indoor Firing Ranges. More than a decade ago, the Michigan National Guard, like most states decided to cease the operation of its IFRs and issued guidance to limit access to the former IFRs in some of our armories. In response to changes in standards, the Michigan National Guard is taking action to reduce risk associated with lead dust. The dust is residue from the IFRs and on-going weapons cleaning, maintenance, movement, storage, or outside environmental factors."

Flint Water Crisis - 14th GOP Congressional District Press Release

"West Bloomfield, MI-January 20, 2016: Today the 14th District Congressional Republican Committee launched a water collection program to help citizens in Flint, MI. "Our fellow citizens in Flint deserve clean and plentiful water," said Janine Kateff, Chairwoman of the 14th District. "To maximize and speed our efforts to help, we decided to work with the office of West Bloomfield Township Clerk Cathy Shaughnessy to collect bottled water. I know that citizens in the 14th District agree that this situation must be addressed and addressed now. By combining efforts, we will deliver more needed water and do it faster."

Flint Drinking Water

Details:

DTMB will continue to offer tap and bottled water as options in the Flint State Office Building. An advisory has been sent asking residents and businesses within a defined area (see attached notice and map) to boil water before using it. However, the Flint State Office Building does fall within the Area of Interest on the map. Additionally, the results of testing we commissioned in October 2015 showed no signs of threats in the water supply to our building.

We will continue to monitor the water crisis and if at any time we have evidence that our water supply poses a threat to the health of our employees and visitors, we will take immediate action. Either way, we will continue to provide bottled water as an option for those who are still concerned.

Contact:

DTMB Customer Service Center, DTMB-Customerservice@michigan.gov or (517) 373-6227

Unplug electronics such as cell phones and laptops once they're charged. Adapters plugged into outlets use energy even if they're not charging.

DRINKING WATER WARNING

**The City of Flint water system lost pressure and contamination may have occurred
BOIL YOUR FILTERED WATER BEFORE USING**

Due to a drop in pressure in the City of Flint water supply, bacterial contamination may have occurred in the water system. Bacteria are generally not harmful and are common throughout our environment. Corrective measures are currently being undertaken to correct the situation.

What should I do?

AS A PRECAUTIONARY MEASURE, DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST. Bring all FILTERED water to a boil, let it boil for one minute, and let it cool before using, or use bottled water. If you are currently NOT using a filter to remove lead from drinking water, FLUSH your water for AT LEAST 7 minutes before collecting any to boil. Boiled FILTERED, boiled FLUSHED, or bottled water should be used for drinking, making ice, brushing teeth, washing dishes, and preparing food. Boiling kills bacteria and other organisms in the water. Continue using boiled or bottled water until further notice.

Due to the pressure loss, there may be trapped air and loose sediment in your water lines. The air and sediment may be removed by flushing your water system. DO NOT FLUSH YOUR SYSTEM THROUGH THE FILTER. The resulting air and sediment may affect the performance of your filter and the filter cartridge should be replaced.

What happened? What is being done?

These precautionary actions are being taken due to the loss of water pressure in the water distribution system caused by a water transmission main break on February 9, 2016. Whenever a water system loses pressure for any significant length of time, precautionary measures are recommended.

The City of Flint Water Department is working to get pressure restored, and water staff will be taking other remedial actions such as flushing and collecting bacteriological samples from around the system. The samples will be collected to determine that the water quality meets the state drinking water standards. We will inform you when tests show no bacteria and you no longer need to boil your water. We anticipate resolving the problem later today. This precautionary boil water notice shall remain in effect until results from the sampling verify the water is safe to drink. **Customers will be advised when the boil water advisory has been lifted.**

For more information, please contact The City of Flint Water Department at (810) 766-7202. General guidelines on ways to lessen the risk of infection by microbes are available from the EPA Safe Drinking Water Hotline at 1(800) 426-4791.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

CERTIFICATION:

WSSN: 2310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules.

Michael Glasgow UTILITIES ADMINISTRATOR 2/9/16
Signature Title Date Distributed

Reminder to water supplier: This notice / certification must be sent to the DEQ.

Subject: We Have Arrived!!!!

Good Afternoon Team Union St.!!!

Well, I must say that, once again, you have amazed me with yet another EXCELLENT effort!! I cannot believe that we have packed, partied, relocated, and unpacked 160 staff members without a major hiccup on our part!!! I thank each of you for working together to make this transition as seamless as possible. I am humbled by your positive attitudes and willingness to assist each other throughout this process. If you have an opportunity, please extend a kind word to Marlene and Jean as they are still tirelessly doing everything possible to make sure that we are well taken care of and in order.

I sincerely hope that you are enjoying your new environment and its amenities. It is really good to see the smiles on so many faces as you get settled in. This is absolutely a beautiful place to do our work and it is fit for such a great team. I truly believe that you are the best and deserve to have the best!!!

Please allow me to share a few things that I am grateful for...

- I am so grateful for each of you and the work that you do.

- I am grateful for a beautiful working environment for my team.

- I am grateful for being able to serve those that are in need.

- I am grateful for the many smiles that greeted me this morning.

- I am grateful for the DTMB, Telecom, Children's Services, and Property Management staff who helped us with the move.

- I am grateful for this day.

If you will just take a moment to consider one thing (or more) that you are grateful for and ride that energy throughout this day, I hope that it brings you peace and joy. Please continue to spread the positive energy and infect the environment and those that you come into contact with it!! Remember that the Union Street District is what you make it...let's make it great!!!!

Mike Noonan, Ed Wright, Dennis Releford, Paul Bates

Thanks Mike,

But it's a team effort and I cannot thank my my team at the facility enough.

Brian Walls, Ed Wright, Dennis Releford and Paul Bates have all gone out of the way for our new tenants and will continue to do so.

Monday we will make sure to take good care of the day's guest. It's going to be a long journey but with the great team I have and the great support from Lansing we will continue to provide great service.

Michael Noonan

Subject: SIGMA External Design Sessions

Ruth,

As I mentioned to you earlier in our checkpoint meeting, we received excellent customer service from Bill Brown (who works for Doug Church @ DTMB Facilities) this past week when preparing and setting up for the design showcases. He was courteous and knowledgeable about the equipment, offered to arrange tables, chairs, microphones and taped down the cords on the stage for our staff that were presenting each day (12/2 and 12/3). Our session yesterday was slated to end at 5pm, but we ended up staying in the room after that to do some logistical planning for the following day and Bill not only made himself readily available to us, but also offered to do the set-up that evening so we didn't have to worry about it in the morning. When we had some trouble with a microphone, he found a replacement for us and also checked and refreshed the batteries in the wireless microphones. He also provided the name of the person who would be on shift to assist us at 7 in the morning if needed and then followed back up with us after our session the next day. In addition, Bill has been a helpful point of contact that Amy has utilized for questions about equipment, lighting, connectivity and logistics during our prior planning phase for these sessions. Very impressed with this service!

Attached are the recognitions I have received and compiled for the next FBSA Quarterly Recognition Event. Tonyia has reserved GOB, Conference Room A for this recognition on Tuesday, March 29th. I would like to finalize the list of attendees by March 1st to ensure we can block the time on the calendars of those we have attending.

The attached is sorted by Division. The person nominated is in red and the email or other recognizing them follows their name.

Bob Burns and Bob Hall, there is one recommendation that includes Kris Garrison and Maureen Bailey in one letter. I have that listed under DCD's section.

BOD, I have a few additional items listed in red for you to consider.

Also, these are just emails (or other) that I have received. If you have others to add, please feel free to do so. I would like to finalize the list of attendees by Tuesday, March 1st.

As a reminder, we had decided to not do both a coin and invite to the quarterly event. If the employee received a coin for recognition, we have not invited them to the recognition event.

Tonyia, can you please add this to the assignment log?

Thank you –

Kerri

Subject: Design & Construction

Gentlemen,

I have been providing legal advice and litigation representation to the Design & Construction Division for the last five years. I am moving on to a new position with the Municipal Employees Retirement System; but before I go, I thought it important to let you know the positive impression your employees are making with our department.

During my time in the Department of Attorney General, I have worked closely with Design & Construction's Director, Bob Hall. We have worked on several complicated and litigious construction projects and I have always found Bob to be extremely professional, knowledgeable, and an excellent manager of his staff. I have the deepest respect for him and his staff, particularly Irene Henry and Patrick Mullen, both of whom exude the same terrific qualities of their director.

Your leadership team in Design & Construction are true ambassadors for DTMB and the State.

Sincerely,

Brian LaVictoire

RE: DTMB Staff

Happy Holidays Mr. Behen

Now that we have reached the end of another year in State Government, I wanted to take a few minutes and let you know how much I and my colleagues at MSHDA appreciate how much DTMB has done for us in 2015. MSHDA has endured many challenges this year and DTMB staff have been there to help us each time.

MSHDA has made many changes with our leases for office space and the staff at the Real Estate Division have gone above and beyond to assist us. Especially Kris Garrison and Maureen Bailey. I have had the pleasure of working with both over the last few years and they both are very knowledgeable and are always pleasant and professional.

How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm

came from people who worked for me, and I feel responsible for that. But I am committed to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." Click [here](#) to read the Governor's full op-ed.

Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. [Click here to read the full story in the Washington Post.](#)

Subject: Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – www.helpforflint.com – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. Administrative Policy 200.37 establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at behend@michigan.gov.

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

The Department of Technology, Management and Budget

THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit www.HelpForFlint.com to learn how you can do so. For additional information and to sign up for daily updates, please visit www.mi.gov/FlintWater. I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

Subject: "Flint residents should not have to pay for water they cannot drink"

Budget recommendation will include \$30 million request for Flint water bill repayments

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a \$30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly

65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking, and washing your hands. Residents still would be responsible for paying the sewer portion of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

[Click here to learn more about the budget request.](#)

 Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.
[Learn more about the \\$30 million request](#)

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at www.mi.gov/flintwater. [Click here to watch the video.](#)

Subject: Conversation with Jamie Mathews

Mathews, Jamie (DTMB) 3:11 PM:

I have a question on the truck rental invoices

Millimaki, Shelly (DTMB) 3:43 PM:

What is your question?

Mathews, Jamie (DTMB) 3:44 PM:

are we charged rental fee for every day, including the weekend?

can you get the actual invoices (like you forwarded to me) for each truck/each week? Looks like that is how they are charging each invoice

Millimaki, Shelly (DTMB) 3:48 PM:

we are charged a rental fee for everyday that we have the trucks, which includes weekends. I have given you all the invoices that have been billed. The billing won't be finalized until we bring back all of the trucks. The reason for the two we currently have (that I sent you) were because we had to swap out trucks that were broken. For example, one of the lift gates broke, so we had to swap that truck out - therefore we got an invoice. Does that make sense?

Mathews, Jamie (DTMB) 3:51 PM:

yes that makes sense. So the one that was in the email didnt have the actual invoice, just the charges. Is there any way you can ask them for the actual invoice?

Millimaki, Shelly (DTMB) 3:52 PM:

I just emailed it to you.

Mathews, Jamie (DTMB) 3:55 PM:

perfect thank you!

what i didn't understand was that we were only charged for 10 days, but there was clearly more than that during the time frame. what day did they swap out?

I just want to make sure I note it for finance

Millimaki, Shelly (DTMB) 3:57 PM:

I will get you the exact date - probably won't be until tomorrow.

Mathews, Jamie (DTMB) 3:59 PM:

okay thanks

Millimaki, Shelly (DTMB) 1:54 PM:

Call me when you have a second

pretty please

;)

Mathews, Jamie (DTMB) 8:40 AM:

Sorry I missed your message. Did you still need to talk to me?

Millimaki, Shelly (DTMB) 8:51 AM:

No - you are off today....it can wait until Tuesday! :D Enjoy your long weekend!

Mathews, Jamie (DTMB) 8:51 AM:

I am working for a little though. Whats up. I can call you really quick no problme\ problem.

because I am supposed to be off all next week ...but am going to work a little time

Millimaki, Shelly (DTMB) 8:54 AM:

Gotcha. I just wanted to let you know that I have created a file for the truck rentals in the Flint Water Crisis folder. They have to bill every two weeks, that is why we have different dates on them. The truck that was replaced was the truck that was billed for \$290. The other trucks are still out there.

Mathews, Jamie (DTMB) 8:55 AM:

so we are paying for the rental on a bi-weekly basis, but then wont be able to do the mileage until they are returned, correct?

Millimaki, Shelly (DTMB) 8:56 AM:

Correct - the actual mileage will be on the last billing. I spoke to my contact and she told me that they have to bill every two weeks. I said no problem. So, I put the invoices in the file. You can see them there.

Mathews, Jamie (DTMB) 8:58 AM:

sweet okay. I will try to figure them out. Since we are not going to be billed daily for mileage, I might delete the mileage column and just add a row at the bottom for that. what do you think?

Millimaki, Shelly (DTMB) 8:58 AM:

Sure.

Michigan State Employee banner image

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJKK>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

Attachments: Flint Water Crisis Expenses.xlsx

Shelly,

Jamie added the VTS employees to the spreadsheet you created and added some additional tabs. I told her MSP was paying for the hotel costs but she left it there just in case. ☺ When you need to update this week's hours, will you please do it on the spreadsheet so we have everything documented. I can do it if you want if you provide the hours to me.

The folder is under the LOS Management folder-Flint Water Crisis.

Thanks,
Amy

Dear State Employees,

Gov. Rick Snyder and I want to thank everyone who donated their time during the holiday weekend to deliver bottled water, water filters, replacement cartridges and water testing kits to families in the city of Flint. We are working hard to ensure all residents are provided with the safe water resources they need, and each donation and hour of your time volunteered goes a long way.

For employees who would like to help the residents of Flint, there are several opportunities to do so. Please visit www.helpforflint.com to learn how you can help.

For additional information and updates, visit www.michigan.gov/flintwater.

Again, thank you for all your support.

Sincerely, Mike Zimmer
Office of Good Government Director
Dept. of Licensing and Regulatory Affairs Director

Hey Jamie,

The drivers are currently located in the following indexes:

Brent Thelen, Jim Thomas, Sean Dennison, and Brian Cardwell are all in index: 77009
Jeff Bailey is index: 77008
Sam Putmon and Steve Kesson are in index: 47021

The truck rentals would go under index 77009.

I hope this is what you needed.

Hi Jeanette,

I have a spread sheet and will get it to you shortly – for my drivers and the VTS drivers.

Thanks,
Shelly

Shelly / Mike / Mark -

Could you provide names of employees and overtime accrued for the past two pay periods? Here after I will need the information provided the Monday after payroll. The goal is to obtain reimbursement for the overtime (at least).

Also, if you have others that have helped with the Flint emergency, please include them too (would like Communications do a story when the crisis is over).

Thank you!

Jeanette

Hi Heather,

This is the first time it has come to me. Record Center sends you a packing slip after you enter the boxes into Versatile. They send you labels for the packing slip and wait for seven days to send to me to create a work order. They wait seven days to ensure you receive your labels and have enough time to attach to the boxes.

As for estimated date of pick-up, I am not sure right now. We are a little behind in picking up record center boxes, as we have been helping out in Flint for the water crisis there. It may be this week, but probably early next week.

Thank you,
Shelly

To: Perez, Heather (LARA) <PerezH@michigan.gov>
Subject: Versatile Boxes Accepted (1151409-1151457) Heather Perez

Good Morning,

Thank you for entering your boxes in Versatile.

Please note the change in the pickup schedule from 14 calendar days to 7 calendar days.

Attached you will find a [Box Packing Slip](#) that will be used instead of the DTMB-948 form.

Please follow the instructions below:

Labels: Your box labels will be sent to you in the next mail run. Under normal circumstances, you should expect to receive your labels within two business days. If you do not receive your Records Center labels, please contact us at recordscenter@michigan.gov. Place the box labels on the boxes in the designated space.

Packing and Sealing Boxes: Make sure that your boxes are not over-stuffed and are sealed correctly. Otherwise, the boxes won't fit on the shelves at the Records Center and you will need to re-pack them. Please see p.27 of the *Records Center Operations Manual and Versatile User Instructions* for instructions. The manual is available online at <http://inside.michigan.gov/wr/records/Documents/RCmanual.pdf>.

Packing Slip: Please print and attach the **Box Packing Slip** to your shipment, instead of the DTMB-948 form. Please confirm that the pick-up location and contact information are accurate. If something on the packing slip needs to be corrected, please e-mail recordscenter@michigan.gov.

Pick-up Schedule: DTMB, Mail and Delivery Services will schedule your pick-up no earlier than 7 calendar days from the date of this e-mail. If your boxes will not be ready for pick-up within 7 calendar days, or you need to make special arrangements for pick-up sooner than 7 calendar days, please reply to this e-mail. You do not need to contact RMS if the 7 calendar day schedule meets your needs. If your shipment is 5 boxes or less please ship them via I.D. Mail. If your shipment will require freight service, please provide account code information on the packing slip prior to pick-up.

Reports: If you want a report of your boxes stored at the Records Center, please see the *Records Center Operations Manual and Versatile User Instructions* for instructions (see p.51).

Archives: Please note that the boxes that are transferred to the Archives of Michigan are stored in a designated space in the Records Center building, and are no longer delivered to the Archives' building in downtown Lansing.

The manual is available online at <http://inside.michigan.gov/wr/records/Documents/RCmanual.pdf>.

Please let us know if you have any questions, our e-mail address is recordscenter@michigan.gov.

Thank you.

Good Afternoon,

Thank you for entering your boxes in Versatile.

Please note the change in the pickup schedule from 14 calendar days to 7 calendar days.

Attached you will find a Box Packing Slip that will be used instead of the DTMB-948 form.

Please follow the instructions below:

Labels: Your box labels will be sent to you in the next mail run. Under normal circumstances, you should expect to receive your labels within two business days. If you do not receive your Records Center labels, please contact us at recordscenter@michigan.gov. Place the box labels on the boxes in the designated space.

Packing and Sealing Boxes: Make sure that your boxes are not over-stuffed and are sealed correctly. Otherwise, the boxes won't fit on the shelves at the Records Center and you will need to re-pack them. Please see p.27 of the *Records Center Operations Manual and Versatile User Instructions* for instructions. The manual is available online at <http://inside.michigan.gov/wr/records/Documents/RCmanual.pdf>.

Packing Slip: Please print and attach the **Box Packing Slip** to your shipment, instead of the DTMB-948 form. Please confirm that the pick-up location and contact information are accurate. If something on the packing slip needs to be corrected, please e-mail recordscenter@michigan.gov.

Pick-up Schedule: DTMB, Mail and Delivery Services will schedule your pick-up no earlier than 7 calendar days from the date of this e-mail. If your boxes will not be ready for pick-up within 7 calendar days, or you need to make special arrangements for pick-up sooner than 7 calendar days, please reply to this e-mail. You do not need to contact RMS if the 7 calendar day schedule meets your needs. **If your shipment is 5 boxes or less please ship them via I.D. Mail.** If your shipment will require freight service, please provide account code information on the packing slip prior to pick-up.

Reports: If you want a report of your boxes stored at the Records Center, please see the *Records Center Operations Manual and Versatile User Instructions* for instructions (see p.51).

Archives: Please note that the boxes that are transferred to the Archives of Michigan are stored in a designated space in the Records Center building, and are no longer delivered to the Archives' building in downtown Lansing.

The manual is available online at <http://inside.michigan.gov/wr/records/Documents/RCmanual.pdf>.

Please let us know if you have any questions, our e-mail address is recordscenter@michigan.gov.

Thank you.

Hi Shelly,

Thanks so much for your response. I'm in no hurry, I've just recently taken over our records center duties and am perhaps being a bit overly cautious. Since the seven days had passed, I just wanted to make sure the pick-up hadn't been lost in a glitch somewhere. The boxes are fine where they are over here.

Thanks again & kudos for the good work in Flint!

Hi Amelia,

We schedule the pick-ups on order received. We don't necessarily come the day it is received by us, as we have a lot of other work orders scheduled already. We have also had most of our resources in Flint helping with the water crisis there, so we are a couple of days behind on picking up record center boxes. I apologize. We should be picking up your boxes tomorrow or Wednesday. Again, I apologize for any inconvenience caused.

Thanks,
Shelly

Subject: RE: Versatile Boxes Accepted (1151609-1151632) Amelia Wilfonger

Thanks for the additional info, Kelly. There's quite a bit to learn with this new duty.

By the way, your last name is a little unusual and it caught my eye because my mother's maiden name was Maki. ☺ Yes....100% Finnish, I am.

Thanks Amelia!

Just as an FYI – we get the work order 7 days after you originally get your packing slip from Record Center. Then, depending on what other work orders we already have scheduled, we will schedule your pick-up. Sometimes it is a day or two, sometimes it may be a bit longer if we have a lot of other items scheduled already. I appreciate your patience!

Thanks again,
Shelly

Hi Shelly,

Thanks so much for your response. I'm in no hurry, I've just recently taken over our records center duties and am perhaps being a bit overly cautious. Since the seven days had passed, I just wanted to make sure the pick-up hadn't been lost in a glitch somewhere. The boxes are fine where they are over here.

Thanks again & kudos for the good work in Flint!

Hi Amelia,

We schedule the pick-ups on order received. We don't necessarily come the day it is received by us, as we have a lot of other work orders scheduled already. We have also had most of our resources in Flint helping with the water crisis there, so we are a couple of days behind on picking up record center boxes. I apologize. We should be picking up your boxes tomorrow or Wednesday. Again, I apologize for any inconvenience caused.

Thanks,
Shelly

Good Afternoon Shelly,

This packing slip was sent out on 2/4. She still has not received a pick up. Can you please advise?

"Hello,

We have boxes to be picked up. Referencing packing slip rec'd via email 1/28/16 for 1151609-1151632.

Thanks so much."

Subject: Versatile Boxes Accepted (1151609-1151632) Amelia Wilfinger

Good Morning,

Thank you for entering your boxes in Versatile.

Please note the change in the pickup schedule from 14 calendar days to 7 calendar days.

Attached you will find a Box Packing Slip that will be used instead of the DTMB-948 form.

Please follow the instructions below:

Labels: Your box labels will be sent to you in the next mail run. Under normal circumstances, you should expect to receive your labels within two business days. If you do not receive your Records Center labels, please contact us at recordscenter@michigan.gov. Place the box labels on the boxes in the designated space.

Packing and Sealing Boxes: Make sure that your boxes are not over-stuffed and are sealed correctly. Otherwise, the boxes won't fit on the shelves at the Records Center and you will need to re-pack them. Please see p.27 of the *Records Center Operations Manual and Versatile User Instructions* for instructions. The manual is available online at <http://inside.michigan.gov/wr/records/Documents/RCmanual.pdf>.

Packing Slip: Please print and attach the **Box Packing Slip** to your shipment, instead of the DTMB-948 form. Please confirm that the pick-up location and contact information are accurate. If something on the packing slip needs to be corrected, please e-mail recordscenter@michigan.gov.

Pick-up Schedule: DTMB, Mail and Delivery Services will schedule your pick-up no earlier than 7 calendar days from the date of this e-mail. If your boxes will not be ready for pick-up within 7 calendar days, or you need to make special arrangements for pick-up sooner than 7 calendar days, please reply to this e-mail. You do not need to contact RMS if the 7 calendar day schedule meets your needs. If your shipment is 5 boxes or less please ship them via I.D. Mail. If your shipment will require freight service, please provide account code information on the packing slip prior to pick-up.

Reports: If you want a report of your boxes stored at the Records Center, please see the *Records Center Operations Manual and Versatile User Instructions* for instructions (see p.51).

Archives: Please note that the boxes that are transferred to the Archives of Michigan are stored in a designated space in the Records Center building, and are no longer delivered to the Archives' building in downtown Lansing.

The manual is available online at <http://inside.michigan.gov/wr/records/Documents/RCmanual.pdf>.

Please let us know if you have any questions, our e-mail address is recordscenter@michigan.gov.

Thank you.

Subject: FW: QA - Handheld
Attachments: Copy of 22_DTMB Handhelds Not Used (002).xlsx

Hi Shelly –

Thanks for the follow up!

FYI – the following AARPs contained desktops and would have had serial numbers for scanning. The client selected server – yet the physical asset was in fact a desktop.

20151217-074327
20151218-095648
20151103-121351

Servers should always have serial numbered bar codes to scan (actually they may have several and they will need to ensure the scan the serial number).

No action required – just an FYI.

Thank you

Subject: What this year's budget means for Michigan...

VIDEO: What Governor Snyder's FY17 budget means for Michigan

Gov. Rick Snyder's FY 2017 budget calls for critical investments for the Flint water crisis, statewide infrastructure and the Detroit Public Schools. The governor's recommendation also addresses the skyrocketing costs of specialty medications that Michigan residents depend on for better health outcomes.

This budget also stays committed to the Governor's core statewide priorities of education, talent and economic development, health and human services, and public safety.

The proposed FY 2017 budget makes key investments to strengthen the state for all of

Michigan's families. Click here to learn more about the top 6 takeaways from the Governor's FY 2017 state budget.

Click a tweet to tweet it out:

The #MiBudget @OneToughNerd proposed yesterday makes key investments to strengthen Michigan for all families --> www.mi.gov/MiBudget

--> @OneToughNerd's #MiBudget includes \$72 million a year for Detroit Public Schools. It is time to act now --> www.mi.gov/MiBudget

--> @onetoughnerd's significant investment in #Flint families is the right thing to do. #FlintFWD #MiBudget www.mi.gov/MiBudget

Subject: VIDEO: Volunteering in Flint

VIDEO: How volunteers are helping Flint

Volunteers at the Food Bank of Eastern Michigan are working hard to collect donations in order to help the families of Flint. Last Thursday, Governor Snyder visited with the many dedicated volunteers and helped sort cans of food.

Good nutrition is critically important for Flint's children. Foods that are high in calcium, vitamin C, and iron can help limit the effects of lead exposure. To donate or volunteer at the Food Bank of Eastern Michigan, visit www.fbem.org.

Subject: The Gov. Snyder's Budget Proposal

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.
DTMB Header 9/22/15

Good morning everyone. I hope everyone had a great holiday weekend.

I had the good fortune to travel to Marquette on Monday with Chad Laidlaw, DTMB's policy and planning analyst, to meet with city, business and university leaders and to address the Economic Club of Marquette. I told them about the many things DTMB does, placing special emphasis on our work in mobility and cybersecurity. Marquette is really developing and making its mark as an innovative and entrepreneurial community.

Now work.

The executive budget Gov. Snyder presented last week outlined his investment plan for Michigan. Yes, the proposal for fiscal year 2017-18 outlined a strategy to address the critical challenges of addressing the Flint water crisis and turning around Detroit's Public Schools, but the \$54.9 billion plan also includes investment in four key areas:

- **Education.** The budget increases investment to K-12 schools, community colleges and the state's public universities. Additional funds are proposed to expand career, technical, science, technology, engineering and math programs.
- **Protecting the Public.** The governor's plan expands the Secure Cities program, which has reduced violent crime in four major Michigan cities. Funds also would support an additional trooper recruit school and an academy to train corrections officers, among other initiatives.
- **Putting People First.** The governor recommends continued expansion of the Healthy Kids Dental Program and funding efforts to ensure residents have access to affordable health care. His proposal boosts funds to help cover new higher cost specialty medications to treat conditions such as hepatitis C and cystic fibrosis, among others.
- **Investing in Infrastructure.** The proposal allocates \$1.2 billion to maintain and repair Michigan roads, bridges and other critical infrastructure.

The budget proposal also includes FY 2017-18 funding recommendations for DTMB. Gov. Snyder recommends ongoing funding of \$1.3 billion for department operations and a one-time allocation of \$32.4 million.

A few highlights include:

- \$502 million for information technology support for all state agencies and \$132.8 million for 14 high-priority IT projects in seven agencies. He recommends increasing the Information Technology Investment Fund by \$7 million, from \$65 million to \$72 million. This fund supports several major multiyear IT projects and upgrades, including the replacement of outdated legacy systems.
- An additional \$5 million to support cybersecurity improvements to safeguard citizens' personal information and protect critical infrastructure and government services.
- IT support of \$6.5 million to modernize the Office of Retirement Services' systems and enhance customer service for more than 530,000 current and future retirees.

You can see the full executive budget recommendations, which are posted on the Budget Office website. Details of DTMB's proposed budget begin on page B-75.

We can expect to see many changes before the budgets are signed and become effective Oct. 1. The executive budget will be used by the House and Senate Appropriations Committees as they work on their own budgets and hold committee hearings on the proposals. I'll keep you posted as the process moves ahead.

As always, I welcome your notes, whether about the budget process or any other topic. Please send them to me at behend@michigan.gov.

Thank you again for all the good work you do. I hope you have a great week ahead.

David

We want to post our accomplishments for the staff to see as the LOS Celebration and certainly wouldn't want anyone to feel left out. If we can outline all the accomplishment and get them to Kristen to have them printed on a poster board, that would be great.

Below is what has been shared so far...

January accomplishments

- 6,194,804 letters inserted
- 8,418,420 Letters Processed for Edoc validations
- 20,447 Trays of Mail Scanned for Full Service compliance
- 380 Skids of Mail wrapped and scanned for Full Service compliance
- \$981,472.86 in postal cost avoidance
- CPC printed 16,811,213 images
- PGS shipped 1,330 jobs
- As a result of the Flint water crisis, Printing Services staff have printed over 1.2 million palm cards, 1 million water testing forms, in English, Spanish and Arabic, as well as thousands of flyers, door hangers, decals and stickers.

1st Quarter Accomplishments

- Doubled the use of HP Records Manager each year since it has been in production
- Reduced the labor effort for Records Center destruction by 33%
- Developed 6 new online Records Management training courses
- Developed 5 new online Records Management guides
- Implemented a new contract for off-site storage services in the Detroit Metro area
- Revised the DTMB E-mail Management Policy
- Completed the Voya 3rd quarter and 4th quarter printing and mailing of statements and inserts.

- Provided tours of our operations for all DTMB employees to learn our service offerings!

Subject: Tyga pick-up

Hi Chris,

I still have drivers working in Flint delivering water because of the water crisis there, so I won't be able to pick up those tygas until tomorrow. I apologize. ☹

Thanks Chris,
Shelly

Subject: RE: Possible Freight Request

Yes. It's going to the Cadillac Bldg because we have housing agents that have to do home inspections, and they would like to distribute the water and the filters while they are there on site.

I'm working out a few details right now, and will get the request submitted shortly. Thank You.

Subject: Possible Freight Request

Good Afternoon Shelly.

Would it be possible to have a pallet of water and filters picked up from our building on Michigan Ave and delivered to the Cadillac Building in Detroit this week? I know it's short notice, and I certainly do not expect you to rearrange the delivery schedule. If you can, great. If not I completely understand and MSHDA can get in there in a van. Thank you for your assistance.

Hi Jeanette,

Attached is the updated spreadsheet with the expenses for the Flint Water Crisis. We have included Printing Services employees in the "payroll" tab, along with Delivery and VTS employees.

Please let me know if you need anything more.

Thanks,
Kristen

Shelly/ / Mike / Mark -

Could you provide names of employees and overtime accrued for the past two pay periods? Here after I will need the information provided the Monday after payroll. The goal is to obtain reimbursement for the overtime (at least).

Also, if you have others that have helped with the Flint emergency, please include them too (would like Communications do a story when the crisis is over).

Thank you!

Subject: Trucks/drivers for Monday

DMTB has been asked to provide 3 trucks/drivers with 7 pallet jacks to assist the Genesee County Food Bank Monday – Saturday 8 am – 4:30 pm.

I know all of the current drivers/trucks assignments are just through Sunday, so was hoping we could assist with this request.

Let me know if / who may be able to assist.

Thank you!!! Your guys are rocking it!!!!

Jeanette

Subject: Fuel purchases for vehicles assigned to Flint Water Crisis.xlsx
Hi Shelly,

Attached is the most up to date list of vehicles and fuel purchased. The total is at the bottom. Let me know if you need anything else

David Hofmeister

Subject: Save the Date: November 18, 2015 Annual Volunteer Notification Drill

Good Morning,

To address a critical requirement for the annual Strategic National Stockpile (SNS) federal assessment, the State is required to annually test the notification and activation of Receipt, Stage, and Store (RSS) volunteers. We will be exercising this component on November 18, 2015. During the exercise, with your assistance, we would like to test the notification of our various volunteer sources, including the Michigan Volunteer Defense Force (MIVDF), Michigan Public Health Institute (MPHI), Michigan Department of Technology, Management, and Budget (DTMB), Civil Air Patrol (CAP) and RSS Pharmacists. On the morning of November 18th, you will receive a Michigan Health Alert Network (MIHAN) message with instructions to begin your volunteer call-down procedure. Following the receipt of that message, the following actions are necessary:

- Confirm the MIHAN alert notification.
- Immediately notify (through any available communications methods) all volunteers designated for RSS activities as listed on your contact lists. Attached is a sample script you can utilize to ensure you have obtained all of the required information. Feel free to modify it as necessary, but be certain to obtain all required information, including:
 - Total number of volunteers notified
 - Total number of volunteers to confirm receipt of notification
 - Total number of volunteers that could report to Flint
 - Average time it would take for volunteers to arrive in Flint
- Complete the attached "November 18, 2015 Annual Volunteer Notification Exercise Report" and submit to DEPR (formally OPHP).
- Revise contact lists as necessary with updated contact information and submit to DEPR.

We prefer that you do not notify your volunteers of this planned exercise in order to obtain the most accurate response data possible.

Please review the attached materials prior to 11/18/15 to ensure you are familiar with the items needed to be tested. Following the exercise, please submit the "November 18, 2015 Annual Volunteer Notification Exercise Report"

detailing your results and your revised contact list to Mary Sharp at sharpm3@michigan.gov no later than December 2, 2015.

If you have any questions, please contact Jason Smith at smithj20@michigan.gov or Mary Sharp at sharpm3@michigan.gov.

If you need assistance or have any questions about the MIHAN, please contact Craig Henry @ henryc1@michigan.gov.

Thank you for your assistance with this important exercise and your continued support of the Michigan SNS program.

MISNS Team

Sample Script to Utilize When Notifying Volunteers (for POC)

(Identify yourself to the volunteer). This is an exercise. We are conducting a notification drill today to test our contact lists for the Michigan Strategic National Stockpile program. We are testing our ability to quickly contact all volunteers and at the same time we are verifying contact information we have on file. I have a few quick questions to ask you today:

1. If we had to activate to support the State SNS program right now, how long would it take you to report to Flint, MI? We are not asking you to physically report to a location today, but just need to know whether or not you could report if needed.
2. Is your contact information accurate? (Verify info with volunteer).

Thank you for your time.

November 18, 2015 – Annual Volunteer Notification Exercise Report

Instructions: Please complete the blue shaded areas of the table with your exercise data. Submit this report, along with your revised volunteer contact list, to Mary Sharp @ sharpm3@michigan.gov no later than **December 2, 2015**. Thank you for your assistance!

Good Morning,

To address a critical requirement for the annual Strategic National Stockpile (SNS) federal assessment, the State is required to annually test the notification and activation of Receipt, Stage, and Store (RSS) volunteers. We will be exercising this component on November 18, 2015. During the exercise, with your assistance, we would like to test the notification of our various volunteer sources, including the Michigan Volunteer Defense Force (MIVDF), Michigan Public Health Institute (MPHI), Michigan Department of Technology, Management, and Budget (DTMB), Civil Air Patrol (CAP) and RSS Pharmacists. On the morning of November 18th, you will receive a Michigan Health Alert Network (MIHAN) message with instructions to begin your volunteer call-down procedure. Following the receipt of that message, the following actions are necessary:

- Confirm the MIHAN alert notification.
- Immediately notify (through any available communications methods) all volunteers designated for RSS activities as listed on your contact lists. Attached is a sample script you can utilize to ensure you have obtained all of the required information. Feel free to modify it as necessary, but be certain to obtain all required information, including:
 - Total number of volunteers notified
 - Total number of volunteers to confirm receipt of notification
 - Total number of volunteers that could report to Flint
 - Average time it would take for volunteers to arrive in Flint
- Complete the attached "November 18, 2015 Annual Volunteer Notification Exercise Report" and submit to DEPR (formally OPHP).
- Revise contact lists as necessary with updated contact information and submit to DEPR.

We prefer that you do not notify your volunteers of this planned exercise in order to obtain the most accurate response data possible.

Please review the attached materials prior to 11/18/15 to ensure you are familiar with the items needed to be tested. Following the exercise, please submit the "November 18, 2015 Annual Volunteer Notification Exercise Report" detailing your results and your revised contact list to Mary Sharp at sharpm3@michigan.gov no later than December 2, 2015.

If you have any questions, please contact Jason Smith at smithj20@michigan.gov or Mary Sharp at sharpm3@michigan.gov.

If you need assistance or have any questions about the MIHAN, please contact Craig Henry @ henrycl@michigan.gov.

Thank you for your assistance with this important exercise and your continued support of the Michigan SNS program.

Subject: Saturday Deliveries

Hi Shelly

One truck w/lift and driver needed to pick-up and deliver pallets on Saturday, January 9, 2016.

Pick-up information for the following locations:

1. Food Bank of Eastern Michigan
2300 Lapeer Rd, Flint, MI 48503
Open at 8 AM
Picking up 3 pallets of water bottles and 2 pallets of gallon jugs
Loading dock is located off Lapeer Rd. When you arrive go to the older building and knock on the door. The supervisor on duty (Sally) will assist with loading the pallets.
2. Genesee County Community Action Resource Department (GCCARD)
Matt Purcell (810) 397-8829
2727 Lippincott, Flint 48507
Ready at 9 AM
Picking up pallets of filters and replacement filters (9 pallets approximately)
3. DEQ Lab
3350 N. M.L. King Blvd, Lansing 48906
Bundles of water testing kits are in the lobby area ready for pickup at any time

Deliver the following to each of the following fire stations:

- 1 filter pallet
- 1 water pallet
- 1 test kit bundle with instructions (Instructions paper pamphlets divide as needed)

716 West Pierson Rd
1525 Martin Luther King Jr. Blvd
310 East 5th St
3402 Western Rd
202 East Atherton

I will be available via my cell all day tomorrow. I will need to let the driver know where to deliver the remaining pallets of filters (2,000) so a name and phone number for contact would be great.

Thank you!!!

Hi Jeanette!

I forwarded this email to my driver: Brent Thelen.

He is going to call you when he gets to the first stop around 8 - 8:30, that way he can write everything down.

Thanks again,
Shelly

Monday, January 11, 2016, 01:23 PM

Snyder Creates New Joint State-Flint Group On Water Crisis

Governor Rick Snyder today formed a new Flint Water Interagency Coordinating Committee joining top state and local officials, as well as drinking water experts, to develop a wide variety of recommendations to address the Flint water crisis.

Mr. Snyder established the committee via executive order.

The committee will include the following members:

- The director of Office of Urban Initiatives within the Executive Office of the governor;
- The deputy state director of Emergency Management and Homeland Security within the Department of State Police;
- The director of the Department of Environmental Quality, or his or her designee;
- The director of the Department of Health and Human Services, or his or her designee;
- The director of the Department or Licensing and Regulatory Affairs, or his or her designee;
- The state treasurer, or his or her designee;
- The superintendent of public instruction, or his or her designee;
- The Flint mayor;
- Three additional representatives of the city of Flint submitted by the Flint mayor and appointed to the committee by the governor;
- Three representatives of Genesee County submitted by the Genesee County Board of Commissioners and appointed to the committee by the governor; and
- Three subject matter experts appointed to the committee by the governor.

In a statement, Mr. Snyder said the council will create an action plan, review recommendations made by the Flint Water Task Force (the group Mr. Snyder created to figure out what went wrong), establish protocols for communications at the local, executive and legislative levels, make recommendations regarding the impact to health of the affected population and “assess the status of infrastructure and determine feasible actions for upgrading Flint’s water system.”

Mr. Snyder created the council amid an unrelenting firestorm of criticism against his administration in how it has responded to lead in some locations’ drinking water in the city, as well as elevated blood lead levels in children.

“We need to focus on improving Flint for the longer term,” Mr. Snyder said in the statement. “This committee, made up of experts from government and the Flint community, will set a course of action to remedy the water situation and resulting health issues, and carry on long after the emergency declaration expires.”

Kristi –

Drivers are needed to assist with supplying the field teams who are working 8:30 am – 5 pm. They would need to be there a little early to make sure the trucks are loaded. Currently you provided 5 drivers/trucks

Additional drivers are needed to product to the fire stations. You provided 2 drivers/trucks that were staying overnight working until 9 pm.

Sorry it took so long – had to get confirmation.

Subject: RE: Drivers staying and cell #'s

Jim Lance called me last night after he checked into a hotel in Grand Blanc and the Holiday Inn. Said he was concerned for his health with lead in the water and wanted to stay outside of the city. He is paying for the hotel himself - not being direct billed to MSP like the others, so he need be submitting a travel voucher.

I'll call the Holiday Inn and cancel his reservation.

Subject: RE: Drivers staying and cell #'s

Can you extend the room for Jim Thomas and Sam Putmon for Saturday night?
They will both work on Sunday.
Jeff Bailey cannot work on Sunday, so I will try to find another driver for Sunday.

Thanks,
Shelly

Hi Jeanette,

The following drivers will be staying through Saturday.

Can you get them breakfast as well? ☺

Sam Putmon: (517-599-0017) He will need a room for tonight through Friday. **24' Box Truck**

Jim Thomas: (517-230-1921) He will need a room for Wednesday through Friday. **Semi – 43'**

Jeff Bailey: (517-749-3223) He will need a room for Wednesday through Friday. **24' Box Truck**

Thanks Jeanette!

Shelly

Joyce,

Attached is the spreadsheet – it is obviously a work in progress.
I am estimating the hours for the drivers for this week. Ryan McKee said estimates are fine.

Thanks,
Shelly

I agree! We have been there since the 9th of January, so we have been pretty short-handed around here. The drivers have done a great job and they have been working through all of the weekends as well. They are getting tired! ☺

Hi Caitlin,

Welcome! I look forward to meeting you! At this time, I think this will work. We have been helping in Flint for the water crisis and have subsequently been short-handed. We should be fine for this move. If anything we may only have 2 to 3 drivers.

Please put it on my calendar!
Thanks again,
Shelly

Good Afternoon Shelly,

My name is Caitlin Wells and I am the new Residence & Events Assistant at the Governor's Residence. We would like to request a furniture move on Monday, February 01, 2016 at 8:30am. In addition, is it possible to have three or four helpers? Please let me know if this will work.

Thank you for your assistance,

Caitlin S. Wells

Subject: RE: Possible Freight Request

Yes. It's going to the Cadillac Bldg because we have housing agents that have to do home inspections, and they would like to distribute the water and the filters while they are there on site.

I'm working out a few details right now, and will get the request submitted shortly. Thank You.

Subject: Possible Freight Request

Good Afternoon Shelly.

Would it be possible to have a pallet of water and filters picked up from our building on Michigan Ave and delivered to the Cadillac Building in Detroit this week? I know it's short notice, and I certainly do not expect you to rearrange the delivery schedule. If you can, great. If not I completely understand and MSHDA can get in there in a van. Thank you for your assistance.

Not ideal but if that is the only option it may work. It will take multiple individuals to lift it in and out as this is a 300 pound piece of equipment. 27" x 27" x 48 tall.

Shelly / Mike / Mark -

Could you provide names of employees and overtime accrued for the past two pay periods? Here after I will need the information provided the Monday after payroll. The goal is to obtain reimbursement for the overtime (at least).

Also, if you have others that have helped with the Flint emergency, please include them too (would like Communications do a story when the crisis is over).

Thank you!

Jeanette

1/28/2016

Just wanted to say thank you. The crew was extremely nice, polite and waited patiently to be told where to put file cabinets. They also, didn't get full use of the dock at the Grand Tower because of the semi they had to use. So they had more work than usual moving items from the truck to their destination.

Just thought I'd pass this along, thank you!

Michelle Holloway

Subject: RE: Star Truck Rentals Invoices

Hi April,

Yes, these are mine. The \$292 one was already charged to my credit card. The other one should have been charged to my card as well.

These are rental trucks for use in Flint for the water crisis there.

I will get with Star to see if the other was charged to my card as well.

Thanks April!
Shelly

Subject: Star Truck Rentals Invoices

Shelly,

Attached are two invoices for Star Truck Rentals. Please let me know if these are not yours. One of them looks like maybe your credit card was charged to it, but I wasn't sure about the other one. If you would like the originals, please let me know where to send them.

Thank you,

April Gokee

Subject: Delivery for Saturday

Hi Shelly –

William Banks will be getting with you on two print orders that need to be delivered on Saturday morning. Should be around 8 boxes. Please deliver to 1101 Beach Street Flint 48502. This is the Genesee County Emergency Operations Center (basement of the building). Have Brent call Henrik Hollaender when he arrives at (517) 898-4225 as they may be able to do a vehicle to vehicle transfer of the boxes.

Ryan McKee will be at the SEOC on Saturday if anything comes up (517) 819-9422.

Thanks for your help!

Subject: RE: LOS celebration - Quarterly Accomplishments

Kristen,

I am heading to a meeting with Seth at Depot. Can I get you the information when I get back?

Thanks,
Shelly

Shelly and Seth,

This is what I have so far to put on a poster to display at the celebration next week. Do you have anything you'd like to add for Delivery or Warehouse?

Thanks,
Kristen

Subject: LOS celebration - Quarterly Accomplishments

We want to post our accomplishments for the staff to see as the LOS Celebration and certainly wouldn't want anyone to feel left out. If we can outline all the accomplishment and get them to Kristen to have them printed on a poster board, that would be great.

Below is what has been shared so far....

January accomplishments

- 6,194,804 letters inserted
- 8,418,420 Letters Processed for Edoc validations
- 20,447 Trays of Mail Scanned for Full Service compliance
- 380 Skids of Mail wrapped and scanned for Full Service compliance
- \$981,472.86 in postal cost avoidance
- CPC printed 16,811,213 images
- PGS shipped 1,330 jobs

- As a result of the Flint water crisis, Printing Services staff have printed over 1.2 million palm cards, 1 million water testing forms, in English, Spanish and Arabic, as well as thousands of flyers, door hangers, decals and stickers.

1st Quarter Accomplishments

- Doubled the use of HP Records Manager each year since it has been in production
- Reduced the labor effort for Records Center destruction by 33%
- Developed 6 new online Records Management training courses
- Developed 5 new online Records Management guides
- Implemented a new contract for off-site storage services in the Detroit Metro area
- Revised the DTMB E-mail Management Policy
- Completed the Voya 3rd quarter and 4th quarter printing and mailing of statements and inserts.
- Provided tours of our operations for all DTMB employees to learn our service offerings!

Subject: UM Flint Water Street Parking Structure - Meeting Minutes #2

Joel,

Please use this email as meeting minutes from our discussion yesterday for the above referenced project. The following was discussed:

1. The State and Ram Construction were unable to attend the meeting.
2. The State needed a general project scope and construction schedule for the project.
 - a. Walker is to send over project specifications and drawings.
 - b. Ram to provide a construction schedule.

3. The post-tensioning repairs will be completed by the contractor over a weekend.
 - a. Walker and Ram agreed that the weekend of June 8th and 9th will work.
 - b. Ram intends to begin work on Friday, June 7th in the evening; Walker will review all P/T repairs on June 8th; and the concrete will be placed on June 8th or 9th. The contractor will provide protection / demobilize to allow operation on Monday morning the 10th of June.
 - i. Ram will follow this email with a full construction schedule by the EOD.
4. The stair tread replacement pricing still needs to be updated by Ram Construction to include lead abatement.
5. Stair tread replacement can be completed by closing one stair tower at a time during normal working hours.

Please make sure to let me know if there are any issues with the dates proposed for construction, or if there are any contractual pieces missing so that they can be remedied before construction.

Thanks,

ETHAN FULTON
Design Engineer

It has been brought to my attention, that there is a water advisory for the City of Flint basically north of the Flint River. I have attached the M-Live article, so at this time I would recommend that staff do not drink the water in this building as well as in the designated neighborhoods.

I feel it would be beneficial to our clients that if you are making contacts in those neighborhoods that you advise your clients of the water advisory if they are not aware.

Foster Care staff, please take the time to alert your relative placements and foster homes of the importance of not letting the children in the designated areas drink the tap water.

I am requesting additional information from the health department at this time. And I will keep you posted.

Flint says drinking water advisories will continue into Tuesday

Ron Fonger | rfonger1@mlive.com By Ron Fonger | rfonger1@mlive.com

on September 08, 2014 at 6:55 PM, updated September 08, 2014 at 6:56 PM

FLINT, MI -- **Boil water advisories** covering parts of Flint's west side will continue at least into Tuesday, Sept. 9.

The city said in a news release Monday, Sept. 8, that until the advisories are lifted, customers in the affected areas should continue to boil water or use bottled water.

The first advisory -- in effect since Friday, Sept. 5 -- covers areas bordered by Dayton Street on the north, DuPont Street on the east, the Flint River on the south, and by Lavelle Road to the Flint River on the west.

A boil advisory also remains in effect for the area bordered by Stewart Avenue on the north, Saginaw Street on the east, Hamilton Avenue on the south, and Clio Road on the west. The advisory was extended to include that part of the city on Saturday, Sept. 6.

The city of Flint is flushing water from hydrants on the west side of the city today, Sept. 8, in an effort to rid the system of total coliform bacteria. Ron Fonger | The Flint Journal

"The Utilities Department believes that due to the low usage and demand of the area, water remains in the system for a longer period of time compared to the rest of the city," a news release says.

"The city of Flint Utilities Department is increasing the chlorine added to water in the area, and to improve water circulation, will continue flushing the system in that part of the city. Residents can expect to see open hydrants in the area," the statement says. "The city of Flint will continue to aggressively investigate this issue until it has been corrected."

Flint's advisories come after multiple positive tests for total coliform bacteria, an indication of a possible pathway for pathogens and fecal contamination to enter a drinking water system.

Total coliforms are used to determine the adequacy of water treatment and the integrity of the distribution system, according to the U.S. Environmental Protection Agency.

For most water users, the advisory suggests boiling water for one minute before using it for drinking, washing dishes or preparing food. The city says anyone with a severely compromised immune system, who is pregnant, or elderly may be at increased risk, however, and "should seek advice from your health care providers about drinking this water."

Although a district engineer for the state Department of Environmental Quality said boil advisories could be lifted Monday based on samples collected Saturday, the city's statement did not indicate the results of the latest testing.

MLive-The Flint Journal could not immediately reach city spokesman Jason Lorenz for further comment.

The latest news release from the city says, "The Utilities Department has opted to keep the advisory in effect until the results of a citywide sampling taken today are known. This advisory is a precautionary measure to ensure the safety of drinking water for city residents."

These most recent boil advisories come less than 30 days after another one in Flint, also on the west side of the city, but further south of the current advisory area.

Two members of the Flint City Council said Monday that questions remain about the city's water distribution system.

Councilman Eric Mays said in a Facebook post that Flint's drinking water problems are enough to constitute an emergency.

"I am asking that the City Council call a special council meeting and pursuant to the charter ask questions as to the quality of water concerns by putting folks under oath and asking the proper questions in this public and open meeting," Mays' statement says.

Councilman Sheldon Neeley said he has filed a damage claim with the city, seeking to refund residential water customers \$5 per day and businesses \$10 per day for as long as the boil advisory remains in effect.

From Randy Rauch:

I have just talked to the Health Dept. and they are not concerned about the water in the downtown area being contaminated. They stated it is only in the designated areas mentioned in the M-Live article. They are drinking the water in the McCree Building.

That being stated, I am to assume our water is also safe to drink at this time.

Jan

From Randy Rauch:

I have just talked to the Health Dept. and they are not concerned about the water in the downtown area being contaminated. They stated it is only in the designated areas mentioned in the M-Live article. They are drinking the water in the McCree Building.

That being stated, I am to assume our water is also safe to drink at this time.

Subject: FW: M-Live Article

It has been brought to my attention, that there is a water advisory for the City of Flint basically north of the Flint River. I have attached the M-Live article, so at this time I would recommend that staff do not drink the water in this building as well as in the designated neighborhoods.

I feel it would be beneficial to our clients that if you are making contacts in those neighborhoods that you advise your clients of the water advisory if they are not aware.

Foster Care staff, please take the time to alert your relative placements and foster homes of the importance of not letting the children in the designated areas drink the tap water.

I am requesting additional information from the health department at this time. And I will keep you posted.

GENERAL NOTES

NOTE:

1. Contractor must review and become familiar with the Limited Building survey identifying the location and concentration of lead paint in the facility.
2. All contract employees must have successfully completed and are current in their annual Michigan Lead in Construction training.
3. Contractor must complete a job hazard analysis (JHA) to identify and plan accordingly for all hazards associated with this project.
4. Contractor will be working in an occupied facility and therefore must take appropriate measures to adequately isolate the work area and any dust/debris from migrating from the work areas into occupied/public areas.
5. Areas will be sufficiently secured to prevent accidental entry into the work area by the public, particular attention is given to restricting/protection of the public when during the removal and replacement of stairs as well as any.
6. Contractors will submit copies of their safety program to UM Flint EHS. Copies of their JHA will be submitted prior to beginning work.
7. Management and handling of lead paint/coating in accordance with Michigan regulations and University Guidelines are required.
8. - Before re-opening each stair tower following completion of the work, ensure that a thorough wet cleaning of the stairs occurs, including wiping handrails, surfaces, etc.
- Clearance sampling following the activities will be conducted to ensure lead paint debris, etc. is cleaned up and the space is suitable for re-entry by the general public. EHS will coordinate the clearance sampling.
9. Contractor will obtain and follow Hot Work permit requirements through UM Flint DPS. Contractor is responsible for fire watch requirement during and after the hot work.
10. Contractors must comply with the University's Construction/Contractor Safety Requirements (Link to doc: <http://www.oseh.umich.edu/contractor/index.shtml>)

NOTE:

CONTRACTOR IS RESPONSIBLE FOR LOCKING AND SECURING EACH STAIRWELL BY USE OF LARGE AND PROFESSIONAL SIGNS WHILE COMMUNICATING CLOSED STAIRWELL AND CLEARLY MARKING ALTERNATE ROUTES, ONLY ONE STAIRWELL MAY BE CLOSED AT A TIME.

NOTE:

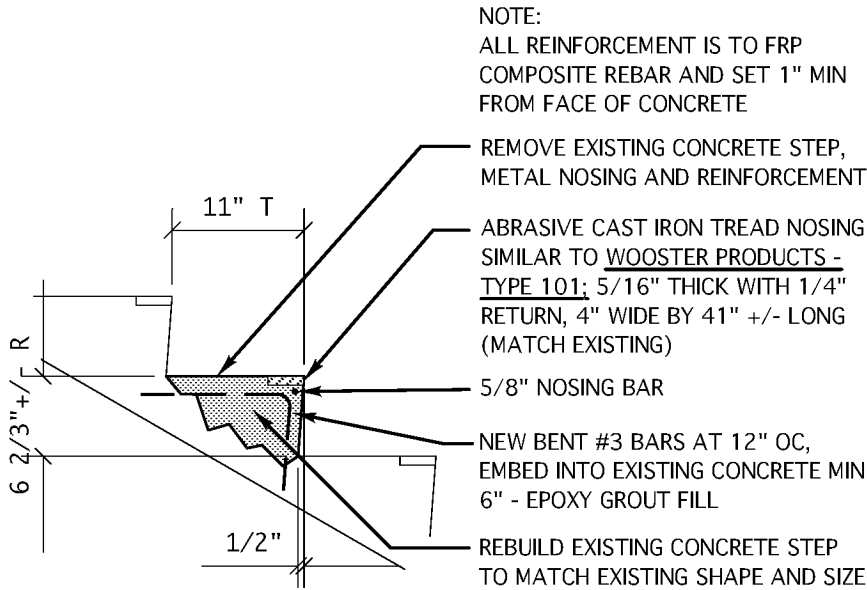

CONTRACTOR IS RESPONSIBLE FOR PROVIDING ADEQUATE CONTAINMENT AND SUBSTANTIAL BARRICADES TO PREVENT ACCIDENTAL ENTRY IN WORK AREAS, PARTICULARLY WHERE HAZARDOUS CONDITIONS EXIST (I.E. LEAD AND FALL HAZARDS.) PRIOR TO BEGINNING ANY WORK WITHIN STAIRWELL. ALL TEMPORARY SAFETY PRECAUTIONS AND CONTAINMENTS ARE TO MEET U OF M-FLINT EHS REQUIREMENTS. ALL QUESTIONS REGARDING ACCEPTABLE BARRIERS AND CONTAINMENT ARE TO BE DIRECTED TO ENVIRONMENT, HEALTH AND SAFETY DEPARTMENT.

NOTE:

Contractor will conduct and submit a job hazard analysis (JHA) identifying the hazards present or that will be created during this work and the methods to mitigate, control or eliminate these hazards. Special attention to be given to the fact that contractor is working in occupied spaces and work area must be secured and dust, vapors, etc. must be controlled , not allowed to migrated from work areas. Thorough cleaning and clearance sampling prior to reopening to the public.

SECTION 13285 - LEAD PRODUCTS
UNIVERSITY PAVILION -PARKING RAMP, 2014

PART 1 - GENERAL

The University Of Michigan - Flint has scheduled repairs and maintenance of certain building components in the the University Pavilion at the University of Michigan - Flint Campus. A limited lead survey has been completed for areas of the parking ramp including the stair towers where much of the work is proposed. **Some paint in the structure, including the project areas has been surveyed for lead containing material (LCM) and was observed to contain lead.** Electronic copies of the Lead survey documents for the project area are provided and a hard copy is available for review through the UM Flint Environment, Health and Safety Department 810-766-6763.

These specifications identify the University's requirements when disturbing or removing lead containing material or paint. The University requires contractors to comply fully and completely with all federal, state and local rules, regulations and ordinances as well as comply with the University's lead removal/abatement specifications. This includes but is not limited to complying with the MICHIGAN LEAD IN CONSTRUCTION STANDARD and the UM OSEH Lead Management program. Furthermore, all efforts before, during and after work, the contractor must ensure that all steps are being taken to protect the health, safety and well-being of the facility occupants, their workers and the general public from exposure to lead, lead dust, lead fumes, lead of any kind related to this facility or activities at this facility.

Under this specification, the General Contractor and subcontractors are hereby informed by the University of Michigan Flint that a lead building material survey of the area scheduled for repair has been completed and that regulated Lead containing materials are present The General Contractor and its subcontractor personnel must be diligent in being alert and if any suspect material is encountered during the course of work, immediately contact the University of Michigan-Flint, Environment, Health & Safety Department or designated representatives.

It is important to note that certain LCMs will remain in the building during proposed construction activities. It is the responsibility of the General Contractor and its subcontractors to ensure that personnel on the project site have completed the applicable level of safety training and that a high degree of due care will be exhibited when working around these regulated materials. Any damage to regulated materials by the General Contractor or its subcontractor personnel are to be reported immediately to the University of Michigan-Flint, Environment, Health & Safety Department or designated representatives. Expenditures and liabilities associated with correcting damaged ACMs and LCMs, exposure hazards or cross contamination issues caused by the General Contractor or its subcontractor will be the responsibility of the General Contractor including clearance testing and any analytical expenses.

1.1 SUMMARY

- A. This Section specifies requirements for working with lead-containing materials (LCM), during any of the following operations:
 - 1. Demolition of Lead-Containing Materials (LCM): Includes razing a building or any portion of a building or piece of equipment with LCM. This is the primary lead activity on most renovation projects.

2. **Incidental Removal or Disturbance of Lead-Based Paint (LBP):** This includes activities such as sanding and scraping for paint preparation activities.
 3. **Abatement of Lead-Based Paint (LBP):** Complete removal of LBP from substrate. This includes removal of LBP from building elements before torch cutting. If any LBP removal is completed in a child care facility, LBP removal must only be conducted by State Licensed Lead Abatement contractors.
- B. Extent of known LCM is as follows:
1. Lead containing coatings and building components are identified in the June 2009 Monarch Environmental summary report letter for the University Pavilion Basement.
 2. Contractor is responsible to review and verify building component conditions in the field prior to bid and work.

1.2 DEFINITIONS

- A. The term "Lead-Based Paint" (LBP) is identified as paint containing lead in any detectable amount.
- B. The term "Abatement" means that LBP is completely removed from the substrate.
- C. The term "Incidental Removal or Disturbance of Lead-Based Paint" indicates one or more of the following operations:
 1. Scraping, hand sanding, or otherwise removing loose LBP from existing surfaces scheduled to remain in place, when this work is for purposes other than Abatement and will not result in complete removal of all LBP.
- D. The term "Demolition of LCM" refers to cutting, drilling, abrading, demolishing, or otherwise disturbing building elements coated with LBP or containing lead for purposes other than Abatement.
- E. The term "Lead-Containing Materials" (LCM) is identified as construction debris coated with lead-based paint or other materials containing lead, such as x-ray shielding.
- F. The term "Critical Barrier" indicates the perimeter of the enclosure within which lead disruption/removal work takes place. Critical Barriers may include existing floor, wall, and ceiling structures, as well as constructed partitions, closures and seals.
- G. The term "Project Site" indicates the limits of the Project Site as indicated on drawings or by provisions of this specification.
- H. The term "Work Area" indicates the area within the Critical Barrier.
- I. The term "Action Level" means exposure to an airborne concentration of lead of 30 micrograms per cubic meter of air calculated as an 8-hour time-weighted average (TWA).
- J. The term "Exposure Assessment" means a determination of employee exposures for a given task measured by air monitoring. The Assessment must meet the criteria for objective data as outlined in the MIOSHA/OSHA Lead in Construction Standard (MIOSHA Part 603, R325.51992 and 29 CFR 1926.62).

- K. The term "OSHA PEL" stands for the Permissible Exposure Limit established by the Occupational Safety and Health Administration for lead exposure. The OSHA PEL refers to an airborne concentration of lead of 50 micrograms per cubic meter of air calculated as an 8-hour time-weighted average (TWA).
- L. The abbreviation "TCLP" stands for Toxicity Characteristic Leaching Procedure and refers to one of the tests to determine if waste is to be disposed as a Hazardous Waste or non-hazardous solid waste.
- M. The term "Hazardous Waste" refers to a listed waste or any solid or liquid waste with one or more of the following characteristics: toxic, corrosive, flammable, explosive, combustible, oxidizer, pyrophoric, unstable (reactive) or water - reactive. This definition includes lead paint that has been removed from the substrate and has failed the TCLP for any reason.
- N. The term "Non-Hazardous Waste" refers to any solid or liquid waste not exhibiting characteristics of Hazardous Waste. This definition includes LBP not removed from substrate and not failing TCLP for other characteristics. It also includes lead paint chips that do not fail the TCLP for any reason.
- O. The term "OSEH/EHS" refers to Owner's Occupational Safety and Environmental Health Departments on both the Ann Arbor and Flint Campuses. **The primary point of contact for the project will be the Environment, Health & Safety Department on the Flint Campus, 801 Northbank Center (NBC), 303 East Kearsley, Flint, Michigan 48502, (810) 766-6763.** The secondary point of contact is the OSEH/EHS Department, 1239 Kipke Drive, Ann Arbor, MI 48109-1010; phone (734) 647-1142.

1.3 SUBMITTALS - IF REMOVAL/ABATEMENT ACTIVITIES ARE INVOLVED

- A. Exposure Assessment Documentation: Submit to OSEH/EHS all information used to document previous employee exposure assessment, if available. If not available, conduct an initial exposure assessment at the start of the project.
- B. Written Compliance Plan: Submit to OSEH/EHS a Written Compliance Plan incorporating all requirements in the MIOSHA Lead in Construction Standard. Also indicate type of containment and method of liquid waste capture to be established if water is utilized for removal.
- C. Health and Safety Requirements: Submit to OSEH/EHS the following information for each employee that will conduct lead disturbance on the job site:
 - 1. Respiratory Protection Program.
 - 2. Proof of current fit test for respirator that will be worn on Project Site.
 - 3. Proof of medical surveillance for respirator usage and lead work.
 - 4. Proof of lead awareness training in accordance with section 1.5. QUALITY ASSURANCE.

ADDITIONALLY, IF LEAD ABATEMENT WORK AS DEFINED IN 1.1 A.3 IS BEING DONE, ADDITIONAL SUBMITTALS INCLUDE 5. AND 6. BELOW.

- 5. Proof of certified lead abatement worker or supervisor accreditation when required.

6. A copy of the Contractor's License to Conduct Lead Abatement Activities from the State of Michigan, when required by other provisions of this Section.
- D. Prepare a written schedule for each operation expected to disturb/remove LCM, indicating the following:
 1. Type of work to be performed, such as cutting, demolition, paint removal, or other action.
 2. Location of work to be performed.
 3. Proposed starting date and time.
 4. Proposed working hours.
 5. Proposed duration.
- E. All submissions must be directed to OSEH/EHS, 204 UPAV, UM-Flint.

1.4 QUALITY ASSURANCE

- A. Personnel involved in the disturbance of LCM shall be trained in accordance with the requirements of the MIOSHA Lead in Construction Standard, including but not necessarily limited to:
 1. The content of the MIOSHA Lead in Construction Standard and its appendices;
 2. The specific nature of the operations which could result in exposure to lead above the action level;
 3. The purpose, proper selection, fitting, use, and limitations of respirators;
 4. The purpose and a description of the medical surveillance program, and the medical removal protection program including information concerning the adverse health effects associated with excessive exposure to lead (with particular attention to the adverse reproductive effects on both males and females and hazards to the fetus and additional precautions for employees who are pregnant);
 5. The engineering controls and work practices associated with the employee's job assignment including training of employees to follow relevant good work practices;
 6. The contents of any compliance plan in effect;
 7. Instructions to employees that chelating agents should not routinely be used to remove lead from their bodies and should not be used at all except under the direction of a licensed physician; and
 8. The employee's right of access to records under 29 CFR 1910.20.

PART 2 - EXECUTION

2.1 HEALTH AND SAFETY REQUIREMENTS

- A. General: Determine employee exposure to lead in air as required in MIOSHA Lead in Construction Standard.
- B. Exposure Assessment: If Contractor has made a previous Exposure Assessment that is representative of the task to be performed on-site, the Contractor may rely on this data and determine the need for personal protective equipment and work practice controls based upon this data, if approved by OSEH/EHS.

C. Job requirements: When the Contractor does not have an Exposure Assessment or the Assessment is determined to be insufficient, the Contractor must conduct personal air monitoring in accordance with the MIOSHA Lead in Construction Standard and follow the requirements below which are outlined by job task until monitoring determines otherwise:

1. Manual demolition, scraping, sanding, heat gun application, power tool cleaning with HEPA dust collection system, spray painting with LCM:
 - a. Use of 1/2 mask respirator with HEPA filters.
 - b. PPE.
 - c. Medical surveillance.
 - d. Use of changing room.
 - e. Use of handwashing facilities.
 - f. Provision of lead awareness training.
2. Using lead mortar, lead burning, rivet busting, power tool cleaning without HEPA collection, cleaning up with dry expendable abrasives, removing or relocating enclosure:
 - a. Loose fitting PAPR with HEPA or supplied air respirator.
 - b. PPE.
 - c. Medical surveillance.
 - d. Use of changing room.
 - e. Use of handwashing facilities.
 - f. Provision of lead awareness training.
3. The techniques identified in the paragraph below should be used only if no other alternatives are available and after consultation with OSEH/EHS. These techniques include Abrasive blasting, welding, using cutting torch, burning (Contact OSEH/EHS for alternatives before using these methods):
 - a. Supplied air respirator or SCBA.
 - b. PPE
 - c. Medical surveillance.
 - d. Use of changing room.
 - e. Use of handwashing facilities.
 - f. Provision of lead awareness training.
4. If work involves Lead Abatement as defined in 1.3.b:
 - a. Work must be completed by personnel trained in accordance with the MIOSHA Lead in Construction Standard.

2.2 PREPARATION

- A. General: Prepare Work Areas in a manner that will protect Owner's personnel and property, and the visiting public, from contact with LCM. Prior to beginning work, confirm starting date and time with Owner. Do not begin work that will disturb LCM without Owner's approval.
- B. Preparing Building Exteriors: Ensure adequate measures are in place to limit airborne lead content below the Action Level of 30 ug/m³ (micrograms per cubic meter) adjacent to the Work Area.
 1. Erect barricades and install warning tape or signs as necessary to prevent inadvertent exposure of passersby to LCM in all forms, including, but not necessarily limited to dust, particles, and fumes.
 2. Completely cover grounds and vegetation with minimum 8-mil thick polyethylene sheets with joints between sheets lapped and taped; with one edge taped to adjacent building surfaces below area of work; and with free ends secured in position with stakes, tie-down lines or weights. Cover sufficient ground area to capture wind-blown chips, dust and particles.

- C. **Preparing Building Interiors:** Ensure adequate measures are in place to protect building occupants from exposure to airborne lead dust, particles, fumes or other LCM exceeding the Action Level of 30 ug/m³ (micrograms per cubic meter) lead content in air. Adequate measures shall include, but are not necessarily limited to, construction of Critical Barriers and/or establishment of negative pressure within Work Area.

1. **Seal off openings** and penetrations into the Work Area. Provide temporary dust barriers consisting of at least polyethylene plastic sheet on wood studs. Lap and tape joints of plastic sheeting to prevent dust, particles, fumes, and other forms of lead debris from leaving the enclosed area.
2. Discontinue building ventilation within the Work Area and seal off ventilation supply and return or exhaust diffusers, grilles or openings.
3. Post warning signs at all entrances to the Work Area that states the following, as required in MIOSHA Lead in Construction Standard:

**WARNING
LEAD WORK AREA
POISON
NO SMOKING OR EATING**

2.3 WORK PRACTICES

- A. General: Perform removal of LCM (includes demolition and abatement activities) in compliance with the following requirements:
1. Restrict access to Work Area to essential personnel.
 2. Use moist-removal methods and/or HEPA vacuuming where applicable. Do not over-saturate the Work Area.
 3. Any debris generated must be cleaned up immediately before it can be tracked into other areas.
 4. Remove contaminated clothing and personal protective equipment before leaving the Work Area, or Work Area enclosure, as applicable.
 5. If Action Level is exceeded outside Work Area, discontinue work and modify Critical Barrier, or perform other modifications of methods or materials as required to reduce the lead contamination below the Action Level.
 6. Prohibit eating, drinking, and smoking in the Work Area.
- B. Incidental Removal and Abatement Of LBP: Remove paint from building surfaces by hand scraping and sanding; or through the use of fluid-applied chemical strippers designed to dry into a solid polymeric sheet and peel off with paint encapsulated. Hand-scraping and sanding must be used in conjunction with moist-removal methods using misted water. Leave moist paint dust and chips in place to air dry before collection. Contact OSEH/EHS as soon as removal has begun.
1. Wet methods (including power-washing) that use amounts of water that can drip, spill, or leak onto the ground, or onto or into other adjacent surfaces are prohibited unless approved by OSEH/EHS.
 2. **Dry removal methods (including sand blasting, power sanding, and other methods relying on high velocity mechanical abrasion) that create airborne fine particulate waste materials are prohibited unless specifically reviewed and approved by OSEH/EHS.**
 3. Prior to torch-cutting building elements containing LBP, remove paint within four inches of centerline of cut in accordance with requirements of this Section.

C. Removal Of Solid Lead Sheeting: Remove and stockpile solid lead sheet materials in a manner that will not result in the contamination of Work Area or Project Site. Remove sheet products in the largest sections possible. Do not unnecessarily cut or abrade lead sheet materials. Provide minimum 8-mil thick plastic sheet covering between solid lead stockpiles and walls, floors, paving or ground as applicable.

1. Do not separate lead sheet materials that are adhesively laminated to gypsum substrates. Remove and stockpile gypsum board with lead laminate attached.

2.4 DISPOSAL

A. Lead Paint Chips, Lead Sheet Materials and Liquids Containing Lead Waste: Coordinate TCLP testing, collection, and removal of the above types of lead waste from the Project Site with OSEH/EHS. Only these types of lead waste need to be collected for TCLP testing and special disposal. Debris from demolition of building structures and equipment covered with lead based paint does not need to be TCLP tested. This type of waste can be disposed of as normal construction demolition debris or recycled. Where testing of waste indicates waste is Non-Hazardous, refer to paragraph C of this section entitled "Disposal of Non-Hazardous LCM from Demolition/Renovation Activities". If waste is classified as Hazardous or needs to be TCLP tested, comply with the following requirements:

1. Collect and place solid and liquid waste in appropriate drums provided by the contractor and approved by the Owner.
2. Store waste containers in a secure area (preferably a locked room at the project site. Set containers securely on a hard surface which is accessible to drum carts. Do not stage containers on lawns, dirt piles, gravel drives areas with mud or basement areas with no elevator access.
3. Ensure that soil, ground water, and drains or sewers within the storage area are protected from possible contamination. Keep containers secure and tightly closed at all times, except when adding waste.
4. Keep abatement waste segregated from other waste and from other Projects. Do not co-mingle waste. **DO NOT MIX LIQUID AND SOLID WASTE.**
5. Place appropriate labels on all containers. Provide all information required on the label; mark labels using indelible ink. The name of the "Waste Generator" is as follows:
 - a. "NORTHBANK CENTER- Ballroom Renovation" University of Michigan -Flint, Flint, MI 48502.
 - b. Contact OSEH/EHS at the start of the project (810-766-6763) for proper generator name and site address.
6. Mark the side of each drum with the name and phone number of Owner's Representative knowledgeable about the type of waste contained.
7. Do not remove waste from Project Site, unless instructed by EHS.

B. Disposal of hazardous lead waste shall be done in coordination with OSEH/EHS.

1. Contact OSEH/EHS at least two weeks in advance to coordinate transportation of the containers.
2. OSEH/EHS will pickup and dispose of properly packaged and staged hazardous lead waste at no cost to the contractor. Call the OSEH/EHS at 810-766-6763 to schedule a pickup immediately after lead waste has been staged.

- C. Disposal of Non-Hazardous LCM from Demolition/Renovation Activities: Collect Non-hazardous LCM waste in a covered dumpster and dispose of the waste at a landfill. If previously containerized lead paint chips pass the TCLP, they can be disposed of as normal construction debris **after all hazardous waste labels have been removed from then container.**
- D. For projects where large amounts of hazardous waste are generated, OSEH/EHS may allow for transportation and disposal of waste by a qualified contractor. If applicable, contact OSEH/EHS for additional transportation and disposal requirements.

2.5 CLEAN UP

- A. Upon completion of LCM or LBP removal and disposal operations, clean all surfaces within the Work Area before it can be tracked into other areas, including, but not necessarily limited to the following:
1. Siding.
 2. Steel support structures.
 3. Floors and ground.
 4. Walls.
 5. Window sills.
 6. Trim.
 7. Ledges and projections.
- B. For projects within building interior spaces, use a HEPA filtered vacuum for removal/elimination of dust, particulates, and debris.
1. Brushing, brooming and other dry methods that generate airborne dust are prohibited.
- C. Remove and dispose of wash water and HEPA filters as Hazardous Waste.
- D. Remove and dispose of all solid waste used for protection and clean-up as Non-Hazardous Waste as indicated in Section 3.4, paragraph C, entitled "Disposal of Non-Hazardous LCM from Demolition/Renovation Activities".
- E. Field Testing: Upon completion of removal, disposal, and clean-up operations, the Owner may visually inspect and/or test the Project Site for evidence of remaining lead contamination. Return to Project Site and, at no additional cost to Owner, re-clean areas found to be contaminated.

PART 3 - OTHER OCCUPATIONAL AND ENVIRONMENTAL HEALTH REQUIREMENTS

3.1

The Contractor must ensure that all work is performed in accordance with all federal, state, and local rules, regulations/ordinances as well as established University of Michigan guidelines. The Contractor is responsible for communicating, monitoring and enforcing all health and safety rules, regulations and contract terms with its employees and all Subcontractors.

The Contractor must have all applicable written health and safety programs as well as provide their own employees with all appropriate health and safety training/certification and the equipment required to safely perform the job tasks to successfully

complete this project in accordance with state and federal regulations. This includes but is not limited to hazard communication, activities that involve working with or near electrical equipment or other potentially energized equipment, lockout-tagout, electrical safety, PPE and respiratory protection, permit confined space, trenching, powered industrial equipment, hazardous chemicals, regulated or hazardous waste, and any other that may apply. These programs must be provided to the University prior to beginning work and must be readily available upon request for the University to review.

3.2 CONTRACTORS SIGNATURE

I have reviewed, received copies appropriate for scheduled work activities and agree to comply with all due care document while working at the Site.

RE: Concrete submittal for Flint State Office Building.

Superior Materials, LLC submits the following concrete submittal according to all known specifications and documents. Immediately below is a summary of this submittal.

- 1.) Mix ID # YOL13552-Footing, 6 inch slump.
 - a. Break History Statistical Summary
 - b. ACI 318 Trial Batch Data and Curve
- 2.) Mix ID # 10K13522-Interior Slab on Grade, 6 inch slump.
 - a. Break History Statistical Summary
 - b. ACI 318 Trial Batch Data and Curve
- 3.) Mix ID # POL11528-Exterior Slab, 6 inch slump.
 - a. Break History Statistical Summary
 - b. ACI 318 Trial Batch Data and Curve
- 4.) Material Data Sheets:
 - a. Cement Mill Report
 - b. Flyash Mill Report
 - c. Fine Aggregate
 - d. Coarse Aggregate
 - e. Admixtures
 - i. Air Entraining agent
 - ii. Water Reducer
 - iii. Mid Range Water Reducer

Please provide approval status when available.

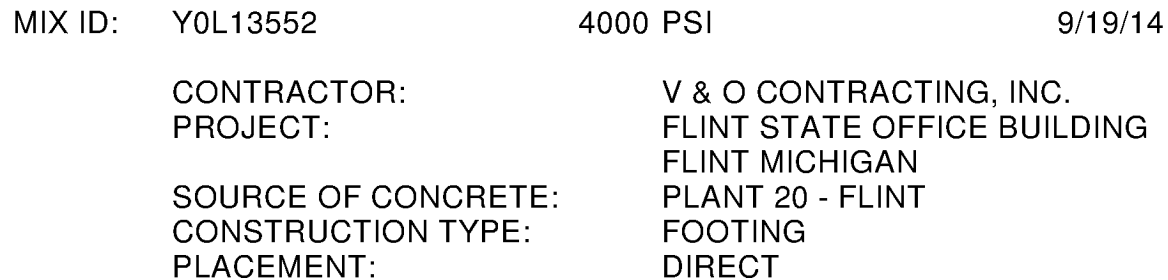

Sincerely,

Nancy Donahue

The Chemical Company

3	05 40 80	Product Data Cast-in-Place Concrete Precast Concrete Mass Concrete
	05 40 80	
	05 70 80	

Description

Micro Air air-entraining admixture provides concrete with extra protection by creating air bubbles that are ultrastable, small and closely spaced – a characteristic especially useful in the types of concrete known for their difficulty to entrain and maintain the air content desired.

Even when used at a lower dosage than standard air-entraining admixtures, Micro Air admixture meets the requirements of ASTM C 260, AASHTO M 154, and CRD-C 13.

Applications

Recommended for use in:

- Concrete exposed to cyclic freezing and thawing
- Production of high-quality normal or lightweight concrete (heavyweight concrete normally does not contain entrained air)

MICRO AIR®

Air-Entraining Admixture

Features

- Ready-to-use in the proper concentration for rapid, accurate dispensing
- Greatly improved stability of air-entrainment
- Ultra stable air bubbles

Benefits

- Increased resistance to damage from cyclic freezing and thawing
- Increased resistance to scaling from deicing salts
- Improved plasticity and workability
- Improved air-void system in hardened concrete
- Improved ability to entrain and retain air in low-slump concrete, concrete containing high-carbon content fly ash, concrete using large amounts of fine materials, concrete using high-alkali cements, high-temperature concrete, and concrete with extended mixing times
- Reduced permeability – increased watertightness
- Reduced segregation and bleeding

Performance Characteristics

Concrete durability research has established that the best protection for concrete from the adverse effects of freezing and thawing cycles and deicing salts results from: proper air content in the hardened concrete, a suitable air-void system in terms of bubble size and spacing and adequate concrete strength, assuming the use of sound aggregates and proper mixing, transporting, placing, consolidation, finishing and curing techniques. Micro Air admixture can be used to obtain adequate freezing and thawing durability in a properly proportioned concrete mixture, if standard industry practices are followed.

Air Content Determination: The total air content of normal weight concrete should be measured in strict accordance with ASTM C 231, "Standard Test Method for Air Content of Freshly Mixed Concrete by the Pressure Method" or ASTM C 173/C 173M, "Standard Test Method for Air Content of Freshly Mixed Concrete by the Volumetric Method."

The air content of lightweight concrete should only be determined using the Volumetric Method. The air content should be verified by calculating the gravimetric air content in accordance with ASTM C 138/C 138M, "Standard Test Method for Density (Unit Weight), Yield, and Air Content (Gravimetric) of Concrete." If the total air content, as measured by the Pressure Method or Volumetric Method and as verified by the Gravimetric Method, deviates by more than 1-1/2%, the cause should be determined and corrected through equipment calibration or by whatever process is deemed necessary.

Master
Builders

Product Data: MICRO AIR®

Guidelines for Use

Dosage: There is no standard dosage for Micro Air admixture. The exact quantity of air-entraining admixture needed for a given air content of concrete varies because of differences in concrete making materials and ambient conditions. Typical factors that might influence the amount of air entrained include: temperature, cementitious materials, sand gradation, sand-aggregate ratio, mixture proportions, slump, means of conveying and placement, consolidation and finishing technique.

The amount of Micro Air admixture used will depend upon the amount of entrained air required under actual job conditions. In a trial mixture, use 1/8 to 1-1/2 fl oz/cwt (8-98 mL/100 kg) of cement. In mixtures containing water-reducing or set-control admixtures, the amount of Micro Air admixture needed is somewhat less than the amount required in plain concrete. Due to possible changes in the factors that can affect the dosage of Micro Air admixture, frequent air content checks should be made during the course of the work. Adjustments to the dosage should be based on the amount of entrained air required in the mixture at the point of placement. If an unusually high or low dosage of Micro Air admixture is required to obtain the desired air content, consult your BASF Construction Chemicals representative. In such cases, it may be necessary to determine that, in addition to a proper air content in the fresh concrete, a suitable air-void system is achieved in the hardened concrete.

Dispensing and Mixing: Add Micro Air admixture to the concrete mixture using a dispenser designed for air-entraining admixtures; or add manually using a suitable measuring device that ensures accuracy within plus or minus 3% of the required amount. For optimum, consistent performance, the air-entraining admixture should be dispensed on damp, fine aggregate or with the initial batch water. If the concrete mixture contains lightweight aggregate, field evaluations should be conducted to determine the best method to dispense the air-entraining admixture.

Precaution

In a 2005 publication from the Portland Cement Association (PCA R&D Serial No. 2788), it was reported that problematic air-void clustering that can potentially lead to above normal decreases in strength was found to coincide with late additions of water to air-entrained concretes. Late additions of water include the conventional practice of holding back water during batching for addition at the jobsite. Therefore, caution should be exercised with delayed additions to air-entrained concrete. Furthermore, an air content check should be performed after any post-batching addition to an air-entrained concrete mixture.

Product Notes

Corrosivity – Non-Chloride, Non-Corrosive: Micro Air admixture will neither initiate nor promote corrosion of reinforcing and prestressing steel embedded in concrete, or of galvanized steel floor and roof systems. No calcium chloride or other chloride-based ingredients are used in the manufacture of this admixture.

Compatibility: Micro Air admixture may be used in combination with any BASF Construction Chemicals admixture, unless stated otherwise on the data sheet for the other product. When used in conjunction with other admixtures, each admixture must be dispensed separately into the mixture.

Storage and Handling

Storage Temperature: Micro Air admixture should be stored and dispensed at 35 °F (2 °C) or higher. Although freezing does not harm this product, precautions should be taken to protect it from freezing. If it freezes, thaw and reconstitute by mild mechanical agitation. **Do not use pressurized air for agitation.**

Shelf Life: Micro Air admixture has a minimum shelf life of 18 months. Depending on storage conditions, the shelf life may be greater than stated. Please contact your BASF Construction Chemicals representative regarding suitability for use and dosage recommendations if the shelf life of Micro Air admixture has been exceeded.

Safety: Micro Air admixture is a caustic solution. Chemical goggles and gloves are recommended when transferring or handling this material. (See MSDS and/or product label for complete information.)

Packaging

Micro Air admixture is supplied in 55 gal (208 L) drums, 275 gal (1040 L) totes and by bulk delivery.

Description

Pozzolith 200 N ready-to-use, liquid admixture is used for making more uniform and predictable quality concrete. It meets ASTM C 494/C 494M requirements for Type A, water-reducing, Type B, retarding, and Type D, water-reducing and retarding, admixtures.

Applications

Recommended for use in:

- Prestressed concrete
- Precast concrete
- Reinforced concrete
- Shotcrete
- Lightweight concrete
- Pumped concrete
- 4x4™ Concrete
- Pervious Concrete
- Rheodynamic® Self-Consolidating Concrete (SCC)

POZZOLITH® 200 N

Water-Reducing Admixture

Features

- Reduced water content required for a given workability
- Controlled setting characteristics – normal or retarded

Benefits

- Improved workability
- Reduced segregation
- Improved finishing characteristics for flatwork and cast surfaces
- Increased compressive and flexural strength

Guidelines for Use

Dosage: Pozzolith 200 N admixture is recommended for use at a dosage of 3-4 fl oz/cwt (185-260 mL/100 kg) of cementitious materials for Type A applications and up to 6 fl oz/cwt (390 mL/100 kg) for Type B and D requirements. Because of variations in job conditions and concrete materials, dosages other than the recommended amounts may be required. In such cases, contact your local BASF Construction Chemicals representative.

Product Notes

Corrosivity – Non-Chloride, Non-Corrosive: Pozzolith 200 N admixture will neither initiate nor promote corrosion of reinforcing steel in concrete. This admixture does not contain intentionally-added calcium chloride or other chloride-based ingredients.

Compatibility: Pozzolith 200 N admixture may be used in combination with any BASF Construction Chemicals admixtures. When used in conjunction with other admixtures, each admixture must be dispensed separately into the mix.

Storage and Handling

Storage Temperature: If Pozzolith 200 N admixture freezes, thaw at 35 °F (2 °C) or above and completely reconstitute by mild mechanical agitation. **Do not use pressurized air for agitation.**

Shelf Life: Pozzolith 200 N admixture has a minimum shelf life of 18 months. Depending on storage conditions, the shelf life may be greater than stated. Please contact your BASF Construction Chemicals representative regarding suitability for use and dosage recommendations if the shelf life of Pozzolith 200 N admixture has been exceeded.

Product Data: POZZOLITH® 200 N

Packaging

Pozzolith 200 N admixture is supplied in 55 gal (208 L) drums, 275 gal (1040 L) totes and by bulk delivery.

		Cast-in-Place Concrete Incast Concrete

Description

PolyHeed FC 100 patented, ready-to-use non-chloride, mid-range water-reducing admixture is a new generation of admixture based on polycarboxylate chemistry.

It is specifically formulated to provide normal setting times with fly ash and/or slag cement concrete mixtures.

PolyHeed FC 100 admixture meets ASTM C 494/C 494M requirements for Type A, water-reducing, Type C, accelerating, and Type E, water-reducing and accelerating, admixtures.

Applications

Recommended for use in:

- All concrete containing increased levels of fly ash or slag cement replacements
- Conventionally-placed concrete mixtures containing a wide range of cements
- Rheodynamic® Self-Consolidating Concrete
- 4x4™ Concrete
- Pervious Concrete

POLYHEED® FC 100

Mid-Range Water-Reducing Admixture

Features

- True mid-range water reduction (5-18%) and excellent performance across a wide slump range, especially the difficult slump range of 6-8 in. (150-200 mm)
- Superior workability/pumpability even in concrete mixtures with low contents of cementitious materials
- Consistent performance in low to high slump concrete mixtures, in particular, the mid-range slump of 5-8 in. (125-200 mm)
- Provides normal setting times with fly ash and slag cement concrete mixtures

Benefits

- Improved performance with a wide range of cements, fly ashes, silica fume, slag cement and aggregates (including coarse and manufactured sands)
- Opportunity to increase the level of fly ash or slag cement replacement in a given concrete mixture
- Reduced in-place concrete costs

Performance Characteristics

Mixture Data: 800 lb/yd³ (358 kg/m³) total cementitious content; 25% cement replacement with Class C fly ash for the Class C reference and PolyHeed FC 100 admixture mixes; slump, 6-7 in. (150-175 mm); air content 5-6%; concrete temperature, 70 °F (21 °C); ambient temperature, 50 °F (10 °C).

Setting Time

Mixture	Initial Set (h:min)	Difference (h:min)
Plain Ref.	7:48	—
Class C Ref.	12:15	+4:27
PolyHeed FC100 admixture @		
10 fl oz/cwt (650 mL/100 kg)	9:22	+1:34
20 fl oz/cwt (1300 mL/100 kg)	6:54	-0:54

Compressive Strength Performance

Mixture	7-Day			28-Day		
	psi	MPa	%	psi	MPa	%
Plain Ref.	3450	23.8	100	5420	37.4	100
Class C Ref.	2690	18.5	78	4820	33.2	89
PolyHeed FC100 admixture @						
10 fl oz/cwt (650 mL/100 kg)	3800	24.8	104	5140	35.4	95
20 fl oz/cwt (1300 mL/100 kg)	4250	29.3	123	6460	44.5	119

Note: The data shown are based on controlled laboratory tests. Reasonable variations from the results shown here may be experienced as a result of differences in concrete making materials and jobsite conditions.

Master
Builders

Product Data: POLYHEED® FC 100

Guidelines for Use

Dosage: PolyHeed FC 100 admixture has a recommended dosage range of 8-30 fl oz/cwt (520-1,950 mL/100 kg) of total cementitious materials for most concrete mixes.

BASF Construction Chemicals does not recommend the use of dosages outside the recommended range without trial testing. Consult your local BASF Construction Chemicals representative for assistance in determining the dosage for optimum performance.

Product Notes

Corrosivity – Non-Chloride, Non-Corrosive: PolyHeed FC 100 admixture will neither initiate nor promote corrosion of reinforcing or prestressing steel embedded in concrete or of galvanized steel floor and roof systems. PolyHeed FC 100 admixture does not contain intentionally added calcium chloride or other chloride-based ingredients.

Compatibility: PolyHeed FC 100 admixture is compatible with most admixtures and can be used in combination with other BASF Construction Chemicals admixtures, unless stated otherwise. When used in conjunction with other admixtures, each admixture must be dispensed separately into the concrete mixture.

Storage and Handling

Storage Temperature: If PolyHeed FC 100 admixture freezes, thaw at 35 °F (2 °C) or above and completely reconstitute by mild mechanical agitation. **Do not use pressurized air for agitation.**

Shelf Life: PolyHeed FC 100 admixture has a minimum shelf life of 18 months. Depending on storage conditions, the shelf life may be greater than stated. Please contact your BASF Construction Chemicals representative regarding suitability for use and dosage recommendations if the shelf life of PolyHeed FC 100 admixture has been exceeded.

Packaging

PolyHeed FC 100 admixture is supplied in 55 gal (208 L) drums, 275 gal totes (1,040 L) and by bulk delivery.

Related Documents

Material Safety Data Sheets: PolyHeed FC 100 admixture.

PSI FIBERSTRAND F

FIBRILLATED POLYPROPYLENE MICRO-FIBER

DESCRIPTION

PSI FIBERSTRAND F is a fibrillated polypropylene micro-fiber for concrete reinforcement that complies with ASTM C 1116, Standard Specification for Fiber Reinforced Concrete and Shotcrete, and is specifically designed to help mitigate the formation of plastic shrinkage cracking in concrete. Typically used at a dosage rate of 1.5 lbs/yd³ (0.9 kg/m³), PSI FIBERSTRAND F micro-fibers have been shown to greatly reduce plastic shrinkage cracking when compared to plain concrete. PSI FIBERSTRAND F micro-fibers also comply with applicable portions of the International Code Council (ICC) Acceptance Criteria AC308 for synthetic fibers.

PRIMARY APPLICATIONS

- Slabs on grade, sidewalks, driveways, curb work, overlays and toppings
- Footings, foundations, walls and tank applications
- Stucco applications, pre-cast concrete and pre-stressed beams
- Shotcrete, slope paving and composite steel deck construction

FEATURES/BENEFITS

- Controls and mitigates plastic shrinkage cracking
- Reduces segregation, plastic settlement and bleed-water
- Provides three-dimensional reinforcement against micro-cracking
- Increases surface durability, impact and abrasion resistance
- Reduction of in-place cost versus wire mesh for non-structural temperature / shrinkage crack control
- Easily added to concrete mixture at any time prior to placement

TECHNICAL INFORMATION

Typical Engineering Data

Material.....	100% virgin fibrillated polypropylene
Specific Gravity.....	0.91
Typical dosage rate.....	1.5 lbs/yd ³ (0.9 kg/m ³)
Available lengths.....	1/4" (6 mm), 1/2" (13 mm), 3/4" (19 mm), 1 1/4" (32 mm), 2" (51 mm) and multi-length blend (ML)
Melt point.....	320°F (160°C)
Electrical and Thermal Conductivity.....	low
Water Absorption.....	negligible
Acid and Alkali Resistance.....	excellent

PACKAGING

PSI FIBERSTRAND F micro-fibers are packaged in 0.75 lb (0.34 kg), 1.0 lb (0.45 kg) and 1.5 lb (0.68 kg) water soluble bags. Special packaging configurations are also available upon request.

SHELF LIFE

5 years in original, unopened package.

DIRECTIONS FOR USE

PSI FIBERSTRAND F micro-fibers can be added to the concrete mixture at any time prior to placement of the concrete. It is generally recommended to add any fiber material to the concrete mixer during batching. Fibers must be mixed with concrete for a minimum of three to five (3-5) minutes at maximum mixing speed, depending upon the mixer type, to ensure complete dispersion and uniformity.

David,

Thanks for forwarding this information.

Just a couple of items to point out.

- 1) The attached notice entitled *Flint Water.pdf* says that the water is not unsafe. It states:

"What should I do?

- There is nothing you need to do unless you have a severely compromised immune system, have an infant, or are the elderly. In that case, you may be at increased risk and should seek advice about drinking water from your healthcare provider.
- **You do not need to boil your water or take other corrective actions.** If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What does this mean?

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours..."

- 2) The press release attached indicates that this notice was sent due to test results for a period ending 11/30/14.

Flint water is unsafe.

From: Jason Lorenz <jlorenz@cityofflint.com>
Sent: Friday, January 02, 2015 7:21 PM
Subject: PRESS RELEASE: Flint Takes Steps to Address Water System Issues
Attachments: Flint Water TTHM Release.pdf

For Immediate Release:

City of Flint Takes Proactive Measures to Improve Water Distribution System and Address Compliance Issues

Flint, Michigan – January 2, 2015 – The City of Flint’s Department of Public Works has been actively working to address upgrades and repairs to the city’s water distribution system. These actions appear to have corrected several long time concerns with the system as well as known compliance issues with the system, including a recent temporary increase in the maximum contamination level (MCL) of trihalomethanes (TTHM) found in water samples collected from the system during a testing period which ended November 30, 2014. The public was notified of the violation as a precautionary measure as required by the Michigan Department of Environmental Quality (MDEQ).

TTHM is a common by-product of the water chlorination process. Increased levels in some water samples collected in the city were an indicator of weaknesses in the distribution system and treatment process, which were due to years of deferred repairs and upgrades to a very old system. The City of Flint’s DPW is and has been pursuing a comprehensive plan to make critical upgrades to its water distribution system for the long term health and operation of the system and to mitigate any future issues.

The levels of TTHM in the water were elevated marginally above the MCL in some samples, resulting in a less urgent “Tier 2” Environmental Protection Agency notification. This means that the EPA believes there is no immediate risk to consumers and/or the system may have already returned to acceptable levels by the time the notice was issued. Although TTHM is considered to be an environmental pollutant that can be carcinogenic, it

can only be hazardous if consumed in water containing the elevated levels at a rate of two liters per person, per day for 70 years. The City of Flint wants to assure the public that according to the MDEQ the water is safe for drinking and all other purposes.

The City of Flint worked closely with the MDEQ to correct the issue by flushing hydrants and replacing key valves in the distribution system. These measures have shown to be effective in not only lowering the TTHM levels in the system, but have also improved the overall health of the system. The Michigan DEQ has acknowledged and appreciates the progress of the City's preemptive evaluation of operations which identified the deficiencies and the corrective measures being taken. The latest round of testing has shown a significant decrease in levels across the board, with most samples falling well below the MCL. It is expected that all sample levels will be well below the MCL in the next round of quarterly scheduled testing in March of 2015.

Flint's DPW welcomes the rigorous review of the MDEQ to ensure steady progress is made on this important issue. "Our proactive plan of replacing valves, flushing hydrants and making other adjustments to the system has shown both promising short term results as well as strengthening our water distribution capability in the long term," said Flint DPW Director Howard Croft. Both the City of Flint and the MDEQ expect the corrective measures being implemented will resolve the issue by early 2015.

The improvements in MCL levels also mirror the increased consistency being seen in chlorine residuals, flow rates, and overall water quality within the city. As part of the DPW strategic plan and Capital Improvement Plan, there are additional improvements coming to the 600 miles of distribution main including, pipe replacements, leak detection, hydraulic modeling, and enhanced asset management features. The Department of Public Works will continue to provide public education and communication about the quality, the process, and the continual improvements occurring within the system as part of the overall management of the water system.

City of Flint Takes Proactive Measures to Improve Water Distribution System and Address Compliance Issues

Flint, Michigan – January 2, 2015 – The City of Flint’s Department of Public Works has been actively working to address upgrades and repairs to the city’s water distribution system. These actions appear to have corrected several long time concerns with the system as well as known compliance issues with the system, including a recent temporary increase in the maximum contamination level (MCL) of trihalomethanes (TTHM) found in water samples collected from the system during a testing period which ended November 30, 2014. The public was notified of the violation as a precautionary measure as required by the Michigan Department of Environmental Quality (MDEQ).

TTHM is a common by-product of the water chlorination process. Increased levels in some water samples collected in the city were an indicator of weaknesses in the distribution system and treatment process, which were due to years of deferred repairs and upgrades to a very old system. The City of Flint’s DPW is and has been pursuing a comprehensive plan to make critical upgrades to its water distribution system for the long term health and operation of the system and to mitigate any future issues.

–CONTINUE–

CITY OF FLINT
OFFICE OF EMERGENCY MANAGER
DARNELL EARLEY
ICMA-CM, MPA

The levels of TTHM in the water were elevated marginally above the MCL in some samples, resulting in a less urgent "Tier 2" Environmental Protection Agency notification. This means that the EPA believes there is no immediate risk to consumers and/or the system may have already returned to acceptable levels by the time the notice was issued. Although TTHM is considered to be an environmental pollutant that can be carcinogenic, it can only be hazardous if consumed in water containing the elevated levels at a rate of two liters per person, per day for 70 years. The City of Flint wants to assure the public that according to the MDEQ the water is safe for drinking and all other purposes.

The City of Flint worked closely with the MDEQ to correct the issue by flushing hydrants and replacing key valves in the distribution system. These measures have shown to be effective in not only lowering the TTHM levels in the system, but have also improved the overall health of the system. The Michigan DEQ has acknowledged and appreciates the progress of the City's preemptive evaluation of operations which identified the deficiencies and the corrective measures being taken. The latest round of testing has shown a significant decrease in levels across the board, with most samples falling well below the MCL. It is expected that all sample levels will be well below the MCL in the next round of quarterly scheduled testing in March of 2015.

Flint's DPW welcomes the rigorous review of the MDEQ to ensure steady progress is made on this important issue. "Our proactive plan of replacing valves, flushing hydrants and making other adjustments to the system has shown both promising short term

CITY OF FLINT
OFFICE OF EMERGENCY MANAGER
DARNELL EARLEY
ICMA-CM, MPA

results as well as strengthening our water distribution capability in the long term,” said Flint DPW Director Howard Croft. Both the City of Flint and the MDEQ expect the corrective measures being implemented will resolve the issue by early 2015.

The improvements in MCL levels also mirror the increased consistency being seen in chlorine residuals, flow rates, and overall water quality within the city. As part of the DPW strategic plan and Capital Improvement Plan, there are additional improvements coming to the 600 miles of distribution main including, pipe replacements, leak detection, hydraulic modeling, and enhanced asset management features. The Department of Public Works will continue to provide public education and communication about the quality, the process, and the continual improvements occurring within the system as part of the overall management of the water system.

—END—

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

City of Flint Did Not Meet Treatment Requirements

Our water system was recently found to be in violation of a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Samples were collected for total trihalomethanes (TTHM) analysis from eight locations on a quarterly basis (May 21, August 21, and November 20 of 2014). The average of the results at ANY of the eight locations must not exceed the maximum contaminant level (MCL) for TTHMs, otherwise our water system exceeds the Maximum Contaminant Level (MCL). The standard for TTHMs is 80 ug/L. The location reporting the highest TTHM level was 99 ug/L, thus, our water system exceeds the TTHM MCL.

What should I do?

- There is nothing you need to do unless you have a severely compromised immune system, have an infant, or are elderly. In that case, you may be at increased risk and should seek advice about drinking water from your health care provider.
- You do not need to boil your water or take other corrective actions. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What does this mean?

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

People who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

What is being done?

We are currently working on solutions to correct the problem. We anticipate resolving the problem in 2015.

For more information, please contact Mr. Brent Wright or Mike Glasgow at 810-787-6537 or the Water Plant at 4500 North Dort Highway, Flint, MI 48505.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the City of Flint.

CERTIFICATION: F1 S3

WSSN: 02310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules. Reminder to water supplier: This notice/certification must be sent to the DEC.

Flint Water Advisory

Date/Time:

Effective Wednesday, January 7, 2015

Details:

The City of Flint recently sent out the attached notice regarding violations to the drinking water standards. While the City of Flint states that corrective actions are not necessary, DTMB is in the process of providing a water cooler on each occupied floor, positioned near the water fountain, so you can choose which water to drink. The coolers will arrive today and will be provided as long as the public water does not meet treatment requirements.

Team,

We have the notices posted and the new water dispensers have been installed at all the drinking fountain locations at the Flint State Office Building in reaction to the City of Flint's notice of a violation in the drinking water standard for the water they supply to our Flint Facility. Please see photo attached. The potable water vendor couldn't deliver till Friday so we pick up the equipment and installed to avoid any extra disruption this issue may cause our tenants and visitors to the building. We worked the vendor for a new customer price so the first month rent on the dispensers was free and will only be \$7.00 per month after that with a price of \$4.00 per 5 gallon container of water. I have made contact with the City of Flint Water Department to gain more information on the corrective action plan and possibly the time line to correct the issue but they were unable to provide any more information at this time. Please let me know if more action is necessary and I will keep everyone posted if I hear any new information on this issue.

Thank you,
Brian

City of Flint Will Hold Public Water Presentation Wednesday, January 21, 2015 at 7:00pm in the City Hall Dome

Flint, Michigan – January 16, 2015 – The City of Flint will be hosting a water presentation on Wednesday, January 21, 2015 at 7pm. That presentation will be held in the City Hall Dome and will feature information detailing water treatment, water distribution and the steps being taken to ensure that citizens get water that meets all regulatory safety and quality standards. “We want the residents, businesses and visitors of Flint to know that the water in Flint is safe and that we are working every day to make improvements to our system to ensure that,” said City DPW Director Howard Croft. “Our goal is make sure we get people the information on our efforts and assure them that we are on the right track with them.”

DPW Director Croft and Utilities Administrator Daugherty Johnson will be joined on a panel by representatives from the Genesee County Drain Commissioner’s office, the Michigan Department of Environmental Quality and LAN engineering. Written questions from the audience will be collected during the presentation and answered by the panel after the presentation.

Addressing Flint's Water Concerns

Recent events have raised concerns among many as to the safety and quality of the water provided by the City's utility system. The City is and continues to be committed to assuring that residents and visitors know that the water is safe and that those responsible for providing water are working every day to improve the quality of the water. The quality of the water does need improvement, but that is not to be confused with safety of the water. The recent notice by MDEQ clearly stated that the water provided by the utility system is safe to drink, but cautioned that some vulnerable groups may want to consult with their health care provider if they have concerns. The City remains committed to their efforts to assure that the water is safe for everyone and that quality is both improved and improving.

To date, the City has taken the following actions:

- As an integral part of the transition to the Flint River on a temporary basis, the MDEQ was consulted about the City's plans, and ultimately issued necessary permits to proceed. The City also engaged the services of the LAN engineering firm to guide the city in installing the necessary equipment to treat the water on an ongoing basis. This resulted in the development of a comprehensive drinking water plan.
- The City monitors its water quality on a daily basis to assure that water quality remains within established guidelines. With the variances in water temperature and the leakage and infiltration problems arising as the result of failure of parts of the distribution system, water quality did exceed, for a time, some of the established guidelines. This resulted in the issuance of the recent notices to the public. Upon receipt of information that some guidelines were exceeded, the City's priority focus was to bring water quality back within guidelines. Efforts taken to address non-compliance included increasing water flow through valve replacements and hydrant flushing and optimizing treatment processes.
- The City has committed to increasing communication with the public in order to inform water users factually of the issues which have arisen, to alleviate unnecessary concern and to identify the steps being taken to address the issues. This is being implemented through detailed and easy to understand educational materials being made available both online and at City Hall, as well as through ongoing public informational meetings.
- Most recently, in light of recent concerns raised by resident groups over the quality and safety of water, Department of Public Works Director Howard Croft and his staff collected questions from citizens during a recent public meeting. After reviewing these questions, DPW Director Croft and his staff set out to answer them in concise detail; the result of that work is a full Water System Questions and Answers document is available online. Along with the detailed information within, the document also contains links to other source documents and regulatory statutes found online which were used as reference. **"We want the residents, businesses and visitors of Flint to know that the water in Flint is safe"**

and that we are working every day to make improvements to our system to ensure that,” said Croft. “Our goal is make sure we get people the information on our efforts and assure them that we are on the right track with them.” More documentation, including regular water quality monitoring reports, will be made available.

- Additionally, a number of public meetings have and will continue to take place. Two of the most recent of these took place at the Antioch Baptist Church and the Mott Community College Regional Technology Center. These meetings were held by concerned neighborhood groups and were attended by Mayor Walling and DPW Director Croft. At both meetings, citizens voiced their concerns and asked questions about water quality and the recent violation notice. Director Croft offered detailed answers to common questions, but also offered to investigate specific water issues raised by residents in which the City could offer assistance. Those in attendance came away with a better understanding of the issues surrounding the drinking water in their community.
- The City of Flint will be hosting a water presentation on **Wednesday, January 21, 2015 at 7pm. That presentation will be held in the City Hall Dome** and will feature information detailing water treatment, water distribution and the steps being taken to ensure that citizens get water that meets all regulatory safety and quality standards. City DPW Director Howard Croft and Daugherty Johnson, Utilities Administrator, will be joined on a panel by representatives from the Genesee County Drain Commissioner’s office, the Michigan Department of Environmental Quality and LAN engineering. Written questions from the audience will be collected during the presentation and answered by the panel after the presentation.
- The City of Flint has also determined that in light of the serious concerns raised, it will secure the services of an external firm with expertise in managing drinking water quality to assess the steps that the city has taken, to make recommendations as to other steps to be taken, to oversee their implementation, and to monitor operations until the City’s water source becomes the KWA. A Request for Proposal was issued on January 15, 2015, with proposals due back on January 26.

The DWSD Question:

As a result of the concerns raised, several community members have suggested that the City reconnect to the Detroit Water and Sewer Department (DWSD). DWSD has advised that they would be willing to allow such a reconnection without a hook-up fee. However, the City would be obligated to pay a fixed monthly charge of \$846,700 plus the \$14.92/Mcf cost of water itself and agree to a long term arrangement. The City’s analysis of the DWSD proposal concludes that the City’s cost would increase by more than \$12 million per year at the proposed rates, and could increase even more as proposed rates are subject to change after July 1, 2015. This increase in costs would not be in the best interests of the City or its water users, as the City is committed to assuring safety and improving water quality by following its current plan, and reconnecting to DWSD would likely require deferment of existing capital improvements or an additional increase in rates.

Denise,

The City of Flint put out a notice of an MCL violation for the drinking water that is used at the Flint State Office Building. Instead of taking the chance with any issues concerning the water to our public and staff it was decided to add water coolers throughout the building until the City can correct their water issue. Hope the information helps, let me know if more explanation is needed.

Thanks,
Brian

Team,

We have the notices posted and the new water dispensers have been installed at all the drinking fountain locations at the Flint State Office Building in reaction to the City of Flint's notice of a violation in the drinking water standard for the water they supply to our Flint Facility. Please see photo attached. The potable water vendor couldn't deliver till Friday so we pick up the equipment and installed to avoid any extra disruption this issue may cause our tenants and visitors to the building. We worked the vendor for a new customer price so the first month rent on the dispensers was free and will only be \$7.00 per month after that with a price of \$4.00 per 5 gallon container of water. I have made contact with the City of Flint Water Department to gain more information on the corrective action plan and possibly the time line to correct the issue but they were unable to provide any more information at this time. Please let me know if more action is necessary and I will keep everyone posted if I hear any new information on this issue.

Thank you,
Brian

Per our conversation:

The MCL (maximum contaminant level) for TTHMs is 80 and flint was 99ug/l thus the water level exceeds the TTHMS MCL.

There is nothing you need to do unless you have a severely compromised immune system, have an infant, or are elderly . In that case you maybe at an increased risk and should seek advice about drinking water from your health care provider.

Let me know if this will do

So are there signs too that say "Do not drink this water"? Or, are these the signs that are posted at the drinking fountains?

Subject: RE: Flint SOB Interiors

Hi Kim, I went and met with the manufacturer's representative and looked at the city water booster pump. In the process of doing so it was discovered that the main 3" cold water riser in the building is galvanized and is very corroded and full of scale. With the new plumbing modifications taking place much of this scale is coming loose and plugging the new sensor faucets and flush valves. Installing a new booster pump system will cause more scale to break loose and cause more of these problems. Fortunately only the main 3" cold water line is galvanized. The rest of the cold water piping in the building is copper and is ok. It is highly recommended that the 3" galvanized main be replaced from the meter up to the eighth floor. The opinion of probable cost for the new booster pump system including electrical is \$35,000. The opinion of probable cost for replacing the cold water main with insulation is \$50,000. Engineering fees would be \$5,500.

Thanks, Craig.

Good Morning,

Just a couple of questions...

I'm running budget numbers and I was wondering if you know the estimated costs for the following items:

Ice storage

Solar panels

Re-roofing

Also, I was talking to Mike Noonan and he asked if we could issue a Bulletin for Booster Pumps? I believe 2 of them.

I heard you selected the zinc color for exterior signs....sound good.

Thanks,

Team,

I made contact with the City of Flint to get an update on the potable water issue and found that on the re-test the water met the violated MCL from the test in January. Mr. Wright with the City Water Department told me they have made several changes to their operation and are planning to add charcoal filters to the system late this summer. The department still has to meet the MCL guidelines in their quarterly sample May 16th before reporting the water is all clear but it does look like they are making progress. I thought you guys might like the information to help keep up on the issue.

Thank you,
Brian

Team,

Today operations noticed that the carpet on the first floor between the public rest rooms was wet upon further investigation we opened up the closet and seen it was completely soaked and dripping water from the ceiling so operations went floor by floor until we located the cause of the water leak. The domestic hot water line was leaking on the fourth floor near the ball valve. Operations turned off the ball valve which seemed to stop the leak and called B&B immediately to show them the leak and where it appears to be coming from. Paul with B&B called Chad from Long Mechanical and they are routed at plumber to the building. I took multiple photos of each floor but only attached the highlights to show you the damages and flooding. Operations has found mold on each floor on the walls due to the water damage, the wall, studs, floor track, and pipe insulation is soaked from fourth floor all the way down, fire proofing on the ceiling is soaked from third floor down, the carpet is soaked on the first floor which will need to be dried out, re-glued, and should probably be replaced so we don't have any mold growth. If you have any questions or would like me photos let me know and I would be happy to get them over to you.

Thank You,

Adam,

It looked like Ed missed you in the original email he distributed. What do you guys think about pushing B&B into calling a water restoration group to dry out the floor, drywall and take care of the mold and carpet issue? I am afraid what that water soaked drywall and floor will do if just left to dry naturally.

Subject: Re: Flint Question

Larry-

I won't make it back today, still here in Flint, but here is a brief update:

- There did not appear to be any visible damage that a tenant would see as most of the issues are within the plumbing chase (other than the carpet outside of the chase which looks generally clean of visible damage)
- Jarvis has been drying up the wet materials - of which most is now dry and they are expecting to pull their equipment tomorrow
- I had ATC out here this morning and they completed air sampling of the 4 affected floors - they will let us know the results when they are back from the lab
- B&B's sub, Long Mechanical has put in a claim to their insurance company for any necessary repairs and will let us know what their plans are in the coming days

Once we get the determination from the insurance company we will review and verify that it covers all damaged attributed to the leak.

If you have any additional questions, please feel free to call me on my cell number below.

7 dead in Bronx from Legionnaires disease outbreak.

It looks like the culprits are cooling towers. Here's some basic facts about your cooling tower and legionella, the bacteria that causes legionnaires disease.

- Legionella is a common occurrence in every cooling tower.
- Ongoing and regular maintenance of the cooling tower is the most vital part of managing legionella outbreaks.
- Having a plan in place for mitigating legionella is no longer an option.

The bottom line is that a proper maintenance plan isn't a "nice to have", it's a "need to have". [Read more.](#)

ASHRAE releases new Legionella risk specification.

ASHRAE recently released a long awaited standard on Legionella, [ANSI/ASHRAE Standard 188-2015 "Legionellosis: Risk Management for Building Water Systems"](#). We encourage you to review the specification but highlights include;

- Develop a maintenance program, including schedule of inspection and maintenance of systems.
- Develop procedures for proper cleaning and disinfection of towers.
- Schedule basin cleaning and purging of stagnant waters.

Get the specification today and start saving yourself from future issues. [Learn more.](#)

Marlene,

For the water if your agency wants to have them and pay for them that is up to dhhs to decide. We had them for a short time with the water issue in flint but we will no longer continue to provide . We have several drinking fountains on each floor.

We have a recycle program that is for non confidential materials. If you need the lockable bins that is on your agency.

On our loading dock we have a recycle program for white paper, mixed paper, card board and metal and plastic .

Hope that helps

Good Afternoon-

Please find the attached air monitoring results for the plumbing shafts that were affected by the water leak on the 4th floor. In speaking with the Cardno ATC, each of the floors did have positive results for above normal readings – he did note that the floor of concern would be the 4th floor which is most likely caused by this being the source of the leak.

Please provide an update on the proposed remediation/repairs so that we can schedule and address this issue as soon as possible. We can have Cardno ATC complete the repairs if necessary.

Subject: 4th floor water leak
Importance: High

Paul-

Per our discussion, you are aware of the domestic hot water line that was leaking on the 4th floor in which you had your plumber repair. It appears that the leak may have been occurring for some time as there appears to be damage below this area on the lower floors. If you refer to the attached photos, the water flooded some of the areas outside of the plumbing chases and has all caused some level of damage to the adjacent gypsum board, pipe insulation, fire-proofing, ceiling tiles, carpet, etc. on all floors. The initial point of concern, other than the damaged materials, is that there also appears to be mold growth taking place. If the materials are not dried out quickly by use of fans or other methods it could continue to worsen and required full replacement of the damaged materials.

Please review the attached photos and the overall onsite conditions of the areas on each floor and provide us with B&B's intended direction to resolve and remediate the issue. We would appreciate and require an immediate response to insure the safety of the occupants.

Thanks

**Bioaerosol in Ambient Air Microbial Evaluation
Flint Office Building
125 Union Street
Flint, Michigan**

Cardno ATC Project No: 188BS15361
Report Date: August 5, 2015

Prepared by:

Cardno ATC
46555 Humboldt, Suite 100
Novi, Michigan 48377

INTRODUCTION

The State of Michigan (Client) authorized Cardno ATC to perform air sampling for non-culturable mold spores in the Flint Office Building, located at 125 Union Street in Flint, Michigan. Based on information provided by the Client a water leak was identified and repaired in a pipe chase on the fourth floor during renovation activities. Water from a breached pipe in the pipe chase on the 4th floor traveled down the pipe chase to the 1st floor.

ASSESSMENT METHODS

On July 30, 2015, Cardno ATC conducted air sampling for non-culturable mold spores. The following methods were utilized.

Bioaerosol in Ambient Air – Total Countable Fungal Bioaerosols: Samples of ambient indoor and outdoor air were collected for laboratory analyses of bioaerosols (airborne particles that are living organisms or fragments that have originated from living organisms) in ambient air. Samples were collected by drawing air across an adhesive material within a “spore trap” cassette. Allergenco D cassettes were utilized. Ambient air was drawn over the spore trap using a high volume pump, calibrated to draw 15 liters of air per minute, for 10 minutes. Each spore trap was resealed and given a unique sample number. The sample number was entered onto the Chain of Custody at the conclusion of each sampling event.

Samples were submitted to IMS Analytical Laboratory for analysis of predominant mold species and estimated concentrations. IMS is accredited under the American Industrial Hygiene Association Environmental Microbiology Laboratory Accreditation Program (AIHA EMLAP) and participates in the AIHA Environmental Microbiology Proficiency Analytical Testing (EMPAT) quality control program.

BIOAEROSOL SAMPLING DATA FINDINGS

On July 30, 2015, Mr. Ryan Rae, Industrial Hygienist at Cardno ATC conducted bioaerosol sampling for non-culturable mold spores: in the 4th, 3rd, 1st floor pipe chase areas; 1st floor vending area and at the front entrance of the building exterior (for comparison to the natural environment).

Table 1: NON CULTURABLE MOLD AIR SAMPLE ANALYSIS (provided on the following page), summarizes the predominant fungal taxa reported for the non-culturable (spore-trap) sampling performed on July 30, 2015. The formal laboratory report prepared by IMS Analytical Laboratory is presented in Attachment A.

INTERPRETATION OF DATA

Bioaerosol Sample Data

The laboratory calculates estimated concentrations of fungal bioaerosols based on the number of identifiable spores observed in the sample trace and the volume of air drawn through the spore trap cassette.

The American Conference of Governmental Industrial Hygienists (ACGIH) considers comparison of indoor/outdoor (exterior) bioaerosol data a common method for evaluating indoor fungal reservoirs or concerns. In normal indoor environments, the total concentrations of fungi in the indoor air are commonly equal to, or less than, the total concentration outdoors (exterior). If indoor fungal bioaerosol concentrations are greater than those outdoors (exterior), then indoor fungal reservoirs are likely to be present. In addition, the types (i.e., taxa or groups) of fungal bioaerosols found inside a building should be qualitatively similar to the taxa recovered outdoors (exterior); presuming outdoor (exterior) air is the only source of indoor fungal bioaerosols. There are no regulatory standards or other widely accepted numerical guidelines available for interpretation of bioaerosol data. Current ACGIH guidelines (Macher, 1999) refrain from providing numerical thresholds for bioaerosols. A study by Horner, et al (2004) suggests that most indoor environments, with no history of water damage, exhibit the presence of species of *Cladosporium* and the *Penicillium/Aspergillus* group of molds, but that the presence of more than a very few spores of species of *Stachybotrys*, *Chaetomium*, and *Ulocladium* in an indoor sample indicates reservoirs of molds related to severe or prolonged water damage.

CONCLUSIONS

Results of the non-culturable (spore-trap) sampling indicated that total fungal taxa concentrations reported were lower in the interior of the building than the exterior of the building. However, the *Penicillium/Aspergillus* group concentrations were greater in the 4th, 3rd and 1st floor pipe chase areas and the 1st floor vending area, than the exterior sample, suggesting that fungal reservoirs may be present. Additionally, *Chaetomium* was identified in the 4th floor pipe chase sample and was not identified in any of the other samples, including the exterior sample. The presence of *Chaetomium* further suggest fungal reservoirs may be present, since this species is associated with prolonged and/or severe water damage, which would be consistent with the Client's indication that the water leak's origin was in the 4th floor pipe chase.

LIMITATIONS

This report has been prepared to assist State of Michigan in evaluating microbiological impact from the water leak in 4th floor pipe chase areas at the Flint Office Building located 125 Union Street in Flint, Michigan. Cardno ATC provided these services consistent with the level and skill ordinarily exercised by members of the profession currently practicing under similar conditions. This statement is in lieu of other statements either expressed or implied. This report is intended for the sole use of the State of Michigan. The intent of the report is to aid the building owner, architect, construction manager, general contractors, and potential demolition and abatement contractors in assessing microbiological impact. This report is not intended to serve as a bidding document nor as a project specification document and actual site should conditions and quantities be field-verified. The scope of services performed in execution of this evaluation may not be appropriate to satisfy the needs of other users, and use or re-use of this document, the findings, conclusions, or recommendations is at the risk of said user.

Other possible building material hazards such as asbestos and lead-based paint were not included as part of this evaluation and may require proper sampling for identification prior to disturbance. Other unidentified source of microbiological impact may be located within walls, ceiling cavities, below flooring or grade, and other non-accessible areas. Caution should be used during any remediation activities.

Additionally, the passage of time may result in a change in the environmental characteristics at this property. This report does not warrant against future operations or conditions that could affect the recommendations made. The results, findings, conclusions, and recommendations expressed in this report are based only on conditions that were observed during Cardno ATC's inspection of the site.

Thank you for this opportunity to be of service to State of Michigan. If you have any questions, please feel free to contact the undersigned at (248) 669-5140.

Sincerely,
Cardno ATC INC.

Ryan Rae
Industrial Hygienist

Martin Gamble
Senior Project Manager

1 - IMS Laboratory, LLC

IMS Laboratory, LLC operates a state-of-the-art environmental laboratory, specializing in full service microbial, asbestos and radon analyses. We maintain the highest levels of quality and personalized service in the industry. Our analytical staff includes only Certified Indoor Air Quality Professionals, Ph.D. Microbiologists, Mycologists, Microbiologists, and Biochemists. Our team's extensive experience in indoor air quality sampling techniques, microbial identification, and analytical interpretation allows us to offer our clients expert personalized service and has made IMS Laboratory an industry leader.

IMS Laboratory is accredited through the American Industrial Hygiene Association (AIHA) for both viable and nonviable fungal identification and through the National Voluntary Laboratory Accreditation Program (NVLAP) for bulk asbestos. To maintain quality control and quality assurance, we use standardized procedures approved under strict AIHA and NVLAP guidelines. Client data information is compiled and stored in a specially designed computer management system for secure, redundant data and the ability to comply with AIHA and NVLAP quality system requirements. A portion of this quality system includes inter-analyst comparisons and statistical quality control using blind duplicate analyses and process blanks. Laboratory data is provided in compliance with AIHA and NVLAP policy modules and ISO 17025 guidelines.

This data is intended for use by professionals having the necessary knowledge of the testing methods to interpret them accurately.

4 - Understanding Laboratory Results

Laboratory findings must only be considered as part of an overall mold investigation. The interpretation of the findings must only be made by a qualified individual after reviewing all relevant data. Visual information and environmental conditions measured during the site assessment are crucial to any final interpretation of the results. A very good reference book which covers sampling and data interpretation has been published by The American Conference of Governmental and Industrial Hygienists and is entitled *Bioaerosols: Assessment and Control*, 1999.

Numerical guidelines cannot be used as the primary determinant as to whether a mold problem may exist. Concentrations of mold in the air will vary depending on weather conditions, building air flow, time of day and time of year. Comparisons between indoor and outdoor mold levels, types of mold found, visual information and environmental conditions are more important in interpreting results than reliance on specific numeric thresholds.

In *Indoor Air Quality in Office Buildings: A Technical Guide*, Health Canada, Revised 1995 (Pages 49-50), Health Canada set forth guidelines which can be used to better understand air testing results. The guidelines included these general principles. Significant numbers of certain pathogenic fungi should not be present in indoor air (e.g. *Aspergillus fumigatus*, *Histoplasma*, and *Cryptococcus*). Bird or bat droppings in air intakes, ducts or rooms should be assumed to contain these pathogens. The persistent presence of significant numbers of toxigenic fungi (e.g. *Stachybotrys atra*, toxigenic *Aspergillus*, *Penicillium* and *Fusarium* species) indicate that further investigation and action should be taken. The confirmed presence of one or more fungal species occurring as a significant percentage of a sample in indoor air samples and not similarly present in concurrent outdoor samples is evidence of a fungal amplifier. The "normal" air mycoflora is qualitatively similar and quantitatively lower than that of outdoor air. The significant presence of fungi in humidifiers and diffuser ducts and on moldy ceiling tiles and other surfaces requires investigation and remedial action regardless of the airborne mold concentrations.

Generally, mold spores are present everywhere. As a general rule, "normal" air mycoflora is qualitatively similar and quantitatively lower than that of outdoor air. When the converse is true, it is likely that an indoor source of mold may exist. However, even this most basic rule may produce misleading results. Airborne mold spore levels vary widely due to factors such as weather conditions and activity levels. For example, in a "normal" home, indoor mold spore levels may be elevated above outdoor spore levels after vacuuming (when airborne indoor levels could be unusually high) or after a heavy snow (when outdoor levels could be unusually low).

Report Prepared For: CARDNO ATC Inc
Project Name: Som - Flint - 125 Union Street
Report Date: 07/31/2015
Lab Number: E77150

Surface Sampling primarily identifies the types and relative proportions of mold on a surface. Viable surface sampling will identify living mold, while nonviable surface sampling will identify all mold (but cannot distinguish between living or dead mold). Surface sampling may confirm that a substance is mold or identify the types of mold present on the surface. Because mold is everywhere, there is a high probability that a surface sample from a "clean" surface will still identify mold on that surface.

There are currently no state or federal standards or guidelines regarding results of fungal samples. There are no levels, which are typical or permissible. There are no recommended exposure limits, no permissible exposure limits, no threshold limit values and no short term exposure limits.

These guidelines are not intended, nor should they be used, for health evaluation purposes or to evaluate the safety of an occupied space. A physician should be consulted regarding health and/or safety questions.

5 - Sample Identification Definitions

Alternaria

A genus of fungi that is extremely widespread and ubiquitous. It is commonly found in outdoor samples and may be isolated from samples of soil, seeds, and plants. Alternaria is also often found in carpets, textiles, window frames, and on horizontal surfaces in building interiors. It is both a plant pathogen and human pathogen. Alternaria produces large spores, suggesting that the spores from this fungus are deposited in the nose, mouth, and upper respiratory tract. It may be related to baker's asthma. Alternaria has been associated with hypersensitivity pneumonitis, sinusitis, deratomycesis, onychomycosis, subcutaneous phaeohyphomycosis, and invasive infection. It is a common cause of extrinsic asthma (immediate-type hypersensitivity: type I).

Found in these Sample Locations: (5) IWA - 1st Flr Chase (7) Exterior - Front Entrance

Ascospores

A large group of spores that are very ubiquitous in nature. They are frequently found in the air after a rain. Most ascospores are plant pathogens; a small portion have been known to cause infection in humans but are identified separately.

Found in these Sample Locations: (3) IWA - 3rd Flr Chase (4) IWA - 2nd Flr Chase (5) IWA - 1st Flr Chase (6) OWA - 1st Floor Vending (7) Exterior - Front Entrance

Basidiospores

A large group of spores that are very ubiquitous in nature. They are released from mushrooms, shelf fungi, puffballs, and a variety of other macro fungi. Basidiospores may be allergenic to those with seasonal allergies.

Found in these Sample Locations: (2) IWA - 4th Flr Chase (3) IWA - 3rd Flr Chase (4) IWA - 2nd Flr Chase (5) IWA - 1st Flr Chase (6) OWA - 1st Floor Vending (7) Exterior - Front Entrance

Cercospora group

A group of closely-related fungi that includes the genera Cercospora and Pseudocercospora. They are pathogenic to a variety of plants, particularly grapes and celery. Fungi in the Cercospora group are not known human pathogens.

Found in these Sample Locations: (7) Exterior - Front Entrance

Report Prepared For: CARDNO ATC Inc
Project Name: Som - Flint - 125 Union Street
Report Date: 07/31/2015
Lab Number: E77150

Chaetomium

A type of ascospore commonly isolated from soil. It is found on a variety of substrates including decomposing plant material and wood, dung, straw, and damp or water-damaged cellulose (e.g. paper on drywall). As a moisture-indicator fungi, Chaetomium only grows when the substrate has a current or previous severe moisture problem. There are over 100 documented species of Chaetomium, several of which are reported to be toxigenic; if not speciated, the genus Chaetomium should be assumed to be toxigenic. It has been known to cause systemic, cerebral, cutaneous, subcutaneous, and pulmonary infections, though usually only in the immunocompromised.

Found in these Sample Locations: (2) IWA - 4th Flr Chase

Cladosporium

One of the most commonly identified outdoor fungi. It is often found indoors in numbers less than outdoors. Cladosporium is also found on decaying plants and food, straw, paint, and textiles. It is generally regarded to be allergenic and can be a cause of extrinsic asthma (immediate type hypersensitivity: Type I). Cladosporium has been reported in cases of skin lesions, keratitis, onychomycosis, sinusitis, and pulmonary infections.

Found in these Sample Locations: (2) IWA - 4th Flr Chase (4) IWA - 2nd Flr Chase (5) IWA - 1st Flr Chase (6) OWA - 1st Floor Vending (7) Exterior - Front Entrance

Epicoccum nigrum

Epicoccum nigrum (also known as Epicoccum purpurascens) is the only species in the genus Epicoccum. It is very commonly isolated from plants, air, animals, foodstuffs, and textiles. Epicoccum nigrum is a known plant pathogen, but is not pathogenic to humans.

Found in these Sample Locations: (5) IWA - 1st Flr Chase (7) Exterior - Front Entrance

Ganoderma

A type of basidiospore from a genus of mushrooms known as shelf mushrooms or bracket fungi, which grow on wood. These spores may be allergenic to those with seasonal allergies.

Found in these Sample Locations: (6) OWA - 1st Floor Vending (7) Exterior - Front Entrance

Mitospores

A large group of morphologically-similar fungi which includes Alternaria, Stemphylium, Pithomyces, and Ulocladium. If hyphal fragments are not attached to the spores, the specific type of mitospore cannot be differentiated and is classified under this grouping. Because mitospores are large spores, they are more easily deposited in the nose, mouth, and upper respiratory tract,

Report Prepared For: CARDNO ATC Inc
Project Name: Som - Flint - 125 Union Street
Report Date: 07/31/2015
Lab Number: E77150

allowing them to be potentially very allergenic. Alternaria, Stemphylium, Pithomyces, and Ulocladium are all commonly found on plants, textiles, paper, and in soil. In building interiors, they are commonly isolated from horizontal surfaces (e.g. window sills, attic rafters). Alternaria is both a plant pathogen and human pathogen and is associated with asthma, hypersensitivity pneumonitis, sinusitis, dermatomycosis, onychomycosis, subcutaneous phaeohyphomycosis, and invasive infection. Stemphylium is not a known human pathogen. Pithomyces is not a known human pathogen, but has been known to cause facial eczema on ruminants (e.g. cattle, goats, sheep). Ulocladium is generally not pathogenic, but has been known to cause cutaneous infections in the immunocompromised.

Found in these Sample Locations: (2) IWA - 4th Flr Chase (7) Exterior - Front Entrance

No Trace or Fungal Spores Observed

No visible trace or spores were observed in the sampling area.

Found in these Sample Locations: (1) Blank

Pen/Asp group

The spores of the genera Penicillium, Aspergillus, Gliocladium, and Trichoderma are quite similar when viewed under a microscope and are grouped together under the heading Pen/Asp. Penicillium species are among the most common fungi found in indoor environments, particularly basements. Certain species may cause infections of the eye, external ear, respiratory system, and urinary tract. Some species of Aspergillus are parasitic on insects, plants, and animals including humans. All Aspergillus species are allergenic. Various species can cause extrinsic asthma, pulmonary emphysema, opportunistic infections of the ears and eyes, and severe pulmonary infections. Many species of Penicillium and Aspergillus produce mycotoxins which may be associated with diseases in humans and animals. Several toxins are considered potential human carcinogens. The genus Gliocladium has not been reported to cause disease in man or animals. The genus Trichoderma has been reported to cause infections in immunocompromised individuals, patients undergoing dialysis, and individuals with chronic kidney failure or chronic lung disease.

Found in these Sample Locations: (2) IWA - 4th Flr Chase (3) IWA - 3rd Flr Chase (4) IWA - 2nd Flr Chase (5) IWA - 1st Flr Chase (6) OWA - 1st Floor Vending (7) Exterior - Front Entrance

Pollen

Pollen are coarse to fine particles/grains produced by various trees, weeds, and grasses. For individuals with seasonal allergies, pollen is often the causative agent.

Found in these Sample Locations: (7) Exterior - Front Entrance

Report Prepared For: CARDNO ATC Inc
Project Name: Som - Flint - 125 Union Street
Report Date: 07/31/2015
Lab Number: E77150

Rust

A plant pathogen that is commonly found on leaves, stems, fruits, and seeds of various plants.

Not a known human pathogen.

Found in these Sample Locations: (7) Exterior - Front Entrance

Smuts/Periconia/Myxomycetes

A group of plant pathogens with similar morphology. They are commonly found in the outdoor environment in soil and on wood, grasses, cereal crops, and flowering plants. Myxomycete spores are considered to cause Type 1 allergies (hay fever and asthma).

Found in these Sample Locations: (5) IWA - 1st Flr Chase (6) OWA - 1st Floor Vending (7) Exterior - Front Entrance

Stachybotrys

A fungus naturally found on decaying plant and tree material. In the indoor environment, it grows on building material with a high cellulose and water content and a low nitrogen content (e.g. wet drywall). There are over 20 documented species of Stachybotrys, and at least two are reported to be toxigenic; if not speciated, the genus Stachybotrys should be assumed to be toxigenic. Specifically, it can produce the mycotoxin trichothecene (Satratoxin H), which is poisonous upon inhalation. Individuals with chronic exposure to the toxin produced by this fungus reported cold and flu symptoms, sore throats, diarrhea, headaches, fatigue, dermatitis, intermittent local hair loss, and general malaise. The toxin may suppress the immune system, affecting the lymphoid tissue and the bone marrow. It is also reported to be a liver and kidney carcinogen. Effects by absorption of the toxin in the human lung are known as pneumomycosis. Areas with relative humidity above 55% are subject to temperature fluctuations and are ideal for toxin production. Stachybotrys is rarely found in outdoor samples. It is usually difficult to find in indoor air samples unless it is physically disturbed.

Found in these Sample Locations: (7) Exterior - Front Entrance

Torula

No reports of human infection. Can cause Type I allergic reactions.

Found in these Sample Locations: (7) Exterior - Front Entrance

6 - Glossary of Terms

Agar ~

A gelatinous medium used for growing microorganisms (e.g. mold, yeast, and bacteria).

Colony ~

A group of hyphae (filaments) of the same type of microorganism growing together. A colony can be seen with the naked eye.

Colony Forming Unit (CFU) ~

A unit of measure describing the number of colonies present in or on a surface of a sample.

Exposure ~

The exposure refers to the quantity of a sample collected for laboratory analysis. With reference to air tests, the exposure is determined by multiplying the flow rate of the collection device by the length of time the device was operating.

Fungus (fungi, pl) ~

Fungi are a form of life (eukaryotic) which can range from unicellular to filamentous. Fungi lack chlorophyll and absorb nutrients. Fungi can reproduce by sexual, asexual, or both means. Mold is a type of fungi.

Hypha (hyphae, pl) / hyphal fragment ~

Hypha is the tubular filament which is the vegetative, nutrient absorbing portion of the fungus.

Mold ~

A very large group of microscopic fungi. Most are filamentous organisms and produce spores that can be air-, water-, or insect-borne. Mold can be a common trigger for allergies. For people who are sensitive to mold, exposure can cause symptoms such as nasal stuffiness, eye irritation, or wheezing. People with serious allergies to mold may have more severe reactions. Severe reactions may occur among workers exposed to large amounts of molds in occupational settings. People with chronic illnesses, such as obstructive lung disease, may develop mold infections in their lungs. Mold growth in the home can be slowed by keeping humidity levels below 50% and ventilating showers and cooking areas.

Mycotoxin ~

A substance produced by fungi which can be toxic to man and/or animals.

Report Prepared For: CARDNO ATC Inc
Project Name: Som - Flint - 125 Union Street
Report Date: 07/31/2015
Lab Number: E77150

Opaque particle ~

Opaque particles are dark, non-biological, debris through which light will not pass.

Petri Dish ~

A dish containing agar for the culturing of microorganisms (e.g. fungi or bacteria).

Raw Count ~

The number of particles counted by an analyst during the examination of specimen.

Reporting Limit (RL) ~

The reporting limit (RL) is the limit of detection for an analyte that can be reliably reported by using a given analytical method. The RL is dependent on the time and volume of sampling.

Sample Medium ~

The sample medium refers to the type of test conducted (e.g. swab, spore trap air test, tape lift, etc.).

Serial Number ~

A manufacturer's specific identification code on a test medium (e.g. spore trap or tape lift).

Spore ~

A propagule/structure produced by fungi as a means of reproduction, survival, and dissemination. Spores can be single cellular or multicellular.

Spore Trap ~

A Spore trap is a collection device (or media) used to capture airborne spores and other airborne particulates. Spore traps are analyzed by microscopic means and do not distinguish between viable and non-viable cells.

Too Numerous To Count (TNTC) ~

TNTC is used to denote specimens in which a type of organism is present at an extremely high level or has grown together so that individual colonies cannot be distinguished.

Toxigenic fungi ~

Toxigenic fungi are fungi capable of producing toxic substances.

8 - Warranties, Legal Disclaimers, and Limitations

IMS's scope of accreditation through the AIHA is for the following FoT(s)/Method(s): Fungal Air - Culturable (SOP 2.4 Cultured Air Sample Reporting); Fungal Bulk - Culturable (SOP 2.5); Fungal Surface - Culturable (SOP 2.5); Fungal Air - Direct Examination (SOP 2.2 and 2.3); Fungal Bulk - Direct Examination (SOP 2.6); and Fungal Surface - Direct Examination (SOP 2.1).

The study and understanding of molds is a progressing science. Because different methods of sampling, collection and analysis exist within the indoor air quality industry, different inspectors or analysts may not always agree on the mold concentrations present in a given environment. Additionally, the airborne levels of mold change frequently and by large amounts due to many factors including activity levels, weather, air exchange rates (indoors), and disturbance of growth sites. It is possible for report interpretations and ranges of accuracy to vary since comprehensive, generally accepted industry standards do not currently exist for indoor air quality inspections of mold in residential indoor environments. This report is intended to provide an analysis based upon samples taken at the site at the time of the inspection. Mold levels can and do change rapidly, especially if home building materials or contents remain wet for more than 24 hours, or if they are wet frequently. This report is not intended to provide medical or healthcare advice. All allergy or medical-related questions and concerns, including health concerns relating to possible mold exposure, should be directed to a qualified physician. If this report indicates indoor mold levels that are higher than in typical indoor living spaces relative to the outdoor environment, or indicates any findings that are of concern to you, further evaluation by a trained mold professional or a Certified Industrial Hygienist (CIH) may be advisable.

Results pertain only to the items tested. Unless otherwise noted in the body of this report, the condition of samples upon receipt was acceptable. Blank samples are reported in the same manner as all other samples. The results are not corrected for contamination.

This report is generated by IMS at the request of, and for the exclusive use of, the IMS client named on this report. The analysis of the test samples is performed by IMS. This report applies only to the samples taken at the time, place and location referenced in the report and received by IMS, and to the property and weather conditions existing at that time only. Please be aware, however, that property conditions, inspection findings and laboratory results can and do change over time relative to the original sampling due to changing conditions, the normal fluctuation of airborne mold, and many other factors. IMS does not furnish, and has no responsibility for, the inspector or inspection service that performs the inspection or collects the test samples. It is the responsibility of the end-user of this report to select a properly trained professional to conduct the inspection and collect appropriate samples for analysis and interpretation. Neither IMS, nor its

Report Prepared For: CARDNO ATC Inc

affiliates, subsidiaries, suppliers, employees, agents, contractors and attorneys ("IMS related party") are able to make and do not make any determinations as to the safety or health condition of a property in this report. The client and client's customer are solely responsible for the use of, and any determinations made from, this report, and no IMS related party shall have any liability with respect to decisions or recommendations made or actions taken by either the client or the client's customer based on the report.

Samples analyzed by IMS are disposed the day that they are analyzed. Storage may be available for a fee with written request at the time the samples are submitted for analysis.

IMS hereby expressly disclaims any and all representations and warranties of any kind or nature, whether express, implied or statutory, related to the testing services or this report including, but not limited to, damages for loss of profit or goodwill regardless of the negligence (either sole or concurrent) of IMS and whether IMS has been informed of the possibility of such damages, arising out of or in connection with IMS's services or the delivery, use, reliance upon or interpretation of test results by client or any third party. In no event will IMS be liable for any special, indirect, incidental, punitive, or consequential damages of any kind regardless of the form of action whether in contract, tort (including negligence), strict product liability or otherwise, arising from or related to the testing services or this report.

IMS accepts no legal responsibility for the purposes for which the client uses the test results. IMS will not be held responsible for the improper selection of sampling devices even if we supply the device to the user. The user of the sampling device has the sole responsibility to select the proper sampler and sampling conditions to insure that a valid sample is taken for analysis. Additionally, neither this report nor IMS makes any express or implied warranty or guarantee regarding the inspection or sampling done by the inspector, the qualifications, training or sampling methodology used by the inspector performing the sampling and inspection reported herein, or the accuracy of any information provided to IMS serving as a basis for this report. The total liability of IMS related to or arising from this report to a client or any third party, whether under contract law, tort law, warranty or otherwise, shall be limited to direct damages not to exceed the fees actually received by IMS from the client for the report. The invalidity or unenforceability, in whole or in part, of any provision, term or condition herein shall not invalidate or otherwise affect the enforceability of the remainder of these provisions, terms and conditions. Client shall indemnify IMS and its officers, directors and employees and hold each of them harmless for any liability, expense or cost, including reasonable attorney's fees, incurred by reason of any third party claim in connection with IMS's services, the test result data or its use by client.

David,
DTMB is no longer providing water coolers at the State Office Building, yet we still provide them at McCree and Clio Road.
What are your expectations moving forward?
Are we going to continue with the water coolers? If so, it seems like it should be all our buildings including the SOB where Child Welfare/Adult Services currently sits.

Sandi

Marlene,

For the water if your agency wants to have them and pay for them that is up to dhhs to decide. We had them for a short time with the water issue in flint but we will no longer continue to provide . We have several drinking fountains on each floor.

We have a recycle program that is for non confidential materials. If you need the lockable bins that is on your agency.

On our loading dock we have a recycle program for white paper, mixed paper, card board and metal and plastic .

Hope that helps

Attachments: City of Flint Annual Water Report.pdf

Mike,

We are still providing Culligan bottled water in the first floor lobby area. We have been slowly pulling the bottled water dispensers off the other floors as new floors get turned over for occupancy. The City of Flint issued their Consumers Annual Water Report, which shows they were in the reporting limits for trihalomethanes matched with the resamples the City conducted show they are within the reporting guidelines. The supplied city water doesn't have any reporting violations at this time. We will have to work with Keith, Larry and yourself to see if we want to abandon the bottled water all together or use in limited areas only.

Thanks,
Brian

2014 Consumers Annual Report on Water Quality

The City of Flint Department of Utilities is dedicated to providing high quality drinking water to the residents of the community. The Consumers Annual Report on Water Quality provides important information about your drinking water. This report includes information about the source of the water, health information, a chart summarizing United States Environmental Protection Agency (USEPA) required testing results, and a table giving explanations of important terms to understand when viewing the test results. The Flint Water Plant & Facilities operates and maintains a certified drinking water laboratory to assure compliance with all state and federal regulations and is committed to prompt and thorough notification to the consumers if there is any reason for concern about the quality of the drinking water.

Information about your drinking water is available at the City of Flint web page on the Internet at www.cityofflint.com or by calling the Flint Water Plant & Facilities at (810) 787-6537. The Safe Drinking Water Hotline at (800) 426-4791 is a resource for health related questions and water quality issues. General drinking water information can be found on the USEPA web site at www.epa.gov/safewater/.

2014 Key to the Detected Contaminant Tables

Symbol	Abbreviation for	Definition/Explanation
>	Greater than	
AL	Action Level	The concentration of a contaminant, which, if exceeded, triggers treatment or other requirements which a water system must follow.
HAA5	Haloacetic Acids	HAA5 is the total of bromoacetic, chloroacetic, dibromoacetic, dichloroacetic, and trichloroacetic acids. Compliance is based on the total.
LRAA	Locational Running Annual Average	
MCL	Maximum Contaminant Level	The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
MCLG	Maximum Contaminant Level Goal	The level of contaminant in drinking water below which there is no known or expected risk to health.
mg/L	Milligrams per Liter	A milligram = 1/1000 gram 1 milligram per liter is equal to 1ppm
MRDL	Maximum Residual Disinfectant Level	The highest level of disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
MRDLG	Maximum Residual Disinfectant Level Goal	The level of a drinking water disinfectant below which there is no known or expected risk to health. MRLDG's do not reflect the benefits of the use of disinfectants to control microbial contaminants.
n/a	Not Applicable	
ND	Not Detected	
NTU	Nephelometric Turbidity Units	Measures the cloudiness of water.
pCi/L	Picocuries per Liter	A measure of radioactivity. Picocurie (pCi) means the quantity of radioactive material producing 2.22 nuclear transformations per minute.
ppb	Parts Per Billion (one in one billion)	The ppb is equivalent to micrograms per liter. A microgram = 1/1000 milligram.
ppm	Parts Per Million (one in one million)	The ppm is equivalent to milligrams per liter. A milligram = 1/1000 gram.
RAA	Running Annual Average	
TT	Treatment Technique	A required process intended to reduce the level of a contaminant in drinking water.
TTHM	Total Trihalomethanes	Total Trihalomethanes is the sum of chloroform, bromodichloromethane, dibromochloromethane and bromoform. Compliance is based on total.

Water Source

From January 1st through April 30th 2014, The City of Flint purchased drinking water from the Detroit Water & Sewerage Department (DWSD) which operates several drinking water facilities. Following treatment to remove impurities, the water is pumped by DWSD to the Flint Water Plant, where the water is then monitored and distributed throughout the City.

The source water comes from the lower Lake Huron watershed. The watershed includes numerous short, seasonal streams that drain to Lake Huron. The Michigan Department of Environmental Quality in partnership with the U.S. Geological Survey, the Detroit Water & Sewerage Department, and the Michigan Public Health Institute performed a source water assessment in 2004 to determine the susceptibility of potential contamination. The susceptibility rating is a seven-tiered scale ranging from "very low" to "very high" based primarily on geologic sensitivity, water chemistry, and contaminant sources. The Lake Huron source water intake is categorized as having a moderately low susceptibility to potential contaminant sources. The Lake Huron water treatment plant has historically provided satisfactory treatment of this source water to meet drinking water standards. If you would like to know more information or a complete copy of the report, contact the City of Flint Water Plant at (810) 787-6537.

General Information

In order to ensure that tap water is safe to drink, the EPA prescribes regulations, which limit the amount of certain contaminants in water provided by the public water systems. The Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water, which must provide the same protection for public health. Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline (800-426-4791).

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water include:

- ◆ **Microbial contaminants;** such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- ◆ **Inorganic contaminants;** such as salts and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- ◆ **Pesticides and herbicides;** which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.
- ◆ **Organic chemical contaminants;** including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.
- ◆ **Radioactive contaminants;** which can be naturally occurring or be the result of oil and gas production and mining activities.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Drinking Water Hotline (1-800-426-4791).

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Infants and young children are typically more vulnerable to lead in drinking water than the general population. It is possible that the lead levels at your home may be higher than at other homes in the community as a result of materials used in your home's plumbing. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The City of Flint Department of Utilities is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. If you are concerned about elevated lead levels in your home's water, you can minimize your potential exposure to lead in your water by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

**Lake Huron Water Treatment Plant
2014 Regulated Detected Contaminants Tables**

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Allowed Level MCL	Highest Level Detected	Range of Detection	Violation yes/no	Major Sources in Drinking Water
-----------------------	-----------	------	------------------	-------------------	------------------------	--------------------	------------------	---------------------------------

Inorganic Chemicals – Monitoring at the Plant Finished Water Tap

Fluoride	5/13/14	ppm	4	4	0.59	n/a	No	Erosion of natural deposits; Water additive, which promotes strong teeth; Discharge from fertilizer and aluminum factories.
Nitrate	5/13/14	ppm	10	10	0.31	n/a	No	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits.

Disinfection By-Products – Monitoring in Distribution System Stage 2 Disinfection By-Products

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Allowed Level MCL	Highest LRAA	Range of Detection	Violation yes/no	Major Sources in Drinking Water
Total Trihalomethanes (TTHM)	2014	ppb	n/a	80	33.0	10.0 - 48.5	No	By-product of drinking water chlorination
Haloacetic Acids (HAA5)	2014	ppb	n/a	60	15.8	8.0 - 19.0	No	By-product of drinking water disinfection

Disinfectant Residuals Monitoring in DWSD Distribution System

Regulated Contaminant	Test Date	Unit	Health Goal MRDGL	Allowed Level MRDL	Highest RAA	Range of Detection	Violation yes/no	Major Sources in Drinking Water
Total Chlorine Residual	Jan-Dec 2014	ppm	4	4	0.82	0.64-0.94	No	Water additive used to control microbes

Regulated Contaminant	Treatment Technique							Typical Source of Contaminant
Total Organic Carbon (ppm)	The Total Organic Carbon (TOC) removal ratio is calculated as the ratio between the actual TOC removal and the TOC removal requirements. The TOC was measured each month and because the level was low, there is no requirement for TOC removal.							Erosion of natural deposits

2014 Turbidity – Monitored every 4 hours at Plant Finished Water Tap

Highest Single Measurement Cannot exceed 1 NTU	Lowest Monthly % of Samples Meeting Turbidity Limit of 0.3 NTU (minimum 95%)	Violation yes/no	Major Sources in Drinking Water
0.19 NTU	100%	No	Soil Runoff
Turbidity is a measure of the cloudiness of water. We monitor it because it is a good indicator of the effectiveness of our filtration system.			

2014 Microbiological Contaminants – Monthly Monitoring in Distribution System

Regulated Contaminant	MCLG	MCL	Highest Number Detected	Violation yes/no	Major Sources in Drinking Water
Total Coliform Bacteria	0	Presence of Coliform bacteria > 5% of monthly samples	0	No	Naturally present in the environment.
E.coli Bacteria	0	A routine sample and a repeat sample are total coliform positive, and one is also fecal or E. coli positive.	0	No	Human waste and animal fecal waste.

2011 Lead and Copper Monitoring at Customers' Tap

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Action Level AL	90 th Percentile Value*	Number of Samples Over AL	Violation yes/no	Major Sources in Drinking Water
Lead	2011	ppb	0	15	< 2.0	0	No	Corrosion of household plumbing system; Erosion of natural deposits.
Copper	2011	ppm	1.3	1.3	0.10	0	No	Corrosion of household plumbing system; Erosion of natural deposits; Leaching from wood preservatives.

*The 90th percentile value means 90 percent of the homes tested have lead and copper levels below the given 90th percentile value. If the 90th percentile value is above the AL additional requirements must be met.

2014 Radionuclides

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Allowed Level MCL	Level Detected	Violation yes/no	Major Sources in Drinking Water
Combined Radium Radium 226 & 228	5/13/14	pCi/L	0	5	0.86 + or - 0.55	No	Erosion of natural deposits

2014 Special Monitoring

Contaminant	MCLG	MCL	Level Detected	Source of Contamination
Sodium (ppm)	n/a	n/a	4.78	Erosion of natural deposits

Collection, sampling result information and table provided by Detroit Water and Sewerage Department (DWSD) Water Quality Division, ML Semegen
City of Flint sample result information provided by the City of Flint Water Plant, M. Glasgow.

Eddie,

OK. I'm going to gather the wrenches and such, and will shut it down @ 10:15 and let you know promptly when its back on.

-Thank you
Dave Carsley

Eddie,

The existing faucet in the 6th floor JC (near gang baths) is leaking. Admittedly, it wasn't prior to me taking it off (for FRP install) and reinstalling it. It has stained the new piece of FRP below it.

I know where the shut off is, and can operate it without assistance. As you know though, it shuts off ALL JCs on the west side of the building.

Please give me the "go" when a somewhat convenient time for your cleaning staff arises today.

I'm thinking 10-15 minutes max.

-Thanks

Subject: Flint State Office Building potable water
Attachments: City of Flint Annual Water Report.pdf; City of Flint Potable Water Evaluation Report.pdf

Mike,

I have researched the drinking water supplied to the Flint Facility and came up with a couple of plans we could consider as we move forward. The City of Flint began operation of their water treatment plant full time with the Flint River as the source on April 25, 2014. The water source before that date was from the Detroit Water Department. The excessive cost increases and reliability issues made the City of Flint explore and change their water source to the treatment plant. The City of Flint has signed agreements to purchase the needed 83 million gallons a day from the Karegnondi Water Authority after the completion of the new system in the fall of 2016, which will dramatically improve the water quality supplied to the water plant. The raw water will be pulled from Lake Huron instead of the Flint River after the connection into the Karegnondi Water Authority system.

The City of Flint hired a firm to investigate and analyze the city's water source and practices in response to the May 2015 sample results, which resulted in a violation of the Trihalomethane MCL limit. The operation evaluation was extensive and produced a 23 page report. The average of all eight sample sites in August 2014 was 142.1 ug/l and the most recent average of samples taken in August 2015 was 63.6 ug/l. The MCL defined by the EPA is 80 ug/l. Flint has now completed tests for 6 quarters and a straight annual running average applies. Based on the samples taken on August 18, 2015 there are no longer any sites in violation of the THM MCL limit. The up to date MOR (monthly operating reports), the 2014 Consumers Annual Report on Water Quality and the Operation Evaluation Report conducted by Lockwood, Andrews & Newnam Inc. on August 27 2015 shows no current violations with the City of Flint supplied potable water to its consumers. The report did make several recommendations in the areas of water source improvements, treatment process and improvements to the distribution system to help maintain the water quality.

We have contacted Mr. Glasskow with the City of Flint Water Department and requested our water be tested on site for the 10 regulated contaminants including Trihalomethanes and lead as well as offered our site to be a documented water sample test site for the cities routine monthly testing. We are hoping by doing this we will built a better working relationship with the city of Flint as well as have a better understanding of the characteristics of our on-site water, backed with regular test results. Although the city has committed to performing the water test the date has not been set but we are hoping the city will send an operator out by next Tuesday 09/22/15 at the latest.

The idea to supply bottled water to the facility was during the cities violation period to help protect the tenants and visitors to the facility, even though the supplied water was reported to be safe for drinking. With 2 floors occupied we paid an average of \$150.00 per month for the water service. I am sure this number will double if not triple considering we have 5 floors occupied to date. After researching all the data matched with the monthly test samples, which are set and monitored by EPA and MDEQ, I would suggest we discontinue providing the bottled water. To be customer friendly and help maintain our above average customer service practices we could maintain 1 bottle water dispenser in the facility lobby area and evaluate at a later date of its need. The only reason I could suggest staying with the bottled water on all floors would be a positive test result after the site test this week or early next, which would be highly unlikely, or to help avoid any future issues that could result from a less then stable raw water source such as the Flint River. If we did decide to continue the bottled water program at the Flint Facility I would suggest we evaluate the program and its need after the city starts to pull water from the Lake Huron source, which should be a higher and more stable source of water to be treated.

I know we need to make a decision if we keep the bottled water or not at the facility so I hope some of this information will help make that decision and also give us the reasons and supporting documentation on how that decision was made. I hope it helps!

Thanks,
Brian

2014 Consumers Annual Report on Water Quality

The City of Flint Department of Utilities is dedicated to providing high quality drinking water to the residents of the community. The Consumers Annual Report on Water Quality provides important information about your drinking water. This report includes information about the source of the water, health information, a chart summarizing United States Environmental Protection Agency (USEPA) required testing results, and a table giving explanations of important terms to understand when viewing the test results. The Flint Water Plant & Facilities operates and maintains a certified drinking water laboratory to assure compliance with all state and federal regulations and is committed to prompt and thorough notification to the consumers if there is any reason for concern about the quality of the drinking water.

Information about your drinking water is available at the City of Flint web page on the Internet at www.cityofflint.com or by calling the Flint Water Plant & Facilities at (810) 787-6537. The Safe Drinking Water Hotline at (800) 426-4791 is a resource for health related questions and water quality issues. General drinking water information can be found on the USEPA web site at www.epa.gov/safewater/.

2014 Key to the Detected Contaminant Tables

Symbol	Abbreviation for	Definition/Explanation
>	Greater than	
AL	Action Level	The concentration of a contaminant, which, if exceeded, triggers treatment or other requirements which a water system must follow.
HAA5	Haloacetic Acids	HAA5 is the total of bromoacetic, chloroacetic, dibromoacetic, dichloroacetic, and trichloroacetic acids. Compliance is based on the total.
LRAA	Locational Running Annual Average	
MCL	Maximum Contaminant Level	The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
MCLG	Maximum Contaminant Level Goal	The level of contaminant in drinking water below which there is no known or expected risk to health.
mg/L	Milligrams per Liter	A milligram = 1/1000 gram 1 milligram per liter is equal to 1ppm
MRDL	Maximum Residual Disinfectant Level	The highest level of disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
MRDLG	Maximum Residual Disinfectant Level Goal	The level of a drinking water disinfectant below which there is no known or expected risk to health. MRLDG's do not reflect the benefits of the use of disinfectants to control microbial contaminants.
n/a	Not Applicable	
ND	Not Detected	
NTU	Nephelometric Turbidity Units	Measures the cloudiness of water.
pCi/L	Picocuries per Liter	A measure of radioactivity. Picocurie (pCi) means the quantity of radioactive material producing 2.22 nuclear transformations per minute.
ppb	Parts Per Billion (one in one billion)	The ppb is equivalent to micrograms per liter. A microgram = 1/1000 milligram.
ppm	Parts Per Million (one in one million)	The ppm is equivalent to milligrams per liter. A milligram = 1/1000 gram.
RAA	Running Annual Average	
TT	Treatment Technique	A required process intended to reduce the level of a contaminant in drinking water.
TTHM	Total Trihalomethanes	Total Trihalomethanes is the sum of chloroform, bromodichloromethane, dibromochloromethane and bromoform. Compliance is based on total.

Water Source

From January 1st through April 30th 2014, The City of Flint purchased drinking water from the Detroit Water & Sewerage Department (DWSD) which operates several drinking water facilities. Following treatment to remove impurities, the water is pumped by DWSD to the Flint Water Plant, where the water is then monitored and distributed throughout the City.

The source water comes from the lower Lake Huron watershed. The watershed includes numerous short, seasonal streams that drain to Lake Huron. The Michigan Department of Environmental Quality in partnership with the U.S. Geological Survey, the Detroit Water & Sewerage Department, and the Michigan Public Health Institute performed a source water assessment in 2004 to determine the susceptibility of potential contamination. The susceptibility rating is a seven-tiered scale ranging from "very low" to "very high" based primarily on geologic sensitivity, water chemistry, and contaminant sources. The Lake Huron source water intake is categorized as having a moderately low susceptibility to potential contaminant sources. The Lake Huron water treatment plant has historically provided satisfactory treatment of this source water to meet drinking water standards. If you would like to know more information or a complete copy of the report, contact the City of Flint Water Plant at (810) 787-6537.

General Information

In order to ensure that tap water is safe to drink, the EPA prescribes regulations, which limit the amount of certain contaminants in water provided by the public water systems. The Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water, which must provide the same protection for public health. Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline (800-426-4791).

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water include:

- ◆ **Microbial contaminants;** such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- ◆ **Inorganic contaminants;** such as salts and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- ◆ **Pesticides and herbicides;** which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.
- ◆ **Organic chemical contaminants;** including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.
- ◆ **Radioactive contaminants;** which can be naturally occurring or be the result of oil and gas production and mining activities.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Drinking Water Hotline (1-800-426-4791).

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Infants and young children are typically more vulnerable to lead in drinking water than the general population. It is possible that the lead levels at your home may be higher than at other homes in the community as a result of materials used in your home's plumbing. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The City of Flint Department of Utilities is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. If you are concerned about elevated lead levels in your home's water, you can minimize your potential exposure to lead in your water by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

Lake Huron Water Treatment Plant 2014 Regulated Detected Contaminants Tables

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Allowed Level MCL	Highest Level Detected	Range of Detection	Violation yes/no	Major Sources in Drinking Water
-----------------------	-----------	------	------------------	-------------------	------------------------	--------------------	------------------	---------------------------------

Inorganic Chemicals – Monitoring at the Plant Finished Water Tap

Fluoride	5/13/14	ppm	4	4	0.59	n/a	No	Erosion of natural deposits; Water additive, which promotes strong teeth; Discharge from fertilizer and aluminum factories.
Nitrate	5/13/14	ppm	10	10	0.31	n/a	No	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits.

Disinfection By-Products – Monitoring in Distribution System Stage 2 Disinfection By-Products

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Allowed Level MCL	Highest LRAA	Range of Detection	Violation yes/no	Major Sources in Drinking Water
Total Trihalomethanes (TTHM)	2014	ppb	n/a	80	33.0	10.0 - 48.5	No	By-product of drinking water chlorination
Haloacetic Acids (HAA5)	2014	ppb	n/a	60	15.8	8.0 - 19.0	No	By-product of drinking water disinfection

Disinfectant Residuals Monitoring in DWSD Distribution System

Regulated Contaminant	Test Date	Unit	Health Goal MRDGL	Allowed Level MRDL	Highest RAA	Range of Detection	Violation yes/no	Major Sources in Drinking Water
Total Chlorine Residual	Jan-Dec 2014	ppm	4	4	0.82	0.64-0.94	No	Water additive used to control microbes

Regulated Contaminant	Treatment Technique	Typical Source of Contaminant
Total Organic Carbon (ppm)	The Total Organic Carbon (TOC) removal ratio is calculated as the ratio between the actual TOC removal and the TOC removal requirements. The TOC was measured each month and because the level was low, there is no requirement for TOC removal.	Erosion of natural deposits

2014 Turbidity – Monitored every 4 hours at Plant Finished Water Tap

Highest Single Measurement Cannot exceed 1 NTU	Lowest Monthly % of Samples Meeting Turbidity Limit of 0.3 NTU (minimum 95%)	Violation yes/no	Major Sources in Drinking Water
0.19 NTU	100%	No	Soil Runoff

Turbidity is a measure of the cloudiness of water. We monitor it because it is a good indicator of the effectiveness of our filtration system.

2014 Microbiological Contaminants – Monthly Monitoring in Distribution System

Regulated Contaminant	MCLG	MCL	Highest Number Detected	Violation yes/no	Major Sources in Drinking Water
Total Coliform Bacteria	0	Presence of Coliform bacteria > 5% of monthly samples	0	No	Naturally present in the environment.
E.coli Bacteria	0	A routine sample and a repeat sample are total coliform positive, and one is also fecal or E. coli positive.	0	No	Human waste and animal fecal waste.

2011 Lead and Copper Monitoring at Customers' Tap

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Action Level AL	90 th Percentile Value*	Number of Samples Over AL	Violation yes/no	Major Sources in Drinking Water
Lead	2011	ppb	0	15	< 2.0	0	No	Corrosion of household plumbing system; Erosion of natural deposits.
Copper	2011	ppm	1.3	1.3	0.10	0	No	Corrosion of household plumbing system; Erosion of natural deposits; Leaching from wood preservatives.

*The 90th percentile value means 90 percent of the homes tested have lead and copper levels below the given 90th percentile value. If the 90th percentile value is above the AL additional requirements must be met.

2014 Radionuclides

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Allowed Level MCL	Level Detected	Violation yes/no	Major Sources in Drinking Water
Combined Radium Radium 226 & 228	5/13/14	pCi/L	0	5	0.86 + or - 0.55	No	Erosion of natural deposits

2014 Special Monitoring

Contaminant	MCLG	MCL	Level Detected	Source of Contamination
Sodium (ppm)	n/a	n/a	4.78	Erosion of natural deposits

EXECUTIVE SUMMARY

Environmental Protection Agency (EPA) and Michigan Department of Environmental Quality (MDEQ) regulations require that public water suppliers test drinking water quarterly throughout the distribution system for disinfectant by-products (DBP's). Two categories of DBP's, tri-halomethanes (THM) and halo-acetic acids (HAA5), are regulated and must be tested for. The City of Flint began operation of their water treatment plant (WTP) full time with the Flint River as the source on April 25, 2014. Since that time, six quarters of samples taken have resulted in annual average violations for total THM. Prior to the first violation (Nov. 2014), the City hired Lockwood, Andrews & Newnam, Inc. (LAN) to complete this Operational Evaluation Report (OER) in conformance with EPA guidelines with the goal to determine the cause(s) of high levels of THM and evaluate possible solutions.

The EPA promulgated the Stage 2 Disinfectants and Disinfection By-Products Rule (DBPR) in January 2006 which set maximum contaminant levels (MCLs) for total trihalomethanes (TTHM) and HAA5 based on an annual running average, tested quarterly, for a given sampling location. The City of Flint reports levels from 8 sampling test locations. Of the six quarterly sampling cycles since Flint began operating the WTP full time, HAA5 levels have been acceptable but TTHM levels have exceeded the MCL. One sampling site was in violation following the May 2015 sampling cycle and results from August 2015 sampling indicate all sites are now within compliance.

A number of issues were identified as possibly contributing to the initial high THM levels measured.

1. Inefficient ozone system functionality which led to increased chlorine feed.
2. Upstream source influences in terms of increased chlorine demand.
3. Bypass stream around softening contributed to chlorine demand and increased total organic carbon (TOC) levels in the effluent.
4. Unlined cast iron pipes in the distribution system contributing to chlorine demand.
5. High water age in the distribution system due to:
 - a. Broken valves causing less than ideal flow patterns
 - b. Inefficient pump station pressure zones
 - c. Water storage volumes in excess of that needed for today's demands
 - d. Oversized water mains
 - e. Low water demands
6. High chlorine demand in filters.
7. High THM formation potential (THMFP) in source water.
8. Less than optimal removal of THM precursors.

A graphical representation of how the factors above relate to the timing of THM compliance sampling is shown as Table 1. Compliance sampling dates are hatched. Each row in Table 1 describes a factor that can lead to increased THM levels and the table defines when each of those factors applied. Note the convergence of nearly all factors around the second sampling period on August 21, 2014 to create what appears to have been a worst case scenario. The table also shows that the factors listed as those that the City can control have been addressed prior to 2015 sampling periods. Monthly operating report data up to August 1, 2015 is depicted on the Table.

TABLE 1 - SUMMARY OF NEGATIVE INFLUENCES ON THM COMPLIANCE SAMPLING

FACTOR	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec
Softening bypass stream over 20% of plant flow												
Ozone system not feeding optimally												
Using full water storage capacity of WSR & CSR												
Chlorine feed at WTP 7.0 mg/l or more												
Ferric chloride feed rate less than 10 mg/l Fe3+												
Raw water temp 23 degrees C or more												
Raw water TOC levels above 8.0 mg/l												
Raw water coliform over 5000 counts/day												
Positive bacteria test in dist. system (boil water notice)												
Water demand less than 15 mgd												
Softening bypass stream over 20% of plant flow												
Ozone system not feeding optimally												
Using full water storage capacity of WSR & CSR												
Chlorine feed at WTP 7.0 mg/l or more												
Ferric chloride feed rate less than 10 mg/l Fe3+												
Raw water temp 23 degrees C or more												
Raw water TOC levels above 8.0 mg/l												
Raw water coliform over 5000 counts/day												
Positive bacteria test in dist. system (boil water notice)												
Water demand less than 15 mgd

ACTION PLAN

The City of Flint has signed an agreement with the Karegnondi Water Authority (KWA) to purchase raw water drawn from Lake Huron. The KWA system is currently under construction and expected to be operational by late 2016. The water supply from Lake Huron will have entirely different water quality characteristics from the Flint River and those characteristics are expected to yield drastically reduced DPB formation. With that, non-structural options to help reduce THM levels are much preferred over solutions requiring new construction. Therefore, two categories of actions have been devised: Stage 1 being actions that can be completed relatively quickly without major construction and Stage 2 consisting of either long term actions or solutions requiring major construction. The City is actively working to complete Stage 1 actions as soon as possible. Stage 2 actions are to be implemented only if Stage 1 actions are ineffective in adequately reducing TTHM levels and therefore Stage 2 is contingent upon the outcome of Stage 1. As of the date of this report, status updates for action items are shown in red.

Stage 1 – Immediate Actions

- Hire third party water quality expert to complete independent 'water audit'
 - The City hired Veolia Water to review all water quality related operations, procedures, actions taken and planned responses. Recommendations from Veolia were provided in a report and technical memo dated 3/12/15 and 3/30/15 respectively.
- Obtain an in house THM analyzer to allow regular operational monitoring of THM levels
 - THM analyzer was installed 2/17/15.
- Hire ozone system manufacturer to troubleshoot ozone system
 - Manufacturer and controls programmers performed on site evaluations followed by corrective modifications in January 2015.
- Bench scale jar testing
 - Match existing process and assess possible areas of improvement
 - Existing process was simulated and an evaluation of existing chemical feed dosages was completed by LAN.
 - Existing process TOC profile was developed by Veolia.
 - Simulate potential modifications to treatment process
 - Soda ash softening evaluation completed and PAC feed testing was completed by LAN.
 - Evaluate coagulation and flocculation polymer aid feeds to assist with TOC removal
 - Evaluations of polymer aids completed by LAN and PVS Technologies.
- WTP operational changes
 - Discontinue softening bypass stream to reduce chlorine demand
 - Operational directive has been set to soften no less than 80% of flow.
 - Disinfection of filter beds to reduce chlorine demand
 - Utility Service Group contracted by City and condition assessment completed. Controls improvements have been completed.
 - Begin coagulation and flocculation polymer aid feeds to assist with TOC removal if bench scale test results are positive
 - Jar testing completed to date has not indicated a meaningful benefit to feeding coagulation/flocculation polymer aids. Increased ferric doses have been implemented at the WTP based on positive jar test results.

- Increase water main flushing efforts to minimize stagnant water
 - Flushing efforts are ongoing as needed based on chlorine residual levels measured in the system.
- Water system modeling to identify areas with high water age and potential solutions
 - The water model has been improved and preliminary results, including system wide water age, have been produced. Water demand updates and reconciliation with operator's data are underway with expected completion in mid June, 2015.
 - Cedar Street Pump Station potential recirculation
 - Water model analysis to be completed Sept-Oct, 2015.
 - West Side Pump Station potential recirculation
 - Water model analysis to be completed Sept-Oct, 2015.
 - Storage tank volume use
 - Operating levels of West Side and Cedar Street reservoirs have been lowered to reduce water age. Possible elimination of WS or CS to be evaluated Sept-Oct, 2015.
 - Possible broken closed valve locations
 - Model has been updated with known broken valve locations. Model results are being evaluated for indications of other possible broken valves. City has also initiated valve assessment program.
 - Locations in need of flushing
 - High water age areas have been identified in the water model. Further evaluation is expected to be done by November 1, 2015 to determine most effective flushing points.

Stage 2 – Contingent Actions

- Replace filter media with granular activated carbon (GAC) media
 - Filter anthracite media was replaced with GAC media July – August 2015.
- Fix ozone system
 - Repairs have been made to gauges and programming and the system is producing proper ozone and functioning under manual operation. Further minor repairs are planned for the 1st quarter 2015 to allow automatic operation.
- Start feeding coagulation and flocculation polymer aids to lower TOC, if not completed in Stage 1
 - Polymers evaluated by LAN did not demonstrate notable benefit.
 - PVS Technologies evaluated a proprietary polymer that showed little benefit.
- Convert to lime and soda ash softening
 - Option deemed unnecessary due to effectiveness of new GAC media.
- Change disinfectant to chloramine or chlorine dioxide until KWA
 - Option deemed unnecessary due to effectiveness of new GAC media.
- Install pre-oxidant feed (permanganate) at intake to optimize ozone disinfection
 - Option deemed unnecessary due to effectiveness of new GAC media.
- Implement advanced treatment for THM precursor removal
 - Option deemed unnecessary due to effectiveness of new GAC media.

- Increased main flushing based on water modeling results
 - Water model analysis to be completed Sept-Oct, 2015.
- Continue valve replacements with water model assistance
 - Water model analysis to be completed Sept-Oct, 2015.
- Emphasize cast iron pipes on water main replacement priority list
 - Flint has bid replacement of over 2 miles of 24" steel pipe along Dupont and Bishop Streets to be completed when and if the City can allocate funds. The water main section is considered a critical transmission main, and is expected to contribute to decreases in water age when complete.

THM samples have been taken and tested 6 times for regulatory reporting since the City began using the Flint River for supply. Numerous additional sets of samples have been taken by the City for internal operational monitoring. Compliance samples were taken in May 2014, August 2014, November 2014, January 2015, February 2015, May 2015, and August 2015. The average of all eight sample sites in August 2014 was 142.1 ug/l and the most recent average of samples taken in August 2015 was 63.6 ug/l. The MCL defined by the EPA is 80 ug/l.

I. BACKGROUND

The City of Detroit Water and Sewer Department (DWSD) has historically provided drinking water for the City of Flint and Genesee County. In the late 1990's growing concern regarding the reliability of the DWSD supply prompted the City of Flint to upgrade their existing water treatment plant (WTP). Those improvements, defined as Phase I, were completed in 2005 and were intended to allow the Flint WTP to operate, using the Flint River as the source, for an extended period of time in the event that supply from the DWSD was temporarily interrupted. Additionally, the Phase I improvements set the stage for Flint to break free from dependence on the DWSD supply and water charges over which they had no control.

A. WATER SUPPLY TRANSITION

1. Detroit Water and Sewer Department (DWSD)

Prior to spring of 2014, the Genesee County and Flint region had been provided drinking water by the DWSD. However, due to excessive cost increases and reliability issues with the DWSD system other options had to be explored.

2. Karegnondi Water Authority (KWA)

In 2010 the Karegnondi Water Authority (KWA) was formed for the purpose of developing a new water supply from Lake Huron to serve the region in lieu of the DWSD supply and the City of Flint elected to join. The KWA expects the new system which is currently being constructed to become operational by the fall of 2016.

3. Flint River – Interim Period

With a renewing water supply agreement between Flint and the DWSD being terminated by the DWSD (effective April 30, 2014) and the KWA system not expected to be operational until late 2016, the City of Flint decided to initiate operation of the existing WTP full time utilizing the Flint River as the interim water source. A variety of WTP improvements were necessary for the Flint plant to become a full time plant. For purposes of this report, Phase II improvements to the Flint WTP are improvements intended to allow the plant to operate full time with either the Flint River as the source or the KWA supply as the source.

B. TTHM VIOLATIONS

The EPA and MDEQ method of determining if TTHM sample results exceed the MCL uses a locational running annual average (LRAA). Flint's first TTHM violation was cited by the MDEQ following the third cycle of sampling completed in November 2014. Of the 8 sampling sites, 4 were in violation. At that time the MDEQ used the following calculation for determining if the MCL had been violated:

$$(2 \times \text{current quarter value} + \text{previous 2 quarter values}) / 4 = \text{Operational Evaluation Value}$$

Flint has now completed tests for 6 quarters and a straight annual running average applies. Based on samples taken on August 18, 2015 there are no longer any sites in violation of the THM MCL limit. The August 2014 average across all test sites was 142.1 ug/l and the August 2015 average is 63.6 ug/l. Test results are tabulated in Table 2. HAA5 sample results are shown in Table 3, of which Flint has had no violations.

TABLE 2 – TTHM TEST RESULTS (ug/L)

Sample Location	5/21/14	8/21/14	11/21/14	2/17/15	5/18/15	8/18/15	May/15 LRAA	Aug/15 LRAA

C. WATER TREATMENT PLANT RECENT IMPROVEMENTS & STATUS

1. Phase I WTP Improvements

Since 1965, the Flint WTP has remained a secondary or backup supply system to the DWSD primary supply. Typically the secondary supply for a public water system is expected to be needed only during emergency situations and normally is designed for short term operation such as providing the average daily demand for a few days. Conversely, Phase I improvements were designed with the intent to upgrade the Flint WTP in order to allow for an extended short term period (6 weeks) because of the perceived high risk that the DWSD supply would fail and remain out of service for an

extended duration. Regardless, the Flint WTP was still intended to serve as a standby plant and as such the Phase I improvements lacked redundancies that would be required for a primary supply WTP.

2. Past Pilot Study & Testing

During design of the Phase I improvements a treatability study was completed by Alvord, Burdick & Howson, LLC (AB&H) in 2002. The Treatability Study evaluated the current treatment processes that are in place at the Flint WTP today with the Flint River as the source. The report recommended the following:

TABLE 4 – 2002 WTP TREATMENT RECOMMENDATIONS

Treatment	Purpose	Point of Application	Dosage (mg/l)
Sodium permanganate	Zebra mussel control	Intake	0.3
Ozone	Taste & odor removal, disinfection	Diffusor basin	1.5
Ferric chloride	Coagulation	Rapid mix	40
Coag aid polymer	Turbidity & TOC removal	Rapid mix	2.0
Floc aid polymer	Turbidity & TOC removal	Floc basin	0.05
Lime	Softening	Softening basin	175
Soda ash	Softening	Softening basin	52
Carbon dioxide	pH adjustment	Recarb basin	37
Media filters	Filtration	N/A	Na
Chlorine	Disinfection	Filter effluent	1.0

Of the recommended items, zebra mussel control, coagulant and flocculation polymer aids, and soda ash feed have not been incorporated into the treatment process.

3. Phase II WTP Improvements for Full Time Operation

Phase II WTP improvements are those needed to convert the Flint WTP from a back-up supply to a primary supply plant. A number of improvements have already been constructed as they were necessary to operate full time when treating water from the Flint River. The improvements under the title of Phase II that have been completed or are nearly complete include installation of the future raw water feed connection point and valving for the KWA supply, upgrades to the lime sludge lagoon, the lime sludge lagoon decant and disposal system, decant pump station and force main, installation of mid-point chlorination before filtration, new oxygen / nitrogen storage facilities for the ozone system, and upgrade of the electric feed sub-station.

Additional improvements to the Flint WTP that are to be completed to become part of the normal treatment process using water supplied by the KWA are:

- New coagulant feed system
- Electrical
 - Pump Station #4 upgrades (under construction)
 - SCADA and controls upgrades
 - Filter transfer pump station feeders
- Pump replacements and VFD installation in the low and high service pump station (under construction)
- Filter transfer pump station to Dort Reservoir
- Facility security improvements

II. SOURCE WATER EVALUATION

A. DATA ANALYSIS

Based on past data collected and the 2002 Treatability Study by AB&H, the Flint River water quality varies seasonally with higher hardness and alkalinity experienced in the winter. Higher magnesium concentrations are also experienced in the winter, adding difficulty to the settling process due to neutrally buoyant floc. General water quality average characteristics recorded for the 2002 Treatability Study as compared with average characteristics recorded in 2014 are shown in Table 5 below.

TABLE 5 – FLINT RIVER WATER QUALITY CHARACTERISTICS							
Period	Turbidity NTU	TOC Mg/l	Alk. Mg/l	Hardness Mg/l as CaCO₃	pH	Total Col. Count/day	THMFP Mg/l
2001 Apr–Oct	7.9	9.4	215	272	8.1	870-1230 (7300 max)	410
2014 May–Oct	8.3	10.3 5/22/14	207	252	8.2	1900-9000 (48,300 max)	187

The Flint River characteristics do not appear to have changed significantly over the past 10+ years. Note that near the time Flint initiated withdrawal from the Flint River investigation by City staff revealed a sewer leak upstream of the plant that may have contributed to the total Coliform count. The leak was subsequently repaired.

B. CONCLUSIONS

Considering the minor changes in Flint River water quality, much of the information contained in the 2002 Treatability Study by AB&H remains relevant today. Data from that report assumed to be consistent today include the following:

- Flint River is influenced by groundwater from a dolomitic aquifer
- Hardness varies seasonally with higher hardness and alkalinity in the winter
- Hardness, alkalinity, magnesium concentrations tend to be reduced by run-off

In development of the 2002 Treatability Study, processes were simulated which resulted in low THM levels. Therefore, information contained in that report was used to assist with establishing a baseline jar testing procedure as discussed further in Section III.

III. TREATMENT PROCESS EVALUATION

A. EXISTING PROCESS DESCRIPTION

The existing WTP consists of an intake with screening from the Flint River, low lift pumping, ozonation, rapid mix, flocculation, settling, softening, recarbonation, filtration, storage and high service pumping. A process diagram is shown as Figure 1.

1. Intake

A 72" diameter pipe draws water from the Flint River through 2 traveling screens to the low lift pump structure. No chemicals are currently fed for Zebra mussel control or pre-oxidation as recommended by the 2002 Treatability Study. Manual removal of zebra mussels is more economical than installation of chemical feed equipment considering the short term need.

2. Ozone

There are 2 ozone generators designed to provide adequate ozone for a WTP flow of up to 36 mgd. There are 3 ozone contact basins. The ozone generators were designed to produce 900 lbs/day at 10% concentration and up to 1300 lbs/day at 6% concentration each. Prior to recent repairs, readings indicated a production rate of approximately 700 lbs/day at 4% concentration. It is possible that before the recent improvements the ozone feed might not have been optimized. In fact, it is known that less than optimal ozonation previously led to increased chlorine feed which would have contributed to THM formation.

3. Rapid Mix

East and West rapid mix chambers allow chemical feed prior to the flocculation basins. Each rapid mix chamber is equipped with a 5 hp mixer.

4. Coagulation / Flocculation

The WTP contains two equally sized flocculation basins, east and west, and each basin provides tapered or gradually slowed mixing from inlet to outlet. There are fifteen 2 hp mixers for each basin with VFDs to control mixing speed. The 2002 Treatability Study recommended feeding both coagulation and flocculation polymer aids. Neither polymer aid is being used today because turbidity and TOC removals have been sufficient to meet regulatory requirements.

5. Settling

Primary clarification takes place within 3 basins containing plate settlers. The settlers are operating as designed but are due for cleaning.

6. Softening

Again, there are two basins for softening: east and west. Each basin is 120' in diameter and contains a solids contact softening unit. Each softening basin/unit has a design capacity of 18 mgd. The east clarifier has an effluent weir imbalance that the City intends to fix when low demands allow for construction. Low lift pumping limitations, flow control to the basins, malfunctioning polymer feed pumps, control restrictions on residuals removal, and fluctuating demands have made it difficult for WTP staff to stabilize the softening process. Softening is accomplished by feeding lime. The decision was made by the City not to feed soda ash in order to remove non-carbonate hardness because acceptable hardness levels could be achieved with lime feed only and softening is short term until Lake Huron water becomes available. Lime and soda ash softening is a possible consideration to assist with TOC removal and thus reduce THM formation.

7. Recarbonation

Recarbonation for pH adjustment is accomplished in east and west recarbonation basins between and to the north of the softening basins. Carbon dioxide storage and feed equipment is located west of the recarbonation basins.

8. Filtration

Filtration is accomplished with 12 dual media filters, equally sized and designed to filter 3.0 mgd each. Sand and anthracite media was replaced in July and August 2015 with new sand and GAC at depths of 12" and 18" respectively. Prior to spring of 2014, the filters had been operated intermittently over the years due to the standby nature of the WTP and until recently, chlorine injection took place downstream of the filters. It is possible some microbial growth had developed in the filters leading to increased chlorine demand which could have contributed elevated TTHM. Late 2014, the City recently hired a contractor to upgrade the electrical controls for the filters and that work has been completed.

9. Disinfection

Disinfection is provided by ozonation and by feeding chlorine. Ozonation occurs at the front end of the WTP. Chlorine is fed prior to filtration and prior to finish water storage / high service pumping. The intermediate chlorine injection location was recently constructed under the Phase II, Segment 1 contract.

10. Clear Well & Pumping

The pump building sits adjacent to a 3 MG clear well and contains both low and high service pumps.

B. JAR TESTS / EXPERIMENTS

1. Approach

There are several well practiced methods by which DBPs can be reduced. First, the disinfectant can be changed to an alternate that has a lower tendency to form DBPs. Second, additional treatment systems such as activated carbon or air stripping (depending on the nature of the precursors) can be added to remove DBP precursors. Lastly, the existing treatment processes can be optimized to remove as much DBP precursor as possible. Of these options, optimizing existing treatment processes is the only strategy that does not require the construction of new and expensive facilities. It is anticipated that Flint will be receiving Lake Huron water by late 2016 and this water will have a completely different chemistry from the Flint River. Major process changes instituted to address THM levels using Flint River water are likely to be unnecessary for Lake Huron water and may even be inappropriate. Therefore, those options which require addition of new treatment processes are undesirable at this time. In recognition of this upcoming change in water source, efforts for this study have concentrated on improving the existing processes, rather than adding new ones. New treatment processes will only be recommended if operational changes to the existing treatment train prove ineffective.

Recent sample test results suggest that most of the DBPs are formed in the distribution system rather than within the treatment plant. Therefore, the most logical approach is to reduce the DBP formation potential (DBFP) rather than simply lowering the levels of DBPs leaving the plant. During bench scale testing, formation potential (FP) levels were the primary indicator of success or failure of proposed process modifications.

2. Protocol

Bench scale pilot testing is intended to reflect actual plant operating and hydraulic conditions so the bench scale treatment units were sized based on various dimensionless factors to ensure the pilot treatment matched the actual system. Bench scale ozonation was not practical due to time and cost limitations. Therefore, water samples were withdrawn from the plant ozone basin effluent. These samples were transported to the laboratory and dispensed into square testing jars. The jars were used to simulate rapid mix, three-stage flocculation, and settling. Rapid mix and flocculation conditions were matched to the plant based on "Gt" values. The "C" value is a measure of the mixing intensity and is a function of mix time, viscosity of the liquid, and mixing power applied to the water. "Gt" then, is a size scaling factor where time has been accounted for. Settling time was scaled to match the shorter settling depth of the testing jars. After settling, samples were decanted from the test jars. The decanted samples were then lime softened; softening conditions were similarly matched on the basis of "Gt". Carbon dioxide was sparged into the samples to reduce the pH. The water was then vacuum filtered through filter paper, sized to simulate the plant's dual media filters. The samples were dosed with excess chlorine and allowed to react for seven days at 25° C before testing for DBPs to determine the formation potential.

The following conditions were applied during testing to properly match small scale testing to actual plant processes.

TABLE 6 – BENCH SCALE TEST MIXING INTENSITIES

Process	G	Duration	Mix RPM
Ozonation	Plant	-	-
Rapid Mix	200	44 sec	160
Flocculation, Stage 1	50	9 min	55
Flocculation, Stage 1	25	9 min	30
Flocculation, Stage 1	12	9 min	19
Settling	N/A	10 min	-
Softening	TBD	10 min	-
Recarbonation	N/A	N/A	-

The primary variables during testing were chemical additions and chemical dosages. Specific chemicals and dosages used for initial testing conditions were selected to reflect current plant usage and the recommendations of the 2002 Treatability Study:

TABLE 7 – BENCH SCALE TEST CHEMICAL FEED RATES

Chemical	Current Usage	2002 Study	Test Values
Ozonation	4.66 mg/l	1.5 mg/l	
Ferric Chloride	7.7 mg/l Fe3+	40 mg/l Fe3+	7.7 – 80 mg/l Fe3+
Coagulant Aid Polymer	Not used	2.0 mg/l	1 – 2 mg/l
Flocculation Aid Polymer	Not used	0.05 mg/l	0 – 0.05 mg/l
Powdered Activated Carbon	Not used	N/A	20 – 100 mg/l
Lime	120 mg/l	175 mg/l	120 – 175 mg/l
Soda Ash	Not used	52 mg/l	0 – 52 mg/l
Cationic Softening Polymer	3.13 mg/l	Not used	3.13 mg/l
Anionic Softening Polymer	0.88 mg/l	Not used	0.88 mg/l
Fluoride	0.45 mg/l	1 mg/l	Not used
Carbon Dioxide	32 mg/l	37 mg/l	Fed to reach pH of 7.5 +/- 0.3
Chlorine	6.3 mg/l	1 mg/l	10 mg/l

3. Considerations

The 2002 Treatability Study did not note significant formation of DBPs. This may be a function of different Flint River water chemistry at that time. However, recognizing the considerable differences in chemical usage and dosages between that study and current operations, those differences in chemical use and dosage are an obvious starting point for optimizing treatment to prevent DBP limit exceedance.

Although it is believed that optimization of current treatment can correct the DBP issue, should optimization of present treatment prove insufficient, alternate residual disinfectants (chloramines and chlorine dioxide) could be investigated as additional treatment measures.

4. LAN Test Results

Two rounds of jar testing were completed by LAN during the weeks of December 15, 2014 and January 26, 2015. Detailed test data is included in Appendix A. Testing results can be summarized as follows:

- Increased dosages of ferric chloride resulted in higher reduction of THMFP.
- The currently utilized feed rate of lime at 120 mg/l is appropriate
- Softening with soda ash in addition to lime resulted in minor additional THMFP reduction – in the range of 0% - 10%.
- The benefits of using a cationic polymer during softening at a dosage range of 0.31 - 3.13 mg/l to help reduce THM's are unclear
- The benefits of using an anionic polymer during softening at a dosage range of 0.09 – 0.88 mg/l to help reduce THM's are unclear
- Feeding PAC was ineffective in reducing THMFP within the dosage range of 20 – 100 mg/l.

5. Testing by Others

In addition to jar testing completed by LAN, the chemical supplier who provides ferric chloride for the City, PVS Technologies, ran tests using their recommended flocculant polymer aid. Plus, Veolia Water completed jars testing of their own the week of February 16th to analyze other process details and current WTP parameters. Experiments completed by PVS Technologies showed very little TOC removal beyond that obtained with straight ferric chloride feed.

6. Conclusions

Increasing the dose rate of ferric chloride is an operational change that can easily be implemented without the need for any additional equipment. Test results show that over 40% THMFP removal can be obtained with a dosage of 60 mg/l Fe3+ or higher. Increased dosing of ferric chloride would be most ideal coupled with regular raw water TOC monitoring so that TOC levels would dictate the appropriate ferric chloride feed rate.

Softening with soda ash in addition to lime is another option the City should consider if increased ferric chloride doses are not adequate to maintain THM levels under the MCL, particularly during warmer months. Again, monitoring of TOC in the raw water could provide useful information of when lime/soda ash softening is necessary.

IV. DISTRIBUTION SYSTEM EVALUATION

EPA guidance for the distribution evaluation portion of an OER is focused on identification and isolation of a specific portion of the distribution system that led to the exceedance. The circumstances of Flint's apparent pending TTHM exceedances are unusual in that a new supply has been implemented which clearly corresponds to the high TTHM sample results. Although the new source is one element in increased TTHM levels, value remains in evaluating the distribution system since water age is also a critical factor. Additionally, there may be distribution improvements that can be made to help alleviate the problem.

A. INFRASTRUCTURE

1. Piping

According to the most recent MDEQ Sanitary Survey, the distribution system is estimated to contain 70% cast iron, 20% ductile iron, 2% concrete and 8% steel water mains. Based on discussions with City staff, the percentage of cast iron pipe may be higher than that stated in the MDEQ Sanitary Survey. Unlined cast iron pipe can become pitted, allowing colonization sites for microorganisms leading to chlorine demand. Additionally, much of the piping in the system is aged and in poor condition. Increased chlorine demand could be resulting from biofilm in older pipes and from main breaks/repairs. The extent of contribution is not known but any water main replacement project will decrease chlorine demand somewhat if constructed properly. Unfortunately, water main breaks may also assist with decreasing water age by providing unintentional flushing. All things considered, it is impossible to quantify the impact existing piping has on THM formation without extensive research and long term study.

The City utilizes City Point software and GPS equipment to document main breaks and prioritize replacements. However, main break information is more pertinent to rusty water complaints and has little relevance to THM levels. Areas that have been targeted for main replacements include the transmission main from the WTP west to Dupont and south to the West Side reservoir, Fenton Road, Atherton Road, Dort Highway, Averil Street, and Boulevard Drive.

2. Storage

There are 4 finish water storage tanks and 1 raw water tank as tabulated below:

TABLE 8 – STORAGE TANKS							
Name	Type	Water	Volume (MG)	Operating		Absolute	
				LWL	HWL	Bottom	OF
Dort Reservoir	Ground	Raw	20	-	-	730	750
WTP Tank	Elevated	Finished	2	883.0	896.0	863.0	898.0
WTP Clear Well – PS #4	Ground	Finished	3	11'	15'	708.5	726.0
Cedar Street Reservoir	Ground	Finished	20	-	11'	737.2	757.2
Westside Reservoir	Ground	Finished	12	-	12'	761.8	779.0

The MDEQ typically recommends providing a minimum finish water storage volume of 1/3 the maximum daily demand (MDD). According to the 2013 MDEQ Sanitary Survey, the 5 and 10 year MDDs are 21.57 mgd and 30.05 mgd respectively. A common rule of thumb for clear well storage volume at a WTP is 10% of the design flow rate. Another general guideline for reliability is to provide total storage to allow for 2 X the average daily demand plus fire flow demand. For this analysis, fire flow is assumed to be 2,500 gpm for either one industrial fire (2,500 gpm) or a combination of one residential (1,000 gpm) and one commercial (1,500 gpm) fire at a 4 hour

duration which results in a total volume of 600,000 gallons. These go-by approximations are summarized below with the applicable flow rates and are compared to the existing storage volumes currently being utilized.

<u>Common Practice</u>	<u>Flow Rate</u>	<u>Recommended Volume by ROT</u>	<u>Volume In Use</u>
Clear well 10% of Design Flow	18 MGD	1.8 MG	3.0 MG
Finish Storage = 1/3 MDD	30.05 MGD	10.0 MG	37 MG
Total Storage = 2 * ADD + FFD	13.87 MGD	28.3 MG	57 MG

Based on the values above, it appears the storage volume used in the Flint system could be decreased without negatively effecting reliability. The appropriate volumes of individual tanks will be further evaluated using the water system model and discussed in Section V (C).

All reservoirs have baffling to minimize stagnant water. Also, all tanks have been maintained and are in reasonable condition. The Westside reservoir has an exposed roof that is in need of rehabilitation, but its current condition has no influence on THM formation.

3. Pump Stations

All pump stations are in good condition but pumps are generally oversized. As an independent consideration, oversized pumps are not a contributing factor to high THM levels. Control of pumps and pressure zones are discussed in detail below.

B. OPERATIONS AND MAINTENANCE

1. Pump Station & Storage Operations

Pump stations and storage tank levels are controlled as shown in Table 9.

TABLE 9 – PUMP STATION CONTROLS			
PS Name	Control Point	On Point	Off Point
PS No. 4 Raw	Operator	-	-
PS No. 4 Finish	Match plant flow	-	-
Westside	System pressure (elevated tank)	22.5'	33'
Cedar Street	System pressure (elevated tank)	22.5'	33'
Torrey Road	Distr. – Brown/Bradley	< 45 psi	> 45 psi

Prior to the first TTHM violation, Cedar Street and Westside pump stations were operated as needed and were alternated. Typically, Cedar Street was run in the morning and Westside was run in the evening and reservoirs for each were filled during low demand periods at night.

Westside, Cedar Street and Torrey Road pump stations are used to boost system pressure when high demands warrant it, but there are not well defined pressure zones within the system. Therefore, the possibility exists that water is being recirculated allowing for increased water age.

2. Booster Disinfection Practices

Booster disinfection is provided at the Cedar Street and Westside pump stations. When sustained residuals are not provided by chlorine feed at the WTP, sodium hypochlorite is applied at the reservoirs while being filled.

3. Changes in System Demands

Water demands in the City have been declining since the 1960's as the population has dropped. As a result, many of the water system components are oversized including storage tanks and water mains which both increase the time for water to reach the user.

From a short term perspective, Flint demands tend to increase in summer as is ordinarily expected but also in the winter due to water main breaks. The MDD for Flint often occurs in winter. Regarding THM formation, with lower temperatures and higher flows in the winter, THM levels taken at the distribution sample points are expected to be lowest for February sampling quarters than all others.

C. WATER SYSTEM HYDRAULIC MODELING

As part of this report, the City provided a hydraulic water model, originally developed by Potter Consulting, for LAN to update. Thus far, LAN has modified the model to be capable of extended period simulations, modified controls to reflect current operations, revised the piping to include known broken valve locations, updated pump curves, checked pipe diameters, updated system demands, and developed preliminary water age results throughout the entire system. Water age shown in the revised model corresponds for the most part to TTHM levels at the sampling sites. However, LAN has also identified several issues affecting the model that require further attention to allow for usable and reliable results. Those issues include accurate quantification of lost water and confirmation of the status of valves throughout the system. Preliminary water age results are presented in Table 10. Revised results will be provided when the hydraulic model has been fully updated.

TABLE 10 – PRELIMINARY WATER AGE FROM WATER MODEL

Sample Point	Location	Address	Water Age (Hrs)	May/15 LRAA THM (ug/l)
1	McDonalds	3719 Davison	25	68
2	BP Gas Station	822 S. Dort Hwy	18	54
3	Liquor Palace	3302 S. Dort Hwy	14	60
4	Taco Bell	3606 Corunna	340	72
5	Univ. Market	2501 Flushing	305	94
6	Salem Housing	3216 MLK	45	66
7	Rite Aid	5018 Clio	41	69
8	N. Flint Auto	6204 N. Saginaw	37	55

It is anticipated that topics shown below in italicized font will be detailed after the model is updated in Sept-Oct, 2015.

1. *Simulation of Existing System*

Match existing conditions. Chlorine and THM data may be used to verify model results. We have chlorine feed data at plant and residuals at 10 locations in each MOR, May 2014 – July 2015.

2. Identification of Water System Deficiencies

Specific issues to look at:

- Water age in entire system*
- Possible recirculating water through pump stations*
- Use of storage tanks – volumes in particular*
- Indications of broken valves*
- Effectiveness of booster disinfection*

V. RECOMMENDATIONS TO MINIMIZE FUTURE OEL EXCEEDANCES

A. SOURCE

The City of Flint has already committed to the change from the Flint River as the water source to Lake Huron under the KWA system, planned for late 2016. The risk of future TTHM limit violations will decline substantially with the use of water from Lake Huron due to much lower DBP precursors. It is important to recognize that the Flint River will become strictly an emergency supply when the KWA supply becomes available and any investments toward the Flint River should be contemplated accordingly. Recommendations discussed below in this section apply to the Flint River as the source.

Reverting to supply from the DWSD until the KWA supply is available as an option. However, based on information provided by the City of Flint, the annual cost to receive water from the DWSD would be at least \$16,000,000/year or \$1,333,000/month. Therefore, utilizing the DWSD for interim supply is cost prohibitive under the terms defined by the DWSD.

1. Watershed Management

A volunteer group entitled the Watershed Coalition performs various tasks related to managing the Flint River watershed such as spring cleanups and annual benthic studies to evaluate the river 'health'. No additional action is recommended at this time.

2. Monitoring

The City documents daily raw water flow, pH, alkalinity, carbonate and non-carbonate hardness, chloride, temperature, turbidity and coliform count as part of standard preparation of Monthly Operating Reports (MOR). WTP staff have obtained and installed TOC and THM analyzers. The THM analyzer is set up as an on-line plant tap monitor and operations personnel have begun taking samples most days to track TOC levels throughout the treatment process. It is recommended to implement TOC tracking as a strict daily procedure which would provide staff the data needed to establish correlations to predict distribution system THM formation.

3. Intake Operations

The 2002 Treatability Study recommended pre-oxidation in the form of sodium permanganate as a feed at the intake. It is possible the addition of a pre-oxidant such as hydrogen peroxide or some type of permanganate could enhance the ozone process. Veolia evaluated permanganate demand during jar testing the week of February 16th, 2014 and recommended implementation at a dosage of 0.5 mg/l – 1.2 mg/l to achieve 10% additional TOC removal.

4. Seasonal Strategies

Past data indicates the Flint River is influenced by groundwater and in particular, dolomitic spring water. The result is hard water with high concentrations of magnesium and sulfate. Also, hardness and alkalinity are higher during the winter. Upon initiation of supply from the Flint River, the City made the decision to soften with just lime to focus on removal of carbonate hardness. One potential modification that could assist with TOC removal and thus decrease THMFP would be lime and soda ash softening. A temporary caustic soda feed system is recommended to be put in place in case the need for optimized softening arises.

5. Upstream Contamination Issues

Upstream contamination issues are extremely difficult to prevent and even if detected are difficult to locate. Evaluation of raw water data collected for MORs is the easiest manner in which to detect upstream contamination issues because the data is already collected for treatment purposes. In fact, high total Coliform readings in the past have signaled potential issues that the City was able to identify and remove.

An upstream monitoring and warning system could be established to attempt to detect water quality issues or spill event type contamination early enough to adjust treatment procedures or cease intake prior to the contamination reaching the WTP. However, given the imminent conversion to the KWA supply, the period of full time use would likely be far too short to achieve payback on the capital expenditures.

B. TREATMENT PROCESS

1. Operational Recommendations

- Increase ferric chloride dosage: Previous testing in the 2002 Treatability Study, jar testing completed by LAN, and a review of 2014 ferric chloride dosages compared to THM levels leaving the WTP support that increasing the ferric chloride dosage would help reduce THM formation.
- Increased monitoring: Currently, the MDEQ does not require daily reporting of raw water TOC or finished water TTHM levels. However, daily tracking of such levels would allow the City to develop a correlation between the two, thus providing a predictive tool to help manage TTHM levels.
- Coagulation and flocculation polymer aids: The 2002 Treatability Study suggested the use of coagulation and flocculation polymer aids. These polymer aids were shown in the 2002 Treatability Study to increase TOC removal and thereby reduce THMFP but jar testing by LAN and PVS Technologies did not indicate clearly defined benefits. Addition of coagulation and flocculation polymer aids should be categorized as a future consideration that would require further evaluation.
- Discontinue softening bypass: In early summer of 2014 the City was bypassing a portion of flow around the softening basins because hardness levels did not warrant softening of the full stream. However, this practice was discontinued because it was believed the bypass stream was contributing to chlorine demand and preliminary data has supported that belief. Chlorine demand dropped 0.5 – 1.0 mg/l following elimination of the bypass stream in early November 2014.
- Soften with lime and soda ash: Research has shown that enhanced softening with both lime and soda ash may provide additional TOC removal. Veolia did not recommend this option after conducting jar tests.
- Disinfection of filter beds: Recommendation is no longer applicable since media has been replaced.
- Optimization of all existing treatment processes: Depending on bench scale testing conditions and results, slight modifications to all treatment processes might in order to replicate lower DPBFP.
- Discontinue or adjust softening anionic polymer feed: Some anionic polymers have been found to increase TOC. However, Veolia provided no recommendation to change polymers following their evaluation.

2. Infrastructure Change Recommendations

- Fix and/or replace faulty ozone equipment: Since the ozone equipment was installed it had not been used extensively on a full time basis. Following minor complications, the City hired the equipment manufacturer and a programmer to troubleshoot the system. Replacement of faulty gauges and redesign of the control program have allowed the system to operate properly since January 2015.
- Replace filter media with GAC media: GAC media could help reduce THM levels by reducing both TOC and chlorine demand. For this consideration, the intermediate chlorine feed location should be relocated to a point downstream of the filters. The City elected to pursue this option and 6 filters were completed in July 2015 and the remaining 6 were completed in August 2015. Provisions are also being considered for adding more GAC media and/or regeneration of media next summer.
- Change disinfectant to chloramine or chlorine dioxide: If other options prove to be ineffective, conversion to another disinfectant should be fully evaluated. Various characteristics of chloramination indicate an advantage over chlorine dioxide, but a full analysis would provide clarity as to which would be preferred.
- Install pre-oxidant chemical feed: Hydrogen peroxide or a form of permanganate as a pre-oxidant can enhance the activity of the ozone. Chemical feed could be installed at the intake structure or low service pump station, depending on the reaction time required. Use of a pre-oxidant at the intake might also provide the additional benefit of disinfection credit for ozonation with the MDEQ if an ozone residual can be obtained at the ozone process effluent as a result.
- Repair upstream sewer leak: a sewer leak upstream of the WTP intake was discovered in early summer 2014 and has been repaired by the City.

C. DISTRIBUTION SYSTEM

Potential distribution issues related to water quality issues discussed in Section IV included old cast iron pipe, oversized infrastructure, and remote storage/pump station locations and operations that might be less than ideal. Recommendations to address those issues are offered in this section.

1. Manage Water Age

a) Storage Tanks

Considering the excess storage capacity discussed in Section IV, in the short term it is recommended that operational changes be implemented immediately to reduce the overall volume of water stored to decrease water age. Immediate operational recommendations include lowering high water levels of reservoirs other than the elevated tank, to reduce the total system wide usable storage volume to 30-37 MG.

In the long term, LAN recommends development of the most ideal options for water model evaluation. Excess storage volume and tank locations within the water system afford Flint numerous options to reduce the amount of storage volume utilized. As a starting point, two recommendations are presented below.

Option 1

- Take West Side reservoir and pump station out of service
- Cut storage volume used in half at Cedar Street reservoir
- Adjusted system wide storage volume would be 35 MG

Option 2

- Take Cedar Street reservoir and pump station out of service
- Adjusted system wide storage volume would be 37 MG

b) Residence Time in Pipes

Completely redesigning and replacing the water system to match today's demands is not feasible financially and would be a waste of infrastructure with remaining useful life. Going forward, it is recommended that any future main replacement projects be evaluated for possible downsizing. When the water model is fully updated, it will provide a valuable tool in determining which mains can be downsized and to what extent. Replacement of broken valves and valve exercising are also recommended, which are programs that have already been implemented into Flint's regular operations.

Operationally, hydrant flushing is recommended as needed to minimize water age in low flow areas. Again, the updated water model should be used to locate high water age areas and optimal flushing points.

2. Reduce Disinfectant Demand

Recommendations to reduce disinfectant demand are similar to those described above to reduce water age. Replacement of old cast iron pipes would lead to a reduction of disinfectant demand on the distribution side, but realistically can only be accomplished over a prolonged period of time. In the meantime, hydrant flushing is the most viable means of reducing disinfectant demand in piping. From a storage standpoint, all reservoirs and tanks should be regularly inspected and maintained to prevent entrance of any outside contamination that would contribute to disinfectant demand. Cleaning of all tanks is recommended as well as investigation into stagnant water prevention options.

3. Water Modeling of Recommendations [yet to be completed]

Determine best flushing locations to reduce water age

Evaluate changes in storage tank operations to reduce water age

Valves to close/add to improve pressure zones, reduce recirculation

Optimization of pump station use – smaller pumps? Shut down?

Evaluate booster disinfection

D. BOOSTER DISINFECTION

Decreasing chlorine feed at the WTP and adding booster disinfection in the distribution system is an alternative intended to reduce the reaction time at higher concentrations of chlorine to reduce DPB formation. Extensive looping and branching within the existing system complicate how to best implement and utilize booster disinfection. Water system modeling is recommended to gage the effectiveness of existing feed point locations and dosages. Further discussion and details will be provided when the distribution evaluation results are available.

E. CATEGORIZATION OF ACTIONS

Considering that the Flint River is being used as the water source only until the KWA supply is available (expected late 2016), options to address high THM formation that require new construction or extensive time to implement are not preferred. On the other hand, the City understands THM sample results to date dictate that some action is necessary. Two categories have been developed to assist the City in prioritizing actions to take. Stage 1 consists of actions that can be completed relatively quickly without major construction and Stage 2 actions are either long term actions or solutions requiring major construction. Stage 1 actions are to be completed first followed by evaluation of the results prior to consideration of Stage 2 actions. Grouping of actions are shown in the table below.

TABLE 11 – ACTION PLAN			
	Action	Purpose	Status
Stage 1	Hire water consultant to complete 'water audit'	Third party review of actions and operations to make sure no options are being missed	Complete
	Increased water quality monitoring – obtain THM and TOC analyzers	Provide information needed to adjust WTP operations to match changing raw water quality	Complete
	Troubleshoot ozone feed system	Reduce chlorine feed and increase TOC removal	Complete
	Bench scale jar testing	Optimize treatment process and evaluate possible modifications	Complete
	Discontinue softening bypass	Reduce chlorine demand	Complete
	Disinfect filters	Reduce chlorine demand	Complete
	Increased water main flushing	Reduce water age / stagnant water	Ongoing
	Water system modeling evaluation	Determine areas with high water age and reasons	Partially complete
Stage 2	Modify booster disinfection feeds, if appropriate	Decrease water age	Not yet evaluated
	Repair ozone system	Reduce chlorine feed and increase TOC removal	Complete
	Continue increased water main flushing	Reduce water age / stagnant water	Ongoing
	Replace filter media with GAC	Reduce TOC and chlorine demand	Complete
	Continue valve replacements based on water model	Reduce water age / stagnant water	Ongoing
	Convert to lime and soda ash softening	Increase TOC removal	Future consideration
	Change disinfectant to chlorine dioxide	Reduce THMFP	Future consideration
	Install pre-oxidant feed at intake	Optimize ozone disinfection, reduce chlorine	Future consideration
	Implement coag. & floc. polymer aids, if appropriate	Increase TOC removal	Future consideration
	Place priority on replacing cast iron water mains	Reduce chlorine demand	Ongoing

Samples were taken August 18th, 2015 for the latest round of quarterly testing. The City has implemented many of the Stage 1 actions and installed GAC media in the filters and THM test results have significantly improved (decreased) since May and August 2014. All sampling results are shown on Chart 1.

Subject: RE: FYI

Well Flint's water is sure getting beat up in the press! We are picking up the sample bottles today and will return them back to the Flint Lab today, which they send them into the state run lab. We should have the results back around Wed, Thursday day of next week. With all the regulations and oversight on drinking water I wouldn't think we have a problem but always best to check and be sure. I will keep on the issue and update as soon as I receive anything back or any further information.

Thanks,
Brian

Legionella strikes again! This time the outbreak is near Chicago, where three area schools were recently evacuated due to a Legionella bacteria scare. **Don't let this happen to your facility.** Goodway has the tools to help you stay on top of cooling tower maintenance - and ahead of legionella outbreaks.

Act today and get **10% off** when you order and while supplies last. Call us at 1-888-364-7753 and mention code **EMG09155** or use online when you ask for a quote.

Offer expires 10/09/15. Maximum total discount is \$200. While supplies last.

Basin cleaning made simple!

One of the smartest ways to keep legionella at bay is to keep cooling tower basins clear of mud, sludge and algae, all areas where bacteria flourish. The TowerVac® helps you easily stay on top of regular maintenance.

[More information](#)

Cleaner, safer tower fill.

Dirty, scaled up tower fill is an optimal breeding ground for Legionella, the bacteria that causes Legionnaires disease. Now you can quickly clean these dangerous and unsightly scale deposits.

[More information](#)

Quick, rechargeable applicator.

The MP-50 is designed for the application of anti microbials and disinfectants. It is battery powered, rechargeable and has a 95 PSI output pressure. The sturdy tank holds up to 5 gallons of chemicals.

[More Information](#)

Industrial performance.

Goodway's GPW-1200 industrial pressure washer is super portable and offers a siphon injector to apply speciality cleaners. It also features an industrial grade design and high quality performance for getting things done.

Subject: Flint State Office Building potable water

Mike,

I have researched the drinking water supplied to the Flint Facility and came up with a couple of plans we could consider as we move forward. The City of Flint began operation of their water treatment plant full time with the Flint River as the source on April 25, 2014. The water source before that date was from the Detroit Water Department. The excessive cost increases and reliability issues made the City of Flint explore and change their water source to the treatment plant. The City of Flint has signed agreements to purchase the needed 83 million gallons a day from the Karegnondi Water Authority after the completion of the new system in the fall of 2016, which will dramatically improve the water quality supplied to the water plant. The raw water will be pulled from Lake Huron instead of the Flint River after the connection into the Karegnondi Water Authority system.

The City of Flint hired a firm to investigate and analyze the city's water source and practices in response to the May 2015 sample results, which resulted in a violation of the Trihalomethane MCL limit. The operation evaluation was extensive and produced a 23 page report. The average of all eight sample sites in August 2014 was 142.1 ug/l and the most recent average of samples taken in August 2015 was 63.6 ug/l. The MCL defined by the EPA is 80 ug/l. Flint has now completed tests for 6 quarters and a straight annual running average applies. Based on the samples taken on August 18, 2015 there are no longer any sites in violation of the THM MCL limit. The up to date MOR (monthly operating reports), the 2014 Consumers Annual Report on Water Quality and the Operation Evaluation Report conducted by Lockwood, Andrews & Newnam Inc. on August 27 2015 shows no current violations with the City of Flint supplied potable water to its consumers. The report did make several recommendations in the areas of water source improvements, treatment process and improvements to the distribution system to help maintain the water quality.

We have contacted Mr. Glasskow with the City of Flint Water Department and requested our water be tested on site for the 10 regulated contaminants including Trihalomethanes and lead as well as offered our site to be a documented water sample test site for the cities routine monthly testing. We are hoping by doing this we will built a better working relationship with the city of Flint as well as have a better understanding of the characteristics of our on-site water, backed with regular test results. Although the city has committed to performing the water test the date has not been set but we are hoping the city will send an operator out by next Tuesday 09/22/15 at the latest.

The idea to supply bottled water to the facility was during the cities violation period to help protect the tenants and visitors to the facility, even though the supplied water was reported to be safe for drinking. With 2 floors occupied we paid an average of \$150.00 per month for the water service. I am sure this number will double if not triple considering we have 5 floors occupied to date. After researching all the data matched with the monthly test samples, which are set

and monitored by EPA and MDEQ, I would suggest we discontinue providing the bottled water. To be customer friendly and help maintain our above average customer service practices we could maintain 1 bottle water dispenser in the facility lobby area and evaluate at a later date of its need. The only reason I could suggest staying with the bottled water on all floors would be a positive test result after the site test this week or early next, which would be highly unlikely, or to help avoid any future issues that could result from a less than stable raw water source such as the Flint River. If we did decide to continue the bottled water program at the Flint Facility I would suggest we evaluate the program and its need after the city starts to pull water from the Lake Huron source, which should be a higher and more stable source of water to be treated.

I know we need to make a decision if we keep the bottled water or not at the facility so I hope some of this information will help make that decision and also give us the reasons and supporting documentation on how that decision was made. I hope it helps!

Thanks,
Brian

2014 Consumers Annual Report on Water Quality

The City of Flint Department of Utilities is dedicated to providing high quality drinking water to the residents of the community. The Consumers Annual Report on Water Quality provides important information about your drinking water. This report includes information about the source of the water, health information, a chart summarizing United States Environmental Protection Agency (USEPA) required testing results, and a table giving explanations of important terms to understand when viewing the test results. The Flint Water Plant & Facilities operates and maintains a certified drinking water laboratory to assure compliance with all state and federal regulations and is committed to prompt and thorough notification to the consumers if there is any reason for concern about the quality of the drinking water.

Information about your drinking water is available at the City of Flint web page on the Internet at www.cityofflint.com or by calling the Flint Water Plant & Facilities at (810) 787-6537. The Safe Drinking Water Hotline at (800) 426-4791 is a resource for health related questions and water quality issues. General drinking water information can be found on the USEPA web site at www.epa.gov/safewater/.

2014 Key to the Detected Contaminant Tables

Symbol	Abbreviation for	Definition/Explanation
>	Greater than	
AL	Action Level	The concentration of a contaminant, which, if exceeded, triggers treatment or other requirements which a water system must follow.
HAA5	Haloacetic Acids	HAA5 is the total of bromoacetic, chloroacetic, dibromoacetic, dichloroacetic, and trichloroacetic acids. Compliance is based on the total.
LRAA	Locational Running Annual Average	
MCL	Maximum Contaminant Level	The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.
MCLG	Maximum Contaminant Level Goal	The level of contaminant in drinking water below which there is no known or expected risk to health.
mg/L	Milligrams per Liter	A milligram = 1/1000 gram 1 milligram per liter is equal to 1ppm
MRDL	Maximum Residual Disinfectant Level	The highest level of disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
MRDLG	Maximum Residual Disinfectant Level Goal	The level of a drinking water disinfectant below which there is no known or expected risk to health. MRLDG's do not reflect the benefits of the use of disinfectants to control microbial contaminants.
n/a	Not Applicable	
ND	Not Detected	
NTU	Nephelometric Turbidity Units	Measures the cloudiness of water.
pCi/L	Picocuries per Liter	A measure of radioactivity. Picocurie (pCi) means the quantity of radioactive material producing 2.22 nuclear transformations per minute.
ppb	Parts Per Billion (one in one billion)	The ppb is equivalent to micrograms per liter. A microgram = 1/1000 milligram.
ppm	Parts Per Million (one in one million)	The ppm is equivalent to milligrams per liter. A milligram = 1/1000 gram.
RAA	Running Annual Average	
TT	Treatment Technique	A required process intended to reduce the level of a contaminant in drinking water.
TTHM	Total Trihalomethanes	Total Trihalomethanes is the sum of chloroform, bromodichloromethane, dibromochloromethane and bromoform. Compliance is based on total.

Water Source

From January 1st through April 30th 2014, The City of Flint purchased drinking water from the Detroit Water & Sewerage Department (DWSD) which operates several drinking water facilities. Following treatment to remove impurities, the water is pumped by DWSD to the Flint Water Plant, where the water is then monitored and distributed throughout the City.

The source water comes from the lower Lake Huron watershed. The watershed includes numerous short, seasonal streams that drain to Lake Huron. The Michigan Department of Environmental Quality in partnership with the U.S. Geological Survey, the Detroit Water & Sewerage Department, and the Michigan Public Health Institute performed a source water assessment in 2004 to determine the susceptibility of potential contamination. The susceptibility rating is a seven-tiered scale ranging from "very low" to "very high" based primarily on geologic sensitivity, water chemistry, and contaminant sources. The Lake Huron source water intake is categorized as having a moderately low susceptibility to potential contaminant sources. The Lake Huron water treatment plant has historically provided satisfactory treatment of this source water to meet drinking water standards. If you would like to know more information or a complete copy of the report, contact the City of Flint Water Plant at (810) 787-6537.

General Information

In order to ensure that tap water is safe to drink, the EPA prescribes regulations, which limit the amount of certain contaminants in water provided by the public water systems. The Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water, which must provide the same protection for public health. Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline (800-426-4791).

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water include:

- ◆ **Microbial contaminants;** such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- ◆ **Inorganic contaminants;** such as salts and metals, which can be naturally-occurring or result from urban storm water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- ◆ **Pesticides and herbicides;** which may come from a variety of sources such as agriculture, urban storm water runoff, and residential uses.
- ◆ **Organic chemical contaminants;** including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations, urban storm water runoff, and septic systems.
- ◆ **Radioactive contaminants;** which can be naturally occurring or be the result of oil and gas production and mining activities.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Drinking Water Hotline (1-800-426-4791).

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Infants and young children are typically more vulnerable to lead in drinking water than the general population. It is possible that the lead levels at your home may be higher than at other homes in the community as a result of materials used in your home's plumbing. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The City of Flint Department of Utilities is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. If you are concerned about elevated lead levels in your home's water, you can minimize your potential exposure to lead in your water by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

**Lake Huron Water Treatment Plant
2014 Regulated Detected Contaminants Tables**

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Allowed Level MCL	Highest Level Detected	Range of Detection	Violation yes/no	Major Sources in Drinking Water
-----------------------	-----------	------	------------------	-------------------	------------------------	--------------------	------------------	---------------------------------

Inorganic Chemicals – Monitoring at the Plant Finished Water Tap

Fluoride	5/13/14	ppm	4	4	0.59	n/a	No	Erosion of natural deposits; Water additive, which promotes strong teeth; Discharge from fertilizer and aluminum factories.
Nitrate	5/13/14	ppm	10	10	0.31	n/a	No	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits.

Disinfection By-Products – Monitoring in Distribution System Stage 2 Disinfection By-Products

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Allowed Level MCL	Highest LRAA	Range of Detection	Violation yes/no	Major Sources in Drinking Water
Total Trihalomethanes (TTHM)	2014	ppb	n/a	80	33.0	10.0 - 48.5	No	By-product of drinking water chlorination
Haloacetic Acids (HAA5)	2014	ppb	n/a	60	15.8	8.0 - 19.0	No	By-product of drinking water disinfection

Disinfectant Residuals Monitoring in DWSD Distribution System

Regulated Contaminant	Test Date	Unit	Health Goal MRDGL	Allowed Level MRDL	Highest RAA	Range of Detection	Violation yes/no	Major Sources in Drinking Water
Total Chlorine Residual	Jan-Dec 2014	ppm	4	4	0.82	0.64-0.94	No	Water additive used to control microbes

Regulated Contaminant	Treatment Technique							Typical Source of Contaminant
Total Organic Carbon (ppm)	The Total Organic Carbon (TOC) removal ratio is calculated as the ratio between the actual TOC removal and the TOC removal requirements. The TOC was measured each month and because the level was low, there is no requirement for TOC removal.							Erosion of natural deposits

2014 Turbidity – Monitored every 4 hours at Plant Finished Water Tap

Highest Single Measurement Cannot exceed 1 NTU	Lowest Monthly % of Samples Meeting Turbidity Limit of 0.3 NTU (minimum 95%)	Violation yes/no	Major Sources in Drinking Water
0.19 NTU	100%	No	Soil Runoff
Turbidity is a measure of the cloudiness of water. We monitor it because it is a good indicator of the effectiveness of our filtration system.			

2014 Microbiological Contaminants – Monthly Monitoring in Distribution System

Regulated Contaminant	MCLG	MCL	Highest Number Detected	Violation yes/no	Major Sources in Drinking Water
Total Coliform Bacteria	0	Presence of Coliform bacteria > 5% of monthly samples	0	No	Naturally present in the environment.
E.coli Bacteria	0	A routine sample and a repeat sample are total coliform positive, and one is also fecal or E. coli positive.	0	No	Human waste and animal fecal waste.

2011 Lead and Copper Monitoring at Customers' Tap

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Action Level AL	90 th Percentile Value*	Number of Samples Over AL	Violation yes/no	Major Sources in Drinking Water
Lead	2011	ppb	0	15	< 2.0	0	No	Corrosion of household plumbing system; Erosion of natural deposits.
Copper	2011	ppm	1.3	1.3	0.10	0	No	Corrosion of household plumbing system; Erosion of natural deposits; Leaching from wood preservatives.

*The 90th percentile value means 90 percent of the homes tested have lead and copper levels below the given 90th percentile value. If the 90th percentile value is above the AL additional requirements must be met.

2014 Radionuclides

Regulated Contaminant	Test Date	Unit	Health Goal MCLG	Allowed Level MCL	Level Detected	Violation yes/no	Major Sources in Drinking Water
Combined Radium Radium 226 & 228	5/13/14	pCi/L	0	5	0.86 + or - 0.55	No	Erosion of natural deposits

2014 Special Monitoring

Contaminant	MCLG	MCL	Level Detected	Source of Contamination
Sodium (ppm)	n/a	n/a	4.78	Erosion of natural deposits

EXECUTIVE SUMMARY

Environmental Protection Agency (EPA) and Michigan Department of Environmental Quality (MDEQ) regulations require that public water suppliers test drinking water quarterly throughout the distribution system for disinfectant by-products (DBP's). Two categories of DBP's, tri-halomethanes (THM) and halo-acetic acids (HAA5), are regulated and must be tested for. The City of Flint began operation of their water treatment plant (WTP) full time with the Flint River as the source on April 25, 2014. Since that time, six quarters of samples taken have resulted in annual average violations for total THM. Prior to the first violation (Nov. 2014), the City hired Lockwood, Andrews & Newnam, Inc. (LAN) to complete this Operational Evaluation Report (OER) in conformance with EPA guidelines with the goal to determine the cause(s) of high levels of THM and evaluate possible solutions.

The EPA promulgated the Stage 2 Disinfectants and Disinfection By-Products Rule (DBPR) in January 2006 which set maximum contaminant levels (MCLs) for total trihalomethanes (TTHM) and HAA5 based on an annual running average, tested quarterly, for a given sampling location. The City of Flint reports levels from 8 sampling test locations. Of the six quarterly sampling cycles since Flint began operating the WTP full time, HAA5 levels have been acceptable but TTHM levels have exceeded the MCL. One sampling site was in violation following the May 2015 sampling cycle and results from August 2015 sampling indicate all sites are now within compliance.

A number of issues were identified as possibly contributing to the initial high THM levels measured.

1. Inefficient ozone system functionality which led to increased chlorine feed.
2. Upstream source influences in terms of increased chlorine demand.
3. Bypass stream around softening contributed to chlorine demand and increased total organic carbon (TOC) levels in the effluent.
4. Unlined cast iron pipes in the distribution system contributing to chlorine demand.
5. High water age in the distribution system due to:
 - a. Broken valves causing less than ideal flow patterns
 - b. Inefficient pump station pressure zones
 - c. Water storage volumes in excess of that needed for today's demands
 - d. Oversized water mains
 - e. Low water demands
6. High chlorine demand in filters.
7. High THM formation potential (THMFP) in source water.
8. Less than optimal removal of THM precursors.

A graphical representation of how the factors above relate to the timing of THM compliance sampling is shown as Table 1. Compliance sampling dates are hatched. Each row in Table 1 describes a factor that can lead to increased THM levels and the table defines when each of those factors applied. Note the convergence of nearly all factors around the second sampling period on August 21, 2014 to create what appears to have been a worst case scenario. The table also shows that the factors listed as those that the City can control have been addressed prior to 2015 sampling periods. Monthly operating report data up to August 1, 2015 is depicted on the Table.

TABLE 1 - SUMMARY OF NEGATIVE INFLUENCES ON THM COMPLIANCE SAMPLING

FACTOR	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec
Softening bypass stream over 20% of plant flow												
Ozone system not feeding optimally												
Using full water storage capacity of WSR & CSR												
Chlorine feed at WTP 7.0 mg/l or more												
Ferric chloride feed rate less than 10 mg/l Fe3+												
Raw water temp 23 degrees C or more												
Raw water TOC levels above 8.0 mg/l												
Raw water coliform over 5000 counts/day												
Positive bacteria test in dist. system (boil water notice)												
Water demand less than 15 mgd												
2014												
Softening bypass stream over 20% of plant flow												
Ozone system not feeding optimally												
Using full water storage capacity of WSR & CSR												
Chlorine feed at WTP 7.0 mg/l or more												
Ferric chloride feed rate less than 10 mg/l Fe3+												
Raw water temp 23 degrees C or more												
Raw water TOC levels above 8.0 mg/l												
Raw water coliform over 5000 counts/day												
Positive bacteria test in dist. system (boil water notice)												
Water demand less than 15 mgd

ACTION PLAN

The City of Flint has signed an agreement with the Karegnondi Water Authority (KWA) to purchase raw water drawn from Lake Huron. The KWA system is currently under construction and expected to be operational by late 2016. The water supply from Lake Huron will have entirely different water quality characteristics from the Flint River and those characteristics are expected to yield drastically reduced DPB formation. With that, non-structural options to help reduce THM levels are much preferred over solutions requiring new construction. Therefore, two categories of actions have been devised: Stage 1 being actions that can be completed relatively quickly without major construction and Stage 2 consisting of either long term actions or solutions requiring major construction. The City is actively working to complete Stage 1 actions as soon as possible. Stage 2 actions are to be implemented only if Stage 1 actions are ineffective in adequately reducing TTHM levels and therefore Stage 2 is contingent upon the outcome of Stage 1. As of the date of this report, status updates for action items are shown in red.

Stage 1 – Immediate Actions

- Hire third party water quality expert to complete independent 'water audit'
 - The City hired Veolia Water to review all water quality related operations, procedures, actions taken and planned responses. Recommendations from Veolia were provided in a report and technical memo dated 3/12/15 and 3/30/15 respectively.
- Obtain an in house THM analyzer to allow regular operational monitoring of THM levels
 - THM analyzer was installed 2/17/15.
- Hire ozone system manufacturer to troubleshoot ozone system
 - Manufacturer and controls programmers performed on site evaluations followed by corrective modifications in January 2015.
- Bench scale jar testing
 - Match existing process and assess possible areas of improvement
 - Existing process was simulated and an evaluation of existing chemical feed dosages was completed by LAN.
 - Existing process TOC profile was developed by Veolia.
 - Simulate potential modifications to treatment process
 - Soda ash softening evaluation completed and PAC feed testing was completed by LAN.
 - Evaluate coagulation and flocculation polymer aid feeds to assist with TOC removal
 - Evaluations of polymer aids completed by LAN and PVS Technologies.
- WTP operational changes
 - Discontinue softening bypass stream to reduce chlorine demand
 - Operational directive has been set to soften no less than 80% of flow.
 - Disinfection of filter beds to reduce chlorine demand
 - Utility Service Group contracted by City and condition assessment completed. Controls improvements have been completed.
 - Begin coagulation and flocculation polymer aid feeds to assist with TOC removal if bench scale test results are positive
 - Jar testing completed to date has not indicated a meaningful benefit to feeding coagulation/flocculation polymer aids. Increased ferric doses have been implemented at the WTP based on positive jar test results.

- Increase water main flushing efforts to minimize stagnant water
 - Flushing efforts are ongoing as needed based on chlorine residual levels measured in the system.
- Water system modeling to identify areas with high water age and potential solutions
 - The water model has been improved and preliminary results, including system wide water age, have been produced. Water demand updates and reconciliation with operator's data are underway with expected completion in mid June, 2015.
 - Cedar Street Pump Station potential recirculation
 - Water model analysis to be completed Sept-Oct, 2015.
 - West Side Pump Station potential recirculation
 - Water model analysis to be completed Sept-Oct, 2015.
 - Storage tank volume use
 - Operating levels of West Side and Cedar Street reservoirs have been lowered to reduce water age. Possible elimination of WS or CS to be evaluated Sept-Oct, 2015.
 - Possible broken closed valve locations
 - Model has been updated with known broken valve locations. Model results are being evaluated for indications of other possible broken valves. City has also initiated valve assessment program.
 - Locations in need of flushing
 - High water age areas have been identified in the water model. Further evaluation is expected to be done by November 1, 2015 to determine most effective flushing points.

Stage 2 – Contingent Actions

- Replace filter media with granular activated carbon (GAC) media
 - Filter anthracite media was replaced with GAC media July – August 2015.
- Fix ozone system
 - Repairs have been made to gauges and programming and the system is producing proper ozone and functioning under manual operation. Further minor repairs are planned for the 1st quarter 2015 to allow automatic operation.
- Start feeding coagulation and flocculation polymer aids to lower TOC, if not completed in Stage 1
 - Polymers evaluated by LAN did not demonstrate notable benefit.
 - PVS Technologies evaluated a proprietary polymer that showed little benefit.
- Convert to lime and soda ash softening
 - Option deemed unnecessary due to effectiveness of new GAC media.
- Change disinfectant to chloramine or chlorine dioxide until KWA
 - Option deemed unnecessary due to effectiveness of new GAC media.
- Install pre-oxidant feed (permanganate) at intake to optimize ozone disinfection
 - Option deemed unnecessary due to effectiveness of new GAC media.
- Implement advanced treatment for THM precursor removal
 - Option deemed unnecessary due to effectiveness of new GAC media.

- Increased main flushing based on water modeling results
 - Water model analysis to be completed Sept-Oct, 2015.
- Continue valve replacements with water model assistance
 - Water model analysis to be completed Sept-Oct, 2015.
- Emphasize cast iron pipes on water main replacement priority list
 - Flint has bid replacement of over 2 miles of 24" steel pipe along Dupont and Bishop Streets to be completed when and if the City can allocate funds. The water main section is considered a critical transmission main, and is expected to contribute to decreases in water age when complete.

THM samples have been taken and tested 6 times for regulatory reporting since the City began using the Flint River for supply. Numerous additional sets of samples have been taken by the City for internal operational monitoring. Compliance samples were taken in May 2014, August 2014, November 2014, January 2015, February 2015, May 2015, and August 2015. The average of all eight sample sites in August 2014 was 142.1 ug/l and the most recent average of samples taken in August 2015 was 63.6 ug/l. The MCL defined by the EPA is 80 ug/l.

I. BACKGROUND

The City of Detroit Water and Sewer Department (DWSD) has historically provided drinking water for the City of Flint and Genesee County. In the late 1990's growing concern regarding the reliability of the DWSD supply prompted the City of Flint to upgrade their existing water treatment plant (WTP). Those improvements, defined as Phase I, were completed in 2005 and were intended to allow the Flint WTP to operate, using the Flint River as the source, for an extended period of time in the event that supply from the DWSD was temporarily interrupted. Additionally, the Phase I improvements set the stage for Flint to break free from dependence on the DWSD supply and water charges over which they had no control.

A. WATER SUPPLY TRANSITION

1. Detroit Water and Sewer Department (DWSD)

Prior to spring of 2014, the Genesee County and Flint region had been provided drinking water by the DWSD. However, due to excessive cost increases and reliability issues with the DWSD system other options had to be explored.

2. Karegnondi Water Authority (KWA)

In 2010 the Karegnondi Water Authority (KWA) was formed for the purpose of developing a new water supply from Lake Huron to serve the region in lieu of the DWSD supply and the City of Flint elected to join. The KWA expects the new system which is currently being constructed to become operational by the fall of 2016.

3. Flint River – Interim Period

With a renewing water supply agreement between Flint and the DWSD being terminated by the DWSD (effective April 30, 2014) and the KWA system not expected to be operational until late 2016, the City of Flint decided to initiate operation of the existing WTP full time utilizing the Flint River as the interim water source. A variety of WTP improvements were necessary for the Flint plant to become a full time plant. For purposes of this report, Phase II improvements to the Flint WTP are improvements intended to allow the plant to operate full time with either the Flint River as the source or the KWA supply as the source.

B. TTHM VIOLATIONS

The EPA and MDEQ method of determining if TTHM sample results exceed the MCL uses a locational running annual average (LRAA). Flint's first TTHM violation was cited by the MDEQ following the third cycle of sampling completed in November 2014. Of the 8 sampling sites, 4 were in violation. At that time the MDEQ used the following calculation for determining if the MCL had been violated:

$$(2 \times \text{current quarter value} + \text{previous 2 quarter values}) / 4 = \text{Operational Evaluation Value}$$

Flint has now completed tests for 6 quarters and a straight annual running average applies. Based on samples taken on August 18, 2015 there are no longer any sites in violation of the THM MCL limit. The August 2014 average across all test sites was 142.1 ug/l and the August 2015 average is 63.6 ug/l. Test results are tabulated in Table 2. HAA5 sample results are shown in Table 3, of which Flint has had no violations.

C. WATER TREATMENT PLANT RECENT IMPROVEMENTS & STATUS

1. Phase I WTP Improvements

Since 1965, the Flint WTP has remained a secondary or backup supply system to the DWSD primary supply. Typically the secondary supply for a public water system is expected to be needed only during emergency situations and normally is designed for short term operation such as providing the average daily demand for a few days. Conversely, Phase I improvements were designed with the intent to upgrade the Flint WTP in order to allow for an extended short term period (6 weeks) because of the perceived high risk that the DWSD supply would fail and remain out of service for an

extended duration. Regardless, the Flint WTP was still intended to serve as a standby plant and as such the Phase I improvements lacked redundancies that would be required for a primary supply WTP.

2. Past Pilot Study & Testing

During design of the Phase I improvements a treatability study was completed by Alvord, Burdick & Howson, LLC (AB&H) in 2002. The Treatability Study evaluated the current treatment processes that are in place at the Flint WTP today with the Flint River as the source. The report recommended the following:

TABLE 4 – 2002 WTP TREATMENT RECOMMENDATIONS

Treatment	Purpose	Point of Application	Dosage (mg/l)
Sodium permanganate	Zebra mussel control	Intake	0.3
Ozone	Taste & odor removal, disinfection	Diffusor basin	1.5
Ferric chloride	Coagulation	Rapid mix	40
Coag aid polymer	Turbidity & TOC removal	Rapid mix	2.0
Floc aid polymer	Turbidity & TOC removal	Floc basin	0.05
Lime	Softening	Softening basin	175
Soda ash	Softening	Softening basin	52
Carbon dioxide	pH adjustment	Recarb basin	37
Media filters	Filtration	N/A	Na
Chlorine	Disinfection	Filter effluent	1.0

Of the recommended items, zebra mussel control, coagulant and flocculation polymer aids, and soda ash feed have not been incorporated into the treatment process.

3. Phase II WTP Improvements for Full Time Operation

Phase II WTP improvements are those needed to convert the Flint WTP from a back-up supply to a primary supply plant. A number of improvements have already been constructed as they were necessary to operate full time when treating water from the Flint River. The improvements under the title of Phase II that have been completed or are nearly complete include installation of the future raw water feed connection point and valving for the KWA supply, upgrades to the lime sludge lagoon, the lime sludge lagoon decant and disposal system, decant pump station and force main, installation of mid-point chlorination before filtration, new oxygen / nitrogen storage facilities for the ozone system, and upgrade of the electric feed sub-station.

Additional improvements to the Flint WTP that are to be completed to become part of the normal treatment process using water supplied by the KWA are:

- New coagulant feed system
- Electrical
 - Pump Station #4 upgrades (under construction)
 - SCADA and controls upgrades
 - Filter transfer pump station feeders
- Pump replacements and VFD installation in the low and high service pump station (under construction)
- Filter transfer pump station to Dort Reservoir
- Facility security improvements

II. SOURCE WATER EVALUATION

A. DATA ANALYSIS

Based on past data collected and the 2002 Treatability Study by AB&H, the Flint River water quality varies seasonally with higher hardness and alkalinity experienced in the winter. Higher magnesium concentrations are also experienced in the winter, adding difficulty to the settling process due to neutrally buoyant floc. General water quality average characteristics recorded for the 2002 Treatability Study as compared with average characteristics recorded in 2014 are shown in Table 5 below.

TABLE 5 – FLINT RIVER WATER QUALITY CHARACTERISTICS							
Period	Turbidity NTU	TOC Mg/l	Alk. Mg/l	Hardness Mg/l as CaCO₃	pH	Total Col. Count/day	THMFP Mg/l
2001 Apr–Oct	7.9	9.4	215	272	8.1	870-1230 (7300 max)	410
2014 May–Oct	8.3	10.3 5/22/14	207	252	8.2	1900-9000 (48,300 max)	187

The Flint River characteristics do not appear to have changed significantly over the past 10+ years. Note that near the time Flint initiated withdrawal from the Flint River investigation by City staff revealed a sewer leak upstream of the plant that may have contributed to the total Coliform count. The leak was subsequently repaired.

B. CONCLUSIONS

Considering the minor changes in Flint River water quality, much of the information contained in the 2002 Treatability Study by AB&H remains relevant today. Data from that report assumed to be consistent today include the following:

- Flint River is influenced by groundwater from a dolomitic aquifer
- Hardness varies seasonally with higher hardness and alkalinity in the winter
- Hardness, alkalinity, magnesium concentrations tend to be reduced by run-off

In development of the 2002 Treatability Study, processes were simulated which resulted in low THM levels. Therefore, information contained in that report was used to assist with establishing a baseline jar testing procedure as discussed further in Section III.

III. TREATMENT PROCESS EVALUATION

A. EXISTING PROCESS DESCRIPTION

The existing WTP consists of an intake with screening from the Flint River, low lift pumping, ozonation, rapid mix, flocculation, settling, softening, recarbonation, filtration, storage and high service pumping. A process diagram is shown as Figure 1.

1. Intake

A 72" diameter pipe draws water from the Flint River through 2 traveling screens to the low lift pump structure. No chemicals are currently fed for Zebra mussel control or pre-oxidation as recommended by the 2002 Treatability Study. Manual removal of zebra mussels is more economical than installation of chemical feed equipment considering the short term need.

2. Ozone

There are 2 ozone generators designed to provide adequate ozone for a WTP flow of up to 36 mgd. There are 3 ozone contact basins. The ozone generators were designed to produce 900 lbs/day at 10% concentration and up to 1300 lbs/day at 6% concentration each. Prior to recent repairs, readings indicated a production rate of approximately 700 lbs/day at 4% concentration. It is possible that before the recent improvements the ozone feed might not have been optimized. In fact, it is known that less than optimal ozonation previously led to increased chlorine feed which would have contributed to THM formation.

3. Rapid Mix

East and West rapid mix chambers allow chemical feed prior to the flocculation basins. Each rapid mix chamber is equipped with a 5 hp mixer.

4. Coagulation / Flocculation

The WTP contains two equally sized flocculation basins, east and west, and each basin provides tapered or gradually slowed mixing from inlet to outlet. There are fifteen 2 hp mixers for each basin with VFDs to control mixing speed. The 2002 Treatability Study recommended feeding both coagulation and flocculation polymer aids. Neither polymer aid is being used today because turbidity and TOC removals have been sufficient to meet regulatory requirements.

5. Settling

Primary clarification takes place within 3 basins containing plate settlers. The settlers are operating as designed but are due for cleaning.

6. Softening

Again, there are two basins for softening: east and west. Each basin is 120' in diameter and contains a solids contact softening unit. Each softening basin/unit has a design capacity of 18 mgd. The east clarifier has an effluent weir imbalance that the City intends to fix when low demands allow for construction. Low lift pumping limitations, flow control to the basins, malfunctioning polymer feed pumps, control restrictions on residuals removal, and fluctuating demands have made it difficult for WTP staff to stabilize the softening process. Softening is accomplished by feeding lime. The decision was made by the City not to feed soda ash in order to remove non-carbonate hardness because acceptable hardness levels could be achieved with lime feed only and softening is short term until Lake Huron water becomes available. Lime and soda ash softening is a possible consideration to assist with TOC removal and thus reduce THM formation.

7. Recarbonation

Recarbonation for pH adjustment is accomplished in east and west recarbonation basins between and to the north of the softening basins. Carbon dioxide storage and feed equipment is located west of the recarbonation basins.

8. Filtration

Filtration is accomplished with 12 dual media filters, equally sized and designed to filter 3.0 mgd each. Sand and anthracite media was replaced in July and August 2015 with new sand and GAC at depths of 12" and 18" respectively. Prior to spring of 2014, the filters had been operated intermittently over the years due to the standby nature of the WTP and until recently, chlorine injection took place downstream of the filters. It is possible some microbial growth had developed in the filters leading to increased chlorine demand which could have contributed elevated TTHM. Late 2014, the City recently hired a contractor to upgrade the electrical controls for the filters and that work has been completed.

9. Disinfection

Disinfection is provided by ozonation and by feeding chlorine. Ozonation occurs at the front end of the WTP. Chlorine is fed prior to filtration and prior to finish water storage / high service pumping. The intermediate chlorine injection location was recently constructed under the Phase II, Segment 1 contract.

10. Clear Well & Pumping

The pump building sits adjacent to a 3 MG clear well and contains both low and high service pumps.

B. JAR TESTS / EXPERIMENTS

1. Approach

There are several well practiced methods by which DBPs can be reduced. First, the disinfectant can be changed to an alternate that has a lower tendency to form DBPs. Second, additional treatment systems such as activated carbon or air stripping (depending on the nature of the precursors) can be added to remove DBP precursors. Lastly, the existing treatment processes can be optimized to remove as much DBP precursor as possible. Of these options, optimizing existing treatment processes is the only strategy that does not require the construction of new and expensive facilities. It is anticipated that Flint will be receiving Lake Huron water by late 2016 and this water will have a completely different chemistry from the Flint River. Major process changes instituted to address THM levels using Flint River water are likely to be unnecessary for Lake Huron water and may even be inappropriate. Therefore, those options which require addition of new treatment processes are undesirable at this time. In recognition of this upcoming change in water source, efforts for this study have concentrated on improving the existing processes, rather than adding new ones. New treatment processes will only be recommended if operational changes to the existing treatment train prove ineffective.

Recent sample test results suggest that most of the DBPs are formed in the distribution system rather than within the treatment plant. Therefore, the most logical approach is to reduce the DBP formation potential (DBFP) rather than simply lowering the levels of DBPs leaving the plant. During bench scale testing, formation potential (FP) levels were the primary indicator of success or failure of proposed process modifications.

2. Protocol

Bench scale pilot testing is intended to reflect actual plant operating and hydraulic conditions so the bench scale treatment units were sized based on various dimensionless factors to ensure the pilot treatment matched the actual system. Bench scale ozonation was not practical due to time and cost limitations. Therefore, water samples were withdrawn from the plant ozone basin effluent. These samples were transported to the laboratory and dispensed into square testing jars. The jars were used to simulate rapid mix, three-stage flocculation, and settling. Rapid mix and flocculation conditions were matched to the plant based on "Gt" values. The "C" value is a measure of the mixing intensity and is a function of mix time, viscosity of the liquid, and mixing power applied to the water. "Gt" then, is a size scaling factor where time has been accounted for. Settling time was scaled to match the shorter settling depth of the testing jars. After settling, samples were decanted from the test jars. The decanted samples were then lime softened; softening conditions were similarly matched on the basis of "Gt". Carbon dioxide was sparged into the samples to reduce the pH. The water was then vacuum filtered through filter paper, sized to simulate the plant's dual media filters. The samples were dosed with excess chlorine and allowed to react for seven days at 25° C before testing for DBPs to determine the formation potential.

The following conditions were applied during testing to properly match small scale testing to actual plant processes.

TABLE 6 – BENCH SCALE TEST MIXING INTENSITIES

Process	G	Duration	Mix RPM
Ozonation	Plant	-	-
Rapid Mix	200	44 sec	160
Flocculation, Stage 1	50	9 min	55
Flocculation, Stage 1	25	9 min	30
Flocculation, Stage 1	12	9 min	19
Settling	N/A	10 min	-
Softening	TBD	10 min	-
Recarbonation	N/A	N/A	-

The primary variables during testing were chemical additions and chemical dosages. Specific chemicals and dosages used for initial testing conditions were selected to reflect current plant usage and the recommendations of the 2002 Treatability Study:

TABLE 7 – BENCH SCALE TEST CHEMICAL FEED RATES

Chemical	Current Usage	2002 Study	Test Values
Ozonation	4.66 mg/l	1.5 mg/l	
Ferric Chloride	7.7 mg/l Fe3+	40 mg/l Fe3+	7.7 – 80 mg/l Fe3+
Coagulant Aid Polymer	Not used	2.0 mg/l	1 – 2 mg/l
Flocculation Aid Polymer	Not used	0.05 mg/l	0 – 0.05 mg/l
Powdered Activated Carbon	Not used	N/A	20 – 100 mg/l
Lime	120 mg/l	175 mg/l	120 – 175 mg/l
Soda Ash	Not used	52 mg/l	0 – 52 mg/l
Cationic Softening Polymer	3.13 mg/l	Not used	3.13 mg/l
Anionic Softening Polymer	0.88 mg/l	Not used	0.88 mg/l
Fluoride	0.45 mg/l	1 mg/l	Not used
Carbon Dioxide	32 mg/l	37 mg/l	Fed to reach pH of 7.5 +/- 0.3
Chlorine	6.3 mg/l	1 mg/l	10 mg/l

3. Considerations

The 2002 Treatability Study did not note significant formation of DBPs. This may be a function of different Flint River water chemistry at that time. However, recognizing the considerable differences in chemical usage and dosages between that study and current operations, those differences in chemical use and dosage are an obvious starting point for optimizing treatment to prevent DBP limit exceedance.

Although it is believed that optimization of current treatment can correct the DBP issue, should optimization of present treatment prove insufficient, alternate residual disinfectants (chloramines and chlorine dioxide) could be investigated as additional treatment measures.

4. LAN Test Results

Two rounds of jar testing were completed by LAN during the weeks of December 15, 2014 and January 26, 2015. Detailed test data is included in Appendix A. Testing results can be summarized as follows:

- Increased dosages of ferric chloride resulted in higher reduction of THMFP.
- The currently utilized feed rate of lime at 120 mg/l is appropriate
- Softening with soda ash in addition to lime resulted in minor additional THMFP reduction – in the range of 0% - 10%.
- The benefits of using a cationic polymer during softening at a dosage range of 0.31 - 3.13 mg/l to help reduce THM's are unclear
- The benefits of using an anionic polymer during softening at a dosage range of 0.09 – 0.88 mg/l to help reduce THM's are unclear
- Feeding PAC was ineffective in reducing THMFP within the dosage range of 20 – 100 mg/l.

5. Testing by Others

In addition to jar testing completed by LAN, the chemical supplier who provides ferric chloride for the City, PVS Technologies, ran tests using their recommended flocculant polymer aid. Plus, Veolia Water completed jars testing of their own the week of February 16th to analyze other process details and current WTP parameters. Experiments completed by PVS Technologies showed very little TOC removal beyond that obtained with straight ferric chloride feed.

6. Conclusions

Increasing the dose rate of ferric chloride is an operational change that can easily be implemented without the need for any additional equipment. Test results show that over 40% THMFP removal can be obtained with a dosage of 60 mg/l Fe3+ or higher. Increased dosing of ferric chloride would be most ideal coupled with regular raw water TOC monitoring so that TOC levels would dictate the appropriate ferric chloride feed rate.

Softening with soda ash in addition to lime is another option the City should consider if increased ferric chloride doses are not adequate to maintain THM levels under the MCL, particularly during warmer months. Again, monitoring of TOC in the raw water could provide useful information of when lime/soda ash softening is necessary.

IV. DISTRIBUTION SYSTEM EVALUATION

EPA guidance for the distribution evaluation portion of an OER is focused on identification and isolation of a specific portion of the distribution system that led to the exceedance. The circumstances of Flint's apparent pending TTHM exceedances are unusual in that a new supply has been implemented which clearly corresponds to the high TTHM sample results. Although the new source is one element in increased TTHM levels, value remains in evaluating the distribution system since water age is also a critical factor. Additionally, there may be distribution improvements that can be made to help alleviate the problem.

A. INFRASTRUCTURE

1. Piping

According to the most recent MDEQ Sanitary Survey, the distribution system is estimated to contain 70% cast iron, 20% ductile iron, 2% concrete and 8% steel water mains. Based on discussions with City staff, the percentage of cast iron pipe may be higher than that stated in the MDEQ Sanitary Survey. Unlined cast iron pipe can become pitted, allowing colonization sites for microorganisms leading to chlorine demand. Additionally, much of the piping in the system is aged and in poor condition. Increased chlorine demand could be resulting from biofilm in older pipes and from main breaks/repairs. The extent of contribution is not known but any water main replacement project will decrease chlorine demand somewhat if constructed properly. Unfortunately, water main breaks may also assist with decreasing water age by providing unintentional flushing. All things considered, it is impossible to quantify the impact existing piping has on THM formation without extensive research and long term study.

The City utilizes City Point software and GPS equipment to document main breaks and prioritize replacements. However, main break information is more pertinent to rusty water complaints and has little relevance to THM levels. Areas that have been targeted for main replacements include the transmission main from the WTP west to Dupont and south to the West Side reservoir, Fenton Road, Atherton Road, Dort Highway, Averil Street, and Boulevard Drive.

2. Storage

There are 4 finish water storage tanks and 1 raw water tank as tabulated below:

TABLE 8 – STORAGE TANKS							
Name	Type	Water	Volume (MG)	Operating		Absolute	
				LWL	HWL	Bottom	OF
Dort Reservoir	Ground	Raw	20	-	-	730	750
WTP Tank	Elevated	Finished	2	883.0	896.0	863.0	898.0
WTP Clear Well – PS #4	Ground	Finished	3	11'	15'	708.5	726.0
Cedar Street Reservoir	Ground	Finished	20	-	11'	737.2	757.2
Westside Reservoir	Ground	Finished	12	-	12'	761.8	779.0

The MDEQ typically recommends providing a minimum finish water storage volume of 1/3 the maximum daily demand (MDD). According to the 2013 MDEQ Sanitary Survey, the 5 and 10 year MDDs are 21.57 mgd and 30.05 mgd respectively. A common rule of thumb for clear well storage volume at a WTP is 10% of the design flow rate. Another general guideline for reliability is to provide total storage to allow for 2 X the average daily demand plus fire flow demand. For this analysis, fire flow is assumed to be 2,500 gpm for either one industrial fire (2,500 gpm) or a combination of one residential (1,000 gpm) and one commercial (1,500 gpm) fire at a 4 hour

duration which results in a total volume of 600,000 gallons. These go-by approximations are summarized below with the applicable flow rates and are compared to the existing storage volumes currently being utilized.

<u>Common Practice</u>	<u>Flow Rate</u>	<u>Recommended Volume by ROT</u>	<u>Volume In Use</u>
Clear well 10% of Design Flow	18 MGD	1.8 MG	3.0 MG
Finish Storage = 1/3 MDD	30.05 MGD	10.0 MG	37 MG
Total Storage = 2 * ADD + FFD	13.87 MGD	28.3 MG	57 MG

Based on the values above, it appears the storage volume used in the Flint system could be decreased without negatively effecting reliability. The appropriate volumes of individual tanks will be further evaluated using the water system model and discussed in Section V (C).

All reservoirs have baffling to minimize stagnant water. Also, all tanks have been maintained and are in reasonable condition. The Westside reservoir has an exposed roof that is in need of rehabilitation, but its current condition has no influence on THM formation.

3. Pump Stations

All pump stations are in good condition but pumps are generally oversized. As an independent consideration, oversized pumps are not a contributing factor to high THM levels. Control of pumps and pressure zones are discussed in detail below.

B. OPERATIONS AND MAINTENANCE

1. Pump Station & Storage Operations

Pump stations and storage tank levels are controlled as shown in Table 9.

TABLE 9 – PUMP STATION CONTROLS			
PS Name	Control Point	On Point	Off Point
PS No. 4 Raw	Operator	-	-
PS No. 4 Finish	Match plant flow	-	-
Westside	System pressure (elevated tank)	22.5'	33'
Cedar Street	System pressure (elevated tank)	22.5'	33'
Torrey Road	Distr. – Brown/Bradley	< 45 psi	> 45 psi

Prior to the first TTHM violation, Cedar Street and Westside pump stations were operated as needed and were alternated. Typically, Cedar Street was run in the morning and Westside was run in the evening and reservoirs for each were filled during low demand periods at night.

Westside, Cedar Street and Torrey Road pump stations are used to boost system pressure when high demands warrant it, but there are not well defined pressure zones within the system. Therefore, the possibility exists that water is being recirculated allowing for increased water age.

2. Booster Disinfection Practices

Booster disinfection is provided at the Cedar Street and Westside pump stations. When sustained residuals are not provided by chlorine feed at the WTP, sodium hypochlorite is applied at the reservoirs while being filled.

3. Changes in System Demands

Water demands in the City have been declining since the 1960's as the population has dropped. As a result, many of the water system components are oversized including storage tanks and water mains which both increase the time for water to reach the user.

From a short term perspective, Flint demands tend to increase in summer as is ordinarily expected but also in the winter due to water main breaks. The MDD for Flint often occurs in winter. Regarding THM formation, with lower temperatures and higher flows in the winter, THM levels taken at the distribution sample points are expected to be lowest for February sampling quarters than all others.

C. WATER SYSTEM HYDRAULIC MODELING

As part of this report, the City provided a hydraulic water model, originally developed by Potter Consulting, for LAN to update. Thus far, LAN has modified the model to be capable of extended period simulations, modified controls to reflect current operations, revised the piping to include known broken valve locations, updated pump curves, checked pipe diameters, updated system demands, and developed preliminary water age results throughout the entire system. Water age shown in the revised model corresponds for the most part to TTHM levels at the sampling sites. However, LAN has also identified several issues affecting the model that require further attention to allow for usable and reliable results. Those issues include accurate quantification of lost water and confirmation of the status of valves throughout the system. Preliminary water age results are presented in Table 10. Revised results will be provided when the hydraulic model has been fully updated.

TABLE 10 – PRELIMINARY WATER AGE FROM WATER MODEL

Sample Point	Location	Address	Water Age (Hrs)	May/15 LRAA THM (ug/l)
1	McDonalds	3719 Davison	25	68
2	BP Gas Station	822 S. Dort Hwy	18	54
3	Liquor Palace	3302 S. Dort Hwy	14	60
4	Taco Bell	3606 Corunna	340	72
5	Univ. Market	2501 Flushing	305	94
6	Salem Housing	3216 MLK	45	66
7	Rite Aid	5018 Clio	41	69
8	N. Flint Auto	6204 N. Saginaw	37	55

It is anticipated that topics shown below in italicized font will be detailed after the model is updated in Sept-Oct, 2015.

1. *Simulation of Existing System*

Match existing conditions. Chlorine and THM data may be used to verify model results. We have chlorine feed data at plant and residuals at 10 locations in each MOR, May 2014 – July 2015.

2. Identification of Water System Deficiencies

Specific issues to look at:

- Water age in entire system*
- Possible recirculating water through pump stations*
- Use of storage tanks – volumes in particular*
- Indications of broken valves*
- Effectiveness of booster disinfection*

V. RECOMMENDATIONS TO MINIMIZE FUTURE OEL EXCEEDANCES

A. SOURCE

The City of Flint has already committed to the change from the Flint River as the water source to Lake Huron under the KWA system, planned for late 2016. The risk of future TTHM limit violations will decline substantially with the use of water from Lake Huron due to much lower DBP precursors. It is important to recognize that the Flint River will become strictly an emergency supply when the KWA supply becomes available and any investments toward the Flint River should be contemplated accordingly. Recommendations discussed below in this section apply to the Flint River as the source.

Reverting to supply from the DWSD until the KWA supply is available as an option. However, based on information provided by the City of Flint, the annual cost to receive water from the DWSD would be at least \$16,000,000/year or \$1,333,000/month. Therefore, utilizing the DWSD for interim supply is cost prohibitive under the terms defined by the DWSD.

1. Watershed Management

A volunteer group entitled the Watershed Coalition performs various tasks related to managing the Flint River watershed such as spring cleanups and annual benthic studies to evaluate the river 'health'. No additional action is recommended at this time.

2. Monitoring

The City documents daily raw water flow, pH, alkalinity, carbonate and non-carbonate hardness, chloride, temperature, turbidity and coliform count as part of standard preparation of Monthly Operating Reports (MOR). WTP staff have obtained and installed TOC and THM analyzers. The THM analyzer is set up as an on-line plant tap monitor and operations personnel have begun taking samples most days to track TOC levels throughout the treatment process. It is recommended to implement TOC tracking as a strict daily procedure which would provide staff the data needed to establish correlations to predict distribution system THM formation.

3. Intake Operations

The 2002 Treatability Study recommended pre-oxidation in the form of sodium permanganate as a feed at the intake. It is possible the addition of a pre-oxidant such as hydrogen peroxide or some type of permanganate could enhance the ozone process. Veolia evaluated permanganate demand during jar testing the week of February 16th, 2014 and recommended implementation at a dosage of 0.5 mg/l – 1.2 mg/l to achieve 10% additional TOC removal.

4. Seasonal Strategies

Past data indicates the Flint River is influenced by groundwater and in particular, dolomitic spring water. The result is hard water with high concentrations of magnesium and sulfate. Also, hardness and alkalinity are higher during the winter. Upon initiation of supply from the Flint River, the City made the decision to soften with just lime to focus on removal of carbonate hardness. One potential modification that could assist with TOC removal and thus decrease THMFP would be lime and soda ash softening. A temporary caustic soda feed system is recommended to be put in place in case the need for optimized softening arises.

5. Upstream Contamination Issues

Upstream contamination issues are extremely difficult to prevent and even if detected are difficult to locate. Evaluation of raw water data collected for MORs is the easiest manner in which to detect upstream contamination issues because the data is already collected for treatment purposes. In fact, high total Coliform readings in the past have signaled potential issues that the City was able to identify and remove.

An upstream monitoring and warning system could be established to attempt to detect water quality issues or spill event type contamination early enough to adjust treatment procedures or cease intake prior to the contamination reaching the WTP. However, given the imminent conversion to the KWA supply, the period of full time use would likely be far too short to achieve payback on the capital expenditures.

B. TREATMENT PROCESS

1. Operational Recommendations

- Increase ferric chloride dosage: Previous testing in the 2002 Treatability Study, jar testing completed by LAN, and a review of 2014 ferric chloride dosages compared to THM levels leaving the WTP support that increasing the ferric chloride dosage would help reduce THM formation.
- Increased monitoring: Currently, the MDEQ does not require daily reporting of raw water TOC or finished water TTHM levels. However, daily tracking of such levels would allow the City to develop a correlation between the two, thus providing a predictive tool to help manage TTHM levels.
- Coagulation and flocculation polymer aids: The 2002 Treatability Study suggested the use of coagulation and flocculation polymer aids. These polymer aids were shown in the 2002 Treatability Study to increase TOC removal and thereby reduce THMFP but jar testing by LAN and PVS Technologies did not indicate clearly defined benefits. Addition of coagulation and flocculation polymer aids should be categorized as a future consideration that would require further evaluation.
- Discontinue softening bypass: In early summer of 2014 the City was bypassing a portion of flow around the softening basins because hardness levels did not warrant softening of the full stream. However, this practice was discontinued because it was believed the bypass stream was contributing to chlorine demand and preliminary data has supported that belief. Chlorine demand dropped 0.5 – 1.0 mg/l following elimination of the bypass stream in early November 2014.
- Soften with lime and soda ash: Research has shown that enhanced softening with both lime and soda ash may provide additional TOC removal. Veolia did not recommend this option after conducting jar tests.
- Disinfection of filter beds: Recommendation is no longer applicable since media has been replaced.
- Optimization of all existing treatment processes: Depending on bench scale testing conditions and results, slight modifications to all treatment processes might in order to replicate lower DPBFP.
- Discontinue or adjust softening anionic polymer feed: Some anionic polymers have been found to increase TOC. However, Veolia provided no recommendation to change polymers following their evaluation.

2. Infrastructure Change Recommendations

- Fix and/or replace faulty ozone equipment: Since the ozone equipment was installed it had not been used extensively on a full time basis. Following minor complications, the City hired the equipment manufacturer and a programmer to troubleshoot the system. Replacement of faulty gauges and redesign of the control program have allowed the system to operate properly since January 2015.
- Replace filter media with GAC media: GAC media could help reduce THM levels by reducing both TOC and chlorine demand. For this consideration, the intermediate chlorine feed location should be relocated to a point downstream of the filters. The City elected to pursue this option and 6 filters were completed in July 2015 and the remaining 6 were completed in August 2015. Provisions are also being considered for adding more GAC media and/or regeneration of media next summer.
- Change disinfectant to chloramine or chlorine dioxide: If other options prove to be ineffective, conversion to another disinfectant should be fully evaluated. Various characteristics of chloramination indicate an advantage over chlorine dioxide, but a full analysis would provide clarity as to which would be preferred.
- Install pre-oxidant chemical feed: Hydrogen peroxide or a form of permanganate as a pre-oxidant can enhance the activity of the ozone. Chemical feed could be installed at the intake structure or low service pump station, depending on the reaction time required. Use of a pre-oxidant at the intake might also provide the additional benefit of disinfection credit for ozonation with the MDEQ if an ozone residual can be obtained at the ozone process effluent as a result.
- Repair upstream sewer leak: a sewer leak upstream of the WTP intake was discovered in early summer 2014 and has been repaired by the City.

C. DISTRIBUTION SYSTEM

Potential distribution issues related to water quality issues discussed in Section IV included old cast iron pipe, oversized infrastructure, and remote storage/pump station locations and operations that might be less than ideal. Recommendations to address those issues are offered in this section.

1. Manage Water Age

a) Storage Tanks

Considering the excess storage capacity discussed in Section IV, in the short term it is recommended that operational changes be implemented immediately to reduce the overall volume of water stored to decrease water age. Immediate operational recommendations include lowering high water levels of reservoirs other than the elevated tank, to reduce the total system wide usable storage volume to 30-37 MG.

In the long term, LAN recommends development of the most ideal options for water model evaluation. Excess storage volume and tank locations within the water system afford Flint numerous options to reduce the amount of storage volume utilized. As a starting point, two recommendations are presented below.

Option 1

- Take West Side reservoir and pump station out of service
- Cut storage volume used in half at Cedar Street reservoir
- Adjusted system wide storage volume would be 35 MG

Option 2

- Take Cedar Street reservoir and pump station out of service
- Adjusted system wide storage volume would be 37 MG

b) Residence Time in Pipes

Completely redesigning and replacing the water system to match today's demands is not feasible financially and would be a waste of infrastructure with remaining useful life. Going forward, it is recommended that any future main replacement projects be evaluated for possible downsizing. When the water model is fully updated, it will provide a valuable tool in determining which mains can be downsized and to what extent. Replacement of broken valves and valve exercising are also recommended, which are programs that have already been implemented into Flint's regular operations.

Operationally, hydrant flushing is recommended as needed to minimize water age in low flow areas. Again, the updated water model should be used to locate high water age areas and optimal flushing points.

2. Reduce Disinfectant Demand

Recommendations to reduce disinfectant demand are similar to those described above to reduce water age. Replacement of old cast iron pipes would lead to a reduction of disinfectant demand on the distribution side, but realistically can only be accomplished over a prolonged period of time. In the meantime, hydrant flushing is the most viable means of reducing disinfectant demand in piping. From a storage standpoint, all reservoirs and tanks should be regularly inspected and maintained to prevent entrance of any outside contamination that would contribute to disinfectant demand. Cleaning of all tanks is recommended as well as investigation into stagnant water prevention options.

3. Water Modeling of Recommendations [yet to be completed]

Determine best flushing locations to reduce water age

Evaluate changes in storage tank operations to reduce water age

Valves to close/add to improve pressure zones, reduce recirculation

Optimization of pump station use – smaller pumps? Shut down?

Evaluate booster disinfection

D. BOOSTER DISINFECTION

Decreasing chlorine feed at the WTP and adding booster disinfection in the distribution system is an alternative intended to reduce the reaction time at higher concentrations of chlorine to reduce DPB formation. Extensive looping and branching within the existing system complicate how to best implement and utilize booster disinfection. Water system modeling is recommended to gage the effectiveness of existing feed point locations and dosages. Further discussion and details will be provided when the distribution evaluation results are available.

E. CATEGORIZATION OF ACTIONS

Considering that the Flint River is being used as the water source only until the KWA supply is available (expected late 2016), options to address high THM formation that require new construction or extensive time to implement are not preferred. On the other hand, the City understands THM sample results to date dictate that some action is necessary. Two categories have been developed to assist the City in prioritizing actions to take. Stage 1 consists of actions that can be completed relatively quickly without major construction and Stage 2 actions are either long term actions or solutions requiring major construction. Stage 1 actions are to be completed first followed by evaluation of the results prior to consideration of Stage 2 actions. Grouping of actions are shown in the table below.

TABLE 11 – ACTION PLAN			
	Action	Purpose	Status
Stage 1	Hire water consultant to complete 'water audit'	Third party review of actions and operations to make sure no options are being missed	Complete
	Increased water quality monitoring – obtain THM and TOC analyzers	Provide information needed to adjust WTP operations to match changing raw water quality	Complete
	Troubleshoot ozone feed system	Reduce chlorine feed and increase TOC removal	Complete
	Bench scale jar testing	Optimize treatment process and evaluate possible modifications	Complete
	Discontinue softening bypass	Reduce chlorine demand	Complete
	Disinfect filters	Reduce chlorine demand	Complete
	Increased water main flushing	Reduce water age / stagnant water	Ongoing
	Water system modeling evaluation	Determine areas with high water age and reasons	Partially complete
Stage 2	Modify booster disinfection feeds, if appropriate	Decrease water age	Not yet evaluated
	Repair ozone system	Reduce chlorine feed and increase TOC removal	Complete
	Continue increased water main flushing	Reduce water age / stagnant water	Ongoing
	Replace filter media with GAC	Reduce TOC and chlorine demand	Complete
	Continue valve replacements based on water model	Reduce water age / stagnant water	Ongoing
	Convert to lime and soda ash softening	Increase TOC removal	Future consideration
	Change disinfectant to chlorine dioxide	Reduce THMFP	Future consideration
	Install pre-oxidant feed at intake	Optimize ozone disinfection, reduce chlorine	Future consideration
	Implement coag. & floc. polymer aids, if appropriate	Increase TOC removal	Future consideration
	Place priority on replacing cast iron water mains	Reduce chlorine demand	Ongoing

Samples were taken August 18th, 2015 for the latest round of quarterly testing. The City has implemented many of the Stage 1 actions and installed GAC media in the filters and THM test results have significantly improved (decreased) since May and August 2014. All sampling results are shown on Chart 1.

Subject: Building Issue

Good Morning Shelly,

This is just to let you know I contacted Mike Noonan regarding the water in the building. In the mornings on the fourth floor the water out of the tap is yellow. On the second floor they are saying it is brown. He is going to have DMB check it out.

We are wondering about the filter on the ice machine...does it filter out the lead...I know this is a "hot topic" in the city so people are wondering about that and the water in general here.

Thanks

Subject: Re: Bathroom

The lead is free... It goes by microns that it filters ..

Keep in mind the lead levels are within standards.

We did send a sample to be tested so we know where we are at. The areas that are a concern are the older neighborhoods and where water is not used a lot . We have constant water flow in the downtown area so we are in better shape than other areas.

I'll keep you posted

Flint Alternate Water Source

Date/Time:

Monday, October 5, 2015 at 6:00 a.m. until further notice

Details:

Beginning Monday, October 5, 2015, water coolers will be available in common areas on floors 1-6 of the Flint State Office Building. Although the drinking water has been tested and falls within all DEQ and EPA regulation standards, alternate water sources will be offered to accommodate all tenants due to recent concerns regarding the water supply. Water testing will continue and the alternate will be available until all quality concerns are addressed.

Thank you for you cooperation.

Yeah I was not sure about adding that,

The press has been beating this up on a daily basis and even Erin Brochavic has been in town. The city currently gets the water from the flint river and they are working on a new pipe line from Lake Huron to flint which should be done by 2017 .

There is higher levels of lead (but it's within the limits)

And to be honest Brian Walts is the expert on this please feel free to contact him he has a tremendous amount of knowledge on this.

I know Brian will be glad to help

I can't verify when it was or wasn't filled, but have been informed again today that it is empty when somebody went to get water. We do have about 120 staff on that floor. I can tell you that our district went through approximately 5 jugs daily when we had them at McCree.

Hi Marlene,

I spoke with Ed and he said he did replace the water container in the lobby area on the 6th floor and checked it this morning during his rounds at 7:20 and it was full. Around 10:00 this morning Dennis said that unit was around half full. These containers are 5 gallon units and with normal use should be able to last more than 2 to 3 hours so we have staff checking all units once morning, noon and night thinking we will be able to catch and replace any unit running out. We will adjust as needed as we go forward.

Thank you,
Brian

I made contact with Ed and Dennis both on the issue and it sounds as though the 6th floor unit ran out sometime between 10:00 and 1:00 today. Dennis is going to adjust and check the 6th floor unit more frequently in the hopes to catch this unit from running empty. A new full 5 gallon container has been installed.

Hi Mike and Larry,

Here are the lead and copper results from the Flint State Office Building samples. No danger at this point to the building occupants from lead with the low readings.

Thanks,
Brian

Subject: Re: sampling

I just spoke to the DEQ and they stated that at both locations there was no copper detected.

#1 location had .001 for lead and #4 had .004 for lead. In order to be a concern it would have to be .015 or above so both are well within acceptable levels.

As far as bacterial or chlorine residual, those samples are submitted differently as they are done in house. Did you submit those as well? They would have been in a much smaller sample bottle. If not, I can connect you with the lab and we may have to have the tech come out.

Subject: Re: Flint Ice Machine

If I can ask what is your cost to have them on contract for flint? Can you change it? I'm not sure where Parks are from.

I have three refrigeration guys in the east zone. But at the very least we could pm it and change the filters for you.

Just my thoughts

Subject: Ice Machine

Keith,

I had a conversation with Larry today and he told me to contact you. In Flint Treasury had us put in an ice machine. While talking with Jaycob and Ann I said that my staff could do the maintenance on them for less a cost than a contractor.

I did not remember this from a focus meeting and I do apologize, that there was an agreement that they had to provide a contractor to do the work. I think we should do the work it's not anything major just water filter and a bin cleaning. We are putting the one on the first floor and will have to do that one. It just makes better sense to me to provide this service as a bill back to our tenants.

Let me know if you want to talk about this.

Once again Marlene you have confused me, LOL! Since putting the water coolers in all the lobby floors we have staff maintain those units as needed and to my knowledge have not removed any units. I may need more information to address any other issues. Please let me know what you think.

Thanks,
Brian

Hi Marlene

Will we be getting water again? The last I think I heard was that we wouldn't be getting replenished. But, a few workers have come to me stating that the news sources say that Flint water is still not safe to drink.

Team,

I did talk to Dennis just to make sure we are all on the same page and he has and is still committed to making sure all lobby coolers are maintained and usable at all times. Please let me know if anyone see's anything different and I will reach out to all if that program is going to change in the future.

Thanks,
Brian

Marsha-

We have one of the offices originally designed for the Governor's staff in Flint available for your use. It has furniture in it minus a chair and is ready to use starting today. I am sure that we can find an extra chair onsite. There is data in the wall, but I did not see a patch cord on the desk.

I have attached a furniture plan noting the location on the 5th floor and this room's relative location to where another group of individuals related to the water situation are stationed.

This space is currently vacant and in DTMB's control. I have cc'd Mike Noonan and Brian Walts onto this email and they are both aware of your request and in agreement that this room is open for your use. Mike is the Facility Manager and Brian the Building Trades Supervisor.

Please let us know if you need anything else.

Monday, January 11, 2016, 01:23 PM

Snyder Creates New Joint State-Flint Group On Water Crisis

Governor Rick Snyder today formed a new Flint Water Interagency Coordinating Committee joining top state and local officials, as well as drinking water experts, to develop a wide variety of recommendations to address the Flint water crisis.

Mr. Snyder established the committee via executive order.

The committee will include the following members:

- The director of Office of Urban Initiatives within the Executive Office of the governor;
- The deputy state director of Emergency Management and Homeland Security within the Department of State Police;
- The director of the Department of Environmental Quality, or his or her designee;
- The director of the Department of Health and Human Services, or his or her designee;
- The director of the Department of Licensing and Regulatory Affairs, or his or her designee;
- The state treasurer, or his or her designee;
- The superintendent of public instruction, or his or her designee;
- The Flint mayor;
- Three additional representatives of the city of Flint submitted by the Flint mayor and appointed to the committee by the governor;
- Three representatives of Genesee County submitted by the Genesee County Board of Commissioners and appointed to the committee by the governor; and
- Three subject matter experts appointed to the committee by the governor.

In a statement, Mr. Snyder said the council will create an action plan, review recommendations made by the Flint Water Task Force (the group Mr. Snyder created to figure out what went wrong), establish protocols for communications at the local, executive and legislative levels, make recommendations regarding the impact to health of the affected population and “assess the status of infrastructure and determine feasible actions for upgrading Flint’s water system.”

Mr. Snyder created the council amid an unrelenting firestorm of criticism against his administration in how it has responded to lead in some locations’ drinking water in the city, as well as elevated blood lead levels in children.

“We need to focus on improving Flint for the longer term,” Mr. Snyder said in the statement. “This committee, made up of experts from government and the Flint community, will set a course of action to remedy the water situation and resulting health issues, and carry on long after the emergency declaration expires.”

Subject: Volunteer Opportunity in Flint

Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.
Michigan State Employee banner image

The State Emergency Operations Center (SEOC) is coordinating a response to the ongoing health and safety issues in the city of Flint's drinking water. Teams from the Michigan State Police, Genesee County Sheriff's Department, Michigan Department of Health and Human Services, and volunteer organizations have been delivering bottled water, water filters, replacement cartridges and water testing kits at homes in the city of Flint since Tuesday.

To help with this critical work, the SEOC is looking for volunteers to expand this effort and continue this distribution during the upcoming holiday weekend. Teams are being assembled for shifts on Saturday, January 16; Sunday, January 17; and Monday, January 18, 2016. If you are interested in volunteering your time for this critical work, please complete the information in one of the attached surveys (depending on which day you are volunteering).

To volunteer on Saturday, January 16, <https://www.surveymonkey.com/r/28NVJBL>

To volunteer on Sunday, January 17, <https://www.surveymonkey.com/r/26NMJKK>

To volunteer on Monday, January 18, <https://www.surveymonkey.com/r/26P7P5G>

Volunteers will begin their assignment at the Local Emergency Operations Center located in the Genesee County Administration Building located at 1101 Beach St, Flint at 9 a.m. and end by 4 p.m. Parking is available at the corner of Beach Street and 8th Street. Lunch will be provided. This is strictly a volunteer effort, as all three days will be unpaid. Volunteers are responsible for their own transportation; mileage reimbursement for personal vehicles is not authorized. Volunteers should dress for working outdoors and wear foot attire appropriate for walking.

This opportunity is for state employees and their immediate family members 16 years of age or older only, others looking to assist should volunteer through the American Red Cross in Flint. The volunteer coordination center for the Red Cross is located at 1401 S. Grand Traverse, Flint, MI. They are open from 9 a.m. to 7 p.m.

For more information on the state's response efforts, visit www.michigan.gov/flintwater.

Subject: Water Filter in 2nd fl lounge

The water filter, although there is still green and red showing, is barely having water filter through it. Might it be ready for replacing?

Also, rumor has it that the filters that were handed out by Home Depot do not filter lead. ARE all the filters used in our building lead removing ones?

Good Morning,

My name is Shane, I work for Genesee County. We are coordinating efforts with the City of Flint to recycle used water filter cartridges in order to help curtail the amount of cartridges ending up in a landfill. With this, I have already received permission from the City to provide bins for collecting the Brita and Pur filter cartridges at the locations they are responsible for. In an effort to remain uniform at all of the distribution sites, I am seeking your permission to provide two bins (one for Brita filters, one for Pur filters) at the two locations below that are under your direction. I will be responsible for ensuring the bins are emptied and will subsequently ship them to be recycled. Please let me know if I have your permission to start this effort at your locations. If you have any questions please feel free to call me. I appreciate your time and look forward to hearing from you soon.

Hello and Thank you for Responding.

I am working on acquiring the collection bins today but I do not anticipate they each would take any larger of a footprint than 20" x 20". GCMPC staff (Carl Thompson and Myself) will be responsible for removing the old filters and the response time can be the same day we are notified the bin is or near full, Monday through Friday or the following business day at the latest.

All the best,

Shane L. Kelley, Planner I

Shane,

The contact for the Union Street building is Mike Noonan. I am including him on this email.

Mike indicates he is in need of the following information:

"I will need to know the size of the bins and who will be disposing the used filters into the bins. What will the response time be for removing old filters?"

Thank you.

Sandi

New AHR and new products! Plus our 50th anniversary party!

AHR Expo is just around the corner and we'll be showing off the newest products from Goodway at booth# 3444. Join us as we showcase the latest in cooling tower cleaning systems, a new and innovative portable coil cleaner and the latest in tube cleaning technology. If you can't make it, call us or go online today to request information and a price quote.

We'll also be celebrating our 50th anniversary in style with a party on Tuesday, January 26th at our booth. For your exclusive invitation, call your Goodway representative today or visit us at booth# 3444 at the show!

Fight Legionella at it's source.

Legionella, scale and bacteria hide and fester in the corners of your cooling tower fill. In the past, cleaning it had been a losing battle - until now. The new TFC-200 helps win the war against legionella by quickly and thoroughly cleaning cooling tower fill of scale, dirt and other debris with our unique process.

Watch the video now.

The future of coil cleaning.

Goodway's new CC-200 takes coil cleaning to a whole new level. It includes a powerful pressurized water spraying system, producing up to 200 PSI, plus an on-board vacuum for easy cleanup. Best of all, it uses CoilShine-T, Goodway's new tablet based coil cleaner that's a fraction of the size and weight of bulky liquid coil cleaners.

More Information

The very best tube cleaner.

RAM-PRO-XL is the cutting edge of chiller tube cleaner technology. It combines a powerful, yet easy-to-use tube cleaner with TubeGuard-XL, Goodway's proprietary tube cleaner tablet that helps blast biofilm and protect tubes against corrosion. Now, tubes are cleaner - and more protected- than ever

before.

Hello and Thank you for Responding.

I am working on acquiring the collection bins today but I do not anticipate they each would take any larger of a footprint than 20" x 20". GCMPC staff (Carl Thompson and Myself) will be responsible for removing the old filters and the response time can be the same day we are notified the bin is or near full, Monday through Friday or the following business day at the latest.

Brian and Mike,

We need at least 12 cubicles on the 5th floor (3 child welfare, 8 adult services), otherwise we will need a conference room to house our staff so that they can do their jobs or they will be sitting on the floor.

This is really impacting our day-to-day operations, including the lack of parking in the basement for our DHHS families (which it is my understanding that alternative parking is being explored).

Subject: 5th floor space

Good Morning Sandi and Tracey,

If you could do me a favor and only let the bare essential staff to work on the 5th floor in the old civil rights area today. With the arrival of the 2 big groups to address the Flint water issues space is going to be a real concern. Please don't panic on me yet, my thinking is they will only need a little extra room then the 3 conference rooms we provided so your new extra staff will still have space but until I see what their needs are I wouldn't know. I should have it figured out by noon or so and will stop down to talk. My guess is they will only need about 5 open cubicles leaving the balance for your teams. Anything you can do will be great!

Thanks,
Brian

How we are fixing the Flint water crisis

Governor Rick Snyder has committed to spending the rest of his time as Governor to fixing the Flint water crisis. Over the last few days, he has sat down to explain what happened and how we're fixing the Flint water crisis. Watch the interviews below and be sure to read the Governor's Op-Ed in the USA Today.

Governor Snyder on Morning Joe

"What is so frustrating and what makes you so angry is you have a handful of experts who were career civil servants that made terrible decisions, in my view. We have to live with the consequences, and they worked for me, so I accept that responsibility. We are going to fix this problem." Watch Governor Snyder address how we are fixing the Flint water crisis on Morning Joe.

Governor Snyder with Charlie LeDuff on Fox 2 Detroit

"I feel awful about this. These are people. They've been harmed. You can't feel good about that. The people of Flint have been harmed and a major influence of that harm

came from people who worked for me, and I feel responsible for that. But I am committed to solving the problem and addressing the damage as much as possible for the rest of the time I'm Governor." Watch Governor Snyder address the Flint water crisis with Charlie LeDuff on Fox 2 News.

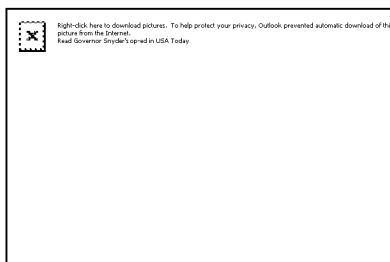

Governor Snyder's 2016 State of the State

"Michiganders don't quit, we don't give up, instead we will work with even more passion and commitment to truly improve our state. For everyone who's chosen to make Michigan their home, this is more than a promise, this is my commitment." Watch Governor Snyder's full closing statement from his 2016 State of the State address.

Governor in USA Today: "I will fix this, and I mean it."

"Residents in one of Michigan's proud cities cannot drink their water. That's unacceptable. The crisis in Flint arose from missteps at all levels of government — local, state and federal. But as governor, I take responsibility for what these families are going through, and I'm holding people in my administration accountable for their failures." Click [here](#) to read the Governor's full op-ed.

Washington Post: "Michigan Gov. Rick Snyder is in a tough spot, but he's his own best spokesman"

Snyder has born the brunt of criticism in the local health crisis that has turned into a national scandal. But unlike many other politicians facing crises of leadership, Snyder may also be his own best counter-programming. [Click here to read the full story in the Washington Post.](#)

Subject: Spending for Flint

SMT,

The ongoing crisis in Flint has necessitated many areas of DTMB to react quickly to assist with the relief efforts. To make sure that all spending is accurately accounted for and properly approved, I want to remind you that all purchases and staff overtime for the Flint emergency must first be approved by DTMB SEOC Coordinators Chris Christensen or Jeanette Doll.

If this process is not followed, it is highly likely that expenditures will not be eligible for reimbursement.

Please be sure to share this message with any relevant staff.

Thanks.

Subject: RE: Parking Structure - State Office Building

I am including our DTMB counterpart here in the SEOC, but this really should be dealt with the same as it would be if there wasn't an emergency. So I think if Sandi is not able to resolve this acceptably with DTMB locally, than Kurt, I think you need to have your facility unit go to their contacts at DTMB to escalate and come to an agreement or process that is acceptable. Maybe there is something we can do with state cars to free up more space.

Subject: Parking Structure - State Office Building

Richard and Brian,
Is there any way that someone can let our guests know from FEMA, US Health and Human Services, JIC and other teams that are working out of this building that they need to avoid parking in the lower level basement.

Due to the lack of parking at this building, our families are parking in no parking zones and being ticketed, parking in DHHS state vehicle spots – which creates state vehicles parking in “visitor” areas – which creates a huge ripple effect.

I mentioned this to Mike Noonan, DTMB, and he indicated our families should park in the “flat lot” (attached map). This lot is a block away from our office, which is not conducive to any family that has special needs.

I understand our need to accommodate our guests from other departments, but our families cannot afford to pay for parking at the flat lot, not to mention parking fines.

Thanks for any assistance your group can provide.

Subject: Re: Flint Office Space Issue

Think we need a field trip. Can discuss in the morning. What other configurations can be accomplished? More hotel space? Conference rooms, other non traditional space. As noted by Chris, taking down additional space and cost not requested, rather try our best to make do within the existing 4 walls.

Hey guys-

I just read through the email chain. To give FEMA all 12 stations, we may need to relocate 12 people (I heard anywhere from 8-12 depending on who I talked to). The idea of moving three people this morning also involved removing one cluster of furniture to set up tables in that space to accommodate additional people. DHHS has two different groups in this area. When I reached out to Patty Curtis this morning, DHHS is claiming they are out of space and have no where to house these staff on other floors. I believe Mike and Brian talked to managers on site and they were unwilling to give up the space. Just a hurdle we'll have to work through when contacting DHHS. I'll be in at 8 and can help with the DHHS piece.

Should we plan that this will impact DHHS's plans for the space in March?

In our meeting I asked Jamie to set up a call with FEMA, Jeannette Doll and Maureen Bailey. Because we had received several contradictory requests for space for FEMA, I felt it would be best to discuss it with them directly and determine their true space counts and figure out likely growth. We could also determine who could be offsite if possible.

If Chris could get this going with FEMA we will create a plan.

Is this possible?

On Jan 25, 2016, at 4:24 PM, Phillippo, Jamie (DTMB) <PhillippoJ@michigan.gov> wrote:

Mike-

Keith Paasch, Bob Burns, Larry Scates, Jim Clark and I met to discuss the request for additional space in Flint. The building is considered full, as in the office space as designed is assigned. We determined that the best way to serve our current clients and the additional resources needed to deal with this crisis may be to find additional space close by. We came up with several ideas (U of M Flint, School for the Deaf in Flint, City of Flint or FEMA bringing in trailers onsite). Maureen Bailey has confirmed 7,000 sq ft is available on Bristol Road at \$12/sq. ft. plus utilities.

Please see the attached prints in reference to space. There is one group of 12 stations that was occupied by Civil Rights plus two offices originally designed for the Governor that the Governor no longer needed on the 5th floor that is highlighted in green. DHHS is taking over the space and has a reconfigure planned starting in March. DHHS is temporarily using the majority of this space until 7th floor is complete. The area reference below is highlighted in yellow within the green space. As stated below, DHHS staff are already in these station and in order for it to accommodate we would need to relocate the staff and tear down the furniture. The other rooms highlighted in orange within the green box have already been occupied by the Governor's staff as well as FEMA personnel. Two open areas are left in the building-the 5th and 6th floor lobbies. The 6th floor is already over occupancy and therefore we cannot add people here. As for adding people in the 5th floor lobby, I'm not sure how our tenants of the floor would be with that as this floor was not supposed to be accessed by the public.

Please let us know how you would like to proceed.

Thanks,

Jamie Phillippo

Subject: Flint Office Space Issue

Chris,

MSP has requested that we find additional space in the Flint State Office Building for additional Federal personnel that will need space in the next few days. DTMB had a meeting this morning in regards to this and after the meeting, BOD/Real Estate determined that we are at "max" in the Flint State Office Building. I asked if that meant we filled all the cubicles or if we are at building occupancy limits. The response was that we filled the cubicles and not at occupancy limits.

Can you assist in getting traction? If we can get these Federal partners in the same area as the State personnel, they can better coordinate response efforts. I spoke with Brian Walts (Flint BTS) and he indicated that if we move 3 DHHS staff members on the 5th floor, they could setup tables capable of housing 30-40 individuals. Brian confirmed that he has space on other floors that they could sit temporarily.

Thank you,

Ryan McKee,
Professional Emergency Manager (PEM)

Subject: Contributing time, muscle and money

During this month's Martin Luther King Jr. holiday weekend, some state employees turned their "day off" into a "day on" in Flint. There, they delivered bottled water, water filters, replacement cartridges and water testing kits to families. The volunteers joined other Michiganders, turning Dr. King's birthday observance into a day of service.

Mike Zimmer, director of the Office of Good Government and the Department of Licensing and Regulatory Affairs, has shared a link – www.helpforflint.com – that offers other opportunities to contribute time, muscle and money to bring clean drinking water to the community. Here in DTMB, some of our employees didn't wait for an invitation to lend a hand. Office of Retirement Services staff contributed funds that were used to buy 31 cases and 23 gallons of water, which a local organization transported to Flint.

Autumn Hubbard, Ambrea Mack and Sarah Esquivel, who are in the photo at the left, nearly emptied the shelves at their local grocery store. Thanks for your efforts.

everyone.

Now work.

Last week, I signed a new policy that formalizes the annual employee review process and sets expectations for employees and managers. [Administrative Policy 200.37](#) establishes consistent standards for implementing performance plans and reviews. Some of the standards are practices we have followed for years. Others are new. Some of particular note include:

- The mandatory use of HRMN
- A standard Feb. 1-Jan. 31 rating period for all employees
- An Individual Development Plan that specifies training or development programs for each employee
- Competencies and objectives that align to DTMB goals or scorecard metrics
- Consequences for managers and supervisors who do not complete the review process as required

A fundamental role of each DTMB manager or supervisor is to provide employees with direction and feedback on their performance. Employees also are expected to take an active role in pursuing professional development opportunities and achieving their competencies and objectives. I encourage you to review the new policy and talk with your manager or supervisor if you have questions. Of course, I welcome your questions and input as well. Please send your comments and ideas to me at behend@michigan.gov.

I know these have been busy weeks for many of you as you take on additional responsibilities and work hard to provide resources and services for our customers and citizens across the state. Please know that your hard work has not gone unnoticed. Thank you for everything you do, every day.

Have a great week,

David

Patrick,
I have reserved room 244 for tomorrow. This is not a locked room; however is a room that is often reserved where someone is currently using it today.

Sandi

BTMB
HELP. CONNECT. SOLVE.

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

City of Flint Did Not Meet Treatment Requirements

Our water system was recently found to be in violation of a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Samples were collected for total trihalomethanes (TTHM) analysis from eight locations on a quarterly basis (May 21, August 21, and November 20 of 2014). The average of the results at ANY of the eight locations must not exceed the maximum contaminant level (MCL) for TTHMs, otherwise our water system exceeds the Maximum Contaminant Level (MCL). The standard for TTHMs is 80 ug/L. The location reporting the highest TTHM level was 99 ug/L, thus, our water system exceeds the TTHM MCL.

What should I do?

- There is nothing you need to do unless you have a severely compromised immune system, have an infant, or are elderly. In that case, you may be at increased risk and should seek advice about drinking water from your health care provider.
- You do not need to boil your water or take other corrective actions. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What does this mean?

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

People who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

What is being done?

We are currently working on solutions to correct the problem. We anticipate resolving the problem in 2015.

For more information, please contact Mr. Brent Wright or Mike Glasgow at 810-787-6537 or the Water Plant at 4500 North Dort Highway, Flint, MI 48505.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the City of Flint.

CERTIFICATION: F1 S3

WSSN: 02310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules. Reminder to water supplier: This notice/certification must be sent to the DEC.

Subject: RE: Phones requested by HHS and FEMA

Thanks Jeanette,

We are getting 5 new phones up to the Flint SOB tomorrow (1-29-16). These phones will be configured and usable out of the box. We can set them up where needed or give them to Brian as he has installed a few of the phones himself in emergency situations.

Just an FYI on the total amount of phones-As of today there are 14 phones being used for the ECC and assorted other people working on the water issue. These 5 new phones will make the total 19 phones.

Thanks,
Tom Hengesbach

Hi Team,

An on-site request has been made for a few more desk top phones to be utilized at the Flint Facility on the 5th floor. Tom Hengesbach sent 5 up a few weeks ago but the couple that was left was used for the request today. It looks like the team on site will request at least 3 more. The ones Tom sent are plug and play and appear to work great. Should the on-site team request through you or could they get a few more??

Thanks,

THANK YOU!

Fellow employees,

Each day, more than 46,000 state of Michigan employees come to work with the confidence and commitment to make Michigan a better place to live, work and play. I appreciate the way you care about the citizens we serve, and how it is reflected in the work that you do.

As you have heard from me and the media, our reputation and trust can be severely impacted when people do not make good decisions, or use good judgment in solving problems. That principle is universal, but never more so than when public health is at stake. What happened in Flint can never be allowed to happen again anywhere in our state.

I know that you want to work in a place where employee input is valued, efforts are recognized, and teams are always striving for continuous improvement. That's why we introduced employee surveys, Bureaucracy Busters and other reinvention initiatives. We want and deserve a culture of innovation, continuous improvement and employee engagement at every level. We can never take for granted how important the people are who depend on us to do our jobs, and I am asking you not to let the situation in Flint negatively impact your motivation to excel every day.

Many of you have taken an interest in helping the citizens of Flint on your own time, and I'd like to take this opportunity to recognize and thank those who have volunteered over the last couple of weekends. You have worked tirelessly to deliver cases of bottled water, water filters, replacement cartridges and water testing kits to the families in need. I appreciate you donating your time to help our fellow Michiganders. To date, more than 37,000 homes have been visited by one of our water resource teams.

For employees who would like to further help the people of Flint, please visit www.HelpForFlint.com to learn how you can do so. For additional information and to sign up for daily updates, please visit www.mi.gov/FlintWater. I am committed to ensuring that all residents have access to safe and clean water.

Again, I'd like to express my gratitude for the work you do every day to continuously improve our state and earn the trust of those you serve. You make a real difference.

Thanks,

AGENDA

Charge / Mission:

- Listening, Learning, Fixing, Building

Mission Flint Team Roll Call

Agreement on the Key Mission Objectives?

- Scientifically validated safe water for All
- Citizen trust/behavior that water is safe
- Scientifically validated assessment of potentially impacted population to monitor
- Independent assessment of mitigation services to minimize/eliminate behavioral/cognitive impacts
- Sustainable Jobs & Opportunities
- Enhanced Learning and Training
- Public Safety and Communities of Hope
- Regaining Trust at every level

Critical Individual Objectives and time line to achieve AND Baseline Progress Reports (including but not limited to):

Progress Reports:

- MSP: GIS Mapping
- DEQ: Water Testing
- HHS: Blood Testing & Wraparound Services
- LARA: Testing, Plumbing
- Budget Office: \$ for Mental Health, Behavioral Health
- Others?

Short Term Mission

- Immediate needs of residents
- Access to safe water
- Water bill relief/certainty
- Communication networks of trust

Long Term Mission

- Restore hope, trust, and opportunity by enabling self reliance

- Sustainability of Solutions

Tactics

- Community Engagement / Friend Raising / Fundraising
- Communications / Messaging
- Tight Collaboration with City, County and Federal partners
- Real time Research & Data processing, analyzing, reporting, and posting

Organizational Layout

- How we will do our work, internally communicate, remove impediments, resolve conflicts and keep moving forward

Meeting and telephone schedule, subcommittees and next steps

Hello,
We are sending up 5 phones for use where needed for the Flint water issue that someone from our group will be delivering today. They should be plug and play out of the box so please keep them in the 5th floor data closet until needed.
Thanks,
Tom

Thanks Jeanette,
We are getting 5 new phones up to the Flint SOB tomorrow (1-29-16). These phones will be configured and usable out of the box. We can set them up where needed or give them to Brian as he has installed a few of the phones himself in emergency situations.
Just an FYI on the total amount of phones-As of today there are 14 phones being used for the ECC and assorted other people working on the water issue. These 5 new phones will make the total 19 phones.
Thanks,
Tom Hengesbach

Hi Team,

An on-site request has been made for a few more desk top phones to be utilized at the Flint Facility on the 5th floor. Tom Hengesbach sent 5 up a few weeks ago but the couple that was left was used for the request today. It looks like the team on site will request at least 3 more. The ones Tom sent are plug and play and appear to work great. Should the on-site team request through you or could they get a few more??

Thanks,

From: Governor's Office <governorsoffice@govsubscriptions.michigan.gov>
Sent: Wednesday, February 03, 2016 6:13 PM
To: Noonan, Michael (DTMB)
Subject: "Flint residents should not have to pay for water they cannot drink"

Budget recommendation will include \$30 million request for Flint water bill repayments

When Governor Rick Snyder presents his budget recommendation next Wednesday, Feb. 10, he will include a \$30 million request for the residents of Flint to keep their water service on and eliminate the need to pay for water they cannot completely trust to drink.

Under the governor's ask, the funding would enable the city of Flint to apply credits for customers on future bills. Estimates show water is roughly 47 percent of billing and sewer costs are around 53 percent. The credit would be applied to consumption usage (roughly

65 percent) of a resident's water portion of the bill, such as for bathing, drinking, cooking, and washing your hands. Residents still would be responsible for paying the sewer portion of their water bills.

Professor Marc Edwards of Virginia Tech said, "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

[Click here to learn more about the budget request.](#)

 Right-click here to download pictures. To help protect your privacy, Outlook prevented automatic download of this picture from the Internet.
[Learn more about the \\$20 million request](#)

We spoke with Staff Sgt. Thomas Vega about the critical resources they're providing to Flint families every day. He also encouraged residents to pick up and return their water testing kits to Flint fire stations. Test results will be posted online at www.mi.gov/flintwater. [Click here to watch the video.](#)

USE FILTERED TAP WATER

- Drinking, cooking
- Brushing teeth
- Washing fruits and vegetables
- Pet water bowls

USE UNFILTERED TAP WATER

- Cleaning
- Bathing

BLOOD LEAD LEVEL TESTING

All Flint children less than six years of age should have their blood lead levels tested. Contact your primary care provider or call 2-1-1.

NUTRITION

Did you know that some foods will help keep lead from being stored in a child's body? These are foods with a lot of calcium, vitamin C and iron.

FREE WATER TESTING

Flint residents who are concerned about their water can obtain free water testing kits at the water resource sites.

USE WATER FILTERS & CARTRIDGES

Water filters can reduce lead and other contaminants by 99 percent when installed correctly. Free water filters are available at the water resource sites.

LEAD IN FLINT WATER

GENERAL INFORMATION

- The amount of lead found in some Flint homes' drinking water could affect kids' health.
 - Even small amounts of lead can harm kids' health because they are still growing.
 - Adults are less likely to be harmed by the levels found in the water.
- Filter your drinking water using a National Sanitation Foundation (NSF)-approved filter.
 - You can receive a free NSF-approved filter if you use City of Flint water.
 - Call 2-1-1 to find out where you can pick up a free water filter.
- Some filters can remove up to 99 percent of the lead in water when used properly. To be sure your filter is removing as much lead as it can, carefully follow the instructions that came with it.
 - Run only cold water through the filter.
 - Change the filter cartridge as often as the instructions say.
- Even after changes to the water system, it may take a while before lead levels in your home's water drop.
- Lead is hard to avoid completely. It can be found in water pipes and brass water faucets, old paint, in dirt, at some job sites, and in metal used for some hobbies.

There are a number of steps you can take to keep yourself and your family healthy. Use the tips below to learn more about how to stay healthy:

LEAD IN WATER

Although your water may be a different color sometimes, it is not caused by lead. It's important to remember:

- You can't see, smell, or taste lead in water.
- Lead won't change the color of your water.
- The only way to know what your home's lead levels are is by having your water tested.

LEAD IN BLOOD

- If your children live in Flint or go to school or childcare in the City of Flint, their blood-lead level should be tested.
- You should contact your doctor about testing.
- Testing is available for free at the Genesee County Health Department. Call 2-1-1 if you need help getting there.
- If you are pregnant or nursing, and you have tested negative for high blood-lead levels, it is safe to breastfeed.
- If you are pregnant or nursing and have tested positive for high blood-lead levels, talk to your doctor about the safety of breastfeeding.

TIPS TO KEEP YOUR HOME SAFE FROM LEAD

WATER FILTERS

- Get your water tested. It's free. Call 2-1-1.
- Use a water filter. Call 2-1-1 for a free filter.
- If you do not have a water filter, use bottled water for drinking and mixing formula.
- Use cold, filtered water for cooking.
- Wash fruits and vegetables with filtered water.
- If you must use unfiltered water, run the water for at least five minutes before you use it. To save time and water in the future, it's a good idea to fill up as many containers as you can once you've run your water for five minutes.
- Drain and flush your water heater tanks regularly to remove any lead that has accumulated. Follow manufacturers instructions for maintenance or contact a licensed professional for assistance.

CLEANING

- Wash dishes, bottles and toys with unfiltered soapy water and dry before use.
- It is safe to use unfiltered tap water to mop floors and wipe down countertops.
- It is safe to wash clothes in your washer and dryer.
- Use door mats. Take your shoes off when indoors.
- Vacuuming carpets may pull more lead dust to the surface. Use a non-motorized sweeper to clean carpets.
- Clean windowsills and play areas often with paper towels and soapy water.

TIPS TO KEEP YOUR HOME SAFE FROM LEAD

IN THE BATHROOM

- Use filtered tap water to brush your kids' teeth.
- Adults can use unfiltered tap water to brush their teeth.
- You can use unfiltered water to shower or bathe, but don't allow water to get in kids' mouths.
- Studies reviewed by the Centers for Disease Control and Prevention show that parents can continue bathing their children in the tub but bath time should be used for bathing only, rather than allowing children to play in the water.
- Lead will not cause rashes or other skin problems. However, if levels of chlorine or other cleaners are high in the water, it may cause itchy or dry skin (similar to what can happen when you swim in a pool).

CARING FOR PETS

- Use filtered tap water for your family pets' water bowls.
- You can use unfiltered tap water to bathe your pets.
- If you notice your pet acting differently than normal, contact your vet.

HEALTHY DIET

- Eat food sources of iron, calcium and vitamin C.
- Wash hands with soap and warm water before eating.
- If you need fresh and healthy food, call the WIC office at 810-237-4537, or for SNAP food assistance apply at www.michigan.gov/mibridges or visit your local Michigan Department of Health and Human Services office.

SOURCES OF IRON INCLUDE:

- Lean red meats, fish, chicken
- Cereals with added iron
- Dried beans and lentils

SOURCES OF CALCIUM INCLUDE:

- Milk
- Yogurt
- Cheese
- Calcium fortified orange juice
- Leafy green vegetables such as kale or turnip greens

SOURCES OF VITAMIN C INCLUDE:

- Oranges, orange juice
- Grapefruit, grapefruit juice
- Tomatoes, tomato juice
- Green peppers
- Potatoes

LEAD INFO

The Flint water response team is focused on the lead in water crisis. In addition to water, scientists have long been concerned about all sources of lead including lead paint, dust, soil, etc.

LEAD PAINT

- Homes built before 1978 likely have lead paint, both inside and outside.
- Old paint is the most common way that kids are exposed to lead.

DIRT

- If you live in the city, there may be lead in the dirt outside your home.
- Before 1996, gas and the exhaust from cars contained lead. More lead will be found in dirt in busy traffic areas.

DUST

- The dust in your home can have tiny amounts of lead from paint and dirt.

HOBBIES AND JOBS

- Solder, fishing sinkers, bullets, and stained glass framing materials are some items that may contain lead. You could also track home lead dust from your job site.

HAVE QUESTIONS?

- For more information about protecting yourself and your family from lead, visit www.michigan.gov/flintwater.
- To find out where you can get a free water filter, call 2-1-1.
- For a free water test, call 2-1-1.
- For more information about lead in your home and what you can do, call the Michigan Department of Health and Human Services at 1-800-648-6942.
- For information on how to help, visit www.helpforflint.com.

FLINT WATER RESPONSE TEAM

PLOMO EN EL AGUA DE FLINT

INFORMACION GENERAL

- La cantidad de plomo que se encuentra en el agua potable en los hogares de Flint podría afectar la salud de los niños.
 - Incluso pequeñas cantidades de plomo pueden dañar la salud de los niños, ya que todavía están creciendo.
 - Los adultos tienen menos probabilidades de ser perjudicados por los niveles encontrados en el agua.
- Filtre el agua potable utilizando un filtro aprobado por la National Sanitation Foundation (NSF).
 - Usted puede recibir un filtro aprobado por NSF gratis, si utiliza agua de la Ciudad de Flint.
 - Llame al 2-1-1 para averiguar adónde puede retirar un filtro de agua gratuito.
- Algunos filtros pueden eliminar hasta el 99% del plomo en el agua cuando se utilizan correctamente. Para asegurarse de que su filtro está eliminando la mayor cantidad de plomo posible, siga cuidadosamente las instrucciones enviadas con éste.
 - Deje correr agua fría a través del filtro solamente.
 - Cambie el cartucho del filtro tan a menudo como lo indiquen las instrucciones.
- Incluso después de los cambios en el sistema de agua, puede tomar un tiempo antes de que los niveles de plomo en el agua se reduzcan.
- El plomo es difícil de evitar por completo. Se puede encontrar en las tuberías de agua y grifos de agua de bronce, pintura vieja, en la tierra, en algunos lugares de trabajo, y en el metal usado en algunos pasatiempos.

Hay una serie de pasos que puede tomar para que usted y su familia estén saludables. Utilice los siguientes consejos para aprender más sobre cómo mantenerse saludable:

PLOMO EN EL AGUA

Aunque el agua a veces puede ser de un color diferente, esto no es causado por el plomo. Es importante recordar:

- Usted no puede ver, oler o saborear plomo en el agua.
- El plomo no cambiará el color del agua.
- La única manera de saber cuáles son los niveles de plomo en su hogar es haciendo examinar el agua.

PLOMO EN LA SANGRE

- Si sus hijos viven en Flint o van a la escuela o a una guardería en la ciudad de Flint, sus niveles de plomo en la sangre deben ser examinados.
- Debe comunicarse con su médico para realizarse un examen.
- El examen está disponible de forma gratuita en el Departamento de Salud del Condado de Genesee. Llame al 2-1-1 si necesita ayuda para llegar allí.
- Si está embarazada o amamantando, y ha dado negativo en los niveles altos de plomo en la sangre, es seguro amamantar.
- Si está embarazada o amamantando y ha dado positivo en los niveles altos de plomo en la sangre, hable con su médico acerca de la seguridad de la lactancia materna.

CONSEJOS PARA MANTENER SU HOGAR PROTEGIDO DEL PLOMO

FILTROS DE AGUA

- Haga examinar el agua de su casa. Es gratis. Llame al 2-1-1.
- Utilice un filtro de agua. Llame al 2-1-1 para solicitar un filtro gratuito.
- Si usted no tiene un filtro de agua, utilice agua embotellada para beber y para mezclar fórmula.
- Use agua fría y filtrada para cocinar.
- Lave frutas y verduras con agua filtrada.
- Si tiene que usar agua sin filtrar, deje correr el agua durante cinco minutos antes de usarla. Para ahorrar tiempo y agua en el futuro, es una buena idea llenar tantos envases como sea posible, una vez que haya dejado correr el agua durante cinco minutos.
- Drene y purgue los tanques de su calentador de agua regularmente, para eliminar cualquier plomo que haya quedado acumulado. Siga las instrucciones de fabricante para el mantenimiento o póngase en contacto con un profesional autorizado para obtener ayuda.

LIMPIEZA

- Lave platos, botellas y juguetes con agua no filtrada y jabón y deje que se sequen antes de su uso.
- Es seguro usar el agua del grifo sin filtrar para limpiar pisos y mesadas.
- Es seguro lavar la ropa en la lavadora y secadora.
- Utilice un tapete en la puerta. Quítese los zapatos cuando esté dentro.
- Aspirar alfombras puede levantar más polvo de plomo sobre la superficie. Utilice una barredora no motorizada para limpiar alfombras.
- Limpie alféizares y áreas de juego a menudo con toallas de papel y agua con jabón.

CONSEJOS PARA MANTENER SU HOGAR PROTEGIDO DEL PLOMO

EN EL BAÑO

- Utilizar agua filtrada para cepillar los dientes de sus hijos.
- Los adultos pueden usar el agua del grifo sin filtrar para lavarse los dientes.
- Se puede utilizar agua del grifo sin filtrar para bañarse, pero no deje que los niños beban el agua cuando jueguen en la bañera.
- Estudios realizados por los Centros de Control y Prevención de Enfermedades muestran que los padres pueden seguir bañando a sus hijos en la bañera, pero la hora del baño se debe utilizar para el baño solamente, en lugar de permitir que los niños jueguen en el agua durante mucho tiempo.
- El plomo no causa erupciones u otros problemas de la piel. Sin embargo, si los niveles de cloro u otros productos de limpieza son altos en el agua, puede causar picazón en la piel o piel seca (similar a lo que puede suceder cuando usted nada en una piscina).

CUIDADO DE MASCOTAS

- Utilice agua filtrada del grifo para que su mascota beba en su tazón.
- Usted puede utilizar el agua del grifo sin filtrar para bañar a sus mascotas.
- Si usted nota que su mascota actúa de manera diferente de la normal, consulte a su veterinario.

DIETA SALUDABLE

- Coma alimentos ricos en hierro, calcio y vitamina C.
- Lávese las manos con jabón y agua tibia antes de comer.
- Si necesita alimentos frescos y saludables, llame a la oficina de WIC al 810-237-4537, o para la asistencia alimentaria "SNAP" aplique en www.michigan.gov/mibridges o visite su oficina local del Departamento de Salud y Servicios Humanos de Michigan.

BUENAS FUENTES DE HIERRO INCLUYEN:

- Carnes rojas desgrasadas, pescado y pollo
- Cereales con hierro añadido
- Frutas secas (pasas, ciruelas pasas)

BUENAS FUENTES DE CALCIO INCLUYEN:

- Leche
- Yogur
- Queso
- Verduras de hojas verdes (espinaca, col rizada, berza)

BUENAS FUENTES DE VITAMINA C INCLUYEN:

- Naranjas, jugo de naranja
- Toronja, jugo de toronja
- Tomates, jugo de tomate
- Pimientos verdes

INFORMACION DEL PLOMO

El equipo de respuesta de Flint está enfocado en la crisis de plomo en la agua. Además del agua, científicos, durante mucho tiempo, han estado preocupados por todas las fuentes de plomo, incluyendo la pintura con

PINTURA CON PLOMO

- Las casas construidas antes de 1978 probablemente tienen pintura con plomo, tanto dentro como fuera.
- La pintura vieja es la forma más común en que los niños son expuestos al plomo.

TIERRA

- Si usted vive en la ciudad, puede haber plomo en la tierra afuera de su casa.
- Antes de 1996, el gas y los gases de escape de los automóviles contenían plomo. Más plomo se encontrará en la tierra de áreas con tránsito intenso.

POLVO

- El polvo en su casa puede tener pequeñas cantidades de plomo de la pintura y suciedad.

AFICIONES Y EMPLEOS

- Las soldaduras, plomadas de pesca, balas y materiales que enmarcan los vitrales son algunos elementos que pueden contener plomo. Usted podría también llevar polvo con plomo a casa de su sitio de trabajo.

¿TIENE PREGUNTAS?

- Para más información sobre cómo protegerse usted y su familia del plomo, visit www.michigan.gov/flintwater.
- Para saber dónde puede obtener un filtro de agua gratuito, llame al 2-1-1.
- Para una examinación de su agua gratis, llame al 2-1-1.
- Para más información sobre el plomo en su casa y lo que puede hacer, llame al Departamento de Salud y Servicios Humanos de Michigan al 1-800-648-6942.
- Para obtener información sobre cómo puede ayudar, visite www.helpforflint.com.

PLOMO EN EL AGUA

Aunque el agua a veces puede ser de un color diferente, esto no es causado por el plomo. Es importante recordar:

- Usted no puede ver, oler o saborear plomo en el agua.
- El plomo no cambiará el color del agua.
- La única manera de saber cuáles son los niveles de plomo en su hogar es haciendo examinar el agua.

PLOMO EN LA SANGRE

- Si sus hijos viven en Flint o van a la escuela o a una guardería en la ciudad de Flint, sus niveles de plomo en la sangre deben ser examinados.
- Debe comunicarse con su médico para realizarse un examen.
- El examen está disponible de forma gratuita en el Departamento de Salud del Condado de Genesee. Llame al 2-1-1 si necesita ayuda para llegar allí.
- Si está embarazada o amamantando, y ha dado negativo en los niveles altos de plomo en la sangre, es seguro amamantar.
- Si está embarazada o amamantando y ha dado positivo en los niveles altos de plomo en la sangre, hable con su médico acerca de la seguridad de la lactancia materna.

CONSEJOS PARA MANTENER SU HOGAR PROTEGIDO DEL PLOMO

FILTROS DE AGUA

- Haga examinar el agua de su casa. Es gratis. Llame al 2-1-1.
- Utilice un filtro de agua. Llame al 2-1-1 para solicitar un filtro gratuito.
- Si usted no tiene un filtro de agua, utilice agua embotellada para beber y para mezclar fórmula.
- Use agua fría y filtrada para cocinar.
- Lave frutas y verduras con agua filtrada.
- Si tiene que usar agua sin filtrar, deje correr el agua durante cinco minutos antes de usarla. Para ahorrar tiempo y agua en el futuro, es una buena idea llenar tantos envases como sea posible, una vez que haya dejado correr el agua durante cinco minutos.
- Drene y purgue los tanques de su calentador de agua regularmente, para eliminar cualquier plomo que haya quedado acumulado. Siga las instrucciones de fabricante para el mantenimiento o póngase en contacto con un profesional autorizado para obtener ayuda.

LIMPIEZA

- Lave platos, botellas y juguetes con agua no filtrada y jabón y deje que se sequen antes de su uso.
- Es seguro usar el agua del grifo sin filtrar para limpiar pisos y mesadas.
- Es seguro lavar la ropa en la lavadora y secadora.
- Utilice un tapete en la puerta. Quítese los zapatos cuando esté dentro.
- Aspirar alfombras puede levantar más polvo de plomo sobre la superficie. Utilice una barredora no motorizada para limpiar alfombras.
- Limpie alféizares y áreas de juego a menudo con toallas de papel y agua con jabón.

CONSEJOS PARA MANTENER SU HOGAR PROTEGIDO DEL PLOMO

EN EL BAÑO

- Utilizar agua filtrada para cepillar los dientes de sus hijos.
- Los adultos pueden usar el agua del grifo sin filtrar para lavarse los dientes.
- Se puede utilizar agua del grifo sin filtrar para bañarse, pero no deje que los niños beban el agua cuando jueguen en la bañera.
- Estudios realizados por los Centros de Control y Prevención de Enfermedades muestran que los padres pueden seguir bañando a sus hijos en la bañera, pero la hora del baño se debe utilizar para el baño solamente, en lugar de permitir que los niños jueguen en el agua durante mucho tiempo.
- El plomo no causa erupciones u otros problemas de la piel. Sin embargo, si los niveles de cloro u otros productos de limpieza son altos en el agua, puede causar picazón en la piel o piel seca (similar a lo que puede suceder cuando usted nada en una piscina).

CUIDADO DE MASCOTAS

- Utilice agua filtrada del grifo para que su mascota beba en su tazón.
- Usted puede utilizar el agua del grifo sin filtrar para bañar a sus mascotas.
- Si usted nota que su mascota actúa de manera diferente de la normal, consulte a su veterinario.

DIETA SALUDABLE

- Coma alimentos ricos en hierro, calcio y vitamina C.
- Lávese las manos con jabón y agua tibia antes de comer.
- Si necesita alimentos frescos y saludables, llame a la oficina de WIC al 810-237-4537, o para la asistencia alimentaria "SNAP" aplique en www.michigan.gov/mibridges o visite su oficina local del Departamento de Salud y Servicios Humanos de Michigan.

BUENAS FUENTES DE HIERRO INCLUYEN:

- Carnes rojas desgrasadas, pescado y pollo
- Cereales con hierro añadido
- Frutas secas (pasas, ciruelas pasas)

BUENAS FUENTES DE CALCIO INCLUYEN:

- Leche
- Yogur
- Queso
- Verduras de hojas verdes (espinaca, col rizada, berza)

BUENAS FUENTES DE VITAMINA C INCLUYEN:

- Naranjas, jugo de naranja
- Toronja, jugo de toronja
- Tomates, jugo de tomate
- Pimientos verdes

INFORMACION DEL PLOMO

El equipo de respuesta de Flint está enfocado en la crisis de plomo en la agua. Además del agua, científicos, durante mucho tiempo, han estado preocupados por todas las fuentes de plomo, incluyendo la pintura con

PINTURA CON PLOMO

- Las casas construidas antes de 1978 probablemente tienen pintura con plomo, tanto dentro como fuera.
- La pintura vieja es la forma más común en que los niños son expuestos al plomo.

TIERRA

- Si usted vive en la ciudad, puede haber plomo en la tierra afuera de su casa.
- Antes de 1996, el gas y los gases de escape de los automóviles contenían plomo. Más plomo se encontrará en la tierra de áreas con tránsito intenso.

POLVO

- El polvo en su casa puede tener pequeñas cantidades de plomo de la pintura y suciedad.

AFICIONES Y EMPLEOS

- Las soldaduras, plomadas de pesca, balas y materiales que enmarcan los vitrales son algunos elementos que pueden contener plomo. Usted podría también llevar polvo con plomo a casa de su sitio de trabajo.

¿TIENE PREGUNTAS?

- Para más información sobre cómo protegerse usted y su familia del plomo, visit www.michigan.gov/flintwater.
- Para saber dónde puede obtener un filtro de agua gratuito, llame al 2-1-1.
- Para una examinación de su agua gratis, llame al 2-1-1.
- Para más información sobre el plomo en su casa y lo que puede hacer, llame al Departamento de Salud y Servicios Humanos de Michigan al 1-800-648-6942.
- Para obtener información sobre cómo puede ayudar, visite www.helpforflint.com.

Subject: Additional Water Coolers

Any chance we can get more water coolers in the staff areas?
Some staff are reporting that they have visited their doctor's office and have elevated blood lead levels.

Subject: Dock Access

Jeff,

There are three guys here from Logic dealing with the water issues here in Flint. These gentlemen are going in and out of the dock on a regular basis to load/unload equipment and supplies. They have asked if it is possible for them to get access to the dock door added to their cards. Mike said that he is okay with it as long as you are okay with it.

The three guys are

Hello everyone,

I apologize that I have not sent this e-mail out sooner. I am still working on a new location for our next meeting, and will let you know as soon as I have a place set. However, our next meeting is still scheduled for this Thursday, February 4th at 3:00 p.m.

As promised, I have attached a number of documents to this e-mail. They are...

1. Minutes from last Thursday's meeting
2. Volunteer Request Form for any organization that needs event based volunteers from the Community Volunteer Reception Center. (Also, please remember that groups interested in volunteering in the work that is being done around the water crisis should visit www.flintvolunteer.org)
3. Updated contact list for the Community Partners Meetings
4. Catholic Charities support group for those affected by the water crisis
5. Long term community recovery model (introduced at last week's meeting)

Finally, remember that tomorrow (Monday), there will be a rally at First Trinity Missionary Baptist Church (1226 Beach St., Flint, MI)...at 12:00 p.m. Everyone is invited.

Hope to see everyone on Thursday. Take care.

Tony Lasher

Executive Director

American Red Cross of East Central Bay - Michigan

(serving the counties of Arenac, Bay, Genesee, Gladwin, Huron, Lapeer, Midland, Saginaw, Sanilac and Tuscola)

Work: 810-893-6647

Community Partners Meeting
American Red Cross
1401 S Grand Traverse St, Flint, MI 48503
Thursday, January 28, 2016

Introductions

- Lieutenant Governor Brian Calley: eye on sustainability, window of opportunity to help Flint, wants to be physically present in community (physical presences will be Rich Baird). Wants over communication. Wants to leave tangible money (100million) for long run before close of his run as a government official. Intends to be at next meeting.
 - Alternative to 211- 866-561-2500, Going to be on Michigan.gov
211 does not work for Obama Phones or for some of the prepaid phones.
 - Need for translation of all documents in Arabic and Spanish. Some posted to Michigan.gov.
 - Concerns raised about how will those who test negative will receive treatment if they are still affected.

National Guard I.D. announcement

- Issues with PODs
 - There are currently rumors going around, they are not working with law enforcement (I.e. ICE). The National Guard's main concern is just to get clean water out to the community. "No human being will be denied water at our five locations. You do not need to give ID; you do not need to show your address." When they ask "What is your address?" if you feel uncomfortable you can call 211 and get a delivery schedule or have someone come for you.

Planning (See PowerPoint)

- Recovery Destination: Healthy Home, Healthy Community
- 6 points of recovery (Each one over seen by someone in the room), possibly have people sign up for "committees" at a later date. KEY OUTCOME.
- Need to work from this macro distribution to a more targeted sustainable solution
- Need to carve out "players" known and unknown
- Team Rubicon: skills of military and first responders to respond to disasters
- Artist/Activist speaking about how 211 is hard and some locations not receiving resources that they need
- Flint Food Bank (810-239-4441), who works with 100 partners, is now making deliveries to over 40 sites, with 21 trucks, 372 pallets. The Food Bank plans on doing this each week. If you know of any nonprofit interested in receiving water have them call the

Food Bank. Must call for pallets only. Catholic Charities can help with smaller quantities of water.

- Some houses are being hit more than once. But there are areas where they have not seen a bottle of water. The Red Cross gets out routes Emergency Operation Center. If there are addresses and locations please leave them here at the Red Cross or call 211. Senior/ Section eight housing seems to be a main concern. Catholic Charities seems to be working on that hurdle as well.

Activity Reports

- Behavioral health support meeting with the Public Health “Flint Community Resilience Group” next Tuesday February 2nd 11am-1pm at River Front Banquet Center. Immediate, intermediate and long term behavioral health addressed.

County EOC/State EOC:

- Sheriff is encouraging everyone to use/promote 211. Or the Sheriff’s radio room has a center set up (more information?). 211 does not meet immediate need for water unless it is a special circumstance. Your name is going on a list. Rumor of State pulling out is not true, there is a “transition” going on.
- More clear guidelines on how to get answers needed. There are 600 franchise customers. Suggestion: look at where the bill comes may/may not help you know where the water is coming from. Emphasis on having people CALL to get answers. There is also the “leaving things on the door” we need to think about if people have the tools to read or call for answers.
- There was a suggestion for an online database so that people can look it up on their own if they would like to. Sean Kammer from the Mayor’s office said that he can most likely get that up tomorrow. There is one floating around out there but we should see if there are differences to make sure correct information is released.
- 95% of community reached by canvassing, 90% twice.
- Reoccurring issue brought up: Put people of Flint to work with the Flint Water Crisis?

FEMA:

- Katie Halliday: There was a federal emergency declaration allowing for four critical commodities: water, filter, filter replacement and water test kits. Also providing technical guidance.
- Staff at federal storing agency and then commodities go to the state area that goes out to distribution. You will not see FEMA out on the ground level.
- Jeannie Moran FEMA region 5 (regina.moran@fema.dhs.gov; 202-821-3867) is our contact

- Health and Human Services have also come in to set up operations on the ground to see what they can offer for sustainable, long term options.
- Department of Community Health states they have had a revolving door of FEMA and State coming through to help come up with long term goals. They are feeling heard. Health Department with EPA will be here all weekend working on long term plans to create center here in Flint. (More information?)

Partners and Stakeholders:

Good360:

- Resource for everyone. Happy to have individual calls. Partners with large local donors to procure products for non-profits. Understand that product need may not be at this time but it may show up down the road. Walmart, Home Depot, CVS, + would be working with 360. They have also been working with local government and non-profits here. Some of these companies are already on the ground.
- Non- Profits can develop their own wish list. Disasterrecovery360.org and you can create your “needs list”. There is no fee to use their services. Products offered at extreme discount or at no cost to non-profit.
- Contact: tiffany@good360.org

Community Volunteer Reception Center (VRC), Staffing request, Website

- Over 310 EBV last Saturday and 40 ARC volunteers. This weekend 360 volunteers coming in, including partners such as Michigan Carpenters.
- There is now a website for the Volunteer Reception Center: Flintvolunteer.com
- This is where large groups will be sent to get connected to VRC.
- Questions keep coming up about pledged money for jobs to help empower people of Flint and long term breaking away from relying on volunteers.
- Transition to working with United Way and how to distribute volunteers for community partners that will help beyond this cause. Starting through the current VRC will allow for this development. “Civic engagement beyond this crisis.” If agencies have a request for volunteers please fill out Volunteer Workforce Request Form (see attached).
- Hours are changing week to week and a set schedule should be released next week.
- GOAL: Eventually have partners post needs to the website and help to stay engaged through a sharing site. Looking for tools to share information.

Other business

- Catholic Charities has started a support group 1pm- 3pm at Catholic Charities' Center for Hope Warming Center 517 E. Fifth Ave
- Monday at 12:00p rally at 1226 Beach St. Flint, MI, First Trinity Missionary Baptist Church
- Metro (Chanelle) keeps a cohesive list of local events and has an email- Thought: link her to site?
- St. Michaels and St. Mary's are trying to canvas. They are going to get in touch with Catholic Charities and Bottles for Babies
- Social Media? "#volunteer4flint" Genesee County Health Department also puts stuff on their Facebook page. They are willing to put things on their page and they have a marketing specialist.
- Who has the resources to host a FB page for this group? TABLE FOR NXT TIME.
- "Bottles for the Babies" working on hitting 41,000 households will be getting magnets and flyering. Getting information from the Health Department. Water IQ (something they use to test local knowledge) results: only 50% new they needed replacement filters and less than 50% knew where to get the replacement filter.
- Cooking Matters Class also going to be offered though Catholic Charities. Time TBA on Monday Afternoons.
- Next Thursday Meeting 3:00p at the American Red Cross. Room TBA.

Importance: High

Hi All,

We had the opportunity to meet onsite this morning with our subs (LaSalle and Central Fabricators) who are involved in the pull ahead work for the week of 2/15 to review the area and discuss as a group. After reviewing the scope in depth and reviewing the existing conditions onsite a number of questions/items came up. I wanted to share those with you all and also propose a plan for us to get in there on Monday 2/8 to begin prep work on this pull ahead work so we can make sure everything goes smoothly and is complete the week of 2/15. We determined today as a group whole that if we delay the start to 2/15 there is a very good chance we won't be completed by 2/22 date for carpet installation. There is a number of items/actions that need to take place in order to have this run smoothly and I fear if we start on 2/15 we won't meet the expectations. Here is our proposed plan for review and approval: Note that we had a very quick discussion with Mike Noonan and a B&B rep about this onsite and they both seemed to believe it would be OK for us to go on Monday 2/8.

2/8

- Mobilize tools/materials onsite
- Install temp. protection, as needed
- Begin disassembly of ceiling grid (PLEASE INFROM THEM TO INSTALL NO MORE CEILING PADS. IT LOOKED TODAY AS IF THEY WERE INSTALLING IN AREAS THAT ARE GOING TO BE AFFECTED BY THIS WORK)
- Identify which electrical and mechanical components need to be disconnected and removed.
 - o This could just be 1 or 2 lights or diffusers once we determine if they are within the grid area that must come down
 - Who will be disconnecting these and removing/reinstalling? Reps with B&B or SOM? We don't have provisions for this within our scope for this work
- Begin fire proofing removal
- Get 220v power installed for welder for Wednesday 2/10 (SOM to handle)

2/9

- finalize fire proofing removal

- All lighting removed
 - All HVAC diffusers removed
 - Confirm 220V power
- 2/10
- Steel sub onsite to weld stiffeners, plates, etc. (Fire HOT permit notice to be submitted by weeks end for next week's work)
- 2/11
- Continue with welding efforts for stiffeners, plates, etc.
- 2/12
- Finalize all welding efforts
 - Clean up
- 2/15 (Monday)
- Roofing subcontractor onsite for roof penetrations and top temp. patch for water tight
 - Steel subcontractor onsite to bolt on stub columns (pending stub columns are back from galvanizer)
- 2/16
- Continue with steel stub columns and roof patching
- 2/17
- Continue with steel stub columns and roof patching, if needed.
 - Begin repairing all fire proofing and ceiling grid
- 2/18
- Continue with fire proofing patching and ceiling grid, if needed
 - Reinstall lighting and mech. diffusers (B&B or SOM?)
- 2/19
- Final clean up and demobilization from site

You can see by the timeline above we will need every bit of 2 weeks to get this work completed now that we have all had a chance to dive in and understand what needs to happen as a group.

A couple of things we learned today and request that I wanted to make everyone aware of:

1. Harrison Rd. will be shut down completely when we do our scheduled crane picks (Dates TBD but our crane rep was onsite today to take measurements, elevations shots, etc.)
2. 220V power will be required for the welding efforts on the 7th floor and also for the welding efforts on the roof when we erect the structure so two (2) 220v access points will be needed for two (2) separate welders.
3. There are Johnson control T-stats that are mounted on the columns we need to do our work on. Can we get them disconnected and removed prior so we don't risk damaging these during the work?

Adam,

I know you scheduled a kick off meeting Thursday next week with B&B but unfortunately that will be too late in the game if we want to accomplish all this scope of work. I can make myself and our superintendent available for a phone conference tomorrow anytime or we can have a quick meeting Monday morning onsite when we kick off LaSalle with the ceiling grid/fire proof demo. Either way, I think we need to discuss in depth as a group before we go at this Monday AM.

Jan,

Can you please forward me the security clearance form that I need to submit with names, etc. since guys will, be coming into the building as early as Monday next week. I would like to get that submitted later today or first thing tomorrow.

Please let me know on this ASAP so we can plan accordingly. My cell # is below if you need to reach me today.

Thank everyone!!

Subject: Flint General- Capacity Increase

With the recent activity in Flint and the added emergency staff into the parking ramp, new employees have been forced to wait on a list for a parking space. Mike Noonan has stated that he sees at least 20 empty spaces on the roof every day, so with his agreement, I have increased the capacity of the random/uncovered parking from 234 to 240 to accommodate some of the staff waiting to park.

We will track the utilization again when the Flint Water Crisis is over and adjust the counts at that time.

Rick- Please make the change to your reports.

Subject: Water Coolers

Kurt,
DTMB is currently providing and paying for Culligan water coolers in the client areas.

As you know, it has been recommended that people within the city of Flint drink filtered water. Even though the staff break area sinks have filters on them, the drinking fountains do not.

Is it possible to get the water coolers in the staff break rooms?

Rental for each unit \$7 (4 are currently needed. One for floors 2, 3, 4, 6. One more added when the 7th floor opens.

Each 5 gallon jug of water \$5.50 + \$7 bottle deposit.

I anticipate the use of 40 jugs per month = \$220.

Please let me know your thoughts.

I have one staff member currently reporting that they have gone to their doctor and was told they have a high blood lead level.

Hi All,

We had the opportunity to meet onsite this morning with our subs (LaSalle and Central Fabricators) who are involved in the pull ahead work for the week of 2/15 to review the area and discuss as a group. After reviewing the scope in depth and reviewing the existing conditions onsite a number of questions/items came up. I wanted to share those with you all and also propose a plan for us to get in there on Monday 2/8 to begin prep work on this pull ahead work so we can make sure everything goes smoothly and is complete the week of 2/15. We determined today as a group whole that if we delay the start to 2/15 there is a very good chance we won't be completed by 2/22 date for carpet installation. There is a number of items/actions that need to take place in order to have this run smoothly and I fear if we start on 2/15 we won't meet the expectations. Here is our proposed plan for review and approval: Note that we had a very quick discussion with Mike Noonan and a B&B rep about this onsite and they both seemed to believe it would be OK for us to go on Monday 2/8.

2/8

- Mobilize tools/materials onsite
- Install temp. protection, as needed
- Begin disassembly of ceiling grid (PLEASE INFROM THEM TO INSTALL NO MORE CEILING PADS. IT LOOKED TODAY AS IF THEY WERE INSTALLING IN AREAS THAT ARE GOING TO BE AFFECTED BY THIS WORK)
- Identify which electrical and mechanical components need to be disconnected and removed.
 - o This could just be 1 or 2 lights or diffusers once we determine if they are within the grid area that must come down

- Who will be disconnecting these and removing/reinstalling? Reps with B&B or SOM? We don't have provisions for this within our scope for this work
- Begin fire proofing removal
- Get 220v power installed for welder for Wednesday 2/10 (SOM to handle)
- 2/9
 - finalize fire proofing removal
 - All lighting removed
 - All HVAC diffusers removed
 - Confirm 220V power
- 2/10
 - Steel sub onsite to weld stiffeners, plates, etc. (Fire HOT permit notice to be submitted by weeks end for next week's work)
- 2/11
 - Continue with welding efforts for stiffeners, plates, etc.
- 2/12
 - Finalize all welding efforts
 - Clean up
- 2/15 (Monday)
 - Roofing subcontractor onsite for roof penetrations and top temp. patch for water tight
 - Steel subcontractor onsite to bolt on stub columns (pending stub columns are back from galvanizer)
- 2/16
 - Continue with steel stub columns and roof patching
- 2/17
 - Continue with steel stub columns and roof patching, if needed.
 - Begin repairing all fire proofing and ceiling grid
- 2/18
 - Continue with fire proofing patching and ceiling grid, if needed
 - Reinstall lighting and mech. diffusers (B&B or SOM?)
- 2/19
 - Final clean up and demobilization from site

You can see by the timeline above we will need every bit of 2 weeks to get this work completed now that we have all had a chance to dive in and understand what needs to happen as a group.

A couple of things we learned today and request that I wanted to make everyone aware of:

1. Harrison Rd. will be shut down completely when we do our scheduled crane picks (Dates TBD but our crane rep was onsite today to take measurements, elevations shots, etc.)
2. 220V power will be required for the welding efforts on the 7th floor and also for the welding efforts on the roof when we erect the structure so two (2) 220v access points will be needed for two (2) separate welders.
3. There are Johnson control T-stats that are mounted on the columns we need to do our work on. Can we get them disconnected and removed prior so we don't risk damaging these during the work?

Subject: Boil Water Advisory
Importance: High

Sandi & Mike,

It has been brought to my attention that there is a water boil advisory covering the City of Flint. Please see the attached two documents. Please remind staff that water must be boiled before washing hands, dishes, etc. Please post signs indicating such and you should disable drinking fountains just to be sure. Please let me know if you have any questions.

Terrence M. Beurer, Deputy Director
MDHHS
Field Operations

DRINKING WATER WARNING

**The City of Flint water system lost pressure and contamination may have occurred
BOIL YOUR FILTERED WATER BEFORE USING**

Due to a drop in pressure in the City of Flint water supply, bacterial contamination may have occurred in the water system. Bacteria are generally not harmful and are common throughout our environment. Corrective measures are currently being undertaken to correct the situation.

What should I do?

AS A PRECAUTIONARY MEASURE, DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST. Bring all FILTERED water to a boil, let it boil for one minute, and let it cool before using, or use bottled water. If you are currently NOT using a filter to remove lead from drinking water, FLUSH your water for AT LEAST 7 minutes before collecting any to boil. Boiled FILTERED, boiled FLUSHED, or bottled water should be used for drinking, making ice, brushing teeth, washing dishes, and preparing food. Boiling kills bacteria and other organisms in the water. Continue using boiled or bottled water until further notice.

Due to the pressure loss, there may be trapped air and loose sediment in your water lines. The air and sediment may be removed by flushing your water system. DO NOT FLUSH YOUR SYSTEM THROUGH THE FILTER. The resulting air and sediment may affect the performance of your filter and the filter cartridge should be replaced.

What happened? What is being done?

These precautionary actions are being taken due to the loss of water pressure in the water distribution system caused by a water transmission main break on February 9, 2016. Whenever a water system loses pressure for any significant length of time, precautionary measures are recommended.

The City of Flint Water Department is working to get pressure restored, and water staff will be taking other remedial actions such as flushing and collecting bacteriological samples from around the system. The samples will be collected to determine that the water quality meets the state drinking water standards. We will inform you when tests show no bacteria and you no longer need to boil your water. We anticipate resolving the problem later today. This precautionary boil water notice shall remain in effect until results from the sampling verify the water is safe to drink. **Customers will be advised when the boil water advisory has been lifted.**

For more information, please contact The City of Flint Water Department at (810) 766-7202. General guidelines on ways to lessen the risk of infection by microbes are available from the EPA Safe Drinking Water Hotline at 1(800) 426-4791.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

CERTIFICATION:

WSSN: 2310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules.

Michael Glasgow UTILITIES ADMINISTRATOR 2/9/16
Signature Title Date Distributed

Reminder to water supplier: This notice / certification must be sent to the DEQ.

Good Morning,

This email is to inform you that someone is in my paid assigned parking spot again. This time it is a silver town and country Mini Van with the license plate 0 (O)KS Z33 .

The vehicle that should be on file for me is a white Chevrolet impala license plate CMW 2391. My car is parked in spot 155 or around that area. Thanks.

Subject: DKP9245 is in space 31 in the flint ramp and it is not their space

Hello Gents,

Jennifer Wozniak parks in space 31 in the ramp and this is the first call we have received from her. But, she states that since FEMA has been parking there, over the last couple of weeks she has only been able to park in her space #31 - 3 times.

Can you look for plate DKP9245 in space 31 and see if it is part of the group for the Flint Water Crisis please. It is another PV Holding Corp car and is not registered with us. We must let them know that gen spaces only and I would like to give Jennifer a call and allow her to park in her own space, she is now in space #33 until the vehicle is moved.

Happy New Year!

Subject: RE: Parking Issues- Genesee County Union St.

Jennifer,

Thank you for the write up. This will help as I am forwarding these issues onto management. When you have someone in your space call the parking office with the plate number and park your vehicle in the random section. In the meantime, we will attempt to locate the person parked in your space and notify facilities. Leave a phone number with us so we can call you when the vehicle has moved out of your space.

Subject: Parking Issues- Genesee County Union St.

Since the Flint water oversight began, it is rare that I am able to park in my assigned parking spot, spot 31. I have had this spot assigned to me since November of 2012. Since the Flint water crisis oversight began, I have had my spot unoccupied about three times, allowing me to park there. Every day I come in, my spot is usually occupied. I report it to building security and will now start reporting it to Central Office, as instructed. The building security is great about handling the situation but new cars park in my spot on a daily basis. I also know that security has been telling people to park on the upper levels, because I see them do it. People aren't listening to them. There has even been one occasion that security has had a car moved from my spot, and another car took that as an opportunity to take my spot before I could, within an hour of the other car moving. I arrived today at 11:30 and the car that was in my spot when I arrived is still there. As a mobile employee, it is frustrating to pay double the parking fee for a covered and reserved spot parking that I cannot use unless I come into the office at 8am, which is rare. I am not the only one having these issues. It is not fair to me to have to pay extra to have to park in a random spot that is uncovered, because people do not want to follow protocol that they are made aware of. I am hoping that some type of compensation can be issued for the difference between what I am paying for parking and the standard parking fee for our office, until I am able to reliably use my assigned spot. Thank you in advance for your assistance.

Subject: Facility Notification: Flint State Office Building

Flint Drinking Water

Details:

An advisory has been issued by the City of Flint asking water customers within a defined area (see attached notice and map) to boil water before using it. However, the Flint State Office Building does not fall within the identified area. DTMB continues to offer tap and bottled water in public areas on each floor as options in the Flint State Office Building.

VIDEO: What Governor Snyder's FY17 budget means for Michigan

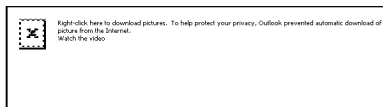

Gov. Rick Snyder's FY 2017 budget calls for critical investments for the Flint water crisis, statewide infrastructure and the Detroit Public Schools. The governor's recommendation also addresses the skyrocketing costs of specialty medications that Michigan residents depend on for better health outcomes.

This budget also stays committed to the Governor's core statewide priorities of education, talent and economic development, health and human services, and public safety.

The proposed FY 2017 budget makes key investments to strengthen the state for all of

Michigan's families. Click here to learn more about the top 6 takeaways from the Governor's FY 2017 state budget.

Click a tweet to tweet it out:

The #MiBudget @OneToughNerd proposed yesterday makes key investments to strengthen Michigan for all families --> www.mi.gov/MiBudget

--> @OneToughNerd's #MiBudget includes \$72 million a year for Detroit Public Schools. It is time to act now --> www.mi.gov/MiBudget

--> @onetoughnerd's significant investment in #Flint families is the right thing to do. #FlintFWD #MiBudget www.mi.gov/MiBudget

Subject: RE: Parking EPA

We only have 40 parking spaces available for staff working on the Flint Water Crisis and we obviously have more staff than that working in Flint. We are having issues on a daily basis with emergency staff parking in employee reserved parking spaces.

We can handle this however you see fit however if the all of the 40 designated spaces are full then they need to find parking elsewhere. Please let me know how you would like us to proceed.
